Version: Release 1.0

Date: June 2007

Manual number:056584500373

Declaration

We, ZTE Corporation, declared that:

- The product is installed with battery separately in the box. The FCC ID label is placed on the mobile phone clearly visible to all persons at the time of purchase.
- The user is cautioned that changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation.
- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific

organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health. The exposure standard for wireless fixed phoned employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limits set by the FCC are 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting as its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the output power. The Highest SAR Values for this model phone when tested for use on the Right cheek were 1.15mW/g.

- Some electronic devices are susceptible to electromagnetic interference sent by phone if inadequately shielded. Please use phone at least 20cm or as far as you can from TV set, radio and other automated office equipment so as to avoid interference.
- For body-worn operation, this phone has been tested and meets FCC RF exposure guidelines when the handset is positioned a minimum of 15 mm from the body without any metal parts in the

vicinity of the handset.

- NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/ TV technician for help.

Explanation for Mobile Phone with/without UIM Card

There are two types of ZTE CDMA Mobile phone, one need UIM card inserted and another does not need. Sections or functions in this manual are for the phone with UIM card. If your phone could be used without UIM card, please pay attention to the following items:

1. You can use your phone without inserting the UIM card.
2. Some functions are only available with UIM and won't display, such as,
 - You can save the new contact only in Phone, not in UIM.
 - You can save the new message only in Phone, not in UIM.
 - The message in Inbox can not be moved to UIM.
 - There is no PIN Lock function in Security Setting.

1 General Information

1.1 Welcome

Thank you for choosing C350 CDMA 1X Digital Mobile Phone.

To guarantee the mobile phone always in its best condition, please read this manual carefully and keep it for future use.

The pictures, symbols and contents in this manual are just for your reference. They might not be completely identical with your phone. Please subject to the real object. ZTE operates a policy of continuous development and reserves the right to update and modify the technical specifications in this document at any time without prior notice.

1.2 Security

- If your mobile phone is lost or stolen, please report to your service provider or agencies of banning the use of your lost UIM card and phone, which will protect you from economic losses resulted from unauthorized use.

You need to provide the phone's ESN number labeled. You can see ESN number after removing the battery. Please keep ESN number for future use.

- To protect your mobile phone from illegal use, please take the

security measures as follows:

- Set PIN code of the UIM card.
- Take it with you as you can.

1.3 Safety Warnings

To the Owner

- Some electronic devices are susceptible to electromagnetic interference sent by mobile phone if inadequately shielded, such as electronic system of vehicles. Please consult the manufacturer on the device before using the phone if necessary.
- Operating of mobile phone may interfere with medical devices like hearing aides and pacemakers. Please always keep the mobile phone more than 20 centimeters away from such medical devices when the phone is powered on. Do not carry the mobile phone in the breast pocket. Power the mobile phone off if necessary. Consult a physician or the manufacturer on the medical device before using the phone.
- Be aware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed, because even if your phone is in standby mode, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.
- Pay attention to traffic safety. Do not use your mobile phone while

driving. Park before making or answering a call.

- Store the phone out of the reach of little children. The phone may cause injury if used as a toy.

Mobile Phone

- Please use original accessories or accessories that are authorized by the manufacturer. Using any unauthorized accessories may affect your mobile phone's performance, and violate related national regulations about telecom terminals, or even endanger your body
- If you want to clean your phone, please use clean fabric that is a bit wet or anti-static. Do not use harsh chemical cleaning solvents or strong detergents to clean it. Turn off your phone before you clean it.
- As your mobile phone can produce electromagnetic field, do not place it near magnetic items such as computer disks.
- Using the phone near electrical appliances such as TV, telephone, radio and personal computer can cause interference, which affects the function of the phone.
- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from leaking into your phone.
- Do not drop, knock or harshly treat your phone. Rough handling

can break internal circuit boards.

- Do not connect the phone with other unauthorized peripheral equipments.
- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Do not charge the mobile phone without battery.
- On occasion of emergent calling, keep your phone in status of power on and in area of service. On the condition of standby, press the key to enter emergency phone number, and then press

Send key  to make a phone call.

Battery Using

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- Never use any charger or battery damaged or worn out.
- Return the wear-out battery to the provider or put it in the appointed recycle place. Do not put it in familial rubbish.

