2. HEADSET OVERVIEW

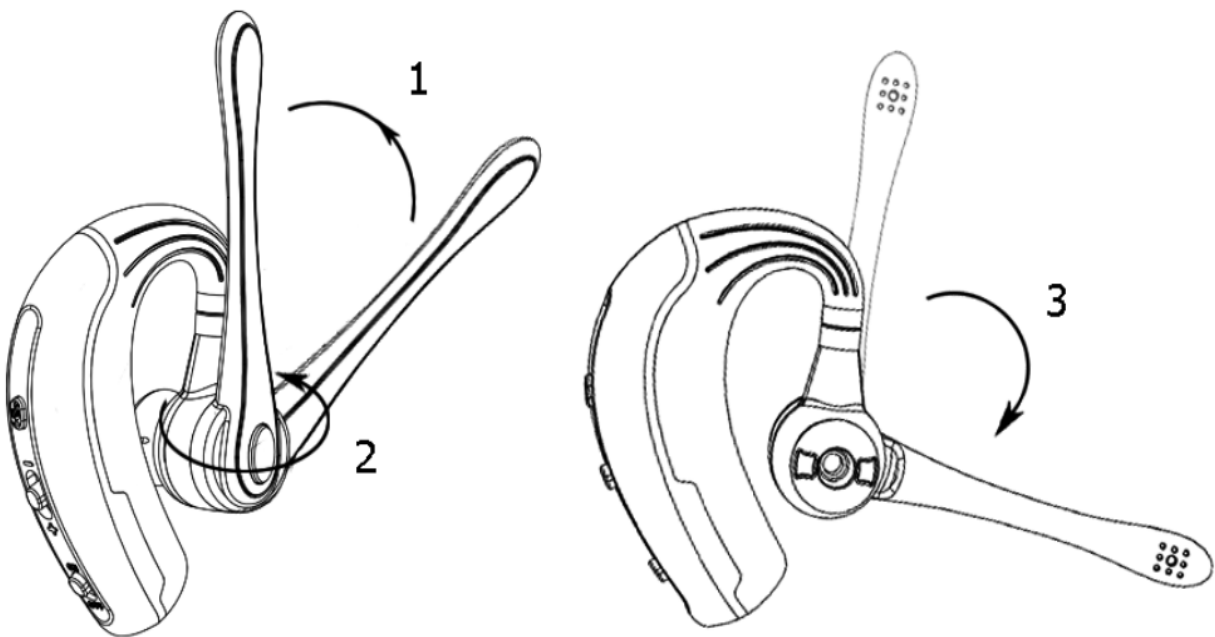

3. HOW TO WEAR

3.1 Switch between Left and Right Ear

The headset can be worn on the left or right ear. To switch ear:

