

# NEIGHBORHOOD UNDER CONSTRUCTION

## DIRECTIONS

Have kids work in teams to construct their own neighborhood.

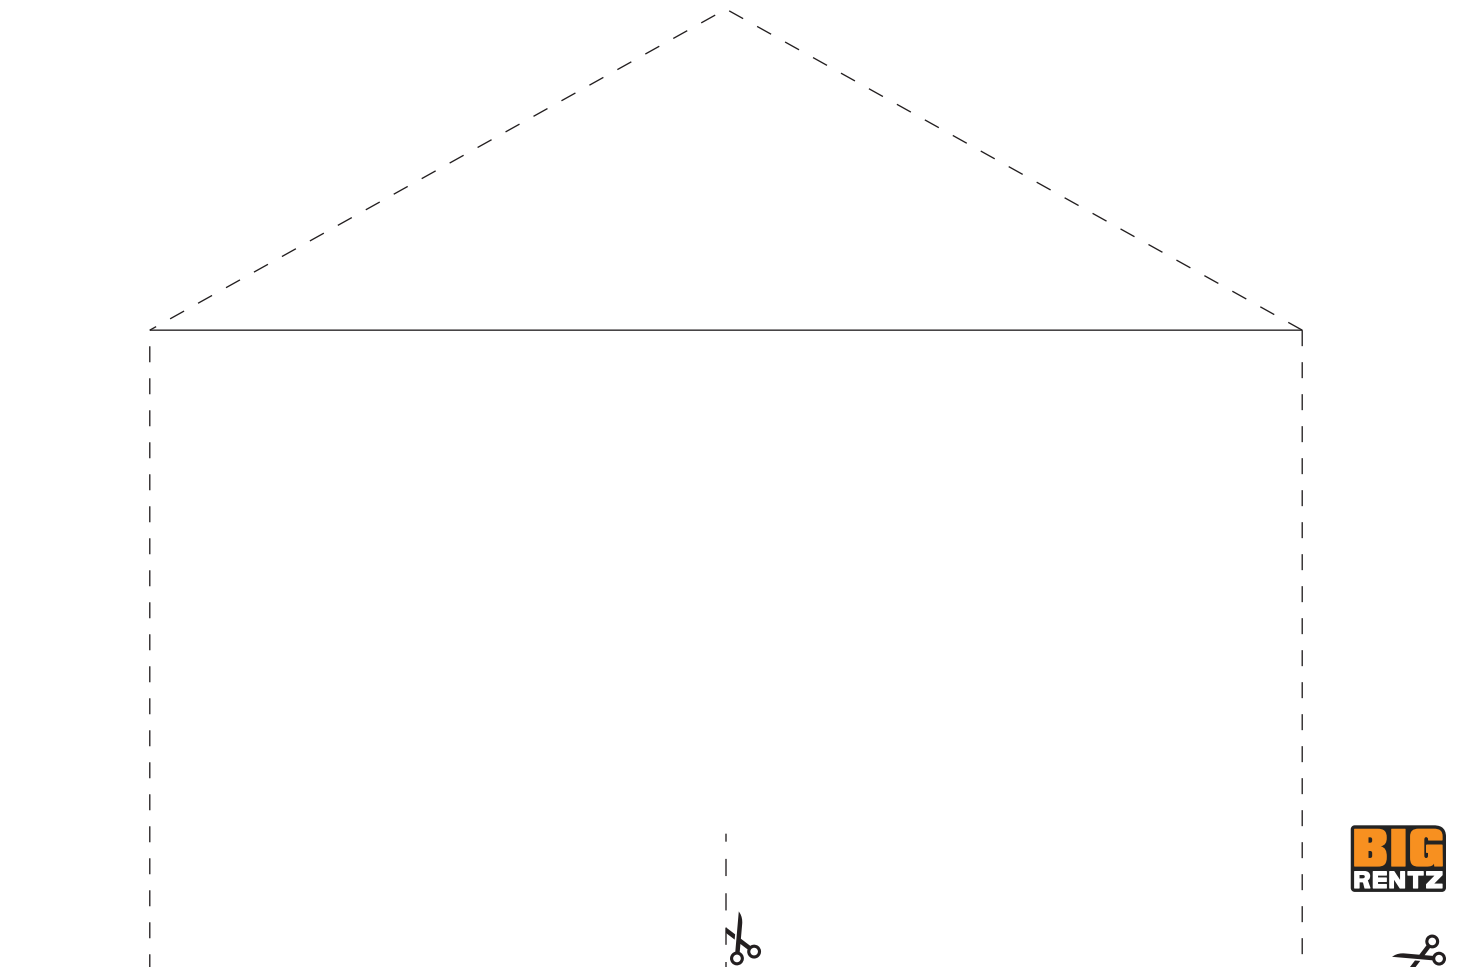

1. Cut out work order form, name badges, and construction signs.
2. What steps does it take to build a house? Write them on your work order.
3. What types of workers will you hire to build your house? Write their names and jobs on your name badges.
4. Draw your house in the outline below.
5. Cut out your house and glue it onto a piece of cardboard.
6. Cut a slot along the bottom and insert a piece of cardboard to create a stand.
7. Set up construction signs around your neighborhood. Once the area is safe, start arranging houses to build your neighborhood!

## SUPPLIES NEEDED

- Scissors
- Crayons
- Cardboard
- Glue

## TIP

Ask kids to explain their house design and list the steps they think are needed to build their house on the work order sheet prior to building. Have kids cut out and prop up the construction signs.
