Getting to Know Your Phone

Thank you for choosing the ZTE Blade L5 Plus.

Before you start, let's take a look at your new phone.

Press the power button to turn on or turn off the screen.

Installing the SIM card

Follow the instructions in the figures below to install your micro-SIM card. Then press and hold the power button to power on your phone.

① Open the battery cover.

② Insert the micro-SIM card/SD card.

Notes:SIM card slot to prevail in kind

Before installing or replacing the SIM card, be sure to turn off the phone. If you're using a small card, please buy standardization SIM dedicated card sets from the formal channels, and then push the whole sets into the slot.

Notes:SD card slot to prevail in kind
Some applications may require a SD card to work normally or may store certain data on it. Therefore, it is recommended that you keep a SD card installed and not remove or replace it randomly.

Single SIM device

Dual SIM device

Charging the phone.

Your phone's battery should have enough power for the phone to turn on, find a signal, and make a few calls. You should fully charge the battery as soon as possible.

WARNING!

Use only ZTE-approved chargers and cables. The use of unapproved accessories could damage your phone or cause the battery to explode.

CAUTION:

Do not remove or change the built-in rechargeable battery in your phone by yourself. The battery can only be changed by ZTE or ZTE authorised service provider.

Product Safety Information

	Don't make or receive phone calls while driving. Never text while driving.		Don't use at gas stations.
	For body-worn operations, maintain a separation of 10 mm.		This device may produce a bright or flashing light.
	Small parts may cause choking.		Don't dispose of your phone in fire.

	This device may produce a loud sound		To prevent possible hearing damage, do not listen at high volume levels for long periods.
	Avoid contact with anything magnetic.		Avoid extreme temperatures.
	Keep away from pacemakers and other electronic medical devices.		Avoid contact with liquids. Keep your phone dry.
	Turn off when asked to in hospitals and medical facilities.		Do not attempt to disassemble.
	Turn off when told to on aircraft and at airport.		Only use approved accessories.
	Turn off when near explosive materials or liquids.		Don't rely on your phone as a primary device for emergency communications.

§ 15.19 Labeling requirements.

The 15.19 statement is used. They should have used the one for Licensed devices: "This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference."§

§15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This wireless phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6

W/kg averaged over one gram of tissue. Device (FCC ID: SRQ-ZTEL5PLUS) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.826W/kg and when properly worn on the body is 1.269W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.0cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.0 cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna
