## Declaration

We, ZTE Corporation, declared that:

- The product is installed with battery separately in the box. The FCC ID label is placed on the mobile phone clearly visible to all persons at the time of purchase.
- The user is cautioned that changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
  - (1) This device may not cause harmful interference, and
  - (2) this device must accept any interference received, including interference that may cause undesired operation.
- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications
- Commission (FCC) of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific

---

organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health. The exposure standard for wireless fixed phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limits set by the FCC are 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the output power.

# 1 General Information

## 1.1 Welcome

Thank you for choosing ZTE-C F285 CDMA 1X Digital Mobile Phone.

To guarantee the mobile phone always in its best condition, please read this manual carefully and keep it for future use.

The pictures, symbols and contents in this manual are just for your reference. They might not be completely identical with your phone. Please subject to the real object. ZTE operates a policy of continuous development and reserves the right to update and modify the technical specifications in this document at any time without prior notice.

## 1.2 Security

- If your mobile phone is lost or stolen, please report to your service provider or agencies of block your lost UIM card and phone, which will protect you from economic losses resulted from unauthorized use.

You need to provide the phone's ESN number labeled. You can see ESN number after removing the battery. Please keep ESN number for future use.

- To protect your mobile phone from illegal use, please take the

---

security measures as follows:

- Set PIN code of the UIM card.
- Take it with you as you can.

### 1.3 Safety Warnings

#### To the Owner

- Some electronic devices are susceptible to electromagnetic interference sent by mobile phone if inadequately shielded, such as electronic system of vehicles. Please consult the manufacturer on the device before using the phone if necessary.
- Operating of mobile phone may interfere with medical devices like hearing aides and pacemakers. Please always keep the mobile phone more than 20 centimeters away from such medical devices when the phone is powered on. Consult a physician or the manufacturer on the medical device before using the phone.
- Beware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed, because even if your phone is in standby mode, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.
- Pay attention to traffic safety. Do not use your mobile phone while driving. Park before making or answering a call.
- Store the phone out of the reach of little children. The phone may

---

cause injury if used as a toy.

**Mobile Phone**

- Please use original accessories or accessories that are authorized by the manufacturer. Using any unauthorized accessories may affect your mobile phone's performance, or even endanger your body
- If you want to clean your phone, please use clean fabric that is a bit wet or anti-static. Do not use harsh chemical cleaning solvents or strong detergents to clean it. Turn off your phone before you clean it.
- As your mobile phone can produce electromagnetic field, do not place it near magnetic items such as computer disks.
- Using the phone near electrical appliances such as TV, telephone, radio and personal computer can cause interference, which affects the function of the phone.
- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from leaking into your phone.
- Do not drop or harshly treat your phone. Rough handling can break internal circuit boards.
- Do not connect the phone with other unauthorized peripheral equipments.
- Do not attempt to dismantle the mobile phone and battery by

---

yourself. Non-expert handling of the devices may damage them.

- Do not charge the mobile phone without battery.
- On emergency calling, phone must be powered on and in area of service. On the condition of standby, enter emergency phone

number, and then press **Send key**  to make a phone call.

#### **Battery**

- Do not short-circuit the battery, as this can cause excessive heating and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- Never use any charger or battery which is damaged or worn out.
- Return the wear-out battery to the provider or trash it.

**Warning:** If the battery is broken, do not touch with bare skin. If it taints your skin, wash your skin with water and ask doctor for help if necessary.

#### **Safety and General Using in Vehicles**

- Before making or answering a call, you should pay attention to the local laws about using wireless mobile phones and take them into account in practical use.
- Safety airbag, brake, speed control system and oil eject system shouldn't be affected by wireless transmitting. If you do meet problems above, please contact your automobile provider.

- 
- Please power off your mobile phone when refueling your automobile, and so do the place where duplex wireless equipments are banned. Don't put your phone together with flammable or explosive items, as inner spark may cause fire.

#### **In Aircraft**

- Follow the restrictions in aircraft. Wireless devices can cause interference in aircraft.
- Please power off your mobile phone before taking off till landing. In order to protect airplane's communication system from interference, it is never allowed to use mobile phone when it is in flight. Using mobile phone before the plane taking off should get aircrew's permission according to safety regulations.

#### **1.4 Limited Warranty**

The warranty does not apply to defects or errors in the product caused by:

- (a) Reasonable abrasion.
- (b) Misuse including mishandling, physical damage, improper installation, unauthorized disassembly of the product.
- (c) Water or any other liquid damage.
- (d) Any unauthorized repair or modification.
- (e) Power surges, lightning damage, fire, flood or other events outside ZTE's reasonable control.

---

(f) Use of the product with any unauthorized third party products such as generic chargers.

(g) Any other cause beyond the range of normal usage for products.