Warning: If the battery is broken, keep away from content. If it taints your skin, wash your skin with abundant fresh water and ask doctor for help if necessary.

Safety and General Using in Vehicles

- Before making or answering a call, you should pay attention to the local laws about using wireless mobile phones and take them into account in practical use.
- Safety airbag, brake, speed control system and oil eject system shouldn't be affected by wireless transmitting. If you do meet problems above, please contact your automobile provider.
- Please power off your mobile phone when refueling your automobile, and so do the place where duplex wireless equipments are banned. Don't put your phone together with flammable or explosive items, as inner spark may cause fire.

In Aircraft

- Follow the restrictions in aircraft. Wireless devices can cause interference in aircraft.
- Please power off your mobile phone before taking off till landing. In order to protect airplane's communication system from interference, it is never allowed to use mobile phone when it is in flight. Using mobile phone before the plane taking off should get aircrew's permission according to safety regulations.

1.4 Limit Warranty

The warranty does not apply to defects or errors in the product caused by:

-
- (a) Reasonable abrasion.
 - (b) Misuse including mishandling, physical damage, improper installation, unauthorized disassembly of the product.
 - (c) Water or any other liquid damage.
 - (d) Any unauthorized repair or modification.
 - (e) Power surges, lightning damage, fire, flood or other events outside ZTE's reasonable control.
 - (f) Use of the product with any unauthorized third party products such as generic chargers.
 - (g) Any other cause beyond the range of normal usage for products.

End User shall have no right to reject, return, or receive a refund for any product from ZTE under the above-mentioned situations.

This warranty is end user's sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

1.5 Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or

in connection with using this product, whether or not ZTE had been advised, knew or should have known the possibility of such damages.

All Confidential

	Earphone
	Silence All
	Alarm
	Power indicator

2.3 Technical Parameters

Handset	
Type	ZTE C350
Dimensions	(Width×Height×Thickness) 46mm×90mm×16mm
Weight	About 75g(Battery Included)
Battery	
Continuous standby time	About 80h~160h (Subject to Network)
Continuous talk time	About 2h~4h (Subject to Network)

Note: Please refer to the real phone for other relative parameters of the battery and charger.

2.4 Battery

The attached Li-ion battery along with the phone can be used after unpacking. For the first three times, please use up the power and charge it fully for a new battery to perform well.

2.4.1 Remove and Installation of Battery

- ◆ Remove: (1) Press and push the back-cover of the phone down to release and remove it off the phone. (2) Put finger on the side finger grips, and then lift up the battery from the finger grips to remove the battery.

- ◆ Installation: (1) Replace the battery into the battery slot, to be noted that the lower end of the battery firstly inserted. (2) Put the back-cover of the phone flatly upon the body of phone. Direct the back cover towards the locking catches on the both sides of the phone and push the back-cover of the phone upward to lock the cover into its place.

2.4.2 Charging the Battery

- ◆ Plug out rubber away (turn 180° as shown in the picture) from the jack on the bottom of the handset and connect the lead from

the charger to the socket on the bottom of the phone. (Note: The side with arrow should be upright while connecting).

- ◆ Connect the charger to a standard wall AC socket.
- ◆ Meanwhile, the charging indicator in up-right corner of the display flops cyclically, indicating the charging is going. In power-off mode while charging, the display only shows the charge indicator. If the battery is completely flat in storage or used up, it may take for a while before the charging indicator appears on the display or any calls can be made.
- ◆ When the charging indicator on the screen stops flopping, the charging is completed. The charging takes usually up to 2~3 hours. In the process of charging, it is a normal phenomenon that the battery, phone and charger get into hot accordingly.
- ◆ After the completion of charging, disconnect the charger from the phone and AC socket.

Note:

- When it is in charge, place the phone on condition of good ventilation and temperature between $-5^{\circ}\text{C} \sim +45^{\circ}\text{C}$. Ensure to use the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.
- When the phone is automatically switched off or indicates the alarm information of power shortage, please charge the battery in time.

-
- The duration time of the standby status or conversation of the phone is based on ideal working environment. In practice, the working time of battery varies with network condition, working environment and application methods.

2.5 Connecting to the Network

2.5.1 UIM Card

Before using the phone, please insert effective UIM (User Identity Module) card into the phone.

All the information related to the network connection is recorded in the metal plane area of UIM card together with the information you stored in your Contacts in the UIM card. The UIM card can be inserted into any CDMA phone to use (new phone automatically reads UIM card).