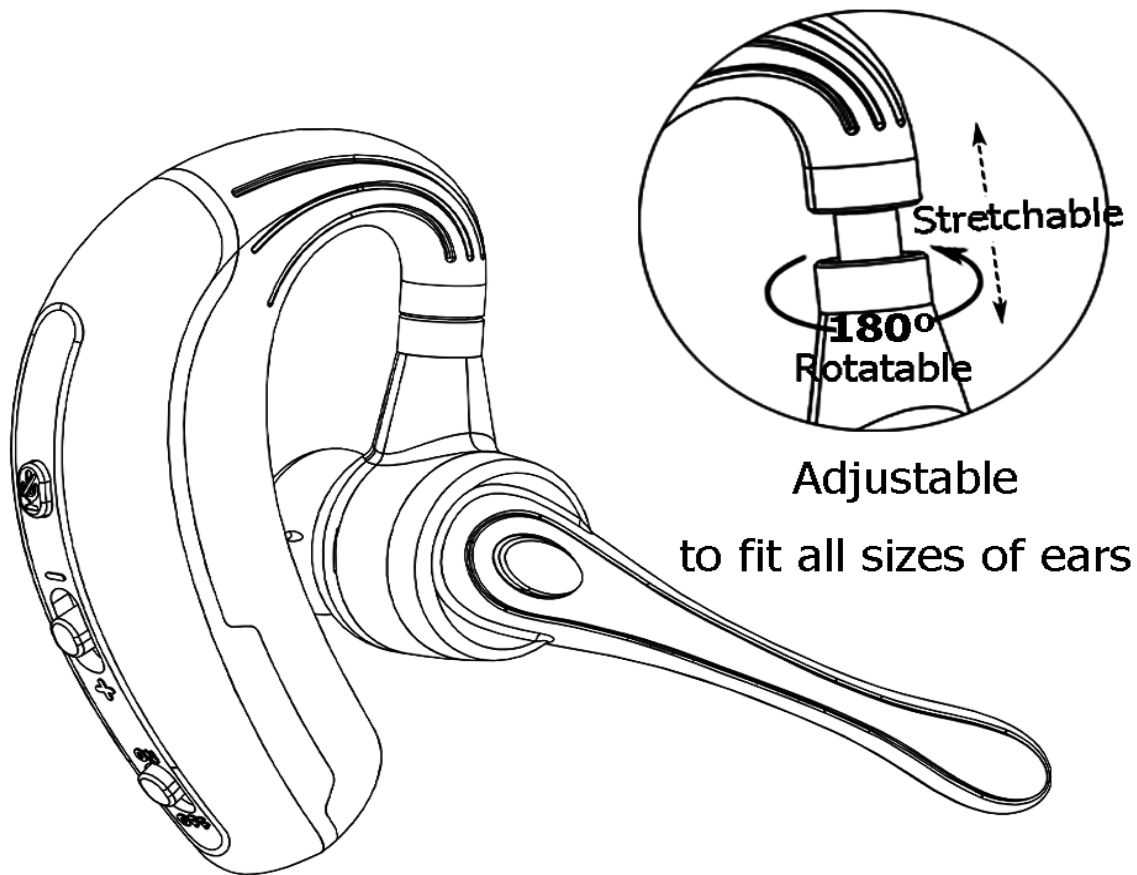

1. Rotate the boom upwards
2. Twist it around so the eartip is on the other side
3. Lower the boom

3.2 Adjust Size

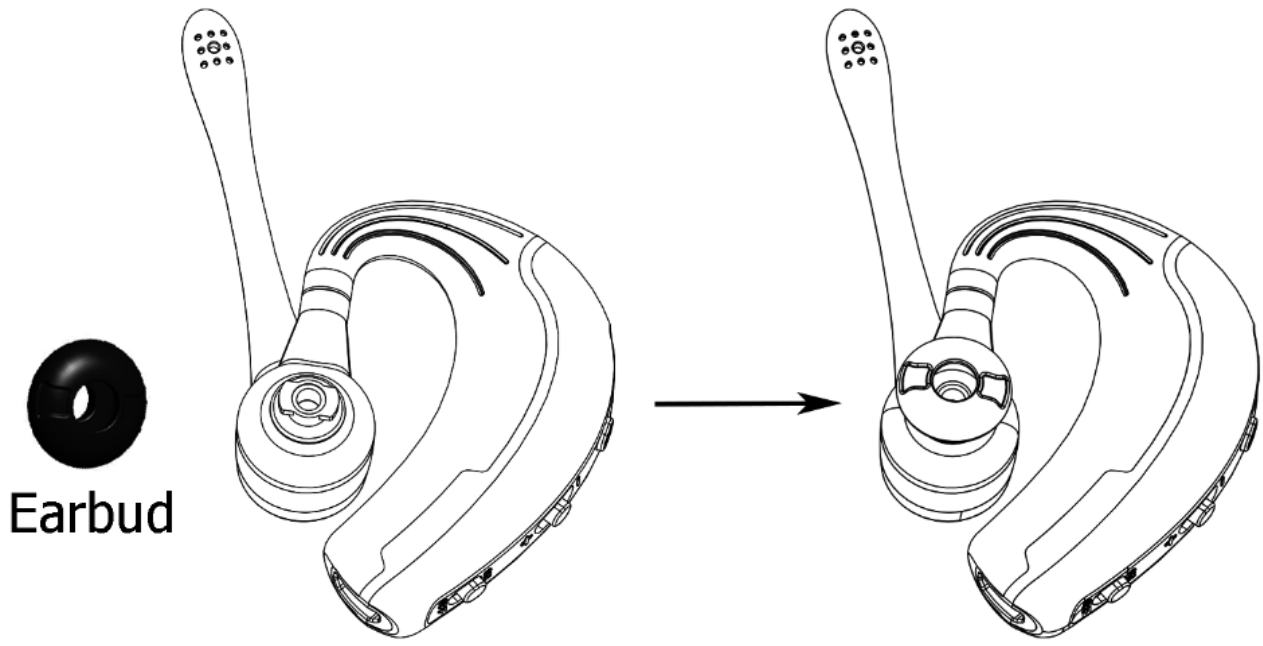

1. Stretch downward, to have little bigger size to suite for your ear.

2. Do not stretch, then smaller size to suite for your ear.

