Starting up

Inserting UIM card

You can obtain an UIM card from your service provider when you sign on as a subscriber.

Caution:

- Do not bend or scratch your UIM card. Keep the card away from electricity and magnetism.
- Don't touch the metal surface of the UIM card in case that information in the card may be lost or destroyed.
- Make sure to disconnect the charger and other accessories from your phone and remove the battery before inserting and removing your UIM card.

1. Press and hold the **End Key** to power off the phone.
2. Slide down the battery cover and remove the battery.
3. Insert the UIM card into the card holder, with the metal contacts facing downward and the cut corner in right direction. Make sure it is pushed all the way to the end as shown below.

4. Push the battery until it clicks into position.
5. Place the battery cover onto the back of your phone.

Notes:

- ▶ The charger and other accessories should be disconnected from your phone before you insert or remove the UIM card.

Removing UIM card

1. Press and hold the **End Key** to power off the phone.

2. Remove the cover.
3. Remove the battery. See **Removing battery**.
4. Remove UIM card gently from the card holder.

Installing battery

Notes:

- The phone automatically switches off if the battery voltage is too low.
- When not using the battery for a long period, remove it from the phone and store it in a cool dry place.

1. Press and hold **End Key** to turn off the phone.
2. Remove the cover.

3. Insert the battery carefully with the contacts located against the gold springs.
4. Push down the battery until it clicks into place.
5. Place the battery cover onto the back of your phone.

Caution:

Do NOT force the cover down by pressing on it. This will damage the cover.

Removing battery

1. Power off your phone.
2. Remove the cover.
3. Lift the battery away from the phone.

Inserting memory card

The external memory card gives your phone a very large memory capacity. This allows you to save multimedia data, including images, photos, MP3 audio files, and ring tones. You can also use this memory

card to store any other files.

Tips:

Your phone can support a memory card with capacity up to 16GB.

1. Open the memory card slot rubber.
2. Firmly insert the memory card into the slot until it clicks into place.
3. Close the memory card slot rubber.

Caution:

Only use ZTE approved memory cards for this device. Any use of unapproved memory cards may cause loss of data or damage to your phone.

Removing memory card

1. Open the memory card slot rubber.
2. Push the memory card to release it from the slot.
3. Pull the memory card completely out of the memory slot on the phone.
4. Close the memory card slot rubber.

Tips:

- Do not remove the memory card while reading or writing to the card. Doing so may cause data corruption on the card or phone. If possible, insert and remove the memory card while the phone is powered off.
- You'd better use your phone to format your memory card. If you want to format it on your PC, please select FAT Formatting type. Otherwise it might cause the memory card not identified by your phone.

Connecting accessories

You can connect your headset to your phone to answer the call and listen to the music. You can also strap handset charm on your phone.

Connect the headset to your phone

Insert the headset to the **Headset port**.

Connect the data cable to your phone

Plug the smaller end of the cable into the **USB connection jack** at one side of the phone, and the bigger

end into the USB port of the computer.

Strap handset charm on your phone

Thread a strap and tighten it.

Power on/off

Notes:

Do not power on your phone if wireless phone use is unapproved, or when it may cause interference or danger.

1. Press and hold **End Key** to turn the phone on.

Tips:

- ▶ When being asked, enter your PIN (Personal Identification Number) code or phone code.
- ▶ The PIN code is the password provided by your network service provider. You need this password to use the UIM card.
- ▶ When the entered PIN code or phone code is accepted, the phone will automatically search for the designated network. After a few seconds, your phone will show the standby mode.

2. To power off the phone, press and hold the **End Key** from the standby mode.

Charging

Your phone is powered by a rechargeable battery. The battery is not fully charged when first unpacked, but there may be enough power to power your phone on. You should use it up completely before charging the battery for the first time. Charge the battery with the procedure indicated below.

1. Open the USB port cover.
2. Insert the charger's USB adapter into the USB port.
3. Connect the charger to a standard AC wall outlet.

