Version: Release 1.0

Date: July 2008

Manual number:

Declaration

We, ZTE Corporation, declared that:

- The product is installed with battery separately in the box. The FCC ID label is placed on the mobile phone clearly visible to all persons at the time of purchase.
- The user is cautioned that changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation.
- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications
- Commission (FCC) of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific

organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health. The exposure standard for wireless fixed phoned employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limits set by the FCC are 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting as its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the output power.

The Highest SAR Values for this model phone when tested for use on the Head was 0.397W/Kg, on body was 0.157w/Kg

1 General Information

1.1 Welcome

Thank you for choosing C362 CDMA 1X Digital Mobile Phone.

To guarantee the mobile phone always in its best condition, please read this manual carefully and keep it for future use.

The pictures, symbols and contents in this manual are just for your reference. They might not be completely identical with your phone. Please subject to the real object. ZTE operates a policy of continuous development and reserves the right to update and modify the technical specifications in this document at any time without prior notice.

1.2 Security

- If your mobile phone is lost or stolen, please report to your service provider or agencies of banning the use of your lost UIM card and phone, which will protect you from economic losses resulted from unauthorized use.

You need to provide the phone's ESN number labeled. You can see ESN number after removing the battery. Please keep ESN number for future use.

- To protect your mobile phone from illegal use, please take the security measures as follows:
 - Set PIN code of the UIM card.

-
- Take it with you as you can.

1.3 Safety Warnings

To the Owner

- Some electronic devices are susceptible to electromagnetic interference sent by mobile phone if inadequately shielded, such as electronic system of vehicles. Please consult the manufacturer on the device before using the phone if necessary.
- Operating of mobile phone may interfere with medical devices like hearing aides and pacemakers. Please always keep the mobile phone more than 20 centimeters away from such medical devices when the phone is powered on. Do not carry the mobile phone in the breast pocket. Power the mobile phone off if necessary. Consult a physician or the manufacturer on the medical device before using the phone.
- Be aware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed, because even if your phone is in standby mode, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.
- Pay attention to traffic safety. Do not use your mobile phone while driving. Park before making or answering a call.
- Store the phone out of the reach of little children. The phone may

cause injury if used as a toy.

Mobile Phone

- Please use original accessories or accessories that are authorized by the manufacturer. Using any unauthorized accessories may affect your mobile phone's performance, and violate related national regulations about telecom terminals, or even endanger your body
- If you want to clean your phone, please use clean fabric that is a bit wet or anti-static. Do not use harsh chemical cleaning solvents or strong detergents to clean it. Turn off your phone before you clean it.
- As your mobile phone can produce electromagnetic field, do not place it near magnetic items such as computer disks.
- Using the phone near electrical appliances such as TV, telephone, radio and personal computer can cause interference, which affects the function of the phone.
- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from leaking into your phone.
- Do not drop, knock or harshly treat your phone. Rough handling can break internal circuit boards.
- Do not connect the phone with other unauthorized peripheral

equipments.

- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Do not charge the mobile phone without battery.
- On occasion of emergent calling, keep your phone in status of power on and in area of service. On the condition of standby, press the key to enter emergency phone number, and then press

Send key  to make a phone call.

Battery Using

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- Never use any charger or battery damaged or worn out.
- Return the wear-out battery to the provider or put it in the appointed recycle place. Do not put it in familial rubbish.

Warning: If the battery is broken, keep away from content. If it taints your skin, wash your skin with abundant fresh water and ask doctor for help if necessary.

Safety and General Using in Vehicles

- Before making or answering a call, you should pay attention to the local laws about using wireless mobile phones and take them

into account in practical use.

- Safety airbag, brake, speed control system and oil eject system shouldn't be affected by wireless transmitting. If you do meet problems above, please contact your automobile provider.
- Please power off your mobile phone when refueling your automobile, and so do the place where duplex wireless equipments are banned. Don't put your phone together with flammable or explosive items, as inner spark may cause fire.

In Aircraft

- Follow the restrictions in aircraft. Wireless devices can cause interference in aircraft.
- Please power off your mobile phone before taking on till landing. In order to protect airplane's communication system from interference, it is never allowed to use mobile phone when it is in flight. Using mobile phone before the plane taking off should get aircrew's permission according to safety regulations.

1.4 Limit Warranty

The warranty does not apply to defects or errors in the product caused by:

- (a) Reasonable abrasion.
- (b) Misuse including mishandling, physical damage, improper installation, unauthorized disassembly of the product.

