Platesetter

Digital press

Litho press

COLORPATH VERIFIED

View status of jobs or devices from anywhere via the internet and create detailed reports.

DISCOVERY

The Discovery process is a study of your current situation to reveal the processes and technology that you currently have in place. Once the Discovery process is completed, a report is delivered that documents the current and desired situations, and clarifies critical issues.

ANALYSIS

The Discovery information is analyzed to provide flexible solutions to improve existing workflows, procedures, quality levels, efficiencies and profitability. We generate measurable metrics and a tangible Return on Investment (ROI) to help evaluate the cost against the results.

IMPLEMENT

At this stage, effective implementation, experience and Print Performance technology, e

IMPLEMENTATION

SUPPORT

WEB ENABLED MONITORING

Ensure job consistency at remote printing sites without hard copy proofs. Status condition of devices and customized reports can be pulled remotely to better understand production efficiencies.

ONLINE MONITORING

IMPLEMENTATION

The Print Performance Team partners with your team members to execute implementation. We work closely with your team to incorporate their first-hand knowledge and to discover any uncovered issues. During Implementation, we launch your Print Performance Plan with a strategy to introduce or improve processes, better enable your team to eliminate any waste and provide valuable data for strategic decision making.

ONLINE SUPPORT

Fujifilm's Print Performance Team monitors the status of your output devices and alert you when a device enters an "out of tolerance" state.

BUSINESS VALUE

SUPPORT

Your Print Performance Plan continues well after Implementation. On-going Support is critical to the continuation of processes that enable cost reductions and increase efficiencies. Members of your Print Performance Team are here to provide any needed training, education and technical support.

DISCOVER THE BENEFITS OF COLORPATH VERIFIED

DISCOVERY

The discovery process includes a study of your current situation to reveal the processes and technologies that you currently have in place. Once the discovery process is completed, a report is delivered that documents the current and desired situations, and clarifies critical issues.

ANALYSIS

The information gathered is then analyzed to provide flexible solutions designed to improve existing procedures, quality levels, efficiencies, and profitability. We generate measurable metrics and a tangible return on investment (ROI) data to help evaluate the cost versus the results.

IMPLEMENTATION

At this stage, the Fujifilm's Print Performance Team partners with your team members to ensure effective implementation. We work closely with your team to incorporate their first-hand experience. During implementation, we install ColorPath using the standards you specify. We will also instruct you on how to use ColorPath to improve processes, better enable your technology, eliminate waste and provide valuable data for strategic decision-making.

SUPPORT

After implementation, your systems will be monitored by Fujifilm's Print Performance Team. On going support is critical to maintaining processes that enable cost reductions and increased efficiencies. If your output devices enter an error state we will contact you and help resolve the issues quickly. Additionally, Print Performance Team provide any needed training, education, and technical support.