End User shall have no right to reject, return, or receive a refund for any product from ZTE under the above-mentioned situations.

This warranty is end user's sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

### **1.5 Limitation of Liability**

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using this product, whether or not ZTE had been advised, knew or should have known the possibility of such damages.

---

## 2 Know Your Phone

### 2.1 Keypad

Key	Tip	Function Description
	Send key	<ul style="list-style-type: none"> <li>◆ Make or answer a call.</li> <li>◆ Press <b>Send key</b> in standby mode to enter <b>recent call list</b>.</li> <li>◆ Press <b>Send key</b> two times directly to redial the last number.</li> </ul>
	End key	<ul style="list-style-type: none"> <li>◆ End an active call or reject a call.</li> <li>◆ Power on/power off.</li> <li>◆ Exit from any interface to standby mode.</li> </ul>

	Right select key (Clear key)	<ul style="list-style-type: none"> <li>◆ Enter Find menu in standby mode.</li> <li>◆ Switch to the options of right bottom submenu.</li> <li>◆ Erase character(s) while editing.</li> <li>◆ Cancel operation, exit to previous window.</li> </ul>
	OK key	<ul style="list-style-type: none"> <li>◆ Confirm the commands and options selected.</li> <li>◆ Confirm the character chosen while character inputting.</li> </ul>

		<ul style="list-style-type: none"> <li>◆ In standby mode, press the key to enter My Menu.</li> </ul>
	Up/Down key (Scroll key)	<ul style="list-style-type: none"> <li>◆ Scroll the cursor up and down.</li> <li>◆ Used as selection key up and down for keying in commands and selecting options shown on the display.</li> <li>◆ In standby mode, hold <b>Up key</b> to write new message; Press <b>Down key</b> to enter Ring Tone menu.</li> <li>◆ Press <b>Up key</b> to enter Messages menu.</li> <li>◆ Used as direction key in games.</li> </ul>
	Left/Right key (Scroll key)	<ul style="list-style-type: none"> <li>◆ Scroll the cursor left and right.</li> <li>◆ Used as selection key to scroll cursor left and right for keying in commands and selecting options shown on the display.</li> <li>◆ In standby mode, press <b>Left key</b> to enter R Mobile World menu, press <b>Right key</b> to view Profiles.</li> <li>◆ Adjust volume in conversation.</li> <li>◆ Used as direction key in games.</li> </ul>
	0~9 Number	<ul style="list-style-type: none"> <li>◆ Key in numbers or characters.</li> </ul>

	key	<ul style="list-style-type: none"> <li>◆ Make a Speed Dial call.</li> </ul>
 	*key, #key	<p><b># key:</b></p> <ul style="list-style-type: none"> <li>◆ Hold <b># key</b> in standby mode to lock phone's keypad.</li> <li>◆ Press <b># key</b> to select text mode when edit text.</li> </ul> <p><b>* key:</b></p> <ul style="list-style-type: none"> <li>◆ Hold <b>* key</b> in standby mode to enable/disable vibration.</li> <li>◆ Press <b>* key</b> once to enter Symbols mode when edit text.</li> </ul>

**Note:** To “press” the key in this manual means to press the key and release it. To “hold” the key means to keep pressing the key for two seconds or more.

## 2.2 Instruction of Interface Icon

Icon	Indication
	Signal strength
	CDMA 1X system
	Incoming call or calling

	Keypad locked
	Roaming
	New message
	Voice mail
	Vibration
	Vira+Ring
	Mute
	Alarm
	Earphone
	Power indicator

### 2.3 Technical Parameters

<b>Handset</b>	
Type	ZTE-C F285
Dimensions	47.5mm × 99mm × 14.8mm
Weight	About 88g(Battery Included)
<b>Battery</b>	
Continuous standby time	About 180~200H (Subject to Network)
Continuous talk time	About 200minute (Subject to Network)

**Note:** Please refer to the real phone for other relative parameters of the battery and charger.

---

## 2.4 Battery

The attached Li-ion battery along with the phone can be used after unpacking. For the first three times, please use up the power and charge it fully for a new battery to perform well.

### 2.4.1 Remove and Install the Battery

- ◆ Remove: (1) Press and push the back-cover of the phone down to release and remove it off the phone. (2) Put outward from the bottom to remove the battery as indicated in the figure.

- ◆ Install: (1) Replace the battery into the battery slot, to be noted that the upper end of the battery firstly inserted. (2) Slide the cover back as shown below.

#### 2.4.2 Charge the Battery

- ◆ As shown in the picture, connect the lead of the charger to the socket at the side of the handset. (Note: The side with arrow should be upright while connecting).
- ◆ Connect the charger to a standard wall AC socket.
- ◆ The charging indicator lights up after connecting. In power-off mode while charging, the display only shows the charge indicator. If the battery is completely used up, it may take for a

---

while before the charging indicator appears on the display.

- ◆ When the charging animation on the screen stops, the charging is completed. The charging takes usually up to 2~3 hours. During charging, it is a normal phenomenon that the battery, phone and charger may get hot.
- ◆ After the completion of charging, disconnect the charger from the phone and AC socket.

**Note:**

- When it is in charge, place the phone on condition of good ventilation and temperature between  $-30^{\circ}\text{C} \sim +60^{\circ}\text{C}$ . Ensure to use the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.
- When the phone is automatically switched off or indicates the alarm for low battery, please recharge the battery soon.
- Talk time or standby time of the phone is based on ideal working environment. In practice, the talk time and standby time of battery varies with network condition, working environment and application methods.

## **2.5 Connect to the Network**

### **2.5.1 UIM Card**

Before using the phone, please insert effective UIM (Subscriber Identity Module) card into the phone.

---

All the information related to the network connection is recorded in the metal plane area of UIM card together with the information you stored in your Contacts in the UIM card. The UIM card can be inserted into any CDMA phone to use (new phone automatically reads UIM card).

Please do not touch the metal plane area of the card to avoid missing and damaging information in the card and put UIM card in place far away from electricity and magnetism.

**Warning:** Please power off the phone before taking out UIM card. It is prohibited to insert or taking out UIM card in the condition of connecting with external power.

### 2.5.2 Insert and Remove UIM Card

- ◆ Power off the phone, remove the battery and other external power.
- ◆ Insert UIM card into UIM card slot in the phone.
- ◆ Pull out UIM card out of slot, as shown in picture hereinafter.

### 2.5.3 Power on/off Phone

Press and hold **End key** to power on/off the phone. The phone will check whether UIM card inserted or not. And then follow the indication on the display:

**Enter PIN**—Key in PIN code of UIM card if it is set.

---

**Searching**—Search appropriate network connected.

#### 2.5.4 PIN Code

To set PIN code (personal identification number) is to avoid the illegal usage of UIM card.

To input PIN code of UIM card and press **OK key** to confirm to start on using phone. If wrong PIN is entered **several** times continuously, then UIM card will be locked by network.

**Note:** The network provider offers you PIN code (four to eight digits). You should change PIN code as soon as possible for security.

**Different UIM card has different limits for wrong PIN code times**

To set PIN code, see “9.4 Security Settings”.

#### 2.5.5 Connect the Network

After powering on and inputting PIN code, the phone automatically searches the network available and in state of standby mode.

Besides sending and receiving calls, you can also do:

- ◆ Press **Left select key** to enter main **Menu**.
- ◆ Press **Right select key** to enter **Contacts** menu.

- 
- ◆ Press **OK key** to enter **Voice Services**.
  - ◆ Hold **# key** to enable/disable vibration.
  - ◆ Hold **Up key** to enter **General** menu.
  - ◆ Press **Up key** to enter **Profile** menu.
  - ◆ Press **Down key** to active **Radio** function.
  - ◆ Press **Left key** to enter **Schedule** menu.
  - ◆ Press **Right key** to enter **Messages** menu.
  - ◆ Press **Send key** to view All recent calls.

ALL CONFIDENTIAL

---

## 3 Basic Operations

### 3.1 Make a Call

Please ensure that you are in good service coverage area.

Examine network signal strength icon  on the screen.

More bars indicate good signal or network coverage. If there is no bar, please move to good network coverage. Sometimes, you only need to change the direction.

◆ **Make a National Call**

Press **Number key** to key in phone number, and add area code when making a long distance call (no need to add area code when dialing local number in some area). Press **Send key** to call out. Press **End key** to end the call.

◆ **Make an International Call**

Enter the country code, area code (without the leading 0) and the complete telephone number you want to dial, press **Send key** to call out.

Before the country code, key in international prefix e.g. "00" of

---

international call directly.

**Inter prefix + Country code + Area code + Telephone number**

00 86 755 26770000

◆ **Make Recent Calls**

All calls you recently dialed, received or missed are saved in your phone. All numbers are grouped as Missed Calls, Received Calls and Dialed Calls. When the list is full, the oldest number will be erased automatically replaced by a new record.

You can check the list as follows:

- ◇ In standby mode, press **Send key** to view All recent calls.
- ◇ The number listed in can be directly dialed by pressing **Send key**.

◆ **Make Pause Calls**

You can make use of pause call to dial an extension or voice service call.

E.g. Key in phone number, press **OK key** to select "P" on the display (character "P" added accordingly), and then key in number afterwards. Press **Send key** to dial the first number, when connected, press **Send key** again to dial the second number automatically.

### **3.2 Answer a Call**

For incoming in standby mode, the phone will offer corresponding

---

ringer or vibration to prompt according to your settings. With the number already saved in Names, the phone also shows the name of caller.