4. Remove the charger from both the wall outlet and the phone once the charging completed.

Notes:

- Make sure that the adapter is inserted into the correct position. Do not force the connector into the port.
- The battery will be fully charged for 3~4 hours.
- Use the charger provided by the original provider. Using unapproved charger may cause danger and violate the authorization and warranty rules of the phone.
- If the phone is over-used in shortage of battery or not used for a long time, the screen may not display the charge indicator until it is continues charged for 10 to 40 minutes.
- For maximum battery performance, it is recommended that you completely charge the battery before using the phone for the first time. A new battery's full performance is achieved only after three complete charge and discharge cycles.
- Once the charging is complete, remove the charger from both the power outlet and the phone.
- To charge the battery, you can use the provided charger or the USB data cable.
- Charging is only possible within a temperature range of -5°C to +45°C.

Keypad lock

Use the keypad lock to prevent the keys from being accidentally pressed.

In standby mode, hold * **Key** to lock the keypad.

Also you can select **Left Soft key [Menu] > Settings > Others > Keypad Lock Set** and set the keypad locking automatically. Or cancel the keypad locking automatically.

If you want to unlock the keypad, press **Right Soft Key [Unlock]** firstly and then press * **Key** to unlock.

Tips:

- When the keypad is locked, **Unlock** is shown in the bottom right hand of the screen.
- If the call is coming when the keypad is locked, you can press **Call Key** to answer. After ending or rejecting the call, the keypad will be locked automatically.
- When the keypad lock is on, calls may be possible to the official emergency number programmed into your device.

Basic operation

Menu

In standby mode, press **Left soft key [Menu]** to enter main menu.

Tools

The **Tools** includes **Calculator, Alarm Clock, Scheduler, U-DISK, World Clock** and so on.

Messages

SMS (Short Messaging Service) allows you to send text messages and manage the messages that you sent and received.

You can also send and receive MMS (Multimedia Message Service) messages. MMS enables you to send messages with images, sounds and texts. Consult your service provider whether this service is available. You may need to register separately for this service.

Call History (Call Log)

You can check the phone numbers of missed, received, and dialed voice calls.

Web (UTK)

You can get the latest information from the Internet through your phone.

Internet access may require registration with the service provider.

The browser is activated with the preset option as soon as you call up the function. Browser settings may be specified/pre-assigned by the service provider.

Surfing (TATA ZONE)

This function allows you to browse, purchase and download applications online. You can consult your service provider for more information about this function.

Contacts

You can store contacts with a variety of phone and fax numbers as well as additional address details.

The phone can store up to 500 entries. The capacity of a phone book on your UIM card depends on the type of UIM card provided by your network operator.

Settings

You can set or personalize your phone.

Multimedia (Music & Media)

You can take photos or videos through camera, record audios, and so on.

Games

You can play games.

Navigating your phone

The phone features, various functions and settings organized in menus and submenus. To select a function from menus:

1. In standby mode, press **Left soft key [Menu]** to open main menu.
2. Use **Navigation keys** to scroll up, down, right or left to select menu.
For example, scroll to **Settings**.
3. Press **OK key** to enter the menu.
4. Press **Up key** or **Down key** to scroll to a submenu, for example **Display/Keypad**.
5. Press **OK key [Select]** to confirm selection.
6. Press **Up key** or **Down key** to scroll to the desired option, for example, **Backlight Time**.
7. Press **Left key** or **Right key** to scroll to the desired option, for example, **30 seconds**.

8. Press **OK key [Save]** to confirm selection.

Tips:

- If a number is shown before an option in menu list, you can access the option quickly by pressing the corresponding number key.
- In this user manual, the steps needed to reach a menu are shown in a condensed form, for example: **Settings > Display/Keypad > Backlight Time > 30 seconds.**

Getting help

When you use your phone, you can obtain the help information from the following options.

