1 General Information

1.1 Welcome

Thank you for choosing ZTE X185 CDMA 2000 1X Digital Mobile Phone.

To guarantee the mobile phone always in its best condition, please read this manual carefully and keep it for further use.

The pictures, symbols and contents in this manual are just for your reference. They might not be completely identical with your mobile phone. Please subject to the real object. ZTE operates a policy of continuous development and reserve the right to update and modify the technical specifications in this document at any time without prior notice.

1.2 Security

■ If your mobile phone is lost or stolen, please inform your service provider or agencies of banning the use of your lost UIM card and phone, which will protect you from economic losses resulted from unauthorized use.

You need to provide the phone's ESN number labeled on the back of the mobile phone. You can see the ESN number after removing the battery. Please keep the ESN number for future use.

■ To protect your mobile phone from illegal use, please take the

security measures as follows:

➢ Set PIN code of the UIM card.

➢ Take it with you as you can.

1.3 Safety Warnings ⚠

To the Owner

■ Some electronic devices are susceptible to electromagnetic interference sent by mobile phone if inadequately shielded, such as electronic system of vehicles. Please consult the manufacturer on the device before using the phone if necessary.

■ Operating of mobile phone may interfere with medical devices like hearing aids and pacemakers. Please always keep the mobile phone more than 20 centimeters away from such medical devices when the phone is powered on. Do not carry the mobile phone in breast pocket. Power the mobile phone off if necessary. Consult a physician or the manufacturer on the medical device before using the phone.

■ Be aware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed, because even if your phone is in standby mode, it still transmits radio frequency (RF) energy. Therefore, power off your phone if required.

- Do not touch any exposed part of the antenna while calling otherwise it will affect the quality of calling and waste battery energy. The damaged antenna will cause slight burn while touching your skin.

- Pay attention to traffic safety. Do not use your mobile phone while driving. Park before making or answering a call.

- Store the phone out of the reach of little children. The phone may cause injury if used as a toy.

Mobile Phone

- Please use original accessories or accessories that are authorized by the manufacturer. Using any unauthorized accessories may affect your mobile phone's performance, and violate related national regulations about telecom terminals, or even endanger your body

- If you want to clean your phone, please use clean fabric that is a bit wet or anti-static. Do not use harsh chemical cleaning solvents or strong detergents to clean it. Turn off your phone before you clean it.

- As your mobile phone can produce electromagnetic field, do not place it near magnetic items such as computer disks.

- Using the phone near electrical appliances such as TV, telephone, radio and personal computer can cause interference, which affects the function of the phone.

![ZTE中兴]

- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from leaking into your phone.
- Do not drop, knock or harshly treat your phone. Rough handling can break internal circuit boards.
- Do not connect the phone with other unauthorized peripheral equipments.
- Do not attempt to disassemble the mobile phone and battery by yourself. Non-expert handling of the devices may damage them.
- Do not charge the mobile phone without battery.
- On occasion of emergent calling, keep your phone in status of power on and in area of service. On the condition of standby, press the key to enter emergency phone number, and then press **Call key** to make a phone call.

Battery Using

- Do not short-circuit the battery, as this can cause excessive heat and fire.
- Do not store battery in hot areas or dispose of it in a fire to avoid explosion.
- Never use any charger or battery damaged or worn out.
- Return the wear-out battery to the provider or put it in the appointed recycle place. Do not put it in familial rubbish.

    Warning: If the battery is broken, keep away from its inner

content. If it taints your skin, wash your skin with abundance fresh water and ask doctor for help if necessary.

Safety and General Using in Vehicles

- Before making or answering a call, you should pay attention to the local laws about using wireless mobile phones and take them into account in practical use.

- Safety airbag, brake, speed control system and oil eject system shouldn't be affected by wireless transmitting. If you do meet problems above, please contact your automobile provider.

- Please turn off your mobile phone when refueling your automobile, and so do the place where duplex wireless equipments are banned. Don't put your phone together with flammable or explosive items; inner spark may cause fire.

In Aircraft

- Follow the restrictions in aircraft. Wireless devices can cause interference in aircraft.

