G4 technology provides superior performance and increased energy efficiency.

**Boiling** | **Chilled** | **Sparkling** | **Filtered** | **Instantly**

The new Zip HydroTap G4 is the most advanced, energy and time-saving product that provides instant filtered, boiling, chilled and sparkling drinking water all from one tap.

A photograph of a modern building's interior, featuring multiple levels with glass railings and walls made of vertical wooden slats. The lighting is warm, and the architecture is clean and contemporary.

# Est. 1962

**The iconic name in instant boiling water, Zip has been providing businesses with drinking water provisions for over half a century.**

# Why Zip?

Since its introduction over 10 years ago, Zip HydroTap has earned a reputation for unparalleled quality. The new G4 is so reliable that we've confidently extended our warranty to 5 years\*.

## History

Since its inception in Australia in 1962, Zip has been producing instant boiling water systems for both domestic and commercial use. Now a multinational company, with the taps being sold in over 70 countries, Zip's iconic red and white branding has become synonymous with hot water taps.

A wholly owned subsidiary was formed in 1991 to handle UK distribution, with customer service offices established in London, Birmingham, Manchester and Norfolk.

Today, Zip's wide range of taps can be found in workplaces all over the UK, ensuring convenient filtered boiling, chilled or even sparkling water at any time of the day.

## Technology

Our HydroTaps feature the very latest technology, meaning they do more than offer a convenient cup of tea or cold drink. The integrated new Zip 0.2 micron filtration system removes dirt and contaminants up to 25 times better than ever before. Even the taste and odour of chlorine is removed, but fluoride is retained, so the whole work force can enjoy crystal clear, great tasting water.

## Design

Since the development of the Zip HydroTap, its iconic robust design and function has stood testament to the Zip values of innovation and sustainability. Found in some of the most recognisable commercial buildings across the world, the HydroTap has become an integral part of working life.

\*Appliance warranty 24 months. Boiling tank warranty 60 months. See page 25 for more information.

## The Zip HydroTap® G4

# Functions & Features

The G4 range can be configured to suit your exact requirements offering any combination of boiling, chilled, sparkling or ambient filtered water, as well as hot and cold.

## HydroTap Provides

### Instant Boiling Water

No more waiting for the kettle to boil every time a member of staff makes a hot drink, the HydroTap G4 provides instant boiling water.

### Instant Chilled Water

Negating the need for a separate water cooler or costly bottled water, the HydroTap offers an unlimited supply of filtered chilled water.

### Sparkling Water

Crystal clear, filtered sparkling water is also available with the HydroTap G4. A perfect way to offer refreshment to staff and visitors.

### Hot and Cold Water

Hot and cold water delivered along with your combination of drinking water choice, all from a single tap. *Vented and non-vented models available, see pages 12-13.*

### Tap & Mixer (Hot and Cold Mixer Tap)

Hot and cold water delivered via a separate tap, requires a cold feed only. *See page 16-17 for our Multi-tap options.*

## G4 Technology – the world's most advanced

### Zip Power-Pulse

Electronic technology controls the set boiling temperature within 0.2°C and eliminates overboil.

### Filtration

Zip 0.2 micron filters remove chlorine taste and odour, lead and impurities as tiny as one five-thousandth of a millimetre.

### Instant delivery

Fingertip control for fast cup filling or hands free pot filling.