Obtain the help from the user manual

Please read the user manual for keys and parts information and instructions for setting up the device for use.

Obtain the help from ZTE web site

If you want to obtain more help information, please visit <http://www.zte.com.cn/main/mobile>.

Text input

Text mode

Your phone offers text input modes: Multitap mode (**abc/ABC**), Numbers mode (**123**), eHiText mode (**En**). Text mode includes capital letter and lowercase mode.

When you are in a field that allows characters to be entered, you will notice the text input mode indicator in the upper right corner of the display.

You can key in letters, digits, characters and symbols when writing text or editing contact record information, following the common instruction in hereinafter table.

Operation	Method
Input Letters	Multitap mode —“ abc/ABC ”, press corresponding letter key till the letter appears.
Input Words	eHiText mode — “ En ”, press any key once to key in any word.
Input Digits	Numbers mode — “ 123 ”, press digit key once. Or press Call key to switch between current mode and numbers mode.
Input Symbols	Symbols mode — Press * key to enter the symbols mode and press corresponding digit key. Or press 1 key till the symbol (common symbols) appears except for numbers mode.
Input Space	Press 0 key , except for being in numbers mode.
Erase Character	Press Clear key .
Move cursor	Press Navigation keys .
Change input mode	Press # key to select another text mode.

Multitap mode

1. Press a number key (**2 ~ 9**) repeatedly until the desired character appears on the screen. Press once to input the first letter on the keypad, press twice quickly to input the second letter, and so on.
2. Press **0 key** to add a space.

Numbers mode

When the input method icon is shown as "**123**", input numbers directly with number keys.

Tips:

While using numbers mode, you need to switch to other text input mode in order to insert a space by pressing **0 key**.

eHiText mode

The eHiText mode is based on a built-in dictionary and generates words from the combination of letters pressed.

1. Press each key associated with the letter you want to enter only once. The letters you have entered appear on the display. The candidate words change with each key you press.
2. When the candidate word is displayed, press **Up key** or **Down key** to highlight the desired candidate words and press **OK key [OK]** to confirm.

3. Press number key **0** to insert space.
4. Press **Clear key** to delete the letter left of the cursor. Press and hold **Clear key** to delete all entered text.

Symbols mode

1. Press *** key**.
2. Use **Navigation keys** to select corresponding symbol.

Notes:

Press **1 key** to input till the symbol appears except for numbers mode. Most common punctuation marks and special characters are available.

Calls

Voice calls

You can call the numbers of the other party directly or you can make a voice call through contacts, calls log, speed dial numbers.

Making a call

1. If required press and hold **0 key** for the international prefix “+”.
2. Enter the number, and press **Call key** to make a call.
3. When the call is connected, you can press **OK key** for **handfree** mode.
4. Press **End key** to end the call.

Making a call from Contacts

1. In standby mode, Select **Left soft key [Menu] > Contacts > List Entries**.
Or press **Right soft key [Contacts]** directly in standby mode.
2. Press **Navigation keys** to select a contact.
3. Press **Call key** to make a voice call.
4. Press **End key** to end the call.

Making a call from call history

1. Press **Call key** in standby mode to display outgoing calls.
2. Press **Up key** or **Down key** to select a number.
3. Press **Call key** for a voice call.
4. Press **End key** to end the call.

Making a one-key-call

In standby mode, press and hold the corresponding number key (**1 ~ 9**) in the speed dial list to make the call.

Press **End key** to end the call.

Setting one-key-call

1. In standby mode, Select **Left soft key [Menu] > Contacts > Speed Dials**.
2. Press **Up key** or **Down key** to select a **Empty** slot, and select **List > All Entries**.
3. Press **Navigation keys** to select a contact in the phone and press **OK key [Select]**.
4. Press **Up key** or **Down key** to select a number, and press **Left soft key** to view the speed dial information.

Receiving calls

When a voice call is coming, your phone will ring or vibrate (Please see **Personalize your phone > Sound**).

