

We make what matters work

About us

Eaton (NYSE:ETN) is a \$17.9 billion power management company. Our vision is to improve the quality of life and the environment through the use of power management technologies and services. Our innovations help reduce energy requirements, operating costs and emissions for buildings, aircraft, trucks, cars, machinery and businesses.

*At Eaton, we make
what matters work
and know **what**
matters next.*

We focus on understanding the big-picture challenges of our customers and deliver innovative solutions that help them achieve their business objectives.

The need for efficient — and sustainable — power will only grow. By 2050, the global population is expected to reach 9.7 billion. This, combined with a growing middle class in emerging markets, means that community infrastructure and services, such as buildings, hospitals, homes, roadways, airports, rail, water treatment facilities, utilities and data centers must keep pace. These are the things that people rely on every day. And it's our job to make sure it all works.

Environmental stewardship

Eaton is committed to industry-leading ESG (environmental, social and governance) practices. We have joined the global movement to limit the increase of the world's temperature to 1.5°C — an effort that begins with our commitment to aggressive, science-based targets. Our goal is to achieve carbon neutrality by 2030 and to certify 100 percent of our manufacturing sites as zero waste-to-landfill during that same timeframe.

Powering Business Worldwide

Our businesses

We have approximately 85,000 employees around the world helping our global customers in more than 175 countries use power more efficiently, safely, reliably and sustainably.

Electrical Sector

Our Electrical Sector is a leader in electrical products, systems and services for power quality, distribution and control, and wiring. Our Electrical business provides technology-driven solutions that serve the critical needs of the industrial, utility, commercial, residential and information technology markets.

Industrial Sector

Our Industrial Sector is comprised of the company's Aerospace, Hydraulics, Vehicle and eMobility businesses.

Our Aerospace Group manufactures hydraulic, fuel, pneumatic and actuation products that deliver safe and efficient solutions for aircraft.

Our Vehicle Group designs, develops and manufactures technologies for the Automotive and Commercial Vehicle markets including transmissions, clutches, engine air management and chassis driveline components — including advanced valvetrain and torque control products — that create, distribute and optimize power.

Our eMobility business combines products, expertise and global manufacturing capabilities from Eaton's Electrical and Vehicle businesses, and focuses on three primary areas for both passenger car and commercial vehicle customers: intelligent power electronics, power systems, and advanced power distribution and circuit protection.
