

## ***Thank you for using Beetle***

The Beetle (BA-100) wireless locator is a simple locate tag which connects to your Apple® iOS device. The Beetle will send an alert to your Apple® iOS device once your child, purse, etc. gets out of communication range.

### ***App installation :***

To begin installation of our Beetle app, scan the QR code to the right which will take you to Apple® App Store for the download.

### ***Device and App user guide :***

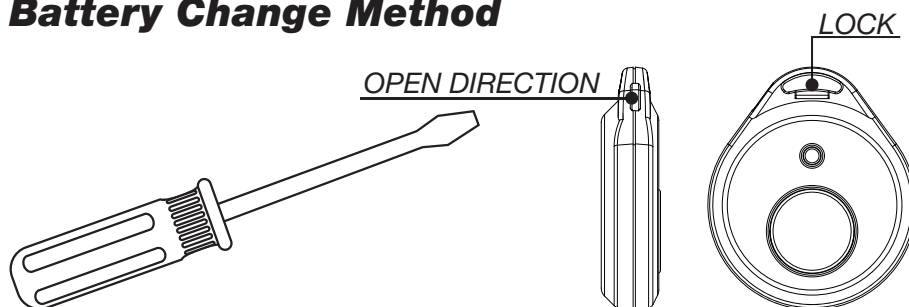

**Step 1 :** If this is the first time using the device, make sure the included coin cell battery is installed with the positive (+) side up.

**Step 2 :** After installing the Beetle app with the included instructions listed above, locate the Beetle app on your Apple® iOS device and open the Beetle App.

**Step 3 :** To begin pairing your Beetle tag, place your Beetle tag near your Apple® iOS device.

**Step 4 :** When starting the Beetle app, your Apple® iOS device will pair up with your Beetle tag automatically. Congratulations, now you are paired with your Beetle tag and are ready to receive alerts when the Beetle tag and your Apple® iOS device are out of communication range.

### ***Battery Change Method***