1. Press **Call key** to answer the call, or press **End key** to reject the call.

Tips:

You can press the button on the headset to answer the call when you connect the headset to your phone.

2. Press **End key** to end the call.

Setting ring for coming call

1. In standby mode, press **Left soft key [Menu]** and select **Sound >Ringers >Voice Calls**.
2. Press **Up key** or **Down key** to select the profile.
3. Select **Right soft key [Edit]** to edit the selected profile.
4. Select ring tone or audio and press **OK key [Select]** to save the setting.

Call options

1. Before you answer the call:
 - ▶ Press **Right soft key [Mute]** to block the current ring tone of the call.
2. After you answer the call:
 - ▶ Press **Right soft key [Mute]** to block your voice.
 - ▶ Press **OK key** to activate **handfree** mode.
 - ▶ Press **Volume keys** or **Up/Down key** to adjust the volume of earpiece.
 - ▶ Press the **Left soft key [Options]** during a voice call for more options.
 - **Call The Third Party**: Call the third party to enjoy triple-party conversation.
 - **Messages**: Switch to Messages interface during a call.
 - **Contacts**: Switch to phonebook interface during a call.
 - **DTMF Off/On**: Activate/deactivate DTMF.

Call history

In standby mode, select **Left soft key [Menu] > Call History** to check the calls log and calls duration.

Viewing recent call history

1. Select **All Calls** to view all calls' log.
2. Select **Missed Calls** to view the missed calls' log.
3. Select **Incoming Calls** to view the incoming calls' log.
4. Select **Outgoing Calls** to view the dialed calls' log.

Deleting call history

1. Press **Up key** or **Down key** to select the type of calls log.
2. Press **Up key** or **Down key** to select the call log you want to delete.
3. Select **Options > Delete/Delete All** to delete.
4. Press **Left soft key [Yes]** to confirm to delete.

Call time

You can check the call duration.

1. Select **Call History > Call Duration**.
2. Press **OK key** to check the call duration.
 - ▶ **Last Call**: Indicate the talk time of the last call.
 - ▶ **Outgoing Calls**: Indicate the talk time of all dialed calls.
 - ▶ **Incoming Calls**: Indicate the talk time of all incoming calls.
 - ▶ **All Calls**: Indicate the talk time of all dialed and received calls.
3. Press **Right soft key** to reset the time.

Messages

Setting message

1. In standby mode, press **Left soft key [Menu]** to enter main menu.
2. Select **Messages > Settings > Messages**, and press **OK key [Select]**.
3. Press **Up key** or **Down key** to select options:
 - ▶ **Default store position:** Set the save position of messages: Phone, or UIM card.
 - ▶ **Save to Sent Box:** Save automatically the sent message.
 - ▶ **Auto Delete Inbox:** Set erasing the read message in Inbox automatically when Inbox is full.
 - ▶ **Message Priority:** The priority of sending message.
 - ▶ **Delivery Report:** Select **On** or **Off** for your phone can or can not automatically receive message from network informing you whether you have sent message successfully.
 - ▶ **Callback:** Set callback number.
 - ▶ **Signature:** Input character to write your signature.
4. Press **OK key** to save.

Editing template

Notes:

The predefined template in your phone will be replaced after you modify the template.

1. Select **Messages > Settings > Quick Text**.
2. Press **Up key** or **Down key** to select desired template.
3. Press **OK key [Edit]** to edit the selected template.
4. Press **OK key [OK]** to save.

Editing SMS on Call Reject

1. Select **Messages > Settings > Edit SMS on Call Reject**.
2. Press **OK key** and edit desired template for rejecting message.

Text messages

SMS (Short Messaging Service) allows you to send text messages and manage the messages that you sent and received.