(c) Water or any other liquid damage.

(d) Any unauthorized repair or modification.

(e) Power surges, lightning damage, fire, flood or other events outside ZTE's reasonable control.

(f) Use of the product with any unauthorized third party products such as generic chargers.

(g) Any other cause beyond the range of normal usage for products.

End User shall have no right to reject, return, or receive a refund for any product from ZTE under the above-mentioned situations.

This warranty is end user's sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

1.5 Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using this product, whether or not ZTE had been advised, knew or should have known the possibility of such damages.

2.3 Technical Parameters

Handset		
Type	ZTE C362	
Dimensions	(Width×Height×Thickness) 47mm*108.2mm*15mm	
Weight	About 85g(Battery Included)	
Battery		
Continuous standby time	About 80h~240h (Subject to Network)	
Continuous talk time	About 2h~4h (Subject to Network)	

Note: Please refer to the real phone for other relative parameters of the battery and charger.

2.4 Battery

The attached Li-ion battery along with the phone can be used after unpacking. For the first three times, please use up the power and charge it fully for a new battery to perform well.

2.4.1 Remove and Installation of Battery

- ◆ Remove: (1) Press and push the back-cover of the phone down to release and remove it off the phone. (2) Put finger on the side finger grips, and then lift up the battery from the finger grips to remove the battery.

- ◆ Installation: (1) Replace the battery into the battery slot, to be noted that the lower end of the battery firstly inserted. (2) Put the back-cover of the phone flatly upon the body of phone. Direct the back cover towards the locking catches on the both sides of the phone and push the back-cover of the phone upward to lock the cover into its place.

2.4.2 Charging the Battery

-
- ◆ Plug out rubber away (turn 180° as shown in the picture) from the jack on the bottom of the handset and connect the lead from the charger to the socket on the bottom of the phone. Connect the charger to a standard wall AC socket.
 - ◆ Meanwhile, the charging indicator in up-right corner of the display flops cyclically, indicating the charging is going. In power-off mode while charging, the display only shows the charge indicator. If the battery is completely flat in storage or used up, it may take for a while before the charging indicator appears on the display or any calls can be made.
 - ◆ When the charging indicator on the screen stops flopping, the charging is completed. The charging takes usually up to 2~3 hours. In the process of charging, it is a normal phenomenon that the battery, phone and charger get into hot accordingly.
 - ◆ After the completion of charging, disconnect the charger from the phone and AC socket.

Note:

- When it is in charge, place the phone on condition of good ventilation and temperature between -5 ~ +45 . Ensure to use the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.

-
- When the phone is automatically switched off or indicates the alarm information of power shortage, please charge the battery in time.
 - The duration time of the standby status or conversation of the phone is based on ideal working environment. In practice, the working time of battery varies with network condition, working environment and application methods.

2.5 Memory Card

Your phone allows you to use a microSD memory card to expand the phone's available memory space. This digital card allows you to easily exchange images, music and voice data quickly between SD compatible devices.

Note: Maximum Memory Card capacity supported is 2 GB. Your phone may work with a microSD of greater capacity, but even if so, it may not be able to access beyond the 2 GB limit.

2.5.1 Insert the microSD Memory Card

1. Open the rubber MicroSD access door and rotate it 90 degree.
2. Firmly insert the microSD card into the slot until it clicks into place.
3. Close the rubber memory card access door.

2.5.2 Remove the MicroSD memory Card

1. Open the rubber microSD access door and rotate it 90

degrees.

2. Push the memory card downwards to release it from the slot.
3. Pull the memory card completely out of the microSD slot on the handset.
4. Close the rubber memory card access door.

Note: Do not remove the memory card while reading or writing to the card. Doing so may cause data corruption on the card or phone. If possible, insert and remove the memory card while the phone is powered off.

2.6 Connecting to the Network

2.6.1 Power on/off Phone

Press and hold **End key** to power on/off the phone. The phone will check whether UIM card inserted well or not. And then follow the prompt indication on the display:

Searching——Search appropriate network connected.

2.6.2 Connecting the Network

After powering on, the phone automatically searches the network available and in state of standby mode.

Besides sending and receiving calls, you can also do:

- ◆ Press **Left select key/OK key** to enter main **Menu**.
- ◆ Press **Right select key** to enter **All list in Names**.
- ◆ Hold *** key** to lock the keypad.

