

SAFETY PRECAUTIONS

Please read the following safety guidelines before using the device.

- Do not use the phone while you are driving.
- Do not place magnetic storage media near your phone. Radiation from the phone may erase the information stored on them.
- Keep your phone and its accessories away from children.
- Mobile phones can interfere with the functioning of medical devices such as hearing aids or pacemakers. People having active medical implants should keep their cell phone at least 15 cm away from the implant.
- Permanent hearing loss may occur if you use earphones or headphones at high volume.
- Use a wireless hands-free system (headphone/ headset) with a low power Bluetooth emitter.
- Keep your calls short or send a text message (SMS) instead. This advice applies specially to children adolescents and pregnant women.
- Use cell phone when the signal quality is good.

NOTICE

Do not dismantle the device or accessories otherwise, manufacturer is not liable to pay for damages as the device and accessories are not covered by warranty.

Use only original batteries and charging devices. Please back up your important data timely and keep them properly. The company is not liable for any failure to call or loss of data due to mis-operation, poor signal or power cut, etc. All the screens in this manual are for reference only, and some contents actually displayed may depend upon the presetting of the service provider or the network operator, or the SIM card. If any functions referred to in this manual are different from those of your device, please follow your device. Do not put use it in a place with flammable gas such as a petrol pumps. The temperature recommended for using the device is 5-35°C. Do not tap the charger, power cable or socket with wet hands. This may cause an electric shock.

 If your phone or any of its accessories do not function normally, then please visit your nearest authorized service facility. The qualified personnel will assist you, and if necessary, will arrange for the service.

WHAT'S IN THE BOX?

Your package comes with the following items. If any of these is missing, please contact your retailer.

- **Device**
- **USB Cable**
- **Adapter**
- **User's Manual**
- **Headset**
- **Battery**
- **Warranty Card**

1. UNDERSTANDING YOUR DEVICE

1.1 GENERAL INFO

S811-S58-AX600 is a dual SIM phone that encloses features, such as Android version 4.4.2, Wi-Fi, DUAL Core 1 GHz Processor, The back camera is 3.0 by software megapixels and front camera is 2.0 by software. This phone is provided with one SIM slots

1.2 DEVICE OVER VIEW

LCD: 3.5 inches, TFT LCD, 320*480,

Buttons: [Home], [Menu], [Back]

Keys: [Power], [Volume].

Right Ports: Earphone port.

Left port: USB port.

2. GETTING STARTED

2.1 INSTALLING CARDS & BATTERY

Please switch off your device before inserting or removing the battery/SIM card or memory card.

Remove & Installing Battery

- Hold the device with the front facing downwards; pull the battery cover.
- Upload the battery according to the arrow direction shown.
- Point the battery contacts slots onto the contacts of the compartment, and then tap down the battery bottom.
- Push the battery cover until it taps into place.

Installing SIM Card

Your device is provided with two SIM slots for two different SIM cards. In order to install SIM card in the device, please follow the steps mentioned below:

- Switch off your device.
- Remove the battery cover and battery.
- Insert the SIM cards in the device.
- Attach the battery.
- Push the battery cover until it taps into place.

Installing Memory Card

Your device supports T-Flash card, which is expanded to the maximum of 32G. The T-flash card is small and should be pulled out and installed carefully and prudently in order to avoid any kind of damage. Please follow the steps mentioned below to install the memory card in the device:

- Switch off your device.
- Remove the battery cover and battery.
- Slide the T-Flash card into the slot.
- Attach the battery.
- Push the battery cover until it taps into place.

Charging the Battery

The device prompts a warning tone and message stating insufficient battery when the battery power is low.

Please follow the instructions mentioned below to charge your device:

- Plug the connector of the charger into the jack of the device.
- Plug the charger into a standard AC wall outlet.

Charging 

Full charged 

You must fully charge the battery before using the device for the first time. It is recommended to charge the battery for three hours before using the device for the first time.

2.2 POWERING ON /OFF

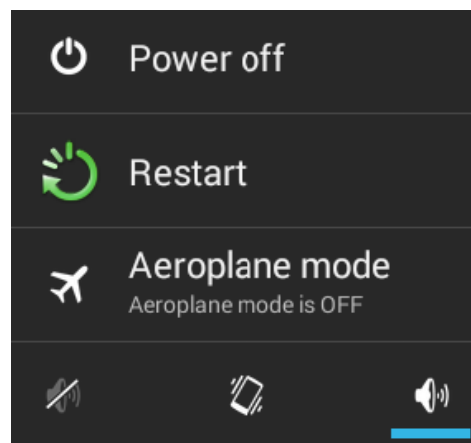

Power On

After installing the SIM cards and charging the battery, you are now ready to turn on your device.