- Please power off your mobile phone before taking off till landing. In order to protect aircraft's communication system from interference, it is never allowed to use mobile phone when it is in flight. Using mobile phone before the plane taking off should get aircrew's permission according to safety regulations.

Exposure to radio frequency energy

Radio wave exposure and Specific Absorption Rate (SAR) information

- The handset is designed to comply with safely, requirements for exposure to radio waves. This requirement is based on scientific

12

guidelines that include safety margins designed to assure the safety of all persons, regardless of age and health.

■ The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using a standardized method with the phone transmitting at its highest certified power level in all used frequency bands.

■ While there may be differences between the SAR levels of various ZTE phone models, they are all designed to meet the relevant guidelines for exposure to radio waves.

■ The SAR limit recommended is 1.6W/kg averaged over one(1) gramme of tissue.

■ The highest SAR value for this model phone tested by MORLAB for use at the head is 1.315 W/kg(1g)

■ The highest SAR value for this model phone tested by MORLAB for use at the body is 0.245W/kg(1g)

■ SAR compliance for body-worn operations is restricted to belt-clips, holsters, or similar accessories that have no metallic component in the assembly and which provide at least 1.5 cm separation between the device, including its antenna, and the users body

1.4 Limit Warranty

The warranty does not apply to defects or errors in the product caused by:

(a) Reasonable abrasion.

(b) Misuse including mishandling, physical damage, improper installation, unauthorized disassembly of the product.

13

(c) Water or any other liquid damage.

(d) Any unauthorized repair or modification.

(e) Power surges, lightning damage, fire, flood or other events outside ZTE's reasonable control.

(f) Use of the product with any unauthorized third party products such as generic chargers.

(g) Any other cause beyond the range of normal usage for products.

End User shall have no right to reject, return, or receive a refund for any product from ZTE under the above-mentioned situations.

This warranty is end user's sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

1.5 Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using this product, whether or not ZTE had been advised, knew or should have known the possibility of such damages.

		■ Make a Speed Dial call.
＊↑ #␣	*Key，#Key	■ Differs in different mode, option or function menu.

Note: To "press" the key in this manual means to press the key and release it. To "hold" the key means to keep pressing the key for two seconds or more.

2.2 Instruction of Interface Icon

Icon	Description
	Signal strength
	New Message
	Silence Mode
	Alarm
	Roam Instruction
	Vibration

🖃	New Voice Mail
IIII	Power Indicator

2.3 Technical Parameter

Handset

Type	ZTE X185
Dimension	44mm × 107mm × 19mm (Width × Height × Thickness)
Weight	About 80g（Battery Included）

Lithium Battery

Continuous Standby Time	About 80h～160h (Subject to Network)
Continuous Talk Time	About 2h～4h (Subject to Network)

Please refer to the real phone for other relative parameters of the battery and charger.

2.4 Battery

The attached lithium battery along with the phone can be used after unpacking. For the first three times, please use up the power and charge it fully for a new battery to perform well.

2.4.1 Removing and Installation of Battery

◆ Removing：(1)Press the back cover release button, push the back-cover of the phone down and remove it off the phone. (2) Put finger on the finger grip, and then lift up the battery from the finger grip to remove the battery.

◆ Installation：(1) Replace the battery into battery slot, to be noted that the bottom end should be firstly inserted; (2) Put the back-cover of the phone flatly upon the body of phone. Direct the back cover towards the locking catches on the both sides of the phone and push the back-cover of the phone upward to lock the cover into its place.

2.4.2 Charging the Battery

◆ Plug out rubber away (turn 180° as shown in the picture) from the jack on the bottom of handset and connect the lead from the charger to the socket on the bottom of the phone (Note: The side with arrow shall be upside while connecting).

◆ Connect the charger to a standard AC socket.

◆ Meanwhile, the charging indicator in the up-right corner of the display flops cyclically, indicating the charging is going. In power-off mode while charging, the display only shows the charging indicator. If the battery is completely flat in storage or used up, it may take for a while before the charging indicator appears on the display or any calls can be made.

◆ When the charging indicator on the screen stops flopping, the charging is completed. The charging takes usually up to 2～3 hours. In the process of charging, it is a normal phenomenon that the battery, phone and charger get into hot accordingly.

