

March 08, 2017

CURRICULUM VITAE

PAMELA J. LEIN

Business Address:

University of California at Davis
School of Veterinary Medicine
Department of Molecular Biosciences
1089 Veterinary Medicine Drive
Davis, CA 95616

Phone: 530-752-1970

Fax: 530-752-7690

Email: pjlein@ucdavis.edu

EDUCATION AND TRAINING

Postdoctoral Training

1990-1992 Roswell Park Cancer Institute, Buffalo, NY, Molecular Immunology

Ph.D./1990 State University of New York at Buffalo, Buffalo, NY, Pharmacology and Toxicology

M.S./1983 East Tennessee State University, Johnson City, TN, Environmental Health

B.S./1981 Cornell University, Ithaca, NY, Biology with Honor

PROFESSIONAL EXPERIENCE

10/13 to present Vice-Chair, Department of Molecular Biosciences
University of California School of Veterinary Medicine, Davis, CA

09/10 to 08/2016 Chair, Pharmacology and Toxicology Graduate Group
University of California, Davis, CA

07/10 to present Professor of Neurotoxicology, Department of Molecular Biosciences
University of California School of Veterinary Medicine, Davis, CA

12/08 to 06/10 Associate Professor of Neurotoxicology, Department of Molecular Biosciences
University of California School of Veterinary Medicine, Davis, CA

9/03 to 11/08 Scientist (Associate Professor equivalent), CROET
Oregon Health & Science University, Portland, OR

07/99 to 09/03 Assistant Professor, Environmental Health Sciences/Toxicology
Johns Hopkins University, Bloomberg School of Public Health, Baltimore, MD

08/93 to 06/99 Assistant Professor, Biology, Canisius College, Buffalo, NY

08/93 to 06/99 Adjunct Assistant Professor, Pharmacology and Toxicology
University at Buffalo School of Medicine & Biomedical Sciences, Buffalo, NY

03/92 to 05/93 Environmental Health Analyst, Dames and Moore
West Valley Nuclear Services Co., Inc., West Valley, NY

09/90 to 03/92 Postdoctoral Fellow, Molecular Immunology
Roswell Park Cancer Institute, Buffalo, NY

08/85 to 09/90 Predoctoral Fellow, Pharmacology and Toxicology
School of Medicine, State University of New York at Buffalo, Buffalo, NY

08/83 to 08/85 Research Associate, Medicine, Division of Gastroenterology
Buffalo General Hospital, Buffalo, NY

01/82 to 07/83 Graduate Assistant, Environmental Health
East Tennessee State University, Johnson City, TN

01/81 to 08/81 Laboratory Technician, Physiology, New York State College of Veterinary
Medicine, Cornell University, Ithaca, NY

AWARDS

- x 2015 Zoetis Award for Veterinary Research Excellence, UC Davis School of Veterinary Medicine
- x Dean's Grant, Arts and Sciences, Canisius College, \$2500 per year, 1995, 1996
- x National Science Foundation Research Opportunity Award, \$10,000, 1994
- x NIH NCI National Research Service Award, *Cell biology of human TILs engrafted into SCID mice* (1 F32 CA09177-01), 1991
- x March of Dimes Predoctoral Fellowship, 1987 to 1990

PROFESSIONAL ACTIVITIES

Professional Society Membership

- x Society of Toxicology (SOT)
- x International Neurotoxicology Association (INA)
- x Neurobehavioral Teratology Society (NBTS)
- x Society for Neuroscience (SFN)

