ZTE C362+

CDMA 1X Digital Mobile Phone

User Manual

Version: Release 1.0

Date: Feb. 2008

Manual number:

Declaration

We, ZTE Corporation, declared that:

▮ The product is installed with battery separately in the box. The FCC ID label is placed on the mobile phone clearly visible to all persons at the time of purchase.

▮ The user is cautioned that changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

▮ This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

▮ Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.

▮ Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The

standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health. The exposure standard for wireless fixed phoned employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limits set by the FCC are 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting as its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the output power. The Highest SAR Values for this model phone when tested for use on the Left cheek were 0.996 mW/g.

▌ Some electronic devices are susceptible to electromagnetic interference sent by phone if inadequately shielded. Please use phone at least 20cm or as far as you can from TV set, radio and other automated office equipement so as to avoid interference.

▌ For body-worn operation, this phone has been tested and meets FCC RF exposure guidelines when the handset is positioned a minimum of 15 mm from the body without any metal parts in the vicinity of the handset.

▌ NOTE:This equipment has been tested and found to comply with

4

the limits for a Class B digital device, pursuant to part 15 of the
FCC Rules. These limits are designed to provide reasonable
protection against harmful interference in a residential installation.
This equipment generates, uses and can radiate radio frequency
energy and, if not installed and used in accordance with the
instructions, may cause harmful interference to radio
communications. However, there is no guarantee that interference
will not occur in a particular installation. If this equipment does
cause harmful interference to radio or television reception, which
can be determined by turning the equipment off and on, the user is
encouraged to try to correct the interference by one or more of the
following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from
that to which the receiver is connected.
—Consult the dealer or an experienced radio/ TV technician for
help.

Explanation for

Mobile Phone with/without UIM Card

There are two types of ZTE CDMA Mobile phone, one need UIM card inserted and another does not need.　Sections or functions in this manual are for the phone with UIM card. If your phone could be used without UIM card, please pay attention to the following items:

1.　You can use your phone without inserting the UIM card.

2.　Some functions are only available with UIM and won't display, such as,

- You can save the new contact only in Phone, not in UIM.
- You can save the new message only in Phone, not in UIM.
- The message in Inbox can not be moved to UIM.
- There is no PIN Lock function in Security Setting.

1 General Information

1.1 Welcome

Thank you for choosing C362+ CDMA 1X Digital Mobile Phone.

To guarantee the mobile phone always in its best condition, please read this manual carefully and keep it for future use.

The pictures, symbols and contents in this manual are just for your reference. They might not be completely identical with your phone. Please subject to the real object. ZTE operates a policy of continuous development and reserves the right to update and modify the technical specifications in this document at any time without prior notice.

1.2 Security

■   If your mobile phone is lost or stolen, please report to your service provider or agencies of banning the use of your lost UIM card and phone, which will protect you from economic losses resulted from unauthorized use.

You need to provide the phone's ESN number labeled. You can see ESN number after removing the battery. Please keep ESN number for future use.

■   To protect your mobile phone from illegal use, please take the security measures as follows:

➢   Set PIN code of the UIM card.

> ➢ Take it with you as you can.

1.3 Safety Warnings

To the Owner

- ■ Some electronic devices are susceptible to electromagnetic interference sent by mobile phone if inadequately shielded, such as electronic system of vehicles. Please consult the manufacturer on the device before using the phone if necessary.

- ■ Operating of mobile phone may interfere with medical devices like hearing aides and pacemakers. Please always keep the mobile phone more than 20 centimeters away from such medical devices when the phone is powered on. Do not carry the mobile phone in the breast pocket. Power the mobile phone off if necessary. Consult a physician or the manufacturer on the medical device before using the phone.

- ■ Be aware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed, because even if your phone is in standby mode, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.

- ■ Pay attention to traffic safety. Do not use your mobile phone while driving. Park before making or answering a call.

- ■ Store the phone out of the reach of little children. The phone may

cause injury if used as a toy.