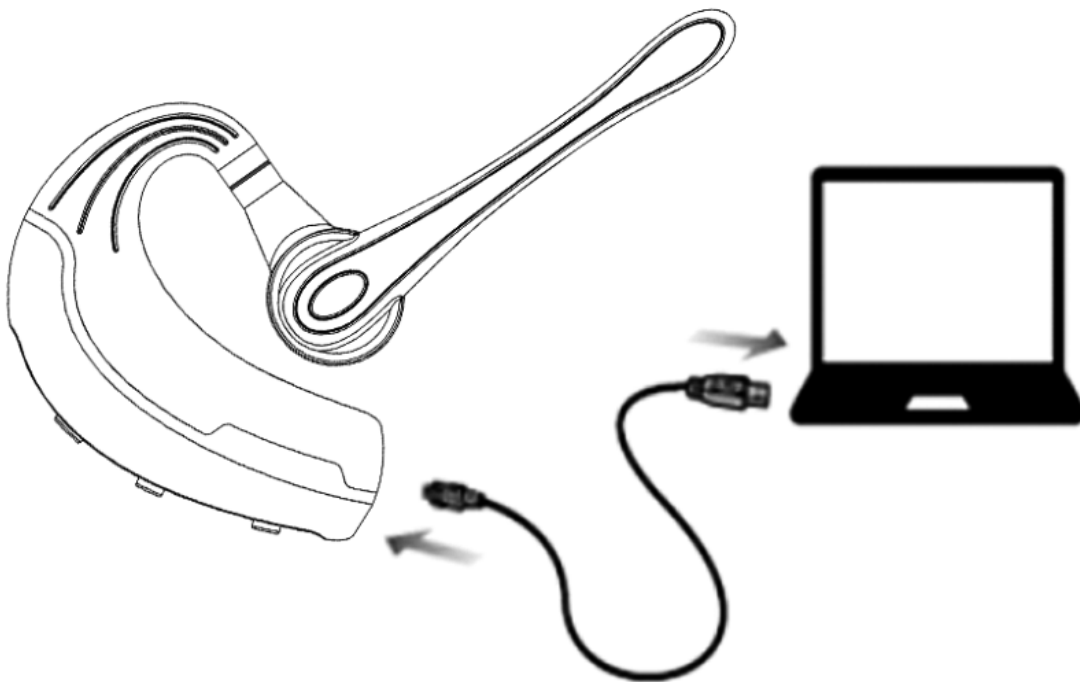

3.3 Change eartip

Slip a fingernail underneath the eartip to take it off. Get the perfect fit by changing the eartip.

4. HOW TO CHARGE THE BATTERY

Plug the headset into any available USB port on your PC using the USB cable.

NOTE1: For safety reasons, we designed this headset to be not functional while it is under charging.

