

SEAGATE SELF-ENCRYPTING DRIVES (SED)

U.S. Export Controls

Seagate® products and technology are controlled by the U.S. and other countries for export, re-export and end use. Seagate products may not be exported or re-exported without prior U.S. government authorization or exception to restricted parties, embargoed or sanctioned countries, or end-users involved in developing, producing or distributing chemical, biological, or nuclear weapons of mass destruction, missile technologies, or other terrorist activities. While all Seagate products are subject to U.S. export controls, certain products that have encryption features, are subject to export restrictions in other jurisdictions. Seagate has secured a single commodity classification ruling from the U.S. Department of Commerce, Bureau of Industry and Security (BIS), for all Seagate drives that contain encryption, whether hardware-based or software-based.

The following classification information is provided by Seagate for informational purposes only on an “as is” basis and should be used in conjunction with the U.S. Export Administration Regulations (EAR) when classifying Seagate products for U.S. export. Exporters of Seagate products are responsible for compliance with all trade regulations, including the EAR, and any reliance by such exporters on this information is done at their own risk and liability.

U.S. Commodity Classification Automated Tracking System (CCATS) G072289 dated 03/06/2010

External and Internal Mass Market Encrypting HDD:

| | |
|---------------------------------------|---------------------------|
| Export Control Classification Number: | 5A992.c |
| U.S. Harmonized Tariff Number: | 8471705065 (external HDD) |
| U.S. Harmonized Tariff Number: | 8471704065 (internal HDD) |
| U.S. License Exception: | NLR |

Internal Encrypting Enterprise HDD:

| | |
|---------------------------------------|---------------------------|
| Export Control Classification Number: | 5A002.a.1. |
| U.S. Harmonized Tariff Number: | 8471704065 (internal HDD) |
| U.S. License Exception: | ENC |

*Solid State HDD:

| | |
|---------------------------------------|------------------|
| Export Control Classification Number: | 5A002.a.1. |
| U.S. Harmonized Tariff Number: | 8471706000 (SSD) |
| U.S. License Exception: | ENC |

*PCIe Flash Storage:

| | |
|---------------------------------------|-----------|
| Export Control Classification Number: | 5A002.a.1 |
| U.S. Harmonized Tariff Number: | 854231000 |
| U.S. License Exception: | ENC |

*Multiple CCATS for these products

For more information on encryption regulatory requirements, please contact BIS directly:

U.S. Department of Commerce, Export Counseling Division, Washington, DC

Trade Controls

Seagate encryption products are globally marketed and distributed, except those countries restricted by U.S. law. Some countries regulate the import of encryption products, e.g., China and Russia. Importers and exporters must observe the specific licensing processes and policies of all countries. Please refer to the links below for information regarding country specific trade controls:

[EU](#) [France](#) [Israel](#) [Hong Kong](#) [Malaysia](#) [Russia](#) [Singapore](#)

The information provided within this document is current as of the date issued and Seagate may, but is not required to, update the information contained herein. This document may not reflect changes in the law following the date of issuance and it does not constitute legal advice. For model specific classification information, please contact Seagate’s International Trade Administration at Ita.clearances@seagate.com.