-
- ◆ Hold **Up key** to power on/off LED Light.
 - ◆ Hold **Down key** to enable/disable the phone in Silence.
 - ◆ Hold **# key** to enable/disable vibration mode.
 - ◆ Press **Up key** to enter **Camera** menu.
 - ◆ Press **Down key** to enter **Messages** menu.
 - ◆ Press **Left key** to enter **MobileShop**.
 - ◆ Press **Right key** to enter **WAP** menu.
 - ◆ Press **Send key** to enter **Dialed** list.

3 Basic Operations

3.1 Make a Call

Please ensure that you are in the place where the signal can be received. Examine network signal strength icon  on the screen.

The more the indication bars, the stronger the intensity of receiving signal is. If there is no bar, please move to the place where the intensity of receiving signal is better. Sometimes, you only need to change the direction.

◆ **Make a National Call**

Press **Number key** to key in phone number, and add area code when making a long distance call (no need to add area code when dialing local number in some area). Press **Send key** to call out. Press **End key** to end the call and conversation.

◆ **Make an International Call**

Enter the country code, area code (without the leading 0) and the complete telephone number you want to dial, press **Send key** to call out.

Before the country code, hold **0 key** to enter the international prefix “+” (the character “+” replaces the international access

code) or key in international prefix e.g. "00" of international call directly.

Country code + Area code + Telephone number

0086 755 26770000

◆ **Make Recent Calls**

All calls you recently dialed, received or missed are saved in your phone. All numbers are grouped as Missed Calls, Received Calls and Dialed Calls. When the list is full, the oldest number will be erased automatically when new record is coming.

You can check the list as follows:

- ✧ In standby mode, press **Send key** to view Dialed Calls.
- ✧ The number listed in can be directly dialed by pressing **Send key**.

◆ **Make Pause Calls**

You can make use of pause call to dial an extension or voice service call.

E.g. Key in phone number, press **OK key** to select "P" on the display (character "P" added accordingly), and then key in number afterwards. Press **Send key** to dial the first number, when connected, press **Send key** again to dial the second number automatically. "P" can be used for not once only.

3.2 Answer a Call

When a call is incoming in standby mode, the phone will offer corresponding ringer or vibration to prompt according to your Setting. With the number already saved in Names, the phone also shows the name of caller meanwhile.

- Press **Send key**  to answer an incoming call.
- Press **End key**  to end a call and the call duration is temporarily displayed.

See “7.3 Call Setting” or refer to other ways of answering calls for your option as follows.

3.2.1 Set Any Key Answer

- Select **Menu**→ **Settings**→ **Call** → **Anykey Answer**.
- Select **On/Off**, and press **OK key**.

An incoming call can be answered by pressing any key except **End key**, **Left /Right select key** when you select **On**.

3.2.2 Incoming Call Silence

- When a call is coming, press **Right select key** to **Mute** the ringer tone.
- This function silences the current incoming call only. The phone will ring normally as next call coming.

3.3 In Conversation

3.3.1 Adjust Volume in Conversation

Press **Left/Right key** to adjust volume of Earpiece during a call.

3.3.2 Select Options in Conversation

During a call, press **Left/Right select key** to select options of **Option (Names, Messages, Record), Mute/Unmute, etc.**

- ✧ Select **Mute** to let other party temporarily can not hear your voice, select **Unmute** back to normal.
- ✧ Select **Option** for selection in Menu, such as **Names, Messages, and Record** with no worry about the ending of conversation.
- ✧ Press **OK key** to open speaker phone, and press **OK key** again back to normal.

3.4 Menu Functions

- ◆ Main Menu Function:
 - ii. In standby mode, press **Left select key/OK key** to enter main Menu. Scroll **Up/Down** or **Left/Right key** through the menu and select functions according to the prompt on the screen.
 - iii. If the menu contains submenus and further submenus, select options and submenu you want according to the prompt on the screen.
 - iv. Press **OK key** or **Right select key** to set or return to the previous

menu. Press **End key** to exit to standby mode.

◆ **Bottom Menu Function:**

If options are displayed on the bottom of the screen, press **Left/Right select key** to select. Press **OK key** or **Right select key** to set or exit.

The functions of phone are mainly grouped in main **Menu**: **Call History**, **Names**, **Multimedia**, **Messages**, **BREW**, **WAP**, **Settings**, **Camera**, and **Organiser**.

Please refer to the text hereinafter in this manual in detail.

4 Names

You can save Names in phone and UIM card. Each contact in phone's memory has three phone numbers, home number, mobile number and work number, and each contact in UIM card only has one phone number.