◆ After the completion of charging, disconnect the charger from the phone and AC socket.

Note：

◆ When it is in charge, place the phone on condition of good ventilation and temperature between -5℃～＋45℃. Ensure to use the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.

◆ When the phone is automatically switched off or indicates the alarm information of power shortage, please charge the battery in time.

◆ The duration time of the standby status or conversation of the phone is based on ideal working environment. In practice, the working time of battery varies with network condition, working environment and application methods.

2.5 Connecting to Network

2.5.1 UIM Card

Before using the phone, please insert effective UIM (User Identity Module) card into the phone.

All the information related to the network connection is recorded in the metal plane area of UIM card together with the information you stored in your Contacts in the UIM card. The UIM card can be inserted into any CDMA phone to use.

Please do not touch the metal plane area of the card to avoid missing and damaging information in the card and put UIM card in place far away from electricity and magnetism.

21

Warning：Please power off the phone before taking out UIM card. It is prohibited to insert or taking out UIM card in the condition of connecting with external power.

2.5.2 Insertion and Extraction of UIM card

◆ Power off the phone, remove the battery and other external power.

◆ Insert UIM card into UIM card holder.

◆ Power off the phone before removing UIM card.

2.5.3 Power on/off Phone

Press and hold **End key** to power on/off the phone. The phone will check whether UIM card inserted well or not. And then follow the prompt indication on the display.

Enter PIN——Key in PIN code of UIM card if it is set.

Searching——Search appropriate network connected.

2.5.4 PIN Code

To set PIN code (personal identification number) is to avoid the illegal usage of UIM card.

To input PIN code of UIM card and press **OK key** to confirm to start on using phone. If inputting wrong PIN three times continuously, UIM card will be locked by network.

Note： The network provider offers you PIN code (four to eight digits). You should change PIN code as soon as possible for security.

22

![ZTE中兴]

To set PIN code, see "7.8 Security Setting".

2.5.5 Connecting to Network

After powering on and inputting PIN code, the phone automatically searches the network available and in state of standby mode.
Besides sending and receiving calls, you can also do:

◆ Press **OK key** to enter main **Menu**.

◆ Hold **Up key** to set the phone in **Silence All**.

◆ Press **Down key** to enter **Messages** menu.

◆ Press **Left key** to enter **Games** menu.

◆ Press **Right key** to view **All Contacts**.

◆ Press **Send key** to enter **All Recent Calls**.

◆ Hold **Clear key** to lock phone's keypad.

3 Basic Operation

3.1 Basic Precondition

Please ensure that you are in the place where the signal can be received. Examine network signal strength icon displayed in upper left corner of screen.
Note: The more the indication bars, the stronger the intensity of receiving signal is. If there is no bar, please move to the place where the intensity of receiving signal is better. Sometimes, you only need to change the direction.

3.1 Making a Call

ZTEX185 can support you on some basic operations of dialing/redialing/speed dialing/answering calls.

1. Power-on ZTEX185.

2. To either make or answer a call, you can make use of

24

Hand-free key, number keys and **Call key**.

3. Make a call or answer a call as steps detailed in the following.

3.1.1 Making a Domestic Call

Press **Number key** to key in phone number, and add area code when making a long distance call (no need to add area code when dialing local number in some area). Press **Call key** to call out. Press **End key** to end the call and conversation.

3.1.2 Making an International Call

Enter the country code, area code (without the leading "0") and the complete telephone number you want to dial, press **Call key** to call out.

Before the country code, hold a certain number key, e.g. **"0" key** to enter the international prefix "+" (the "+"character replaces the international access code) or key in international prefix e.g. "00" of international call directly.

Country code + Area code + Telephone number

0086   755   26770000

3.1.3 Hand-free

- Hand-free

ZTEX185 supports hand-free function. Press **Hand-free key** to

25

activate. The dial tone make user easy to recognize whether the phone is in status of hand-free or not.

- Earpiece and Hand-free Conversion

ZTEX185 supports hand-free converts to normal earpiece speaking (hand-free speaking is off while pressing hand-free key again). ZTEX185 also supports earpiece to hand-free speaking (press **Hand-free key** to convert from earpiece conversation to hand-free speaking).

