4 Device Installation

Note

- The following figures are for reference only, please refer to the actual device for more details.
- Before installation, please make sure the installation surface can at least support 3x weight of the camera.

The device can adopt two types of installation mode which are desktop installation and ceiling mount. Please refer to Figure 4-1 for desktop installation.

Figure 4-1

For desktop installation, you just need to stick the device on the installation surface.

Please refer to Figure 4-2 for ceiling mount.

Figure 4-2

The exact installation steps are shown as follows:

Step 1

Dig holes on the proper installation surface according to the hole sites on the quick installation board.

Step 2

Knock the expansion bolts into the holes.

Step 3

Use self-tapping screws to fix the quick installation board well.

Step 4

Connect to device power.

Step 5

Adjust the monitoring angle and stick the device on the quick installation board.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

Attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment should be installed and operated with a minimum distance 20cm between the radiator and your body