Mobile Phone

- Please use original accessories or accessories that are authorized by the manufacturer. Using any unauthorized accessories may affect your mobile phone's performance, and violate related national regulations about telecom terminals, or even endanger your body
- If you want to clean your phone, please use clean fabric that is a bit wet or anti-static. Do not use harsh chemical cleaning solvents or strong detergents to clean it. Turn off your phone before you clean it.
- As your mobile phone can produce electromagnetic field, do not place it near magnetic items such as computer disks.
- Using the phone near electrical appliances such as TV, telephone, radio and personal computer can cause interference, which affects the function of the phone.
- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from leaking into your phone.
- Do not drop, knock or harshly treat your phone. Rough handling can break internal circuit boards.
- Do not connect the phone with other unauthorized peripheral

equipments.

- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Do not charge the mobile phone without battery.
- On occasion of emergent calling, keep your phone in status of power on and in area of service. On the condition of standby, press the key to enter emergency phone number, and then press **Send key** to make a phone call.

Battery Using

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- Never use any charger or battery damaged or worn out.
- Return the wear-out battery to the provider or put it in the appointed recycle place. Do not put it in familial rubbish.

  Warning: If the battery is broken, keep away from content. If it taints your skin, wash your skin with abundant fresh water and ask doctor for help if necessary.

Safety and General Using in Vehicles

- Before making or answering a call, you should pay attention to the local laws about using wireless mobile phones and take them

into account in practical use.

- Safety airbag, brake, speed control system and oil eject system shouldn't be affected by wireless transmitting. If you do meet problems above, please contact your automobile provider.

- Please power off your mobile phone when refueling your automobile, and so do the place where duplex wireless equipments are banned. Don't put your phone together with flammable or explosive items, as inner spark may cause fire.

In Aircraft

- Follow the restrictions in aircraft. Wireless devices can cause interference in aircraft.

- Please power off your mobile phone before taking on till landing. In order to protect airplane's communication system from interference, it is never allowed to use mobile phone when it is in flight. Using mobile phone before the plane taking off should get aircrew's permission according to safety regulations.

1.4 Limit Warranty

The warranty does not apply to defects or errors in the product caused by:

(a) Reasonable abrasion.

(b) Misuse including mishandling, physical damage, improper installation, unauthorized disassembly of the product.

5

(c) Water or any other liquid damage.

(d) Any unauthorized repair or modification.

(e) Power surges, lightning damage, fire, flood or other events outside ZTE's reasonable control.

(f) Use of the product with any unauthorized third party products such as generic chargers.

(g) Any other cause beyond the range of normal usage for products.

End User shall have no right to reject, return, or receive a refund for any product from ZTE under the above-mentioned situations.

This warranty is end user's sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

1.5 Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using this product, whether or not ZTE had been advised, knew or should have known the possibility of such damages.

Handset	
Type	ZTE C362+
Dimensions	Width×Height×Thickness 46.5mm*107.5mm*13.8mm
Weight	About 80g(Battery Included)
Battery	
Continuous standby time	About 80h 240h (Subject to Network)
Continuous talk time	About 2h 4h (Subject to Network)

Note: Please refer to the real phone for other relative parameters

of the battery and charger.

11

2.4 Battery

The attached Li-ion battery along with the phone can be used after unpacking. For the first three times, please use up the power and charge it fully for a new battery to perform well.

2.4.1 Remove and Installation of Battery

◆ Remove (1) Press and push the back-cover of the phone down to release and remove it off the phone.   (2) Put finger on the side finger grips, and then lift up the battery from the finger grips to remove the battery.
◆ Installation   (1) Replace the battery into the battery slot, to be noted that the lower end of the battery firstly inserted. (2) Put the back-cover of the phone flatly upon the body of phone. Direct the back cover towards the locking catches on the both sides of the phone and push the back-cover of the phone upward to lock the cover into its place.
2.4.2 Charging the Battery
◆ Plug out rubber away (turn 180° as shown in the picture) from the jack on the bottom of the handset and connect the lead from the charger to the socket on the bottom of the phone. (Note: The side with arrow should be upright while connecting).

◆ Connect the charger to a standard wall AC socket.

13

◆ Meanwhile, the charging indicator in up-right corner of the display flops cyclically, indicating the charging is going. In power-off mode while charging, the display only shows the charge indicator. If the battery is completely flat in storage or used up, it may take for a while before the charging indicator appears on the display or any calls can be made.

◆ When the charging indicator on the screen stops flopping, the charging is completed. The charging takes usually up to 2 3 hours. In the process of charging, it is a normal phenomenon that the battery, phone and charger get into hot accordingly.

◆ After the completion of charging, disconnect the charger from the phone and AC socket.

Note

■ When it is in charge, place the phone on condition of good ventilation and temperature between -5 45 . Ensure to use the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.

■ When the phone is automatically switched off or indicates the alarm information of power shortage, please charge the battery in time.

■ The duration time of the standby status or conversation of the phone is based on ideal working environment. In practice, the working time of battery varies with network condition, working

14

environment and application methods.

2.5 Connecting to the Network

2.5.1 UIM Card

Before using the phone, please insert effective UIM (User Identity Module) card into the phone.

All the information related to the network connection is recorded in the metal plane area of UIM card together with the information you stored in your Contacts in the UIM card. The UIM card can be inserted into any CDMA phone to use (new phone automatically reads UIM card).

Please do not touch the metal plane area of the card to avoid missing and damaging information in the card and put UIM card in place far away from electricity and magnetism.

Warning   Please power off the phone before taking out UIM card. It is prohibited to insert or taking out UIM card in the condition of connecting with external power.

2.5.2 Insertion and Extraction of UIM Card

Power off the phone, remove the battery and other external power.

Insert UIM card into UIM card slot in the phone   or pull out UIM card out of slot, as shown in picture hereinafter.

2.5.3 Power on/off Phone

Press and hold **End key** to power on/off the phone.The phone will check whether UIM card inserted well or not. And then follow the prompt indication on the display:

Enter PIN——Key in PIN code of UIM card if it is set.

Searching——Search appropriate network connected.

2.5.4 PIN Code

To set PIN code (personal identification number) is to avoid the illegal usage of UIM card.

To input PIN code of UIM card and press **OK key** to confirm to start on using phone. If inputting wrong PIN three times continuously, UIM card will be locked by network.

Note The network provider offers you PIN code (four to eight digits). You should change PIN code as soon as possible for security.

To set PIN code, see "6.3 Security Setting".

2.5.5 Connecting the Network

After powering on and inputting PIN code, the phone automatically searches the network available and in state of standby mode.

Besides sending and receiving calls, you can also do:

◆ Press **Left select key** to enter main **Menu**.

◆ Press **Right select key** to enter **Find**.

◆ Hold *** key** to lock the keypad.

◆ Hold **Up key** to power on/off LED Light.

◆ Hold **Down key** to enable/disable the phone in Silence.

◆ Hold **# key** to enable/disable vibration mode.

◆ Press **Up key** to enter **Messages** menu.

◆ Press **Down key** to enter **Ring Tone**.

◆ Press **Left key** to enter **Camera**.

◆ Press **Right key** to enter **Media Display**.

◆ Press **Send key** to enter **Dialed** list.

17

3 Basic Operations

3.1 Making a Call

Please ensure that you are in the place where the signal can be received. Examine network signal strength icon ▼ᵢᵢₗₗ on the screen.

The more the indication bars, the stronger the intensity of receiving signal is. If there is no bar, please move to the place where the intensity of receiving signal is better. Sometimes, you only need to change the direction.

◆ **Making a National Call**

Press **Number key** to key in phone number, and add area code when making a long distance call (no need to add area code when dialing local number in some area). Press **Send key** to call out. Press **End key** to end the call and conversation.

◆ **Making an International Call**

Enter the country code, area code (without the leading 0) and the complete telephone number you want to dial, press **Send key** to call out.

Before the country code, hold **0 key** to enter the international prefix "+" (the character "+" replaces the international access

18

code) or key in international prefix e.g. "00" of international call directly.