3.1.4 Redialing Recent Calls

All calls you recently dialed, received or missed are saved in your phone. All numbers are grouped as Missed Calls, Incoming Calls and Outgoing Calls. When the list is full, the oldest number will be erased automatically when new record is coming.

You can check the list as follows:

✧ In standby mode, press **Call key** to view All Recent Calls.

✧ Press **Call key** again to redial directly the last one dialed phone.

✧ All the numbers in the list can be directly dialed or redialed by pressing **Call key**.

Note: Whenever abnormal power down arouses abnormal restart, the last call record will not be saved.

3.2 Answering Calls

When a call is coming in standby mode, the phone offers

26

corresponding ringer or vibration to prompt according to your settings. With the number already saved in Contacts, the phone also shows the name of caller meanwhile.

• Press [icon] to answer an incoming call.

• Press [icon] to end a call and the call duration is temporarily displayed.

See "7.9 Accessories" or refer to other ways of answering calls for your option as follows.

3.2.1 Setting Any Key Answer

1. Select **Menu→ Settings→ Accessories→ Any Key Answer**

2. Select **On**，and press **OK key**.

An incoming call can be answered by pressing any key except **End key** [icon].

3.2.2 Incoming Call Silence

• When a call is coming, press **OK key** to select **Silence** to mute the ringer tone.

• This function silences the current incoming call only. The phone will ring normally as next call coming.

3.2.3 Silence in Conversation

During conversation, you can press **Right key** and **OK key** to select **Mute** to let the other party temporarily not hear your voice; Re-press **Right key** and **OK key** to select **Unmute** back to normal.

27

3.2.4 Adjusting Volume in Conversation

Press **Up/Down key** to adjust volume of Earpiece during a call.

3.2.5 Selecting Options in Conversation

During a call, press **Right key** and **OK key** to select **SPK.ON/ Normal, Mute/Unmute,** to set phone **Speaker on/off**, mute/umute phone, or select **Menu** for options in **Menu**, such as **Contacts**, with no worry about the ending of conversation.

3.3 Viewing Missed Calls

For missed calls, with the function of alert setting, phone screen indicates "Missed xxx Calls" ("xxx" shows the number of missed calls).

• Press **OK key** to select **OK** to clear screen, and then return to the standby mode.

• Press **Right key→ OK key** to select **Calls** to enter the list of missed calls.

3.4 Menu Functions

◆ Main Menu Function:

1. In standby mode, press **OK key** to enter main menu. Scroll **Up/Down** or **Left/Right key** through the menu and select functions.

2. If the menu contains submenus and further submenus, select options and submenu you want according to the prompt on the

28

screen.

3. Press **OK key** or **Clear key** to set or return to the previous menu interface. Press **End key** to exit to standby mode.

◆ Bottom Menu Function:

If options are displayed at the bottom of the screen, press **OK key** and then **Left/Right key** to select. Press **OK key** or **Clear key** to set or exit.

The functions of phone are mainly grouped in main **Menu**: **Contacts**, **Messages**, **Recent Calls**, **Settings**, **Extra**, and **Games**. Please refer to the text hereinafter in this manual in detail.

4 Contacts
4.1 Finding Records

You can search for a name or number in **Contacts** in pop-up window by choosing**:**

◆ **In All Contacts**

1. Press **OK key**, and select **Contacts**.

2. Select **View All**. You can key in the first characters of the name you are searching for to view contact directly in All Contacts.

3. Press **Up/Down key** to scroll though the corresponding name(s) and records in the list. Scroll to the name you want, and press **OK key** to view the details.

◆ **Find**

1. Press **OK key**, and select **Contacts**.

2. Select **Find**. You can key in the characters of the name you are

searching for. And then press **OK key** twice to find.

All the contacts will be list by the letter of the name. If no contact in the list, "No contacts found" will be displayed.

Note: You search for the name or number you want to edit. Press **Options**. Select **Add New** (not for UIM card), **Edit Name**, **Classify Contact** (not for UIM card), or **Erase Contact**, and add new contact, edit the name, number, or text and press **OK key**.