Please do not touch the metal plane area of the card to avoid missing and damaging information in the card and put UIM card in place far away from electricity and magnetism.

Warning: Please power off the phone before taking out UIM card. It is prohibited to insert or taking out UIM card in the condition of connecting with external power.

2.5.2 Insertion and Extraction of UIM Card

Power off the phone, remove the battery and other external power.

Insert UIM card into UIM card slot in the phone, or pull out UIM card out

of slot, as shown in picture hereinafter.

2.5.3 Power on/off Phone

Press and hold **End key** to power on/off the phone. The phone will check whether UIM card inserted well or not. And then follow the prompt indication on the display:

Enter PIN—Key in PIN code of UIM card if it is set.

Searching—Search appropriate network connected.

2.5.4 PIN Code

To set PIN code (personal identification number) is to avoid the illegal usage of UIM card.

To input PIN code of UIM card and press **OK key** to confirm to start on using phone. If inputting wrong PIN three times continuously, UIM card will be locked by network.

Note: The network provider offers you PIN code (four to eight digits). You should change PIN code as soon as possible for security.

To set PIN code, see “7.4 Security Settings”.

2.5.5 Connecting the Network

After powering on and inputting PIN code, the phone automatically searches the network available and in state of standby mode.

Besides sending and receiving calls, you can also do:

- ◆ Press **Left select key** to enter **Main** menu.
- ◆ Press **Right select key** to enter **Names** menu.
- ◆ Hold *** key** to enable/disable vibration mode.
- ◆ Hold **Up key** to set the phone in **Silence All**.
- ◆ Press **Up key** to enter **Messages** menu.
- ◆ Press **Left key** to enter **Toolkit** menu.
- ◆ Press **Right key** to enter **Games** menu.
- ◆ Press **Send key** to enter **All Calls** list.
- ◆ Press **OK Key** to enter **MobileShop**

3 Basic Operations

3.1 Making a Call

Please ensure that you are in the place where the signal can be received. Examine network signal strength icon  on the screen.

The more the indication bars, the stronger the intensity of receiving signal is. If there is no bar, please move to the place where the intensity of receiving signal is better. Sometimes, you only need to change the direction.

◆ **Making a National Call**

Press **Number key** to key in phone number, and add area code when making a long distance call (no need to add area code when dialing local number in some area). Press **Send key** to call out. Press **End key** to end the call and conversation.

◆ **Making an International Call**

Enter the country code, area code (without the leading 0) and the complete telephone number you want to dial, press **Send key** to call out.

Before the country code, hold **0 key** to enter the international prefix "+" (the character "+" replaces the international access code) or key in international prefix e.g. "00" of international call directly.

Country code + Area code + Telephone number

0086 755 26770000

A diagram showing the components of a phone number. The text "Country code + Area code + Telephone number" is at the top. Below it, three numbers are listed: "0086", "755", and "26770000". Each number is underlined. Lines connect the text to the numbers: a line from "Country code" to "0086", a line from "Area code" to "755", and a line from "Telephone number" to "26770000".

◆ **Making Recent Calls**

All calls you recently dialed, received or missed are saved in your phone. All numbers are grouped as Missed Calls, Incoming Calls and Outgoing Calls. When the list is full, the oldest number will be erased automatically when new record is coming.

You can check the list as follows:

- ✧ In standby mode, press **Send key** to view All Recent Calls.
- ✧ The number listed in can be directly dialed by pressing **Send key**.

◆ **Making Pause Calls**

You can make use of pause call to dial an extension or voice service call.

E.g. Key in phone number, press **OK key** to select "P" on the display (character "P" added accordingly), and then key in number afterwards. Press **Send key** to dial the first number, when connected, press **Send key** again to dial the second number automatically. "P" can

be used for not once only.

3.2 Answering a Call

When a call is incoming in standby mode, the phone will offer corresponding ringer or vibration to prompt according to your settings. With the number already saved in Names, the phone also shows the name of caller meanwhile.

- Press **Send key**  to answer an incoming call.
- Press **End key**  to end a call and the call duration is temporarily displayed.

See “7.3 Call Setting” or refer to other ways of answering calls for your option as follows.

3.2.1 Handset Auto Answer

You can set handset to answer an incoming call automatically.