Sending a new SMS

1. Select **Left soft key [Menu] > Messages > New SMS**.
2. In the number field, enter the recipient(s) party's number or select **Left soft key [Options] > Contacts** to choose the recipient(s).
3. Press **Down key** to the text field.
4. Edit the message, press **Left soft key [Options]**:
 - ▶ Select **Save to Drafts** to save message in Drafts.
 - ▶ Select **Quick Text** to insert templates.

- ▶ Select **Signature** to insert signature.
 - ▶ Select **Network Symbol** to insert network symbol.
 - ▶ Select **Send Name** to insert contact's information.
5. Press **OK key [Send]** to send your message.

Receiving SMS

1. The envelope icon will appear on the information bar to indicate new incoming SMS. The message alert tone and vibrate activate depending on the current profile (Sound) setting.
2. For the old messages:
 - i. Select **Messages > Inbox**.
 - ii. Press **Up key** or **Down key** to select the desired SMS to view.
 - iii. Press **OK key** to view the message.

Replying SMS

1. Select **Left soft key [Menu] > Messages > Inbox**.
2. Press **Up key** or **Down key** to select the desired messages.
3. Select **Right soft key [Reply]** to reply to the selected message sender.
Or in the message list interface, select desired message:
 - i. Press **OK key** to view the message.
 - ii. Select **Right soft key [Reply]** to reply to the selected message sender.

Calling back

1. Select **Left soft key [Menu] > Messages > SMS and MMS > Inbox**.
2. Press **Up key** or **Down key** to select the desired messages.
3. Press **OK key** to view the message.
4. Select **Left Soft key [Options] > Use Callback > Voice Call** to call the message sender.
Or select **Left Soft key [Options] > Use Highlight Object > Voice Call** to call the message sender.

Use number

1. Select **Left soft key [Menu] > Messages > Inbox**.
2. Press **Up key** or **Down key** to select the desired messages.
3. Press **OK key** to view the message.
4. Select **Left Soft key [Options] > Use Callback > New Contact** to save the message sender.
Or select **Left Soft key [Options] > Use Highlight Object > New Contact** to save the message sender.

Deleting SMS

1. Select **Left soft key [Menu] > Messages > Inbox**.
2. Press **Up key** or **Down key** to select the desired messages.

3. Select **Left soft key [Options] > Delete/Delete all** to delete the selected message or all list messages.

Message management

In standby mode, select **Left soft key [Menu] > Messages** to enter message interface. It includes **New SMS, Inbox, Outbox, Drafts, Sent, Check Voice Mail, User Folder, UIM Card, Templates, Settings Memory Info,** and **Voice SMS.**

Message boxes

The **Inbox** folder contains all of your received messages. From this folder you can view your received messages, reply or forward messages to another recipient.

The **Outbox** folder contains all messages that were unsuccessfully sent during the last attempt. From this folder you can edit or resend your messages.

The **Drafts** folder contains drafts and unfinished messages. From this folder you can complete or resend your messages.

The **Sent** folder contains messages that were sent successfully. From this folder you can edit or forward messages to another recipient.

Select **Check Voice Mail** to view the list and listen to voice mail.

Select **User Folder** to create your own folder for download file.

Select **UIM Card** to check the messages saved in UIM card.

Select **Templates** to add new words and sentences for Quick Text of message.

Select **Quick Text** to view all templates words and sentences.

Select **Voice SMS** to send voice SMS.

You can check the amount of memory available for messages through **Memory Info** folder.

Notes:

- You can not receive new messages if memory for messages is full.
- Total amount of messages decided by the space of phone and UIM card.

Contacts

Adding a contact

You can store contacts with a variety of phone and fax numbers as well as additional address details.

The phone can store up to 1000 items. The capacity of a phone book in your UIM card depends on the type of UIM card provided by your service provider. The saved location can be identified by the icon before the contacts.

1. Select **Left soft key [Menu] > Contacts > New Entry > Save to Phone/UIM**.
2. Select save location.
3. Enter the information of contact, such as name, number, and so on.
4. Press **OK key [Save]** to save the new contact.