4.2 Adding New Record

■ **Save to Phone:**

1. Select **Menu→ Contacts→ Add New**

2. Select would-be added information: **Phone**, **Email**, **Address**, and **Web Page.**

3. Press **OK key** twice to select **Next**, then **Enter name** of the contact. See "**10. Character Input**" more instructions for

writing text and character.

4. After the completion of writing, select **Next**.

5. Scroll to the just-added phone number to reedit，press **OK key.**
   Further operation can be executed, such as, **Edit**, **Erase**,
   Send SMS Message, **Number Type**, **Save to R-UIM**, **Add to**
   Speed Dial.

6. Scroll to **Options** and press **OK key**

- **Add New:** Add new information.

- **Edit Name:** Edit Contact name.

- **Classify Contact:** Group records into **Personal** or **Business**.

- **Erase Contact:** Erase this new contact.

When you Add new **Email**, **Address** or **Web Page** and press **OK**
key, you can：

- View Address：View the **Email**, **Address or Web Page** in
detail.

- Edit：Edit the **Email**, **Address** or **Web Page**.

- Erase：Erase the **Email**, **Address** or **Web Page**.

■   **Add to UIM Card:**

1. Select **Menu→ Contacts→ Add to RUIM**

2. Key in **Phone Numbers**, and press **OK key** twice to select
   Next, then **Enter name** of the contact. See "10. Character
   Input" more instructions for writing text and character.

3. After the completion of writing, select **Next.**

4. Scroll to the just-added phone number to reedit，press **OK key.**
   Further operation can be executed, such as, **Edit, Send SMS**
   Message, Save to Phone, Add to Speed Dial.

5. Scroll to **Options,** and press **OK key.**

- **Edit Name**： Edit Contact name.

- **Erase Contact:** Erase this new contact

Note: In standby mode, key in phone number, press **Left/Right**
key to select **New**, **To Existing**, **To RUIM**, **Find**, and then press **OK**
Key to add new record or search for record.

4.3 Viewing Records

1. Select **Menu**→ **Contacts**

2. Select following option, you can view the corresponding records
in list.

  －**View All**：All records in phone and UIM card

  －**R-UIM**： All records in UIM Card.

  －**Personal**： All records in **personal** group.

  －**Business**： All records in **business** group

Note: When there is no storage record in Contacts, it will indicate
"No contacts found".

ZTE中兴

4.4 Erasing Records

4.4.1 Erasing a Record

1. Select **Menu** → **Contacts**.

2. Select **View All** or **Find** to search for would-be erased record.

3. Scroll to the record you want to erase and press **OK key**.

4. Select **Options** to **Erase Contact**, and press **OK key**. "Erase contact?" indicated on the display.

5. Press **OK key** to select **Yes**.

4.4.2 Erasing All Contacts

You can erase all the records in Contacts.

See **"7.8 Security"** for the details.

4.5 Editing Name of the Contacts

1. Select **Menu**→ **Contacts**.

2. Select **View All** or **Find** to search for would-be edited record.

3. Scroll to the record you want to edit and press **OK key**.

4. Select **Options** to **Edit Name**, and press **OK key**.

5. Press **Clear key** to erase character of the current name, and rewrite the name.

6. Select **Save**. "**Contact Saved…**"appears on the display.

ZTE中兴

4.6 Editing Phone Number

1. Select **Menu→ Contacts**.

2. Select **View All** or **Find** to search for would-be edited record.

3. Scroll to the number you want to edit and press **OK key**.

4. Select **Options** to **Edit** number, and press **OK key**.

5. Press **Clear key** and press **number key** to erase and key in digit of phone number.

6. Press **OK key** twice and select **Save**. "Number Saved…" appears on the display.

4.7 Selecting Group

You can group the stored records into **Personal** and **Business**.

