AIR FRY TIPS & TRICKS

SHAKE, SHAKE, SHAKE

Check food and shake basket frequently for even browning.

AUTO-STOP AND START

The unit will automatically pause cooking when the basket is removed and will resume cooking when the basket is replaced.

CONVERT OVEN RECIPES

Convert oven recipes by using the Roast or Bake function and reducing the temperature by 25°F. Check food frequently to avoid overcooking.

FREESTYLING RECIPES

If you are cooking less food than the recipe calls for, remember to reduce the cook time. If you're cooking a bit more, increase the cook time. Check food frequently.

AIR FRYING FRESH INGREDIENTS

For best results with fresh vegetables, using at least 1 tablespoon of oil is a good rule of thumb, but you can use more or less to achieve your desired level of crispiness.

DON'T OVERCROWD

Evenly arrange and space ingredients out to ensure consistent browning.

SECURE YOUR FOOD

To keep lightweight foods from being blown around by the fan, secure them with toothpicks.

MORE EVEN BROWNING

Use an oil spritzer or cooking spray to evenly coat ingredients for more consistent browning.

DEHYDRATE TIPS & TRICKS

SLICING

Use a mandoline slicer to get consistent, thin fruit and vegetable slices. Fruits and veggies should be sliced as thinly as possible without falling apart.

PREVENT OXIDATION

Fruits like apples and pears brown quickly when cut. To delay oxidation, soak them in water with a squeeze of lemon juice for 5 minutes.

DRY BEFORE YOU DEHYDRATE

Pat fruits and vegetables as dry as possible before placing them in the basket.

DON'T OVERLAP

Lay ingredients flat and close together to optimize space. Individual pieces should not overlap or be stacked.

TRIM THE FAT

Before dehydrating beef or poultry, make sure to trim off all fat, as it does not dry out and could turn rancid.

PASTEURIZING JERKY

Finish off dehydrated meats and fish by using the Roast function at 330°F for 1 minute to fully pasteurize them.

HOW LONG TO DEHYDRATE?

Most fruits and veggies take 6-8 hours, while jerky takes 5-7 hours. The longer you dehydrate ingredients, the crispier they will become.

STORAGE

To maximize shelf life, store dehydrated foods at room temperature in an airtight container up to 2 weeks.