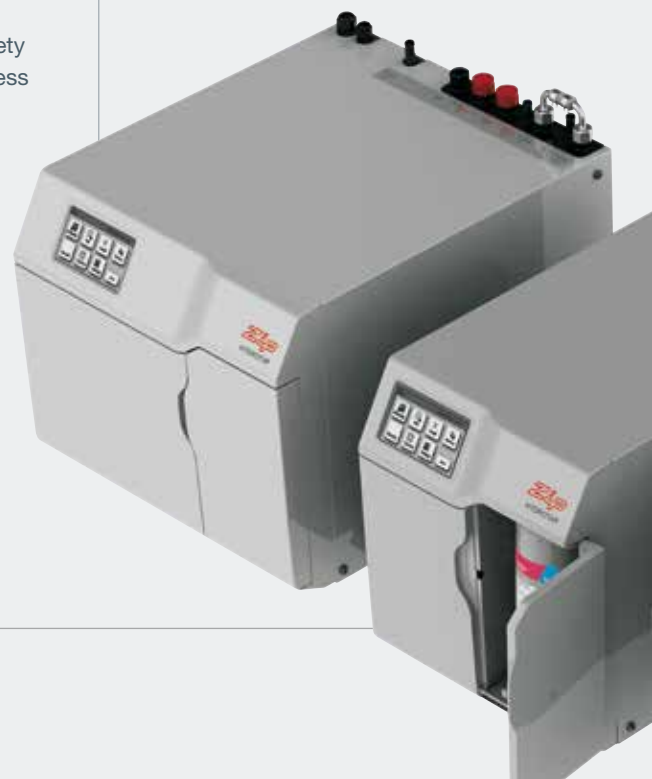

### Safety Features

Can be set to finger-thumb safety operation for boiling water access or boiling isolation mode for increased safety.

## Smarter Technology

Intelligent design coupled with new technology creates a low energy air-cooled ventilation system with superior performance and better environmental responsibility. The G4 is now even more energy efficient. Unlike water-cooled systems, the Zip HydroTap doesn't waste water.

## Energy Saving

We know that more and more businesses are setting themselves sustainability targets, and with the HydroTaps many energy saving features, you can be confident that it works with your environmental objectives.

- Power-Pulse™ technology controls power phasing precisely, minimising energy consumption and power costs.
- After two hours of non-use, the HydroTap either powers down to maintain boiling water at 64°C or hibernates – powers off completely.
- A programmable 24/7 weekly timer turns the power off during periods your kitchen is not in use.

## Healthier

It's a well-known fact that hydration boosts concentration, so having a Zip HydroTap in staff areas promotes healthier drinking because it is always on hand.

In addition, the new Zip 0.2-micron filters reduce chlorine taste and odour and filter out particles more than one fifth of a micron in size – 25 times finer than commonly used 5.0-micron filters. This is arguably the most advanced and most practical filtration system available anywhere in the world today.

## Leading the way

The new Zip G4 Command-Centre™ leads the world in time-saving energy technology.

## Selecting your perfect Zip HydroTap G4

It couldn't be simpler. Follow our step-by-step guide below to find the tap that meets your exact needs.

**1. Choose the functions.** Whether you want boiling, chilled or sparkling, or all three, there is a tap for you. In addition, decide on whether you want a single tap (G4 Classic or All-in-One) or two taps (Tap and Mixer).

**2. Decide what capacity you'll need to service your office.** Choose from a range of four sizes:

Boiling / Chilled*	Staff
100/75	Up to 25 staff
140/75	Up to 30 staff
160/175	Up to 50 staff
240/175	Up to 75 staff

\*Cups per hour.

**3. Select your finish from the options detailed on the next page.**

Our sales team can help ensure you specify the most efficient solution to match your requirements. Contact a member of our sales team on 0845 6 005 005 or visit us at [nowzipit.co.uk/commercial](http://nowzipit.co.uk/commercial) for more information.

## The Zip HydroTap® G4

# Tap Styles & Accessories

Depending on your requirements and specifications, we can provide the tap that suits your needs.

The classic G4 tap is perfect for areas that just require filtered drinking water and boiling water. It can be installed at a sink ( *i* ) or away from a sink with a font ( *ii* ). Minimal and iconic, it perfectly blends in with its surroundings.

For kitchen areas that also require a hot and cold mixer tap facility, the All-in-One model ( *vi* ) is the ideal solution, and means you only need to have one tap.

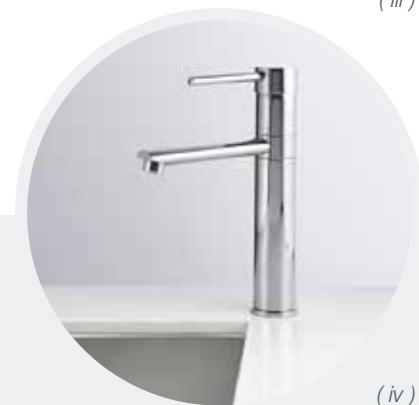

Multi-taps offer the user a solution where only a cold water feed is available – the Classic G4 tap and separate mixer tap provide hot and cold water plus any choice of drinking water provision available in the G4 range. Choose from three tap styles. ( *iii* ), ( *iv* ), ( *v* ) mixer tap options.

