

ZTE Blade C342

User Manual

Getting Started

Overview

Keys Explained

Key	Function
Power Key	Hold to turn on or off Silent, Vibrate, standard or Airplane mode, or to restart or power off. Press to switch your phone to Sleep mode. Press to wake up your phone.
Home Key	Press to return to the Home Screen from any application or screen. Hold to see Google search.
Menu Key	Press to get the options for the current screen. Hold to see recently used applications.
Back Key	Press to go to the previous screen.
Volume Keys	Press or hold to turn the volume up or down

Switching Your Phone On/Off

Make sure the SIM card is in your device and the battery is charged.

Hold Power Key to switch on your phone.

To switch it off, hold Power Key to get the phone options. Select Power off, and then tap OK.

Setting Up Your Phone for the First Time

When you first power on your phone after you purchase it or reset it to factory settings, you need to do some settings before using it.

Reset to Factory Settings: Tap Menu Key in the standby mode, then select SETTINGS > My device> Language &

input > Language to change the language you want to use, if needed.

Switching to Sleep Mode

To save battery power, Sleep Mode suspends your device to a low-power-consumption state while the display is off. Your device also goes into Sleep Mode by itself when the display is automatically turned off after a certain period of time.

You can start sleep mode by pressing the Power Key.

Waking Up Your Phone

1. Press Power Key to activate your screen display.
2. Long press  icon to unlock.

NOTE: If you have set an unlock pattern, PIN or password for your phone, you'll need to draw the pattern or enter the PIN/password to unlock your screen.

Touch Control

You can use finger gestures to control your phone. The controls on your touch-screen change dynamically depending on the tasks you're performing.

1. Tap the buttons, icons, or applications to select items or to open applications.
2. Flick the screen to scroll up, down, left or right.
3. Drag to move particular items across the screen.
4. Double-tap the screen or pinching two fingers on the screen apart/together to zoom in/out the screen.

NOTE: You can view the phone screen in portrait or landscape orientation simply by holding it upright or turning it on its side. Not all screens are viewable in landscape.

Home Screen

In the Home screen, besides the shortcut icon is displayed, you can also set your own wallpaper, add the widgets or application shortcuts you need, or remove them as you like.

Extended Home Screen

The Home Screen extends beyond the screen width, giving you loads more space to add more stuff. Simply slide your finger to the left or right.

Choosing Your Wallpaper

1. Press the Home Key to return to the Home Screen.
2. Tap the Menu Key and select CUSTOMIZE DESKTOP >Set idle wallpaper.
3. Choose the image or animation you want to use as the wallpaper. Some cropping may be needed for Gallery images.
4. Tap Set wallpaper.

Adding Items to Your Home Screen

1. Press Home Key > tap  to enter the main menu Application Program Interface
2. In the list of applications, touch and hold the icon until the main screen appears, move the application icon to the idle position, release the finger.

Removing Items from Your Home Screen

1. Press the Home Key to return to the Home Screen.
2. Tap and hold the item you want to delete until the **Remove** icon appears on the top of the screen.
3. Drag the item to the **Remove** icon and release your finger when the item turns red.

Status and Notification Icons

Here is what simple icons mean.

	USB connected		Missed call
	Airplane mode		Signal strength
	Battery charge		New message
	Meeting mode		Wi-Fi network
	Alarm set		Earphone insert
	Silent mode		Signal searching
	Bluetooth icon		USB debugging connected
	Data Conn off		New Wi-Fi network detected

Using the Notification Panel

Flick the status bar downwards from across the top of the screen to open the Notification Panel, where you can see your calendar events, new Messages and so on. Tap to open the shortcuts panel from notification panel. To hide the panel, tap on the bottom of the panel, drag up.

Open Recently-Used Applications

1. Press and hold the Menu Key from any screen. The phone will display the applications you used recently.
2. Tap the application you want to open.
3. Slide the application away to end it.

Getting Connected to the Internet

Your phone's impressive networking capabilities allow you to access the Internet or your corporate network with ease.

You can use default connection settings to connect to the Internet via your mobile network, or Wi-Fi.

The network connection can be enabled /disabled manually.

Press Home key > tap  > Settings > Network > Network Management > Choose a network to connect prior.

Adding a New Network Connection

To get connected via your mobile network you need a data plan with your service provider. Also if the networks settings are not pre-configured on your phone, please contact your provider to get the necessary information.

You can view settings by pressing Home key > tap  > Settings > Network > More > Mobile networks > choose Card 1 or Card 2 > Access Point Names.

