[Logix User Guide and Documentation](#) - PDF

- Follow the instructions in the install program. Logix will install and start automatically.
- If you require any additional system files, they will be downloaded automatically from MicroSoft's website at www.Microsoft.com. If your security software does not permit downloading these files, you may need to reset your security settings.
- Important Note: If you are receiving an error referring to Microsoft SQL when installing and launching Logix, you may need to install the correct version of SQL on your computer.

UserName and Password

Before you can start using Logix, you will need to get an authorization Password.

- o Install Logix as described above.
- o Determine whether you want to view the Demo or obtain the free Trial version or if you want to subscribe to a one-, three- or twelve-month period.
- o **Call 571.426.5951 or email us at bc@logistixsolutions.com** for the authorization password.
- o Provide the “UserName” that is automatically displayed on the Logix sign in screen.
- o Enter the 16-digit (Logix) or 20-digit (ProLogix) alphanumeric password and press OK.
- o Then, press NEXT to view the Demo(s), start a New Project, continue a Current Project or open a Recent Project.

Starting Logix

- o Double click on Logix.EXE or the Logix Icon once you have installed the program.
- o Enter the Password on the opening screen.
- o Check **Remember Me** if you want Logix to remember your password.
- o Read and Agree to the End-User License Agreement.
- o Click on OK to start using Logix.

If you check **Remember Me** you won't need to reenter a password next time. Just check **Remember Me** and click OK and pick up where you left off the last time you were logged on.

The following documents and programs will be useful to you in learning to use Logix.

- o [Logix Quick User Guide](#) – walks you through the demo.
- o [Logix User Guide and Documentation](#) – all the features, reports and screens.
