

# i-Key 4 TX Quick Reference Guide

## Compliance

i-Key products are compliant with the following organizations

## INTRODUCTION

The i-Key 4 TX is a long range access control transmitter that behaves exactly like a proximity card, but with range of up to 25 metres. i-Key 4 has 4 buttons, allowing many functions to be controlled by the one pendant. Additionally, the TX can be supplied with a micro disc inside which acts as a proximity card allowing long range access to roller shutters via the pushbuttons and regular door access by presenting the pendant to a regular access control reader.

## BUTTONS i-Key TX Pendant

The diagram details the pendant button layout.

## BATTERY REPLACEMENT

To replace the batteries on the i-Key 4 TX simply unscrew the two screws at the top and bottom on the rear of the pendant. The keyring does not have to be removed. Replace the battery with a CR2032 battery and ensure the polarity is correct. Always check the seal is in place before reassembly.

LED (illuminates when a button is pressed)

## SPECIFICATIONS

Dimensions: 36mm (W) x 16mm (D) x 56mm (H)  
Power: CR2032 lithium battery

## ORDERING CODES

i-Key 4 TX/M	4 button Transmitter with Mifare disc
i-Key 4 TX/TC	4 button Transmitter with Tecom disc

## DIMENSIONS

## **Federal Communication Commission Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- . Reorient or relocate the receiving antenna.
- . Increase the separation between the equipment and receiver.
- . Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

***FCC Caution:*** To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example - use only shielded interface cables when connecting to computer or peripheral devices).

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
