

Installation Guide

WiFi 6 AX1800 Dual Band Access Point WAX202

Note: The DC power adapter varies by region.

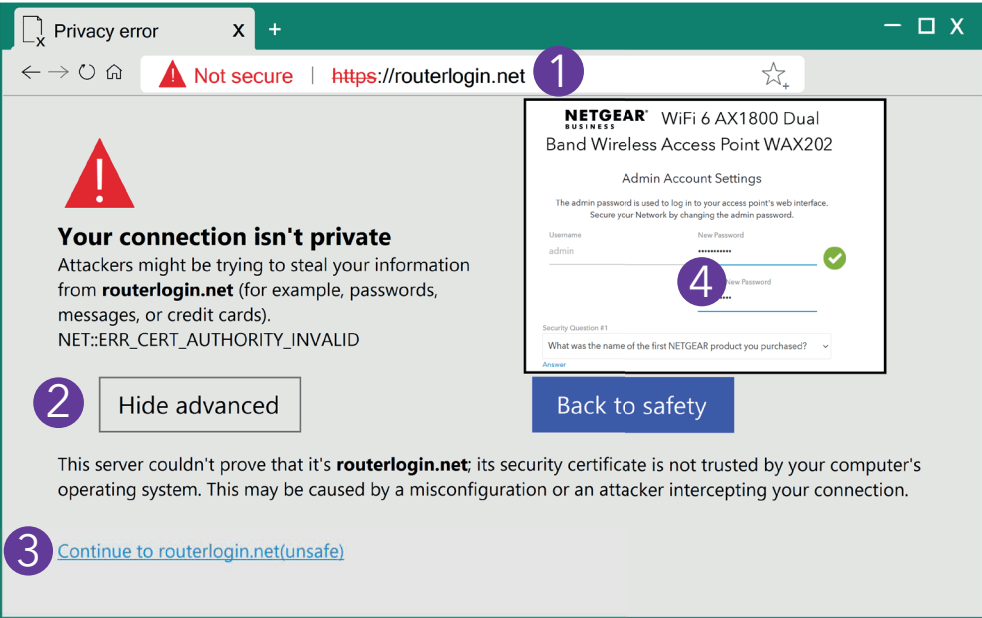

Step 1. Connect and power up the WAX202

Step 2. Join the default WiFi Network

Step 3. Log in via your web browser

Note: This example uses the Google Chrome browser. Your browser might be different.

1. Type **https://www.routerlogin.net** in the address field of your browser. Your browser might display a security message.
2. Click the **Advanced** button.
3. Click the **Continue to routerlogin.net** link.
4. Follow the onscreen Setup Wizard prompts:
 - Set a new admin password for local login.
 - You can set a new WiFi network name (SSID) and WiFi password. If you do, reconnect with your new SSID and WiFi password to complete the setup.

Optional Step 4. Change the operation mode

If a device in your network already provides router functions, change to access point mode.

1. When logged in to the WAX202, select **ADVANCED > Advanced Setup > Router / AP / Bridge Mode**.
2. Select the **AP Mode** radio button and click the **Apply** button.

More information

For more information on how to set up and configure the WAX202, see the detailed online installation guide or user manual, which you can download by visiting <https://www.netgear.com/support/download>.

Register the device

We recommend that you register your device by visiting <https://www.netgear.com/mynetgear>.