Turning On Wi-Fi

Wi-Fi provides wireless Internet access over distances of up to about 300 feet.

1. Press Home key > tap  > Settings.
2. Click  next to the Wi-Fi menu to turn it on, click  you can turn off the Wi-Fi function.

Connecting to a Wi-Fi Network

1. Press Home key > tap  > Settings > Network > Wi-Fi.
2. When the Wi-Fi is on, the Wi-Fi access points, or “hotspots”, that your phone has detected are displayed with their names and security settings.
3. Tap an access point to connect to it.

NOTE: If security features are implemented, you'll need to enter a password.

Checking the Wi-Fi Network Status

You can check the Wi-Fi network by looking at the  icon in the status bar.

Tethering & portable hotspot

Share your phone's data connection via USB or as a portable Wi-Fi hotspot.

Enabling USB tethering

TIPS: The PC accesses the Internet via the phone's mobile network. Therefore, set up the networks connection correctly before you try to use the phone as a modem.

Plug the USB cable into your phone and tick the USB

tethering check box.

Disabling USB tethering

Drop the status bar, touch USB connected and clear the USB tethering check box.

You can also just pull out the USB cable.

Enabling the Wi-Fi Hotspot

You can use the phone as a portable WLAN router, to share your phone's internet connection with one or more PC or other devices.

NOTE:

When the portable Wi-Fi hotspot function is enabled, you cannot use your phone's applications to access the internet via its Wi-Fi connection.

You can configure the Wi-Fi hotspot as follows:

1. Press Home Key > tap  > Settings > Network > More > Tethering & portable hotspot > portable wi-fi hotspot, Click OFF to turn it on.
2. Tap **Set up** Wi-Fi hotspot to set up & manage portable Wi-Fi hotspot.

Disabling the Wi-Fi Hotspot

Press Home Key > tap  > Settings > Network > More > Tethering & portable hotspot > portable wi-fi hotspot and click ON you can turn off the Wi-Fi hotspot to turn it off.

Browsing the Internet

You can use your phone to get on the Internet via a network or Wi-Fi connection.

Press Home Key > tap  > Browser.

There are different ways to open web pages:

Tap the address bar to enter the website you want to browse. Then tap **go** on the touch keyboard.

Tap Menu Key > Bookmarks or History and select a bookmark or history to open.

Browsing Options

When you browse the Web, you can also do the following:

Press Menu Key > Exit to exit.

Press Menu Key > Bookmarks or History and select a bookmark or history to open.

Press Menu Key > Settings to configure browser settings.

Using Bookmarks

If you know the Web address, you can manually add bookmarks. To bookmark a web page, open it and tap Menu Key > Save to bookmarks. Give the bookmark a name and save it.

Editing a Bookmark

1. Open a Browser window.
2. Tap Menu Key > Bookmarks
3. Select an item you want to edit and hold on it until the shortcut menu pops up.
4. Select Edit bookmark.
5. Edit the Label or Address, and then tap OK to save it.

TIPS: Tap Menu Key > Advanced panel to use scientific calculation.

FCC ID

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2)

this device must accept any interference received, including interference that may cause undesired operation.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device complies with the RF specifications when the device is used near your ear or at a distance of 1.0 cm from your body. Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep your device 1.0 cm away from your body to meet the requirement earlier mentioned.

This device meets guidelines for exposure to radio waves. Your device is a low-power radio transmitter and receiver. As recommended by international guidelines, the device is designed not to exceed the limits for exposure to radio waves.

These guidelines were developed by the independent scientific organization International Commission on Non-Ionizing Radiation Protection (ICNIRP) and include safety measures designed to ensure safety for all users, regardless of age and health.

The Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a device. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level of the device when being operated can be well below the value. This is because the device is designed to use the minimum power required to reach the network.

The SAR limit adopted by USA and Canada is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The highest SAR value reported to the FCC and IC for this device type when tested for use at the ear is 0.910 W/kg,

and when properly worn on the body is 1.284 W/kg. North America edition is limited using channel 1-11. This limited operation can be only set by software and was done before the product down from the product line. All the products for North America marketing were embedded this limited before shipping. Customers have no way to choose the channel 12 & 13.

ZTE Uses the inner tool Web GUI to perform this limited operation and set method is as below: The US code to set in wifi advanced options will county code set to the United States, click "apply" button, and then back to the wifi basic page, Channel show for 1- 11. Limited by local law regulations, version for North America does not have region selection option."

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit

different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV
technician for help.