- Select **Menu**→ **Settings**→ **Call Setting**→**Auto Answer**
- Select **On/Off**, and press **OK key**. The phone can be connected in 5 seconds.

3.2.2 Setting Any Key Answer

- Select **Menu**→ **Settings**→ **Call Setting**→ **One-Touch**.
- Select **On/Off**, and press **OK key**.

An incoming call can be answered by pressing any key except **End key**, **Left /Right select key**.

3.2.4 Incoming Call Silence

- When a call is coming, press **Right select key** to select **Mute** the ringer tone.
- This function silences the current incoming call only. The phone will ring normally as next call coming.

3.3 In Conversation

3.3.1 Silence in Conversation

During conversation, you can press left select key to select **Option (Names, Messages or Record)** or press right select key to choose **Mute** displayed. Select **Mute** to let the other party temporarily not hear your voice; Select **Unmute** back to normal. You can also enter **Contacts, Messages or Record** during a conversation.

3.3.2 Adjusting Volume in Conversation

Press **Left/Right key** to adjust volume of Earpiece during a call.

3.3.3 Selecting Options in Conversation

During a call, press **Left/Right select key** to select options of **Option (Names, Messages or record), Mute/Unmute**, etc.

- ◇ Select **Mute/Unmute** to let the other party temporarily can or can not hear your voice;
- ◇ Select **Option** for selection in Menu, such as **Names, Messages or record**, with no worry about the ending of

conversation.

3.4 Menu Functions

- ◆ Main Menu Function:
 - i. In standby mode, press **Left select key** to enter main Menu. Scroll **Up/Down** or **Left/Right key** through the menu and select functions according to the prompt on the screen.
 - ii. If the menu contains submenus and further submenus, select options and submenu you want according to the prompt on the screen.
 - iii. Press **OK key** or **Right Select Key** to set or return to the previous menu. Press **End key** to exit to standby mode.

- ◆ Bottom Menu Function:

If options are displayed on the bottom of the screen, press **Left/Right select key** to select. Press **OK key** or **Right select key** to set or exit.

The functions of phone are mainly grouped in main **Menu: Names, Messages, Call History, Settings, ToolKit and VAS.**

Please refer to the text hereinafter in this manual in detail.

4 Names

You can save contacts in phone and UIM card. Each contact in phone's memory has three phone numbers, home number, mobile number and work number, and each contact in UIM card only has one phone number. Select **Option** → **Other options** → **Capacity** to view memory of phone and UIM card.

4.1 Viewing Records

Select **Menu** → **Names**. You can view the corresponding records in all list. Scroll to the name you are finding, and press **OK Key**, you can see the details of the name.

Note: When there is no storage record in Contacts, it will indicate "No Item".

4.2 Finding Records

You can search for a name in **Names** in pop-up window by choosing:

- ◆ **In All**

-
1. Select **Menu** → **Names**.
 2. Press **Up/Down key** to scroll through the corresponding name(s) and records in the list. Scroll to the record you are finding, and press **OK key** to view the details.

◆ **Search**

1. Select **Menu** → **Names**.
2. Select one contact record and choose **Search** in **Option**. You can key in the first characters of the name you are searching for to view contact directly in All List.
3. Press **Up/Down key** to scroll through the corresponding name(s) and records in the list. Scroll to the name you want, and press **OK key** to view the details or select **Option**.

◆ **In Standby Mode:**

To quickly find phone number in **Names** in standby mode, press **Right select key** to scroll to the name you want.

All the contacts will be list by the letter of the name. If no contact in the list, "No Item" will be displayed.

4.3 Adding New Entry

1. Select **Menu** → **Names**.
2. Select one contact record and choose **Add New Entry** in **Option**.
3. Select the position of would-be added information: **Phone, UIM**
4. If you choose in **Phone**, press **Up/Down key** to write the

information of Name/Group/Home Number/Mobile Number/work Number, if you choose in **UIM**, press **Up/Down key** to write the information of **Name/number**, See "10 Text Input " more instructions for writing text and character.

5. After the completion of writing, press **OK key** to save the contact.
6. Scroll to the just-added phone number to reedit, press **OK key** or select **Option**. Further operation can be executed, such as:
 - ◇ **Edit:** Edit the number.
 - ◇ **Delete:** Delete the number.
 - ◇ **Make a call:** Make a call to this number.