Participation on Advisory Panels

- x USEPA IRIS Assessment of PCBs, Expert Author, 2016-2017
- x External Advisory Committee, NIEHS T32 Training Program, University of Illinois at Urbana-Champaign, 2016-present
- x Endowment Fund Steward, Society of Toxicology, Neurotoxicology Specialty Section, 2015-present
- x Scientific Advisory Board, U.S. Food and Drug Administration, National Center for Toxicological Research, Member, 2014-2016; Chair, 2017-2019
- x Autism Research Institute Think Tank, April 2014
- x Councilor, International Neurotoxicology Association, 2013-2017
- x Society of Toxicology, Northern California Regional Chapter, Vice-President, 2013-2014, President, 2014-2015, Past-President, 2015-2016
- x External Advisory Panel NIEHS Core Center of Excellence at the University of Rochester, Rochester, NY, 2011-present
- x Steering Committee, NIH NINDS CounterACT Program, 2011-present
- x Society of Toxicology, Neurotoxicology Specialty Section, Councilor, 2005-2007, Vice-President-Elect, 2010-2011, Vice-President, 2011-2012, President, 2012-2013, Past-President, 2013-2014
- x Center for Alternatives to Animal Testing (CAAT), Johns Hopkins University, 2000-2014
- x European Centre for the Validation of Alternative Methods, Developmental Neurotoxicity Testing, Ispra, Italy, April 2005, March 2007
- x Scientific Advisory Panel on Dimethoate, U.S. Environmental Protection Agency, 2004-2005
- x Committee on Developmental Neurotoxicity Testing, OECD, 2001-2002
- x Urban Environmental Health Research Council, NIEHS Center in Urban Environmental Health, Johns Hopkins University Bloomberg School of Public Health, 2000-2003

Program or Project Development

- x The 10th Annual CounterACT Conference, Chair, June 2016
- x The 21st International Symposium on Microsomes and Drug Oxidations (MDO), October 2-6, 2016, Co-Chair, 2015-2016.
- x Neuroprotection Workshop, NINDS CounterACT Program, Co-Chair, 2013-2014
- x TestSmart: Developmental Neurotoxicity Testing IV, Center for Alternatives to Animal Testing, The Johns Hopkins University, Steering Committee Member, 2012-2014
- x Environmentally –Triggered Neurodevelopmental Disorders: Focus on Endocrine Disruption and Sex Differences in Autism, ADHD and Schizophrenia, 27th International Neurotoxicology Conference, Conference Co-Chair, October 2011
- x Biological Basis for Endocrine Disruption and Sex Differences in Susceptibility to Neuro-Developmental Disorders, 27th International Neurotoxicology Conference, Session Chair, October 2011
- x Human Pluripotent Stem Cells and Neural Progenitors as Models of Gene-Environment Interactions in Neurological Diseases, Society of Toxicology, 50th Annual Meeting, Session Chair, March 2011
- x Neuroscience session: Alternatives in DNT, World Congress 7, Session Chair, September 2009
- x Animal Models of Autism, 25th International Neurotoxicology Conference, Session Co-Chair, October 2008
- x Models of Neuroprotectant Screening for Chemically-Induced Neurodegeneration, 25th International Neurotoxicology Conference, Session Co-Chair, October 2008
- x Fetal Basis of Adult Onset Disease, 24th International Neurotoxicology Conference, Session Co-Chair, November 2007
- x TestSmart: Developmental Neurotoxicity Testing III, Joint Research Council, European Commission, Steering Committee Member, 2009-2011
- x TestSmart: Developmental Neurotoxicity Testing II, Johns Hopkins University Center for Alternatives to Animal Testing (CAAT), Steering Committee Member, 2006-2009
- x TestSmart: Developmental Neurotoxicity Testing I, Johns Hopkins University Center for Alternatives to Animal Testing (CAAT), Steering Committee Member, 2003-2006
- x TestSmart: Endocrine Disruptors, Johns Hopkins University Center for Alternatives to Animal Testing (CAAT), Workshop II, Feb 2002, Workshop Coordinator, 2001-2002
- x TestSmart - Endocrine Disruptors, Johns Hopkins University Center for Alternatives to Animal Testing (CAAT), Workshop I, Feb 2001, Workshop Coordinator, 2000-2001
- x Incorporation of imaging techniques into undergraduate cell and molecular laboratories, Biology Dept, Canisius College, P.I., 1998-1999
- x Laboratory revision in genetics and improvements in cell and molecular courses, Biology Dept, Canisius College, Co-P.I., 1997-1999
- x Howard Hughes Medical Institute Program for Undergraduate Science Education, School of Arts and Sciences, Canisius College, Co-P.I., 1996-1999
- x Curricular reform, Introductory Biology Core, Biology Dept, Canisius College, 1993-1995