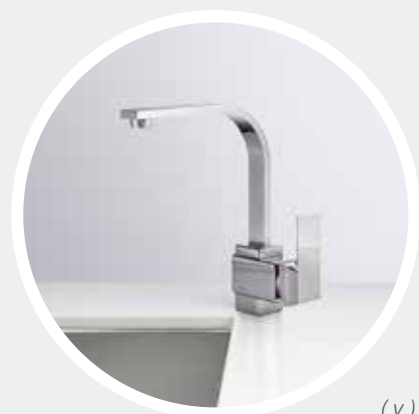

( *i* )

( *iii* )

( *iv* )

( *v* )

## No Sink Required

In an office building, there are many instances where a drinking water supply is needed and no sink is available. With the convenient font accessory, the HydroTap G4 can be situated anywhere.

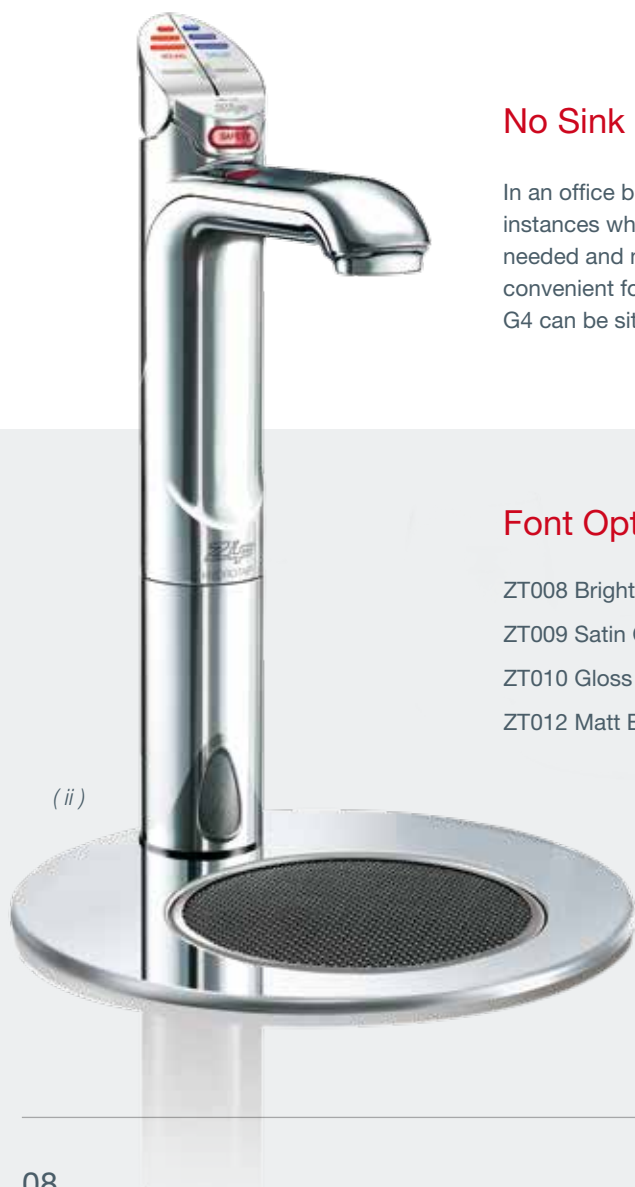

## Font Options

ZT008 Bright Chrome finish

ZT009 Satin Chrome finish

ZT010 Gloss Black finish

ZT012 Matt Black finish

( *ii* )

(vi) All-in-One

## Choice of Finish

Perfectly match your Zip HydroTap G4 to your office interior thanks to our range of finishes.

Bright Chrome

Satin Chrome

Gloss Black

Matt Black

## Scale Management

Recommended for use in hard water areas.

We offer a choice of three filters to control limescale and protect your Zip HydroTap. For initial installation each filter has a dedicated installation kit, which includes the head and all necessary push fit components.