1. Select **Menu→ Contacts.**

2. Select **View All** or **Find** to search for would-be edited record in phone's memory, and press **OK key**.

3. Select **Classify Contact** and press **OK key**.

4. Select **Personal** or **Business** and press **OK key**. "Contact Saved…" appears on the display.

4.8 Setting Number Type

1. Select **Menu→ Contacts.**

2. Select **View All** or **Find** to search for would-be edited record in phone's memory and press **OK key.**

3. Select number, press **OK key**, and select **Number Type**

4. Select the type of number: **Work, Home, Mobile, Pager** or **Other** and press **OK key**.

4.9 Setting Speed Dial

In standby state, you can make a **Speed Dial** of stored number by keying in one or two-digit digit (2-99).

1. Select **Menu**→ **Contacts**

2. Select **View All** or **Find** to search for the record you want to set as speed dial number, press **OK key,** and then move to number in window, and press **OK key**.

3. Scroll to select **Add to Speed Dial** and press **OK key**.

4. Select an **Empty** slot in list.

5. Press **OK key**. "Contact added…" appears on the display.

4.10 Viewing and dialing Speed Dial

Viewing：

Select **Menu**→ **Contacts**→ **Speed Dial List,** all Speed Dial list indicated.

Dialing：

When you select one phone number in the **Speed Dial List**, you can press **Send Key** to dial. You can also make a call by entering speed dial number in the standby mode.

Method 1: Enter speed dial number, press **Send Key** to dial.

Method 2: Directly hold the Speed Dial Number digit key. If the

Speed Dial Number is one-digit, directly hold the digit key. If the Speed Dial Number is two-digit, press first digit key and then hold the second one. For example: If the Speed Dial Number is 25, you should press 2 key firstly, and then hold 5 key, thus it can dial directly.

Note: Some handset may not support method 1. Some handset support only one-digit speed dial number, some support both one-digit and two-digit speed dial number.

4.11 Memory Status

1. Select **Menu**→ **Contacts**→ **Memory Status**.

2. View the number of saved entries and maximum number of entries saved in phone and UIM card.

For example: 8/200, UIM Card: 4/150, indicating that 200 records entries in Max., out of which eight have be saved in phone. And 150 entries in Max., out of which four have been saved in UIM Card. Please consult with service supplier for storage capacity of UIM card.

4.12 Copying All Contacts

■ **Phone to UIM:** Copy all contacts of the phone's memory to UIM card

Note: This function can copy all the contract records to UIM card, and all the different records or numbers under the same name will be

copied accordingly to UIM card one by one as different records.

- **UIM to phone:** Copy all contacts in UIM card to the phone' memory.

    Note: This function can copy all the contract records to the phone's memory, and all the different records with same name will be copied accordingly to the phone's memory.

5 Messages

This is introduction of knowing how to send, receive and erase the messages in your phone.
Note：The function introduced hereinafter may differ with different service offered in your area. Please consult with your service provider for more detailed information.

5.1 Sending a New Message

Please consult with the service provider to support the network service of sending message. You can only send message to the mobile phone which can receive message.

1. Select **Menu**→ **Messages**→ **Create Message**.

2. Input the recipients' **Phone Number**

- Or -

Select phone number from **Contacts** (in pop-up display of number

input, press **OK key**, and **Left/ Right key** to scroll to **Contacts)**,

Numbers, and then press **OK key** to select the phone number you want

to send message to and press **OK key**.

3. Select **Continue** to **Write** message text. See "10. Character

Input" more instructions for writing text and character.

4. When you finish writing message, pressing **OK key** to select

message **Priority: Normal, Interactive, Urgent, Emergency**.

The default priority is **Normal**.

5. Select **Continue** and

Send, and press **OK key** to send message, or

Save, and press **OK key** to save message in **OutBox**.

Send To Multireceiver, and press **OK key** to send messages to

all the receivers. Scroll to **Add receiver**, inputting recipients see "5.2

Sending Messages" for details.

Note: The SMS centers of some cities and regions do not support

messages longer than 160 characters.

5.2 Sending Messages

You can send messages to grouped mobile phone which can

receive message meanwhile.

1. Select **Menu→ Messages→ Send To Multi**.

2. Select **Add receive**r, press **OK key** and key in **Phone Number**

- Or -

Select phone number from **Contacts** (in pop-up display of number

input, press **OK key** and **Left/ Right key** to scroll to **Contacts)**, press **OK key** and select all the phone numbers you want to send message to, and press **OK key**.