Consultations

- x Consultant to McLarens Young International, Global Claims Services, 2010-2011
- x Technical consultant to emGene, Inc., Columbia, MD, 2002-2003
- x Consultant to Law Offices of Kysor & Della Posta, Gowanda, NY representing Andrew V Rupp in the State of New York Worker's Compensation Board in regard to Andrew V Rupp, WCB Case #8930-4882, 1998

EDITORIAL ACTIVITIES

Editorial Board Membership

- x International Journal of Molecular Sciences, Molecular Toxicology Section, Associate Editor, 2014-present
- x Neurotoxicology and Teratology, Associate Editor, 2013-present
- x Toxics, 2013-present
- x Current Neurobiology, Associate Editor, 2009-2016
- x Neurotoxicology, Editorial Board, 2007 – 2009; Associate Editor, 2009-present
- x Toxicology and Applied Pharmacology, Editorial Board, 2007 – 2011, Associate Editor 2012-present
- x Toxicological Sciences, Editorial Board, 2011-present
- x Journal of Toxicology, Editorial Board, 2007-2010
- x Toxicology Letters, Editorial Board, 2001-2004

Peer Review Activities

Brain Research ♦ Chemical Research in Toxicology ♦ Chemico-Biological Interactions ♦ Chemosphere ♦ Developmental Biology ♦ Environmental Health Perspectives ♦ FASEB J ♦ International J Toxicology ♦ J Cell Biology ♦ J Neurobiology ♦ J Neurochemistry ♦ J Neuroinflammation ♦ J Neuroscience ♦ J Neuroscience Methods ♦ J Neuroscience Research ♦ J Pharm & Experimental Therapeutics ♦ Molecular Neurobiology ♦ Neurochemical Research ♦ Neuroscience Letters ♦ Neurotherapeutics ♦ Neurotoxicology ♦ Neurotoxicology and Teratology ♦ The Veterinary Journal ♦ Toxicology Letters ♦ Toxicology and Applied Pharmacology ♦ Toxicological Sciences

Review of Proposals

- x *Ad hoc*, NIH Study Section, ZRG1 MDCN-B (55) CounterACT Exploratory Grants, July 8, 2016
- x *Ad hoc*, NIH Study Section, ZES1 LKB-J, Summer Research Training and Development, June 14, 2016
- x *Ad hoc*, NIH Study Section, NAL, Neurotoxicology and Alcohol, June 13, 2016
- x *Ad hoc*, Agence Nationale de la Recherche (ANR), French National Research Agency, May 2015
- x *Ad hoc*, NIH study section, ZRG1 DKUS-C (54), Environmental Contributors to Autism Spectrum Disorders (R01s), April 2015
- x Pilot project review, NIEHS Core Center of Excellence, Texas A&M, College Station, TX, August 2014
- x *Ad hoc*, NIH study section, ZES1 LWJ-K, Neurodegenerative Disorders, March 2014
- x *Ad hoc*, NIH study section, ZES1 LKB-J, Career Training in Environmental Health Sciences, March 2014
- x Standing Member, NIH, study section, Environmental Health Sciences Review Committee (EHSRC), the NIEHS chartered review committee, Sept 2011-August 2015
- x Center for Alternatives to Animal Testing (CAAT), 2001-2004, 2009-2014
- x Pilot project review, UC Davis Alzheimer's Disease Center, University of California, Davis, CA, April 2012
- x Pilot project review, NIEHS Center for Environmental Health, Columbia University, New York, NY, April 2012

- x *Ad hoc*, NIH study section, ZRG1 IFCN-A02, Neurotoxicology Special Emphasis Panel, March 2012
- x *Ad hoc*, NIH study section, EHSRC, Environmental Health Sciences Review Committee, The NIEHS chartered review committee, Nov 2010, April 2011
- x Standing Member, NIH study section, NAL, Neurotoxicology and Alcoholism, Oct 2007-Sept 2011
- x *Ad hoc*, NIH study section, ZRG1 BDCN-N, Neurotransmitters and Neuroplasticity, Apr 2007
- x *Ad hoc*, NIH study section, NAL, Neurotoxicology and Alcoholism, Oct 2006
- x *Ad hoc*, NIH study section, NIGMS, Minority Biomedical Research Support (MBRS) Support of Continuous Research Excellence (SCORE) in Neuroscience, 2006
- x *Ad hoc*, NIH study section, NIEHS, Conference Grant Applications (R13), 2002-2005
- x Chair, NIH study section, NIEHS, Special Emphasis Panel, 2002
- x Member, NSF Integrative Organismal Biology/Developmental Systems Cluster, 2005-2007
- x *Ad hoc*, NSF, Developmental Neuroscience Program, 1999-2002, 2004-2006
- x *Ad hoc*, NSF, Research Experience for Undergraduates Program, 2001
- x The Davidson Institute for Talent Development, Davidson Fellows Submission Review, 2004
- x Johns Hopkins Center in Urban Environmental Health, 2001, 2004, 2009