### Choice of three filters:

- FL2300 G4 kit with one micron filtration for light commercial use.
- FL3600 G4 kit with one micron filtration for normal commercial use.
- FL6000 G4 kit PLUS with one micron filtration for heavy commercial use.

## Meeting DDA Requirements

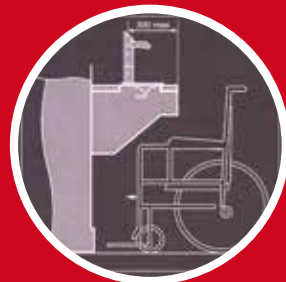

A number of our HydroTap G4 models can be adapted for users with limited mobility or impaired vision. For example, we can add oversize levers or Braille lever-covers. For example, we can add oversize levers or Braille lever-covers.

Braille Lever-Covers

Wheelchair Accessible

# The Zip HydroTap® G4 Classic

The Zip HydroTap G4 Classic combines the style of a single tap with a reliable filtered drinking water supply. Time-saving, energy-saving and healthy, no workplace is complete without it. Choose from boiling, boiling and chilled, or even boiling, chilled and sparkling for ultimate refreshment instantly on tap.

**Boiling** | **Chilled** | **Sparkling** | **Filtered** | **Instantly**

*Shown with optional font and drip tray.  
Accessory No. ZT008.*

# Zip HydroTap® G4 Classic Features

## Instant Boiling Water

No more waiting for the kettle to boil every time a member of staff makes a hot drink, the HydroTap G4 provides instant boiling water.

## Instant Chilled Water

Crystal-clear, great-tasting, chilled, filtered drinking water, always, on tap.

## Sparkling Water

Sparkling chilled, filtered water at a fraction of the cost of bottled water.

## Zip Filtration

0.2-micron filter brings you what is arguably the most advanced and most practical filtration system available anywhere in the world today.

## Zip Power-Pulse

Electronic technology controls the set boiling temperature within 0.2°C and eliminates overboil.

## Safety Features

Can be set to finger-thumb safety operation for boiling water access or boiling isolation mode for increased safety.

## Tap colour and lever options:

The HydroTap G4 has been developed to offer flexibility in its appearance as well as it's function.

The G4 has four finishes to choose from:

-  Gloss Black
-  Matt Black
-  Bright Chrome
-  Satin Chrome

Extended levers and braille covers only available with classic chrome HydroTap G4 models.

The beautiful light filled interior of London's iconic 'Blue Fin' building. IPC Media, the UK leading magazine publishers have installed several Zip HydroTaps to deliver boiling, chilled and sparkling water to office kitchens and demonstration areas.

# The Zip HydroTap® G4 All-in-One

Zip HydroTap G4 All-in-One will change the way workplace kitchens are planned and used. In addition to all the benefits of the classic Zip HydroTap, the G4 All-in-One has a single 120-degree swivel tap.

The All-in-One can be centrally mounted on a double bowl sink where it serves as a hot and cold water mixer tap and also delivers boiling, chilled and sparkling filtered drinking water instantly. All at a fraction of the cost of bottled water. Perfect for kitchens with only a cold water supply (vented models) or both hot and cold water supply (non-vented models), it's the only single-solution tap your office kitchen will ever need.

**Boiling** | **Chilled** | **Sparkling** | **Hot & Cold** | **Filtered** | **Instantly**

*Inset Image: 120° swivel top section allows the G4 All-in-One to be positioned between two sinks.*

## PwC Case Study

PricewaterhouseCoopers is one of the world's largest professional services firms with 30 offices throughout the UK.

“After installing a Zip HydroTap in one location, news of the improved facility spread quickly and they now form part of our rolling refurbishment programme with over 50 units already in place. As well as our refurbishments, HydroTaps are also being installed in our newly built central London locations. Here, energy efficiency and aesthetics are key and Zip's products meet the criteria perfectly.”

Jon Barnes, Head of Building and Facilities Services for PricewaterhouseCoopers

The Zip G4 All-in-One offers a full service single tap solution perfect for uncluttered interiors and smaller functional spaces.