- Press **Send key**  to answer an incoming call.

- Press **End key**  to end a call and the call duration is temporarily displayed.

See "7 Profiles", "9 Settings" or refer to other ways of answering calls for your option as follows.

### 3.2.1 Headset Autoanswer

You can set headset to answer an incoming call automatically.

- Select **Menu** → **Profiles** → **Headset** → **Profile Edit** → **Auto**

**Answer.**

- Select option and press **Left select key** or **OK key**.

- **Off:** No headset autoanswer.

- **After 5 Seconds:** The headset of the phone can be connected in 5 seconds automatically.

- **After 10 Seconds:** The headset of the phone can be connected in 10 seconds automatically.

### 3.2.2 Set Any Key Answer

- Select **Menu** → **Settings** → **Call** → **Anykey Answer**.

- Select **On/Off**, and press **OK key**.

---

An incoming call can be answered by pressing any key except **End key, Left /Right select key**.

### 3.2.3 Incoming Call Silence

- For an incoming call, press **Right select key** to make the ringer tone in **Mute/Unmute**.
- This function silences the current incoming call only. The phone will ring normally for next incoming call.

## 3.3 In Conversation

### 3.3.1 Silence in Conversation

During conversation, you can select **Option (Contacts or Messages)** or **Mute** displayed. Select **Mute** to let the other party temporarily not hear your voice; Select **Unmute** back to normal. You can also enter **Contacts** or **Messages** during a conversation.

### 3.3.2 Adjust Volume in Conversation

Press **Left/Right key** to adjust volume of Earpiece during a call.

### 3.3.3 Select Options in Conversation

During a call, press **Left/Right select key** and **OK key** to select options like **Mute/Unmute, Option (Contacts or Messages)**, etc.

- ◇ Select **Mute/Unmute** to temporarily mute/unmute my conversation.
- ◇ Select **Option** for selection in Menu, such as **Contacts** or

---

**Messages**, with no worry about ending the conversation.

### 3.4 Menu Functions

◆ Main Menu Function:

- i. In standby mode, press **Left select key** to enter main Menu. Scroll **Up/Down** or **Left/Right key** through the menu and select functions according to the prompt on the screen.
- ii. If the menu contains submenus and further submenus, select options and submenu you want according to the prompt on the screen.
- iii. Press **Right select key** to set or return to the previous menu. Press **End key** to exit to standby mode.

◆ Bottom Menu Function:

If options are displayed on the bottom of the screen, press **Left/Right select key** and then **OK key** to select. Press **OK key** or **Right select key** to set or exit.

The functions of phone are mainly grouped in main **Menu: Calls, Contacts, Messages, Radio, Settings, My Services, Tools, Games & Apps**, and **VBytes**.

Please refer to the text hereinafter in this manual in detail.

**Note:** The picture used in this manual are with small icons.

---

## 4 Contacts

You can save contacts in phone and UIM card. Each contact in phone's memory has three phone numbers. Select **Memory Status** to view memory of phone and UIM card.

### 4.1 Find Records

You can search for a name or number in **Contacts** in pop-up window by choosing:

#### ◆ **Contacts**

1. Select **Menu** → **Contacts**.
2. Select **All List**. You can key in the first characters of the name you are searching for to view contact directly in **All List**.
3. Press **Up/Down key** to scroll through the corresponding name(s) and records in the list. Scroll to the name you want, and press **OK key** to view the details or select Option.

#### ◆ **Find**

1. Select **Menu** → **Contacts**.
2. Select **Find**. You can key in total or any part of the the

---

name/number/group you are searching for in Find Name/Find Number/Find Group. And then press **Left select key** to find.

3. Press **Up/Down key** to scroll through the corresponding name(s) and records in the list. Scroll to the name you want, and press **OK key** to view the details or select Option.

All the contacts will be list by the letter of the name. If there are no contacts in the list, "No Record" will be displayed.

## 4.2 Add New Record

### ■ Save to Phone or UIM card:

1. Select **Menu**→**Contacts**→**Add Name**.
2. Select would-be added information: **Name**, **Existing Name**.
3. Press **OK key** and choose the saving position of Phone or UIM. And then add Name/Group/Home Number/Mobile Number/Office Number/Default Number/Call Alert/Sms Alert and set Call Alert/Sms Alert of the contact. See "13. Text Input" instructions for writing text and character.
4. After the completion of writing, press **Left select key** to save the contact.
5. Scroll to the just-added phone number to reedit, press **OK key** or select **Option**. Further operation can be executed, such as:
  - ◇ **Edit**: Edit the number.
  - ◇ **Send Message**: Send message to this number.

- 
- ◇ **Make a call:** Make a call to this number.
  - ◇ **Send Name:** Send the name and number of the contact as a message.
  - ◇ **Erase:** Delete the number.