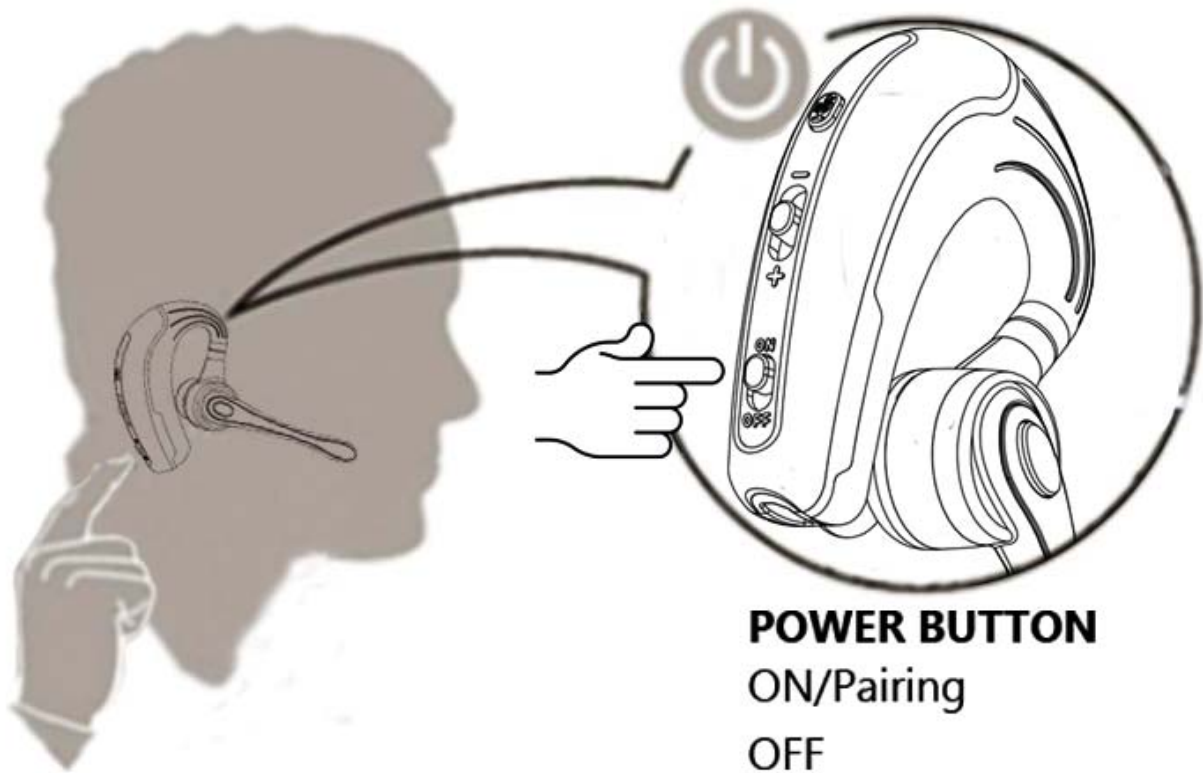

NOTE2: If the output of your charger for this headset is higher than 5V, it will damage your headset potentially. You must use standard charger(5V or lower) for your headset.

It takes approx. 2 hours to fully charge the battery.

5. How to Connect

5.1 Get Paired

The first time you power on your headset, it begins the pairing process.

1. Wearing your headset, tap power on button to “ON” side. You will hear “Power ON” and the headset indicator lights flash red and blue.

2. Activate Bluetooth® on your phone and set it to search for new devices.

- iPhone® Settings > Bluetooth > On*
- Android™ > Bluetooth: On > Scan for devices*

NOTE *Menus may vary by device.

3. Select ***"Spoon B1"***

If necessary, enter four zeros (0000) for the passcode or accept the connection.

Once successfully paired, you hear "connected" and the headset indicator lights stop flashing.

NOTE*The headset powers off automatically after 120 secs without paired to phones.