# Zip Taps of London

Zip HydroTaps are already installed in the Gherkin, Blue Fin Building, Heron Tower, the London Television Centre, the Treasury, the Shard and the British Museum. If every office in the capital switched to using such a system – a reduction in London's CO2 emissions of up to 35,000 tons per year\* could be achieved. Here are just some of the existing HydroTap installations across London.

# The Zip HydroTap® G4 & Mixer Tap

Designed for situations with only a cold water supply. Perfect for workplace kitchens that require a mixer tap and a separate Zip HydroTap in the same area.

Enables hot and cold water from the mixer tap – with boiling, chilled and sparkling filtered drinking water from the Zip HydroTap G4. The HydroTap G4 & Mixer Tap has the ability to deliver five kinds of water supply from the two separate taps. Offers all of the advantages of a standard HydroTap plus these additional four benefits:

Provides hot water at up to 50° to the mixer tap (supplied) and either boiling, chilled and sparkling (5-in-1), or boiling and chilled (4-in-1), or boiling and ambient (3-in-1) to the HydroTap.

**Boiling** | **Chilled** | **Sparkling** | **Filtered** | **Tap & Mixer** | **Instantly**

*Above: Zip G4 HydroTap shown with classic mixer tap, positioned over a double sink.*

# Zip HydroTap® G4 & Mixer Tap Features

# The Zip HydroTap® G4 Industrial Models

The safe and robust HydroTap G4 industrial model has been specifically developed for use within industrial areas or correctional facilities, and offers all the benefits of a standard G4 model but with safety and security in mind.

Offers all the advantages of a standard HydroTap plus these additional benefits:

- Super strong tapered shank anchor (side touch models)
- Damage resistant side or top touch buttons
- Simple 2-button without safety lock
- Optional 3-button with safety lock
- Can be installed R/H or L/H
- Side touch variant (primarily for use in high security locations, such as prisons) has a high strength tapered base which fastens to an undersink clamp block with a reinforcing spine.

**Boiling** | **Chilled** | **Filtered** | **Instantly**

For more configurations of the Zip HydroTap Correctional & Industrial please see page 27.

# You're in good company

**In a commercial kitchen, office  
breakout area, medical facility or  
school canteen, Zip taps are  
unsurpassed in their adaptability.**

---

*Zip HydroTaps feature  
in London's iconic  
'Blue Fin' building.*

# Zip appliances work harder

**The G4's low energy, air-cooled  
ventilation system reduces standby  
energy consumption by up to 51%  
over the previous models.**

## Specify Zip

As a company wanting to stand out from the crowd, you have to specify the best. Zip HydroTap creates the right impression from the outset. Add to this the positive impact on employees' working lives and overall energy cost savings achieved with the new G4, and it is clear that the HydroTap range will continue to pay dividends for years to come.

## Flexibility

The taps are suitable for both large-scale office blocks through to schools, hospitals and factory buildings. All materials involved in the manufacture of the G4 comply with European Restriction of Hazardous Substances Directive and meets the Living Buildings Challenge. All our HydroTap G4 products are RoHS & Red List Compliant.

## Style as well as substance

The HydroTap G4 combines market-leading technology with sleek design, meaning you'll never have to compromise on aesthetics.

## Simplicity

Fit-out specialists and installers will want to know that the Zip HydroTaps can be fitted just about anywhere, with or without a sink – thanks to the optional font kit. With connection points at the rear, neat installation of the command centre is simpler than ever.

### ITV Case Study

As part of its refurbishment programme ITV wanted a straight-forward, energy-efficient and more compact solution to provide a wide range of drinks for guests getting ready for shows such as This Morning and Daybreak, as well as for busy staff and those eating in the restaurants.

itv

## BIM Library - Industry Leaders

Zip have set new standards in the industry by becoming the first company within its sector to launch a fully populated BIM Library. Our BIM files help Architects, Contractors and Facilities Managers speed up the design and management process when HydroTaps are specified.

*Shown with optional font and drip tray.  
Accessory No. ZT008.*

## Instant pure water any way you want

The new Zip 0.2-micron filters ensure you have access to the purest water possible. Water is essential for the body's well-being and healthy adults need between one and a half and three litres a day. With the HydroTap G4 you are providing a clean, safe supply of drinking water to keep staff healthy.

