User Manual

Caution

» Congratulations on your new smart table top. Please read the user manual carefully before using the unit. Then operate it properly.
 » This apparatus is supposed to be connected with AC 100V-240V power supply.
 » The unit should be powered off before unplugging it.
 » Do not touch the sockets at any time, it may cause a electricity shock.
 » Do not pull the silicon cover of the power supply too hard, it may cause a damage to the product.
 » Ensure the apparatus is installed stably.
 » The apparatus is for in door use only.
 » Do not used in extreme environment.
 » Do not place the apparatus in sunlight exposure or near heat source.
 » Do not try to take any components away off the apparatus because there is not useless component and it may cause electricity shock.
 » Children under 13 years old should use it under adults' supervision.
 » Never try to repair this product by yourself as it may cause a void warranty. Please contact with the store or customer service for help if problem occurs.
 » This apparatus might be updated as technology & system upgraded. The corresponding revision of the manual will not notify specially.
» FCC Caution:
 Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
 This equipment should be installed and operated with minimum Do not pull the silicon cover of the power supply too hard, it may distance 20 cm between the radiator and your body.
 This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 (1) This device may not cause harmful interference, and
 (2) this device must accept any interference received, including interference that may cause undesired operation.
 This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.
» NOTE:
 This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
 supply.
 However, there is no guarantee that interference will not occur in a

particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