PUBLICATIONS

Refereed Journal Articles

1. Pancorbo OC, **Lein PJ**, Blevins RD (1987) Mutagenic activity of surface waters adjacent to a nuclear fuel processing facility. *Arch Environ Contamin Toxicol* 16:531-537. PMID: 3632040
2. Kung MP, Nickerson PA, Sansone FM, Olson JR, Kostyniak PJ, Adolf MA, **Lein PJ**, Roth JA (1988) Effect of short-term exposure to hexachlorophene on rat brain cell specific marker enzymes. *Fund Appl Toxicol* 11:519-527. PMID: 2906023
3. **Lein PJ**, Higgins D (1989) Laminin and a basement membrane extract have different effects on axonal and dendritic outgrowth from embryonic rat sympathetic neurons in vitro. *Dev Biol* 136:330-345. PMID: 2479584
4. Bruckenstein DA, **Lein PJ**, Higgins, Fremereau RT (1990) Distinct spatial localization of mRNA's in cultured sympathetic neurons. *Neuron* 5:809-819. PMID: 2148487
5. **Lein PJ**, Higgins D, Turner DC, Flier LA, Terranova VP (1991) The NC1 domain of type IV collagen promotes axonal growth in sympathetic neurons through interaction with the D₁E₁ integrin. *J Cell Biol* 113:417-428. PMC2288935
6. **Lein PJ**, Higgins D (1991) Protein synthesis is required for the initiation of dendritic growth in embryonic rat sympathetic neurons in vitro. *Dev Brain Res* 60:187-196. PMID: 1716531
7. **Lein PJ**, Banker GA, Higgins D (1992) Laminin selectively enhances axonal growth and accelerates the development of polarity by hippocampal neurons in culture. *Dev Brain Res* 69:191-197. PMID: 1424096

Functional Outcomes of Interactions between an ASD-Relevant Gene and Air Pollution

The goal of this project is to test the hypothesis that developmental exposure to traffic-related pollution impairs behavioral phenotypes relevant to ASD coincident with neuroinflammation and/or altered neuronal connectivity. The objectives are to analyze the effects of traffic-related air pollution alone and in combination with one gene strongly implicated in ASD, ProSAP2/Shank3, in male and female rats exposed to inhaled traffic-related pollution during gestation and lactation. **Role:** Co-Investigator

U54 NS079202 (Lein)

09/01/12-08/30/17

NIH NINDS CounterACT Program

Novel anticonvulsant and neuroprotective therapies for TETS and OP intoxication

The unifying goal of the UC Davis CounterACT Center of Excellence is to identify improved medical countermeasures for treating acute intoxication with seizure-inducing chemical threat agents.

Role on project: Center Director and PI of Project 2 of the Center

R21 ES026515 (Lein)

04/01/16-03/31/18

NIH NIEHS

Does air pollution increase risk of AD in a genetically susceptible animal model?

The goal is to test the hypothesis that chronic exposure to traffic-related air pollution triggers inflammatory responses in the brain to initiate or accelerate the progression of Alzheimer's disease-like pathology and cognitive dysfunction in a novel transgenic rat expressing AD susceptibility genes.

