- ◆ Switch input method when editing

## *Interface Icons*

Icon	Indication
	Signal strength
	Earphone in use
	Keypad locked
	Power indicator
	New message
	Unread alarm
	Unread schedule
	Missed calls indicator
	Ring for incoming call
	Ring before vibration for incoming call
	Ring + Vibration for incoming call
	Vibration for incoming call

	Silence for incoming call
	Music&FM background
	Alarm
	USB mode
	Connecting Bluetooth Earphones
	Bluetooth Open
	Bluetooth Transmission
	Push message
	T-flash Card inserted
	New MMS

## *Insert and Extract UIM Card*

- ◆ Power off the phone, remove the battery and other external power.
- ◆ Insert UIM card into UIM card slot in the phone, or remove UIM card out of slot, as shown in picture .

## *Remove and Install the Battery*

The attached Li-ion battery along with the phone can be used after unpacking. For the first three times, please use up the power and charge it fully for a new battery to perform well.

**Remove:** (1) Put finger on the top finger grip in back-cover, and then slide the back-cover of the phone down to release and remove. (2) Put finger on the finger grip, and then lift up the battery to remove the battery.

**Install:** (1) Replace the battery into the battery slot, to be noted that the lower end of the battery firstly inserted. (2) Put the back-cover of the phone flatly upon the body of phone. Push the back-cover of the phone to lock the cover into its place.

## *Charge the Battery*

- ◆ Plug out rubber away from the jack on the side of the handset and connect the lead from the charger to the socket on the side of the phone. (Note: The side with arrow should be upright while connecting).
- ◆ Connect the charger to a standard wall AC socket.
- ◆ When the charging animation on the screen stops, the charging is completed. The charging takes usually up to 2~3 hours. During charging, it is a normal phenomenon that the battery, phone and charger may get hot.
- ◆ After the completion of charging, disconnect the charger from the phone and AC socket.

## *Power on/ off Your Phone*

Please hold **End key** to power on/off the phone. The phone will automatically search for the network.

Besides sending and receiving calls in standby mode, you can also do:

- Press **OK key** to enter main **Menu**.
- Press **Left select key** to enter main Menu.
- Press **Right select key** to enter **Contacts** menu.
- Press **Up key** to enter **Shortcuts** menu.
- Press **Down key** to enter **Messages inbox** menu.
- Press **Left key** to enter **Neo Application** menu.

- Press **Right key** to **User Neo Navigation** menu.
- Press **Send key** to enter **Call history** list.
- Hold **\* key** to lock the keypad.
- Hold **# key** to switch the silent and general mode.

**Note:** To “press” key in this manual means to press the key and release it. To “hold” key means to keep pressing the key for two seconds or more.

## ***Make and Answer a Call***

- *Make a call*  
Enter the phone number  
Press **Send key** to make the call.  
Press **End key** to end the call.
- *Answer a call*  
Press **Send key** to answer the call.  
Press **End key** to end the call.

Stopwatch	Menu→Tools→Stopwatch	Stopwatch timing.

## *Phone Lock*

Phone lock could prevent your phone from illegal use. The default handset password is 1234. Please change it to your own phone password as soon as possible.

## *PIN Code and PUK Code*

**PIN Code:** PIN code could prevent your UIM card from illegal use. When PIN lock is on, you should enter the PIN code when opening the handset again.

**PUK Code:** Consecutive inputting wrong PIN code for three times can cause locking of UIM card. To unlock, you need PUK code.

**Note:** PIN code and PUK code may be offered together with the UIM card. If not, please contact with network operator. Please change default PIN code to your own as soon as possible.

## *Warning and Maintenance*

- Keep the phone out of the reach of little children. The phone may cause injury if used as a toy.
- Please use original accessories or accessories that are authorized by the manufacturer.
- Please keep the phone dry and store in shady and cool place.
- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from seeping into your phone.
- Do not drop or harshly treat the phone. Rough handling can break internal circuit boards.
- Do not connect the phone with other unauthorized peripheral equipments. Do not attempt to dismantle the mobile phone and battery by yourself.
- Power off your phone before you clean the phone. Please use clean fabric that is anti-static to clean your phone.
- As your mobile phone can produce electromagnetic field, do not use the phone near electrical appliances.
- Do not charge the mobile phone without battery.
- Beware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories.
- The user is cautioned that changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

## ***Warranty Terms***

The warranty does not apply to defects or errors in the product caused by:

- (a) Reasonable abrasion.
- (b) Misuse including mishandling, physical damage, improper installation, unauthorized disassembly of the product.
- (c) Water or any other liquid damage.
- (d) Any unauthorized repair or modification.
- (e) Power surges, lightning damage, fire, flood or other events outside ZTE's reasonable control.
- (f) Use of the product with any unauthorized third party products such as generic chargers.
- (g) Any other cause beyond the range of normal usage for products.

End user shall have no right to reject, return, or receive a refund for any product from ZTE under the above-mentioned situations.

This warranty is end user's sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

## ***Limitation of Liability***

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection

with using this product, whether or not ZTE had been advised, knew or should have known the possibility of such damages.

## ***FCC Regulations:***

- This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

- This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio

communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

## ***RF Exposure Information (SAR)***

This model phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency

bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 0.911 W/kg and when worn on the body, as described in this user guide, is 0.626 W/kg (Body-worn measurements differ among phone models, depending upon available enhancements and FCC requirements.)

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: Q78-X992.

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.5 cm from your body when the phone is switched on.
