3. Operation

Note: For PC switching, you can use the face-panel buttons of the KVM Switch, or a hot-key command sequence via keyboard.

Face-Panel Buttons

Press the corresponding face-panel button to select your PC or USB devices.

Hot-Key Command Sequence

A keyboard hot key command consists of three keystrokes:

Hot Key command = ScrLk + ScrLk + Command key(s)

After pressing the ScrLk key, you have 2 seconds to press the ScrLk key again. If you do not press a key within 2 seconds, the switch will exit hot-key mode.

Note:

1. Hot key command works on top row numbers keys only.
2. A PS/2 Keyboard is required for proper hot key function. If you use a USB keyboard, hotkey feature is disabled.
3. When the binding of PC, USB Hub & Audio/Mic port switching is enabled by the hotkey sequence, any PC, USB Hub and Audio/Mic switching are bound together.
4. For non-PnP OS (Linux, Windows NT4.0), please use the following commands to reset the mouse setting.

Q1: Where is the power supply? I did not find one in the box.

A1: The TK-210K does not require a power supply. It draws power from your computer's USB connection. As long as your KVM switch is connected to the USB or PS/2 port, it will receive the necessary power to function.

Q2: I have the KVM switch connected properly, but my keyboard and mouse don't work.

A2: Please make sure your USB port is working properly by testing it with your other USB devices. Once you confirm that the USB port is functional, please reboot your computers, and try to use the KVM switch again.

Q3: I have the KVM switch connected properly, but my microphone and speakers don't work.

A3: First, make sure your sound card is properly installed on your computers. Second, make sure your speakers and microphone work properly when connected directly to your computer. Third, make sure your speakers and microphone are connected in correct jack on the KVM switch. Make sure the audio cables are connected to the correct jack on your computer.

Q4: Can I connect and disconnect the USB cables while the computers are turned on?

A4: Yes, you can connect or disconnect the USB cables while the computers are turned on because the USB interface is Plug-and-Play and Hot-Pluggable.

Q5: Will the KVM switch remember the keyboard settings between computers?

A5: Yes, the KVM switch will remember the keyboard settings when switching between your computers. (i.e.: Cap lock, Num key, etc.)

Q6: How do I switch from one computer to another with the KVM switch?

A6: PC User: Push Buttons, Hot-Key Commands

Mac User: Push Buttons

Linux User: Universal Hot-Key Commands
