Installation

1. Handset

Connect phone set and receiver with the handset cord.

2. External power adapter

Plug the external power adapter to the external AC socket 100V ~240V.

How to power on/off

- ◆ Switch the power toggle switch (**BATT**) to “|” side which located at the phone's back to power on the battery, or connect the phone to an external AC socket via the external power adapter.
- ◆ Press the \mathbb{P} /EXIT key for about 3 seconds, the phone will then automatically test whether the SIM card is inserted and valid.
- ◆ In standby state, besides making and answering calls, you can do also:
 - Press **MESSAGE** key to enter **Messages** menu.
 - Press **MENU/SELECT** key to enter main **Menu**.
 - Press **NAMES/CLR/BACK** key to enter **Contacts** list.
- ◆ In state of power-on, press and hold button \mathbb{P} /EXIT key, LCD screen closes or turn off the power toggle switch directly.

As usual, suggest make use of external power supply. When power down or unavailable power supply nearby, you can use battery for backup.

How to Make a Call

- ◆ Pick up the handset or press the **HANDFREE** key.
- ◆ Enter the telephone number by using the **Number keys** (add area code when making a long distance call) or select from Contacts.
- ◆ Press the **CALL/REDIAL Key** to make the call.

Voice Mail

Before using [Voicemail](#), consult with service provider to confirm that the voice mailbox has been activated.

The system automatically sends a message to your phone informing a new voice message. Read the message and then dial voice mail box number to listen to your

voice message.

To read your voice mail, hold “**1**” *key* to dial voice mail box number in standby mode.

Message

1. Select **Short Messages** in **Menu**.
2. Select **New message** to write and edit message text.
3. Select **Options** to send or save the message.
 - Select **Inbox** to view messages received.
 - Select **Outbox** to view the sent messages.
 - Select **Draftbox** to view draft messages.
 - Select **Msg settings** to make some necessary short message settings.

Phone Lock

Phone lock could prevent your phone from illegal use. The default phone code is 1234. Change it to your own phone password as soon as possible.

PIN Code and PUK Code

PIN Code: PIN Code could prevent your SIM Card from illegal use. When PIN lock is on, you should enter the PIN code when opening the handset again. Change the default PIN code password to your own PIN Code password as soon as possible.

PUK Code: Consecutive inputting wrong PIN code for three times can cause locking of SIM Card. To unlock, you need PUK code.

PIN code and PUK Code may be offered together with the SIM Card. If not, contact with network operator.

Warning and Maintenance

- Keep the phone out of the reach of little children. The phone may cause injury if used as a toy.
- Use original accessories or accessories that are authorized by the manufacturer.
- Keep the phone dry and store in shady and cool place.
- Do not expose your mobile phone to direct sunlight or store it in hot areas. High temperatures can shorten the life of electronic devices.
- Prevent liquid from seeping into your phone.
- Do not drop, knock or harshly treat the phone. Rough handling can break internal circuit boards.

- Do not connect the phone with other unauthorized peripheral equipments. Do not attempt to disassemble the mobile phone and battery by yourself.
- Power off your phone before clean the phone. Use clean fabric that is anti-static to clean your phone.
- As your mobile phone can produce electromagnetic field, do not use the phone near electrical appliances.
- Do not charge the mobile phone without battery.
- Be aware of the usage limitation when using a mobile phone at places such as oil warehouses or chemical factories.
- The user is cautioned that changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.
- Use phone within a temperature range of -10°C ~ + 55°C and a humidity less than 95%.
- To comply with FCC RF exposure compliance requirements, this grant is applicable to only Mobile Configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.
- Declared that the product is installed with battery separately in the box. The FCC ID label is placed on the mobile phone clearly visible to all persons at the time of purchase.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference.
 - (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