P01 ES011269 (Van de Water)

06/01/13-05/31/18

NIH NIEHS/USEPA

The UC Davis Center for Children's Environmental Health and Disease Prevention

Project 4: Calcium Signaling Defects in Autism (Pessah and Lein, Co-Leaders)

Project 4 will test the hypothesis that CGG trinucleotide repeats in the FMR1 gene, the most prevalent single gene disorder contributing to autism risk, influence susceptibility to non-dioxin-like (NDL) persistent organic pollutants (POPs) identified in Core 3 and pro-inflammatory cytokine profiles identified in Project 3 to predominate in plasma of women participating in the MARBLES study during pregnancy. **Role on project:** Co-Leader of Project 4

U54 HD079125 (Abbeduto)

09/01/13-08/31/18

NIH/NICHD

MIND Institute Intellectual and Developmental Disabilities Research Center (IDDRC)

The goal is to support a translational science agenda focused on intellectual and developmental delays (IDD). The IDDRC will integrate research from multiple disciplines and bridge basic and clinical science to arrive at treatments for IDD conditions. The range of IDD conditions include autism spectrum disorder, fragile X syndrome, Down syndrome, ADHD, chromosome 22q11.2 deletion syndrome, and many others. **Roles:** Core C Co-Director; Project 1 Co-Investigator

R01 ES014901 (Lein [Contact] and Pessah, MPI)

12/01/08-1/30/19

NIH NIEHS

Molecular and Cellular Basis of PCB Developmental Neurotoxicity

The main objective of this grant is to test the hypothesis that non-coplanar PCBs disrupt neuronal connectivity via ryanodine receptor (RyR)-mediated mechanisms that modulate Ca²⁺-dependent signaling pathways linked to activity-dependent dendritic growth and plasticity.

P30 ES023513 (Hertz-Picciotto)

05/05/15-03/31/20

NIH/NIEHS

UC Davis Environmental Health Science Core Center

The overarching goal of the UC Davis Environmental Health Sciences Core Center is to expand the scope, innovation, and impact of EHS research so as to improve environmental public health in northern California, the Central Valley, and across the globe.

Role: Leader, Career Development Program

R01 ES024946 (La Merrill)

03/01/16-02/28/21

Perinatal DDT exposure causes insulin resistance in mice through impaired thermogenesis

The overall objective of this proposal is to identify mechanism(s) by which environmentally relevant exposure to DDT during development increases risk of T2D in adulthood. Our central hypothesis is that developmental DDT exposure alters the epigenetic programming and/or sympathetic nervous system regulation of thermogenesis during early development, resulting in impaired thermogenesis throughout the life course. **Role:** Co-Investigator

Completed

RD835550 (Lein)

11/01/13-10/31/16

USEPA

Identification and scientific validation of AOPs involving genomic and nongenomic intracellular thyroid hormone signaling in neurodevelopment

Goal: (1) Identify neurodevelopmental processes regulated by thyroid hormone (TH) and determine whether these differ significantly between species; (2) Elucidate genomic and/or non-genomic intracellular signaling pathways that mediate TH effects on neurodevelopment; (3) Identify 'pathways of toxicity' by which chemicals interfere with TH-mediated neurodevelopment; and (4) Link pathways of toxicity with adverse neurodevelopmental outcomes in an in vivo model.

R01 ES017425 (Lehmler (Contact), Lein, Pessah, MPI)

12/1/09-11/30/15

NIH/NIEHS

Enantioselective Metabolism Influences PCB Developmental Neurotoxicity.

The primary goal of the project is to explore whether the PCB atropisomers have differential potency and efficacy towards ryanodine receptors.

