**Frog Sensor and Wireless Link 915 MHz
User Guide**

Frogparking Limited
36 Victoria Avenue
Palmerston North
www.frogparking.com

1. Introduction

The Frog Sensor and Wireless Link are designed to operate without human interaction directly. Management of the system is via the web interface using an external computer, its browser and the internet. Connection to the Frog Parking management servers requires a login to ensure only valid users are able to access the information provided, and only Administrators of the system are able to manage system configuration.

Because of this, the requirement for a user manual for the Frog Sensor and Wireless Link has not been found to be required. An installation guide has been completed, as this is the most common human interaction with the two units.

2. FCC Compliance

Label Statements:

The Installation Guide contains the following statements in lieu of them being included on the device labels.

Frog Sensor and Wireless Link:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Warning: Changes or modifications not expressly approved by Frogparking Ltd could void the user's authority to operate the equipment.