- In power-off state, long press **[Power]** Key to turn on the device.
- After playing the power-on Logo and the ring, the system goes into the idle state.
- Drag the lock button rightwards to unlock the screen.
- If the screen turns off, then tap the **[Power]** Key to lighten LCD.

Power Off

- In power-on state, long press and hold the **[Power]** Key for 5 seconds.
- A pop-up window appears, select Power off.
- Select OK to confirm.

Automatic Customer Registration

After 4 hours of usage a SMS from the device will be sent automatically for the customer registration.

- ☛ Standard SMS charges apply.

3. BASIC OPERATIONS

3.1 CALLING

Make Calls

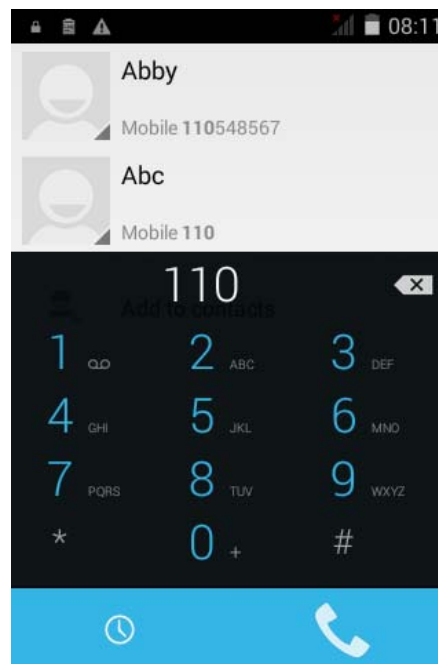

If the icon  /  appears on the screen, then you can make or receive calls. To make a call, please follow the steps mentioned below:

Enter the Main Menu, select 
Enter the phone number using the on-screen keyboard.

Tap  to erase a wrong number. Tap and hold it to erase the entire number.

After entering phone number, tap  to make a call by Master SIM or Slave SIM.

To end the call, tap 

Answer/Reject an Incoming Call

When you receive an incoming call, a notification message appears on the screen. In order to accept the call, drag  towards right. If you wish to reject the call, drag  towards left.

Put a call on hold

If you activate “Call waiting” for Master SIM or Slave SIM, during a call conversation, another call comes in, you can operate:

- Hold call: Select Hold to put the first call on hold.
- Unhold call: Select Unhold to unhold this call.

Developer options

You can activate/deactivate USB debugging and operate other user interface settings.

About Phone

You can check Status or Battery Use or Legal information or Manufacture or Model No. or Android Version or Baseband Version or Kernel Version or Build No., etc.

8. APPLICATIONS & UTILITIES

For your entertainment purpose, your device is provided with several interesting games, applications and utilities. Please ensure that you have GPRS setting in your device to access the applications. Contact your operator for GPRS settings. Such as Gmail for using Google's web-based email service; Google Search for finding anything anywhere with Google Search; Local for discovering nearby places you'll love; Latitude & Maps for searching places of interest; Browser and Opera mini for browsing website; C Live, C Games and Play store for finding and downloading applications and fun games; Navigation for helping you drive; My to check all relevant applications.

Tips: With connection to Wi-Fi network, this application can run normally, too.

9. SPECIFICATIONS

Screen (WVGA)	3.5" HVGA
Battery	1250mAh
Dimensions	118.6*62.8*10.2
Weight	100g
Band	GSM: 850/900/1800/1900 WCDMA: 850/1900
Standby Time	400h
Maximum Talk Time	4.8h (GSM) , 2.5(WCDMA)
Power Adapter	Input: 100-240V/750mAh

Tips: The standby time and maximum talk time depend upon the network signals and settings.

10. ROHS DECLARATION

Declaration of Conformity with the requirements of the e-waste Management Rules, 2011 (adopted by Notification S.O.1035 (E) of Ministry of Environment and Forests)

The Product is in conformity with the requirements of Rule 13 of the e-waste Rules. The content of hazardous substance with the exemption of the applications listed in SCHEDULE II of the e-waste Rules:

1. Lead (Pb) – not over 0.1% by weight;
2. Cadmium (Cd) – not over 0.01% by weight;
3. Mercury (Hg) – not over 0.1% by weight;
4. Hexavalent chromium (Cr6+) – not over 0.1% by weight;
5. Polybrominated biphenyls (PBBs) – not over 0.1% by weight;
6. Polybrominated diphenyl ethers (PBDEs) – not over 0.1% by weight.

FCC Caution.

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This mobile phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: AX600/AX630(FCC ID: ZSW-30-009) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.59W/kg and when properly worn on the body is 1.34W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.0cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.0cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.0 cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
