Intro- (Thank you for purchasing)

Thank you for purchasing the eero PoE 6. This User Manual is designed to take you through installation and setup. It also includes warranty terms, compliance and returns information.

Package contents (Hardware, brackets, screws, etc)

- 1 eero PoE 6
 - 1 mounting bracket
 - Mounting accessories
-

Installation requirements (screwdriver, drill, etc)

- 1 Phillips head screwdriver
 - 1 Drill and drill bits
-

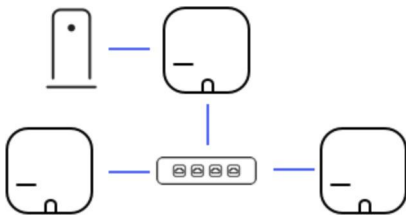

System requirements (Android/MacOS)

Internet connection, modem, Ethernet cable, and smartphone.

eero PoE 6 is powered via PoE (802.3af/at/bt) power sourcing equipment or an eero 15 W USB-C external power supply unit (sold separately).

Recommended network topology

If you have a PoE switch, we recommend connecting it to the outer port (marked “2.5”) which is the preferred WAN port and the PoE input. From there, connect additional eero nodes to powered Ethernet ports, keeping in mind each eero PoE 6 device requires 15.4 W of power budget at the output of a PoE PSE that doesn't support LLDP, and less if LLDP is supported. Once plugged in, proceed to add the nodes through the eero App.

If you plan on using this network in bridge mode, please make sure there is a single eero connected between the router and downstream switch as pictured above.

Hardware overview LEDs (colors, blinking, etc)

LED Color	What it Means
● No Light	eero doesn't have power
● Blinking White	eero software starting up / connecting to the Internet
● Blinking Blue	Broadcasting Bluetooth
● Solid Blue	The eero app is connected to your eero and is setting up
● Blinking Green	Multiple eeros detected
● Blinking Yellow	The unit is not receiving sufficient power
● Solid White	eero is connected to the Internet
● Solid Red	eero is not connected to the Internet

Hardware installation

eero PoE 6 devices were designed to be mounted on walls and ceilings for standard use. Installation is meant to be fixed, given the included screws and drywall anchors shipped with each unit.

Screw and Wall Anchor Mounting:

Included with your eero PoE 6 unit(s) should be a pack of #8 Phillips head screws and plastic drywall anchors.

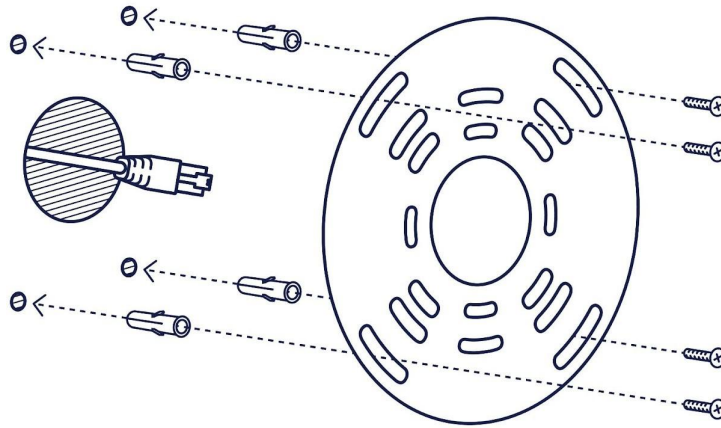

- You will need to pre-drill 6mm pilot holes for the installation of the plastic drywall anchors
- Please see the diagram below to determine placement and screws to use for your installation.

Cabling for Power/PoE

Try to avoid orienting your eero PoE 6 such that power and or ethernet cable lay over the top of the unit or in between the eero PoE 6 unit and the installation site.

- Power your device either by plugging in an Ethernet cable connected to PoE power sourcing equipment into the 2.5 Gbps port **OR** by plugging the cable from a 15 W external power supply unit into the USB-C port.
 - See the following images for recommended cable routing for wall installation.

Creating a new account and a new network

For this installation, we'll need you to create an eero account separate from your existing Professional Installer account. If you already have a personal account, you can skip this step.

Step 1:

Download the eero app for iOS or Android:

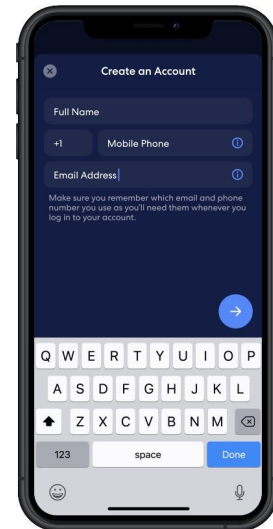

Download the free eero app – you can find it on the Apple App Store or Google Play. eero supports both iOS and Android.

You will not be able to set up your system on a web browser.

Step 2:

Create an eero account

To begin setting up your new eero network, you will need an eero account first. You will need to enter your phone number and email address. By default, we'll send a verification code to your email address, but you can opt to receive it via text message instead. Enter this code on the verification screen of the app to create your account.

If you have an existing professional installer account and need to create a separate, non-installer account, please logout of your current account from the eero App. This can be done from Settings -> Account -> Logout

Once logged out of your professional installer account, please select the option to create a new account. Use an email address and phone number not affiliated with your professional installer account as the account credentials.