- R01 ES017592 (Lein(Contact) and Fryer, MPI)** 07/1/10-06/30/15
NIH NIEHS
Role of Macrophages in Organophosphorus Pesticide-Induced Airway Hyperreactivity.
The main goal is to test the hypothesis that airway macrophages mediate organophosphorus pesticide-induced airway hyperreactivity in non-atopic hosts.
- R21 NS072094 (Lein (Contact) and Rogawski, MPI)** 09/30/10-08/31/13
NIH NINDS
Identification of novel therapeutic approaches to TETS and OP intoxication
The goal is to obtain preliminary data in support of our hypothesis that AMPA receptor (AMPA-R) antagonists and/or inhibitors of soluble epoxide hydrolases (sEH) will significantly improve clinical management of acute TETS and parathion intoxication by extending the therapeutic window, enhancing neuroprotection and providing therapeutic efficacy against diverse chemical threat agents.
- R01 ES 016308 (Anger [Contact] and Lein, MPI)** 06/01/08-04/30/13
NIH NIEHS
Biomarkers of Organophosphorus Pesticide-Induced Neurotoxicity.
The main objective of this project is to test the hypotheses that OP-induced neurobehavioral deficits in humans are dose-related and that biomarkers of oxidative stress and inflammation are better predictors of neurobehavioral deficits than cholinesterase inhibition.
- U01 NS 057993 (Ford)** 09/27/06-05/31/11
NIH NINDS
Neuroprotective Roles for Neuregulins in Neurotoxin-Mediated Neuronal Injury.
The major goal of this project is to test the hypothesis that neuregulins will be neuroprotective against CNS damage caused by OPs. (**Role on project:** PI on subcontract)
- UC Davis M.I.N.D. Institute Pilot Project (Lein)** 07/01/09-6/30/10
University of California, Davis
Potential Gene-Environment Interactions in ASD: Disruption of neuroligin-mediated synaptogenesis by organophosphorus pesticides.
The major goal of this project is to test the hypothesis that organophosphorus pesticides interfere with neuroligin-mediated synapse formation in cultured hippocampal neurons.
- R01 ES014601 (Fryer)** 12/01/06-11/30/11
NIH/NIEHS
Asthma exacerbation by organophosphate pesticides
The goal of this project is to test the hypothesis that sensitized animals will be more sensitive to organophosphorus pesticides than non-sensitized animals and that organophosphorus pesticides will interact with eosinophils to further exacerbate airway hyperreactivity in this susceptible population.
Role on grant: Co-Investigator
- R01 NS046649 (Lein)** 07/01/03-04/30/08
NIH/NINDS
Retrograde dystrophic influence of IFN-gamma on neurons
The main grant objective was to test the hypothesis that the pro-inflammatory cytokine gamma interferon contributes to inflammation-associated neuropathology by acting directly on neurons to induce dendrite retraction and synapse loss.

- R56 ES014901 (Lein)** 07/01/07-06/30/08
NIH NIEHS
Molecular and Cellular Basis of PCB Developmental Neurotoxicity
The main grant objective was to test the hypothesis that non-coplanar PCBs disrupt neuronal connectivity via ryanodine receptor (RyR)-mediated mechanisms that modulate Ca²⁺-dependent signaling pathways linked to activity-dependent dendritic growth and plasticity.
- Project #2007-27 (Lein and Tanguay)** 01/01/06-02/01/08
Johns Hopkins University Center for Alternatives to Animal Testing (CAAT)
Zebrafish as an In Vivo Model System for Identifying Developmental Neurotoxicants
The overall goal of this project is to evaluate zebrafish as an alternative model for developmental neurotoxicity testing.
- R21 NS45037 (Lein)** 01/01/04-12/31/06
NIH NINDS
Molecular regulation of primary dendritogenesis
The main grant objective was to identify genes that control the growth of primary dendrites in mammalian neurons by using subtractive hybridization techniques to isolate genes that are differentially regulated in sympathetic neurons during BMP-induced dendritic growth.
- MRF Seed grant (Lein)** 12/01/05-11/30/06
Medical Research Foundation of Oregon
Mechanisms of organophosphate-induced neuronal M2 receptor dysfunction
The goal of this project is to address the question of how organophosphorus pesticides inhibit M2 receptors in parasympathetic nerves that innervate the airways.
- R21 ES11771 (Lein)** 04/30/02-07/31/05
NIH NIEHS
Mechanism of organophosphate developmental toxicity
The goal was to test the hypothesis that organophosphate insecticides disrupt axonal growth in the developing nervous system by interfering with the morphogenic activity of AChE.
- PR012236 (Fryer)** 01/31/02-03/31/05
United States Department of Defense
Mechanistic studies investigating the role of organophosphate insecticide exposure in the development and exacerbation of asthma The goal was to test the hypothesis that organophosphate insecticides alter airway responsiveness by altering cholinergic neurotransmission in the lung.
Role on grant: Co-Investigator
- R03 HD40936 (Lein)** 03/01/02-08/31/04
NIH NICHD
Do PCBs alter developing brain structure and cognition? The goal was to test the hypothesis that PCBs alter cognitive behavior in juveniles via effects on dendritic morphogenesis.
- P30 ES03819 (Groopman)** 04/01/01-03/31/08
NIH NIEHS *Johns Hopkins Center in Urban Environmental Health*
The major goal of this project is to identify environmental chemical exposures and susceptibility factors that alone or together increase risk of disease for people living in urban environments.
Role on grant: Director, Facility Core for Cell and Tissue Analysis, Apr 01 to Aug 03