Country code + Area code + Telephone number

<u>**0086**</u>   <u>**755**</u>   <u>**26770000**</u>

◆   **Making Recent Calls**

All calls you recently dialed, received or missed are saved in your phone. All numbers are grouped as Missed Calls, Received Calls and Dialed Calls. When the list is full, the oldest number will be erased automatically when new record is coming.

You can check the list as follows:

✧   In standby mode, press **Send key** to view Dialed Calls.

✧   The number listed in can be directly dialed by pressing **Send key**.

◆   **Making Pause Calls**

You can make use of pause call to dial an extention or voice service call.

E.g. Key in phone number, press **OK key** to select "**P**" on the display (character "P" added accordingly), and then key in number afterwards. Press **Send key** to dial the first number, when connected, press **Send key** again to dial the second number automatically. "P" can be used for not once only.

19

3.2 Answering a Call

When a call is incoming in standby mode, the phone will offer corresponding ringer or vibration to prompt according to your Setting. With the number already saved in Names, the phone also shows the name of caller meanwhile.

• Press **Send key** to answer an incoming call.

 • Press **End key** to end a call and the call duration is temporarily displayed.

See "6.3 Call Setting" or refer to other ways of answering calls for your option as follows.

3.2.1 Setting Any Key Answer

• Select **Menu→ Settings→ Call → Anykey Answer**.

• Select **On/Off**, and press **OK key**.

An incoming call can be answered by pressing any key except **End key**, **Left /Right select key** when you select **On**.

3.2.2 Reject the Call by Sending SMS

When a call is incoming is standby mode, you can press Left select key to select SMSReject. The phone will send a SMS to the caller without receveing the call. The message contents could be edit in **Messages → Msg Settings → General → Edit SMS on Call Reject.**

20

3.2.3 Incoming Call Silence

　　• When a call is coming, press **Right select key** to select **Mute**
the ringer tone.

　　• This function silences the current incoming call only. The phone
will ring normally as next call coming.

3.3 In Conversation

3.3.1 Adjusting Volume in Conversation

Press **Left/Right key** to adjust volume of Earpiece during a call.

3.3.2 Selecting Options in Conversation

During a call, press **Left/Right select key** to select options of
Option (**Names**, **Message, Record**), **Mute/Unmute**,etc.

　　✧　Select **Mute** to let other party temporarily can not hear your
　　　　voice, select **Unmute** back to normal.

　　✧　Select **Option** for selection in Menu, such as **Contacts,
　　　　Message**, **Record** with no worry about the ending of
　　　　conversation.

　　✧　Press **OK key** to open speaker phone, and press **OK key**
　　　　again back to normal.

3.4 Menu Functions

◆　Main Menu Function:

i.　In standby mode, press **Left select key/OK key** to enter main

Menu. Scroll **Up/Down** or **Left/Right key** through the menu and select functions according to the prompt on the screen.

ii. If the menu contains submenus and further submenus, select options and submenu you want according to the prompt on the screen.

iii. Press **OK key** or **Right Select Key** to set or return to the previous menu. Press **End key** to exit to standby mode.

◆ Bottom Menu Function:

If options are displayed on the bottom of the screen, press **Left/Right select key** to select. Press **OK key** or **Right select key** to set or exit.

The functions of phone are mainly grouped in main **Menu**: **Organiser**, **Profiles**, **Call History**, **Messages**, **Names**, **Settings**, **U-MAX**, **Multimedia,** and **Games**.

Please refer to the text hereinafter in this manual in detail.

4 Names

You can save contacts in phone and UIM card. Each contact in phone's memory has three phone numbers home number, mobile number and work number, and each contact in UIM card only has one phone number.

4.1 Add Name

4.1.1 Add New Entry

1. Select **Menu→ Names→ Add Name→ Name**.
2. Select the save postion you want same, **Phone** or **UIM**.
3. Press **Up/Down key** to relative item,

✧ **Name**: Add the persons name. See "13 Text Input" more instructions for wirting text and character.