Editing contact

1. Select **Left soft key [Menu] > Contacts > List Entries**.
2. Press **Up key** or **Down key** to select the desired contact.
3. Press **OK key** to view and **Edit** the contact.
4. Press **OK key [Save]** to save.

Deleting contact

You can delete one contact or all contacts from your phone or UIM card.

1. Select **Left soft key [Menu] > Contacts > List Entries**.
2. Select the desired contact.
3. Select **Left soft key [Options] > Delete/ Delete All** to delete one contact or all contacts.

Finding contact

1. Select **Left soft key [Menu] > Contacts**.
2. Input the name or number you want to find in the text field.
3. Press **Up key** or **Down key** to scroll through the corresponding name(s) and record(s) in the list. Scroll to the name you want, and press **OK key** to view the details.

Notes:

All the Names will be list by the letter of the name.

Adding a group

Assign group for the contacts.

1. Select **Left soft key [Menu] > Contacts > Groups**.
2. **Select** the desired group.
3. Select **Left Soft Key [Options] > New Entry**.
4. Add the entry information.

- ▶ Select **GPS** to activate and set GPS function.
- ▶ Select **Airplane Mode On/OFF** to deactivate/activate airplane mode.

Phone Security

Phone password

Phone password can protect your phone efficiently and avoid illegal usage. If phone password protection is activated, you should input the correct password in phone start-up.

- For a new bought phone, the protection function is not activated and the default password is 0000.
- In standby mode, select **Menu > Settings > System > Security > Phone Lock** to activate or deactivate password protection.
- In standby mode, select **Menu > Settings > System > Security > Change Code** to change phone password. It is suggested to change the password according to your requirement.

Notes:

Please remember the password you set, otherwise your phone can not be used normally, need to contact ZTE after-sale service center.

PIN code

PIN code is the personal identification code of UIM card, used to avoid illegal usage for your UIM card. Once PIN code is started, the correct PIN code should be inputted in phone start up, otherwise the phone can only execute emergency call.

- For a new bought card, the default code is supplied by the service provider.
- In standby mode, select **Menu > Settings > System > Security > PIN Code** to activate or deactivate PIN code.
- In standby mode, select **Menu > Settings > System > Security > PIN Code > Change PIN Code** to change PIN code.
- If input wrong PIN code continuously for three times, the phone will lock the UIM card and prompt you to input PUK code to unlock.

Notes:

If you change PIN code, please remember it clearly.

PUK code is the specified unlock code for UIM card, when UIM card is locked, input the correct PUK code and then input the new set PIN code, UIM card then can be used normally.

- PUK code may be supplied with the new bought card, the detail can refer to the service provider.
- PUK code can only be inputted continuously for 10 times, if input wrong PIN code for 10 times, UIM card will be locked indefinitely.

Notes:

If PUK code is supplied with the new bought card, please keep it safely.

Restoring factory settings

Restoring factory settings can recover all the items in **Settings** menu to the default values.

1. In standby mode, Select **Left soft key [Menu] > Settings > System > Default Reset**.

Space management

1. In standby mode, select **Left soft key [Menu] > Music & Media > Memory Info**.
2. Press **OK key [Select]** to check the space information.

General information

Security

If your mobile phone is lost or stolen, please report to your service provider or agencies of banning the use of your lost phone, which will protect you from economic losses resulted from unauthorized use. You need to provide the phone's MEID number labeled. You can see MEID number after removing the battery. Please keep MEID number for future use.

- To protect your mobile phone from illegal use, please take the phone with you as you can.

Safety Warnings

To the Owner

- Some electronic devices are susceptible to electromagnetic interference sent by mobile phone if inadequately shielded, such as electronic system of vehicles. Please consult the manufacturer of the device before using the phone if necessary.
- Operating of mobile phone may interfere with medical devices like hearing aid and pacemaker. Please always keep the mobile phone more than 20 centimeters away from such medical devices when the phone is powered on. Do not carry the mobile phone in the breast pocket. Power the mobile phone off if necessary. Consult a physician or the manufacturer of the medical device before using the phone.
- Be aware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed, because even if your phone is in standby mode, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.
- Pay attention to traffic safety. Do not use your mobile phone while driving. Park before making or answering a call.
- Store the phone out of the reach of little children. The phone may cause injury if used as a toy.