4.1 Add Name

4.1.1 Add New Entry

1. Select **Menu**→ **Names**→ **Add Name**→ **Name**.

2. Press **Up/Down key** to relative item,

- ✧ **Name:** Add the persons name. See "13 Text Input" more instructions for writing text and character.
- ✧ **Home Number/Mobile Number/Office Number:** write the call number by keying the Number key.
- ✧ **Default Number:** Press **Left/Right key** to set the **Home Number, Mobile Number** or **Office Number** as default number.
- ✧ **Group:** Press **Left/Right key** to set the names group as **No Group, Family, Relatives, Friends, Business, Colleagues, School, Club, or VIP**.

-
- ◇ **Photos:** Press **OK key** and you can choose the photos from **Phone(Photo, WAP or BREW)** or **Card**.
 - ◇ **Call Alert:** Press **OK key** to set specific ring for the calling of the names.
 - ◇ **Sms Alert:** Press **OK key** to set specific ring for the SMS of the names.

3. After the completion of writing, press **Left select key** to save the contact.

4. Scroll to just input phone number, press **OK key** or **Left select key**, Further operation can be executed, such as:

- ◇ **Edit:** Edit the names.
- ◇ **Send message:** Send message to this number.
- ◇ **Make a call:** Make a call to the default number of this names.
- ◇ **Send Name:** Send SMS of this number information to others.
- ◇ **Delete:** Delete the number.
- ◇ **Set to speed dial:** Assign a speed dial number to the phone number.
- ◇ **Default Number:** Set the number as the default number.
- ◇ **Add to Black List:** Add the number to black list.

Note: In standby mode, key in phone number, press **Left select key** to **Save** or **Send Message**.

If you save the same number again, the phone prompts to remind

you this number is already exist.

4.1.2 Edit Existing Name

1. Select **Menu** → **Names** → **Add Name** → **Existing Name**.
2. Press **Left/Right key** to different Groups, press **Up/Down key** to the record you want edit.
3. Press **OK key** and scroll to the phone number (**Home Number**, **Mobile Number** or **Office Number**) you want edit, press **OK key/Left select key**. You can enter into the phone number you select. Press **Right select key** to erase the characters, input the characters you want input (See 13. Text input for more information). And press **Up/Down key** to move the cursor you can make other changes of the names. Select **Save** to save the modification.

4.2 Find Records

◆ In All List

1. Select **Menu** → **Names** → **All List**.
2. Press **Up/Down key** to scroll though the corresponding name(s) and records in the list, or press the characters of the names.
3. Scroll to the record you are finding,
 - ◇ Select **Option**, you can **Add New Entry**, **View**, **Edit**, **Send Message**, **Make a Call**, **Delete**, **Delete All**, or **Send Name**.
 - ◇ Press **OK key**, you can see the detail phone numbers.

◆ **Search**

1. Select **Menu** → **Names** → **Find**.
2. Press **Up/Down Key** to select **Find Name**, **Find Number** or **Find Group**.
3. Input the name or number you want find, or select the group you want find and press **OK key**.
4. Press **Up/Down key** to scroll though the corresponding name(s) and records in the list. Scroll to the name you want, and press **OK key** to view the details or select **Option**.

All the Names will be list by the letter of the name. If no contact in the list, "No Record" will be displayed.

Note: In standby mode, press **Right select key** to enter **All** in **Names** directly.

4.3 Select Group

There are nine groups, no group, family, relatives, friends, business, colleagues, school, club and VIP preset in your phone, you can rename them and set ringer for the different group.

1. Select **Menu** → **Names** → **Find Groups**.
2. Scroll to the group you want to edit, **No group**, **Family**, **Relatives**, **Friends**, **Business**, **Colleagues**, **School**, **Club**, or **VIP**. Press **Left select key** or **OK key**. Further operation can be executed, such as:

- ◇ **View Members**: view the all members of the group.

-
- ◇ **Set Ring Tone:** Set the personal call ringer for the group. You can select ring from the list set already in phone or download ring by yourself.
 - ◇ **Set Msg Tone:** Set the personal message ringer for the group. Press Up/Down key to select the SMS ring.
 - ◇ **Edit Title:** press **OK key** and you can rename the name of group.

Note: For the group of **No Group**, you can only **View Members**.

4.4 Set Speed Dial

1. Select **Menu**→ **Names**→ **Speed Dials**.
2. Select one **Empty** slot in list and press **Left select key** or **OK key**.