5.2 Pair another phone

After pairing your headset to your phone you may want to pair another or new phone.

Deactivate Bluetooth® on your first phone.

1. Tap the power on button to "OFF" side. The headset indicator lights flash red and turn off.

2. Tap the power on button to "ON" side, the headset indicator lights flash red and

blue.

3. Activate Bluetooth® on your another phone and set it to search for new devices.

4. Select “**Spoon B1**”

If necessary, enter four zeros (0000) for the passcode or accept the connection. Once successfully paired, the headset indicator lights stop flashing and you will hear “Connected”.

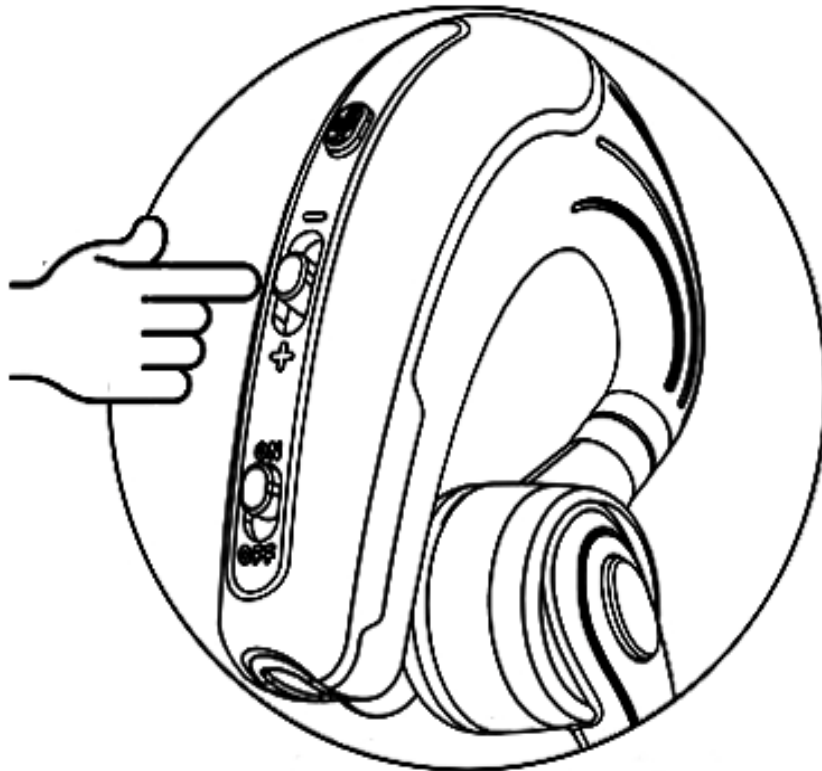

5. Activate Bluetooth® on your first phone.

6. Tap the power button to “OFF” Side to power off the headset.

7. Tap the power button to “ON” side to power on the headset, then you can get two phones automatically connect with your phone.

NOTE: If your PC does not support Bluetooth function or remind you need driver, you need to use an external Bluetooth USB Adapter.

9. Q&A

Q Why do I have crackling noise?

A Bluetooth is a radio technology that is sensitive to objects between the headset and the connected device. Ensure the headset and the connected device are within range (up to 10 meters or 33 feet).

Q What is the range of the headset?

A This Bluetooth Headset supports the following maximum ranges: 10m/33ft.

Q Why can't I hear anything?

A You might need to increase the speaker volume, or ensure that the headset is connected to a device.

Q Why my headset could not connect with the device?

A Check your device's Bluetooth menu and

delete/forget the headset. Re-connect the headset to your Bluetooth device following the Bluetooth connection instructions(Section 5).

Q How to take care of my headset?

A Recommend to power off the headset and put it in storage case when not use.

Avoid storage at extreme temperatures (above 35°C/95°F or below -20°C/-4°F). It will shorten battery life and may affect headset operation.

Do not expose the headset to rain or other liquids.

FCC Requirement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
