

3 Click [Next]

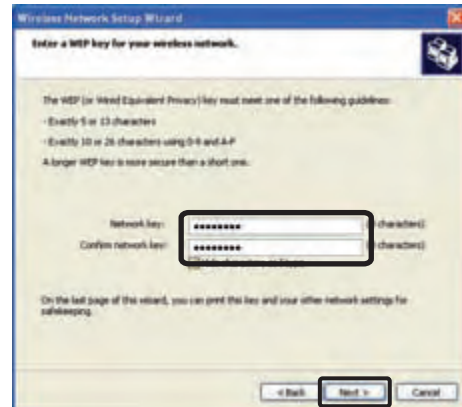

4 Type "Network name (SSID)" and choose the method to assign a network key, click [Next]

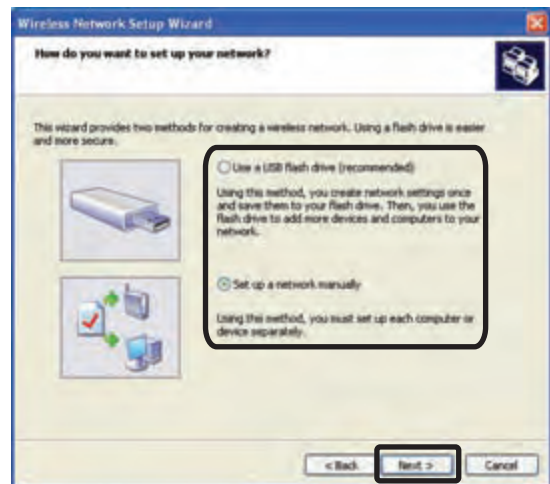

Tip

- If you choose "Automatically assign a network key", go to step 6.

5 Type the Network key and Confirm network key, click [Next].

6 If you want to save network settings to your flash disk, please choose "Use a USB flash drive" or "Set up a network manually", click [Next].

7 Click [Finish] and the notebook will connect to a wireless LAN.

Tip

Sometimes, setting up network is necessary.

Finish Setting Up Wireless LAN

1 Press **[Fn] + [F2]** or push wireless LAN switch to turn off wireless LAN function, and the wireless LAN LED will be off.
