

The mouse manual

1,(Dimensions)

Mouse	
Model No.	ZM-M520W
Length:	100.5mm
Width:	58mm
Height:	31mm
Weigh:	51g

2、 (Electrical specifications)

Operating Voltage:	DC 1.5V	Operating Current:	10mA
Mouse Type:	2.4G	Work frequency band	2403-2478Mhz
The working distance	8m	Group channels	16
Resolution:	1000/1600 DPI	Acceleration:	10G
Scanning Frequency:	3000fps	Speed:	28in/s
Battery Life:	Three months	Battery Spec:	AA*1

①	the left mouse button	②	the right mouse button
③	The middle mouse button	④	mouse CPI conversion key
⑤	Weak light	⑥	The power switch

The indicating lamp working state

Weak functional indicator	Low power state indicating lamp twinkle to 4HZ
DPI Function indicator	800DPI Slow flashing/1600DPI quick flashing
<p>FCC Certification Requirements Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -- Reorient or relocate the receiving antenna. -- Increase the separation between the equipment and receiver. -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -- Consult the dealer or an experienced radio/TV technician for help.</p>	
direction for use	
<p>a .Part: the mouse 1PCS receiver 1PCS AA cell 1PCS.</p> <p>b .The receiver is inserted into the USB interface of the computer, the computer will automatically install the driver.</p> <p>C . Open the battery cover of the mouse, the AA battery into the battery slot, and then loaded on the battery cover.</p> <p>D .The power switch to NO position, press the mouse button can be normal use.</p>
