Paper Replacement

English

1. Replace the paper by pushing the switch on the printer to open the cover.

3. Place the paper roll into the printer and straightened the paper as shown in the picture above.

2. Take out the adjustable plate. Open the adjustable plate slightly, install the paper roll in the plate and close it.

Paper Replacement

1. Replace the paper by pushing the switch on the printer to open the cover.
2. Take out the adjustable plate. Open the adjustable plate slightly, install the paper roll in the plate and close it.
3. Place the paper roll into the printer and straightened the paper as shown in the picture above.

Attention

- ① Insert or pull out the charge cable gently to avoid any damages to the port.
- ② Pull out the cable after charging is complete.
- ③ Do not charge or use the printer in high temperature, high humidity, or foggy circumstances (e.g. in a bathroom, a steam room or beside a fire) which may be dangerous. (NOTE: This machine is not suitable for tropical environments)
- ④ Improper charging methods may cause damages to the print head.
- ⑤ Do not touch the print head in case of high temperature.
- ⑥ Be aware of the sharp blade.
- ⑦ If the operation of the printer fails, the printer can be reset by gently inserting the reset hole.

Phomemo official consumables types

Plain paper: With image retention up to 7 or 10 years.

Color paper: Include yellow, pink and blue paper... with image retention up to 5 years.

Sticker Paper: With sticky glue, with image retention up to 10 years.

Sticky Note: With back glue, can be pasted and taken off at any time.

Continuous label paper: With sticky glue, with no fixed size, can freely set the printing length.

* The paperroll is the special paper for the Phomemo.

* The guarantee policies can not be enjoyed if the Phomemo failure is produced because the paperroll is not used.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

***RF warning for Portable device:**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
