

# Remediation in ATI

**FOLLOW THESE INSTRUCTIONS TO ACCESS  
THE ATI REMEDIATION TUTORIALS  
DESIGNED TO HELP YOU MASTER CONTENT**

# Remediation

- Remediation is required of all students who do not meet performance standards on practice assessments and/or proctored assessments
- Remediation is encouraged for all students regardless of their performance in order to increase their mastery of topics covered on practice and proctored assessments

Here is your focused review page with basic instructions

Welcome - the ability to create a Focused Review is right at your fingertips! With this unique tool you can target remediation for the assessment you have selected.

To view any item on the left side of this page, click on that item name and your options will appear. It will be helpful for you to remember what the icons represent.

## Legend:

-  - is a printable document
-  - is a web page or video content

The printable documents in this review can be combined into a single document for your convenience. Click the checkboxes next to the printable to be included, click on the Export button at the bottom of the left-hand pane, and the system will create a single Adobe Acrobat PDF<sup>®</sup> file.

Pieces of content may apply to more than one area of study, the Resource view can be changed by clicking on the "view by:" option at the top of the left-hand pane.

When you have finished creating your Focused Review, just click on the close button; you will be redirected back to the tool that you originally used to create the review.

Clinical Judgment/Critical Thinking in Nursing

1. Making Clinical Judgments

## Making Clinical Judgments

- FOUNDATIONAL THINKING SKILLS**
- Signs and symptoms
  - Normal and expected laboratory values
  - Risk factors/complications
  - Nursing interventions
  - Side effects of medications

- CRITICAL THINKING SKILLS**
- Additional data
  - Inferences
  - Examination of alternative solutions
  - Determining a plan of action
  - Analyzing new information
  - Prioritizing interventions
  - Identifying a desired outcome
  - Choosing the correct/highest priority action
  - Identifying a potential risk or complication
  - Comparing/contrasting elements of a situation/concept
  - Recognizing need for intervention
  - Performing mathematical calculations
  - Calculating correct dosages

Click on a circle, and you will get a video or slides

Media player controls: Play/Pause, Previous, Next, Progress bar, Subtitles (Subs)

Nursing requires the application of knowledge from the physical and social sciences,

## LEGAL RESPONSIBILITIES chapter 4

UNIT 1	SAFE, EFFECTIVE CARE ENVIRONMENT
Section	Management of Care
Chapter 4	Legal Responsibilities

### Overview

- In order to be safe practitioners, nurses must understand the legal aspects of the nursing profession.
- Understanding the laws governing nursing practice allows nurses to protect clients' rights

Click on the chapter and you will get a review document with the topics you need to review

accordance with the various sources of law nurses know and comply with these laws. By nurses are able to:

- Discern the responsibilities of nursing in relationship to the responsibilities of other members of the health care team.
- Provide safe, competent care that is consistent with standards of care.

Sources of Law

# Review

- You may be required to complete remediation before attempting the next exam whether it is a practice exam or a proctored exam
- You may also be required to complete other remediation activities
- Referral for a proctored exam will depend on how well you demonstrate mastery of the topics