Replacing an existing network

To replace an existing network, open the eero App and tap the blue plus sign located on the top right corner of the home screen, then select “Add or Replace eero Devices.” It’s recommended to start with replacing non-gateway nodes first, simply follow in-app instructions replacing each node. Once all non-gateway nodes have been replaced, proceed to replace the Gateway eero.

When replacing the Gateway eero, we recommended unplugging your modem from power for 2 minutes to prevent potential issues with obtaining an IP address. Additionally, make sure the Gateway eero is plugged directly into your ISP connection, do not place a switch between the Gateway and the Modem or ONT, even if planning to use the network in bridge mode.

GARANTIE LIMITÉE

eero LLC (« eero ») garantit à l'acheteur initial d'un appareil eero (« Produit ») sur Amazon.com, eero.com ou auprès d'un revendeur agréé eero, que le Produit sera exempt de défauts de matériaux et de fabrication dans des conditions normales d'utilisation pendant une période de un (1) an à compter de la date d'achat au détail par l'acheteur initial auprès d'un revendeur agréé (a) pour les Produits neufs et non ouverts, ou (b) pour les Produits remis à neuf en usine approuvés par eero (le cas échéant, la « Période de garantie »).

1. Recours

Si un défaut matériel survient et qu'une réclamation valable est reçue par eero pendant la Période de garantie, eero remplacera le Produit d'origine défectueux (le « Produit d'origine ») par un Produit de remplacement neuf ou remis à neuf, dont la version sera identique ou ultérieure à celle du Produit (« Produit de remplacement »). Si eero, à sa seule discrétion, détermine qu'il n'est pas raisonnable de remplacer le Produit défectueux, eero pourra vous rembourser le prix d'achat payé pour le Produit d'origine. En cas de défaut, dans la mesure permise par la loi, il s'agit de votre recours unique et exclusif. La présente Garantie limitée est valable uniquement dans les pays où les Produits sont vendus par Amazon.com, eero lui-même ou par l'intermédiaire d'un revendeur ou d'un agent agréé, et est valable dans la mesure permise par les lois en vigueur desdits pays. Tout

Produit de remplacement sera garanti pour la durée restante de la Période de garantie initiale ou trente (30) jours, la durée la plus longue étant retenue, ou pendant la période supplémentaire pouvant être prévue par la législation en vigueur dans votre pays.

2. Comment bénéficier du service de garantie

Pour bénéficier du service de garantie, vous devez communiquer avec notre équipe de service client à l'aide des coordonnées indiquées sur notre site Web à l'adresse **eero.com** ou par courriel à l'adresse **support@eero.com** afin d'obtenir une autorisation de retour de marchandise (« ARM »). eero, à son entière discrétion, peut choisir d'expédier votre ou vos Produits de remplacement avant de recevoir votre Produit d'origine, et **vous devez renvoyer votre ou vos Produits d'origine à eero dans les 30 jours suivant la réception d'une ARM de la part d'eero.** Le ou les Produits de remplacement ne vous seront pas facturés à condition (i) que vous nous renvoyiez le ou les Produits d'origine avant ou dans les 30 jours suivant la date d'expédition de votre demande de Produit de remplacement, et (ii) que le problème que vous avez signalé concernant le ou les Produits d'origine soit couvert par les modalités de la présente Garantie limitée.

Si eero ne reçoit pas le ou les Produits d'origine dans les 30 jours suivant la date d'expédition de votre demande de Produit de remplacement, ou si eero détermine que le problème lié à votre ou vos Produits d'origine n'est pas couvert par la présente Garantie limitée, eero imputera les frais d'expédition du ou des Produits de remplacement, les coûts des étiquettes d'expédition prépayée qui vous ont été envoyées au préalable par courriel, ainsi que le prix standard alors en vigueur pour le ou les Produits de remplacement concernés à votre carte de crédit ou au mode de paiement initial utilisé lors de votre commande initiale. Si eero n'a pas accès à vos renseignements de paiement antérieur, eero vous enverra une facture du montant du.

Tous les Produits d'origine doivent être renvoyés à l'adresse indiquée par eero dans leur emballage d'origine ou dans un emballage assurant un degré de protection équivalent, accompagnés d'une preuve d'achat. Pour un envoi réussi, vous devez renvoyer le ou les Produits d'origine à l'aide de l'étiquette de retour prépayé qui vous a été fournie par eero. Il est de votre responsabilité de conserver un exemplaire de l'étiquette d'expédition avec le numéro de suivi attribué par un mandataire du transporteur comme preuve que la possession du Produit d'origine renvoyé a été transférée au transporteur. En envoyant le ou les Produits d'origine à eero, vous acceptez de transférer la propriété du ou des Produits d'origine à eero.

Si votre réclamation est valable en vertu de la présente Garantie limitée, eero assumera les frais d'expédition liés au renvoi du Produit d'origine et à l'expédition du Produit de remplacement. Tout Produit renvoyé à eero sans réclamation valable au titre de la garantie ou sans ARM peut être rejeté, vous être renvoyé à vos frais (sous réserve de prépaiement) ou conservé pendant 30 jours pour que vous puissiez le récupérer, puis mis au rebut à la seule discrétion de eero.