## Efficiency

The super-stylish, energy-efficient HydroTap G4 from Zip is the latest evolution of Zip's instant boiling and chilled filtered water system, delivering tomorrow's technology today.

The HydroTap G4 stamps out water wastage and includes a number of intelligent energy-saving features.

## Environment

The Zip HydroTap G4 is ideal for architects, specifiers and facilities managers looking to cut energy wastage and provide effective, healthier refreshment.

The HydroTap G4 is the most energy efficient and environmentally responsible product in the market; a factor which is becoming increasingly important to environmentally conscious businesses.

*Left: The exterior that provides the name. London's 'Blue Fin' building.*

# Reputation

Zip remains the world leader in instant boiling water, setting the pace in time-saving, energy-saving, water-conserving and user-safety technology.

Supported by the largest national company-owned installation and service team in our industry, you will enjoy peace of mind when you choose Zip HydroTap G4.

# Compact

Space-saving is key, so whether you're a busy catering kitchen or a small business, you can rest-assured that our under-sink units for the G4 range are more compact than ever.

# Approvals

RoHS Compliant. All materials involved in Zip HydroTap manufacture comply with the European Restriction of Hazardous Substances Directive 2011/65/EC.

Red List Compliant. Designed to meet the sustainable initiatives of the Living Building Challenge by eliminating prohibited materials shown on the LBC Red List.

Zip HydroTap G4 range of undersink units are all WRAS Approved.

## IPC Media Case Study

The UK's leading magazine publisher, IPC Media, has moved to a new and exciting building in London's Southwark, dubbed 'The Blue Fin'. One of the many features is the installation of 2000 blue aluminium fins adorning the exterior, keeping the interior spaces cool behind the building's glass façade.

Architects Allies and Morrison, Bennett Interior (interior architect) and ISG (fit-out contractor) aimed for the highest design standards and the latest technology in every aspect of the exterior and interior.

The light-filled offices have been tailored to meet the demands of personnel responsible for the production of 70 magazines and websites, including the international wine bible – Decanter. Their offices include a dining room and wine store, with a kitchen featuring a Zip HydroTap, dispensing both boiling and chilled filtered water, instantly.

# Installation, Service & Training

For ongoing peace of mind, we provide prompt service in any location thanks to our team of national fully trained, directly employed service engineers.

## Zip Installation

Easy installation and full support is what we pride ourselves on. We supply detailed installation guides and step-by-step information so your HydroTap is installed quickly, easily and with minimal disruption.

## Servicing & Maintenance

While we have every confidence that your Zip product will offer years of low-maintenance drinking water, there are some important things that need doing to ensure this.

For ongoing peace of mind, we provide a national team of fully trained, directly employed engineers.

## Training

Zip's experienced team of Training Managers offer bespoke product training geared to the needs of Installers, Specifiers and Facility Managers.

These 'hands on' sessions typically take place on site, or in one of Zip's specially designed training centres, covering all relevant product installation, servicing and maintenance issues.

**We have a large team of fully-trained Zip field support staff covering the UK, with over 58 engineers.**

**We believe our response times are the best in the industry, with same-day\* call-out in London if you call us before midday.**

\*Response times for other areas will vary.

## Warranty & Rental

The Zip HydroTap G4 models featured in this brochure are covered by a comprehensive full parts and labour warranty. We also offer a straightforward rental option.

### Our Warranty

For peace of mind, the Zip HydroTap G4 models featured in this brochure are covered by a comprehensive full parts and labour warranty for 24 months from date of purchase. A further 36 months boiling tank warranty is included. Visit [www.nowzipit.co.uk/commercial](http://www.nowzipit.co.uk/commercial) to find out more.

### Rental Options

Zip rental plans help you conserve your capital and make it easy for you to keep your facilities up to date. We can offer you an all-inclusive rental plan for both the equipment and associated service and maintenance, all for a fixed regular payment – with various options at the end of your contract. Contact us for a tailored quote on 0845 6 005 005.

### Interested in finding out more?