Mobile Phone

- Please use original accessories or accessories that are authorized by the manufacturer. Using any unauthorized accessories may affect your mobile phone's performance, and violate related national regulations about telecom terminals, or even endanger your body.
- If you want to clean your phone, please use clean fabric that is a bit wet or anti-static. Do not use harsh chemical cleaning solvents or strong detergents to clean it. Turn off your phone before you clean it.
- As your mobile phone can produce electromagnetic field, do not place it near magnetic items such as computer disks.
- Using the phone near electrical appliances such as TV, telephone, radio and personal computer can cause interference, which affects the function of the phone.
- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from leaking into your phone.
- Do not drop, knock or harshly treat your phone. Rough handling can break internal circuit boards.
- Do not connect the phone with other unauthorized peripheral equipments.
- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Do not charge the mobile phone without battery.
- On occasion of emergent calling, keep your phone in status of power on and in area of service. On the condition of standby, press the key to enter emergency phone number, and then press **Call key** to make

a phone call.

- The user is cautioned that changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation.
- Some electronic devices are susceptible to electromagnetic interference sent by phone if inadequately shielded. Please use phone at least 20cm or as far as you can from TV set, radio and other automated office equipment so as to avoid interference.
- NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/ TV technician for help.

Battery Using

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- Never use any charger or battery damaged or worn out.
- Return the wear-out battery to the provider or put it in the appointed recycle place. Do not put it in familial rubbish.

Warning:

If the battery is broken, keep away from content. If it taints your skin, wash your skin with abundant fresh water and ask doctor help if necessary.

Radio Frequency (RF) Energy

This device meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the device as reported to the FCC when tested for left hand, cheek, as described in this user guide, is 1.05W/kg for CDMA 850 band.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this device is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: Q78-ZTECR200.

For body operation, this device has been tested and meets the FCC RF exposure guidelines for use the positions the device a minimum of 1.5cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines.

Safety and General Using in Vehicles

- Before making or answering a call, you should pay attention to the local laws about using wireless mobile phones and take them into account in practical use.
- Safety airbag, brake, speed control system and oil eject system shouldn't be affected by wireless transmitting. If you do meet problems above, please contact your automobile provider.
- Please power off your mobile phone when refueling your automobile, and so do the place where duplex wireless equipments are banned. Don't put your phone together with flammable or explosive items, as inner spark may cause fire.

In Aircraft

- Follow the restrictions in aircraft. Wireless devices can cause interference in aircraft.
- Please power off your mobile phone before taking on till landing. In order to protect airplane's communication system from interference, it is never allowed to use mobile phone when it is in flight. Using mobile phone before the plane taking off should get aircrew's permission according to safety regulations.

Limit Warranty

The warranty does not apply to defects or errors in the product caused by:

1. Reasonable abrasion.
2. Misuse including mishandling, physical damage, improper installation, unauthorized disassembly of the product.
3. Water or any other liquid damage.
4. Any unauthorized repair or modification.
5. Power surges, lightning damage, fire, flood or other events outside ZTE's reasonable control.
6. Use of the product with any unauthorized third party products such as generic chargers.
7. Any other cause beyond the range of normal usage for products.

End User shall have no right to reject, return, or receive a refund for any product from ZTE under the above-mentioned situations.

This warranty is end user's sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using this product, whether or not ZTE had been

advised, knew or should have known the possibility of such damages.

Troubleshooting

If your phone appears following phenomenon in the process of application, please read following relative information at first. If the problems still can not be solved, please contact with the distributor or service provider.