Pilot grant (Lein)

05/01/01-04/30/02

The Thomas and Carol McCann Innovative Research Fund for Asthma and Respiratory Disease
Modulation of muscarinic receptor expression on sympathetic neurons by pro- and anti-inflammatory agents associated with asthma The goal was to test the hypothesis that pro- and anti-inflammatory agents (IFN-J and dexamethasone) modulate M2 receptor expression in sympathetic neurons.

Pilot project proposal 00-12 (Lein)

04/01/00-03/31/01

NIEHS, Johns Hopkins University Center in Urban Environmental Health
Effects of polychlorinated biphenyls on estrogen metabolism in the developing hippocampus
The purpose of the proposed pilot study is to test the hypothesis that perinatal exposure to PCBs causes neural deficits by altering estrogen metabolism in neural structures critical to cognitive function, such as the hippocampus.

Pilot project (Lein)

05/01/00-04/30/02

Johns Hopkins University Bloomberg School of Public Health
Regulation of dendritic growth by target-derived bone morphogenetic proteins
The specific aims of this pilot grant are to test the hypothesis that BMPs derived from target tissues regulate dendritic growth in sympathetic neurons. The long-term objective is to develop testable hypotheses regarding molecular mechanism(s) by which neurotoxins disrupt neuronal morphogenesis.

Pilot Project Proposal 99-12 (Lein)

07/01/99-06/30/00

NIEHS, Johns Hopkins University Center in Urban Environmental Health
Assessment of dendritic growth as a targeted process in the developmental neurotoxicity of polychlorinated biphenyls (PCBs) The hypothesis being tested in this pilot project is that PCBs alter dendritic growth in primary neuronal cultures.

AREA NS/OD36401 (Lein)

04/01/97-08/31/99

NIH NINDS
Regulation of dendritic growth by osteogenic protein-1
The goal was to characterize effects of OP-1 on dendritic growth in cultured sympathetic neurons, and determine whether the spatial and temporal distribution of OP-1 in sympathetic ganglia and target tissues supported with their proposed role in regulating dendritic development in sympathetic neurons.

Pilot project (Lein)

01/01/91-12/31/91

American Cancer Society, Roswell Park Cancer Institute
Cell biology of human TILs engrafted into SCID mice The goal was to compare the integrin expression profile on tumor infiltrating lymphocytes versus peripheral blood lymphocytes.

TRAINING GRANT PARTICIPATION

Active

T32 ES007059 (Lein)

07/01/10-06/30/18

NIH NIEHS
Advanced Training in Environmental Health Sciences
The objective of this grant is to support pre- and postdoctoral trainees in the area of environmental health sciences research.

Completed

P42 ES04699 (Hammock) 04/01/10-03/31/15

NIH NIEHS Superfund Research Program

Biomarkers of exposure to hazardous substances, Training Core C of the program project

The Training Core aims to produce doctoral level engineers and scientists with the interdisciplinary educational experience necessary to address complex research problems posed by hazardous waste sites. **Role on project:** PI of Training Core C

T35 ES07308 (Lein) 04/01/03-03/31/04

NIH NIEHS

Short Term Research Training for Minority Students The main objective was to provide opportunities for qualified undergraduate under-represented students to participate in research on the mechanisms of the adverse effects of environmental agents on human health.

ADDITIONAL INFORMATION

Personal statement of research and research objectives

Our goal is to determine how environmental stressors interact with genetic susceptibilities to influence the risk and severity of neurodevelopmental disorders and neurodegeneration. Altered patterns of connectivity are associated with neurological deficits; therefore, we are investigating how environmental contaminants, chemical convulsants and inflammation perturb neuronal connectivity as determined using biochemical, morphogenic and electrophysiological endpoints. We are also developing biomarkers of OP neurotoxicity and testing novel therapeutic approaches for protecting against the neurodegenerative effects associated with neurotoxic pro-convulsants.
