## 1. Introduction

The KIP Accounting Center consolidates control of user account data and printing rules for all copy print and scan activities for KIP color and B&W systems. Account data is continuously accessed by KIP Touchscreen copy & scan systems as well as the variety of KIP printing applications and print drivers. Rules based printing and three customizable fields for password protected user accounts, project numbers, and department codes help administrators and IT managers control print costs or turn printing into billing revenue.

### KIP Accounting Center Features

3 Customizable Fields | Import for User Data Using LDAP | Clear Fields After Each Job Submission | ASCII Import/Export | Easily Update User, Project and Department Data | Automated Update Via Scripting | Password Protect Any or All Data Entries | No Special Data Servers Required

## 1.1 System Requirements

Recommended PC Specifications:

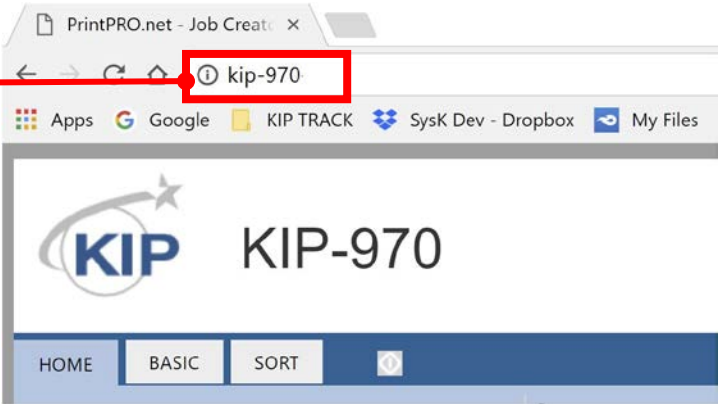

- 3.0 GHz processor speed
- 1 GB RAM
- Hard disk of 100 GB or more
- DVD-ROM
- USB-connection
- Windows 7, Windows 8, Windows 10
- 32/64 bit OS compatible

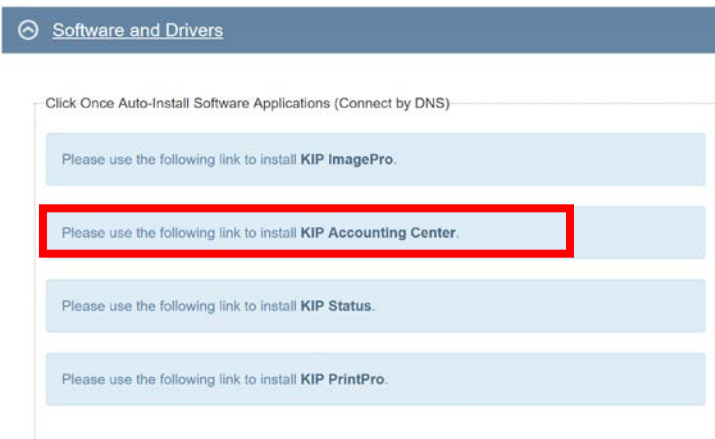

## 1.2 Installation

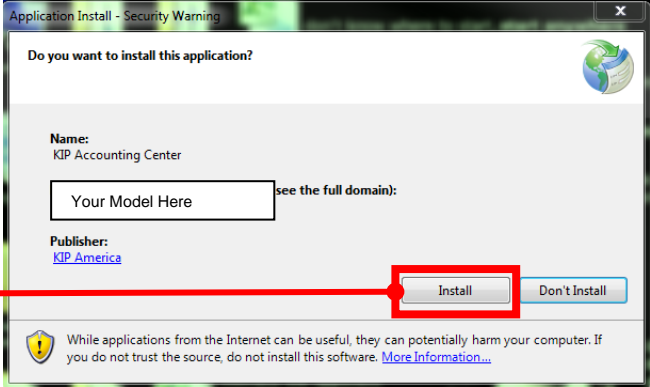

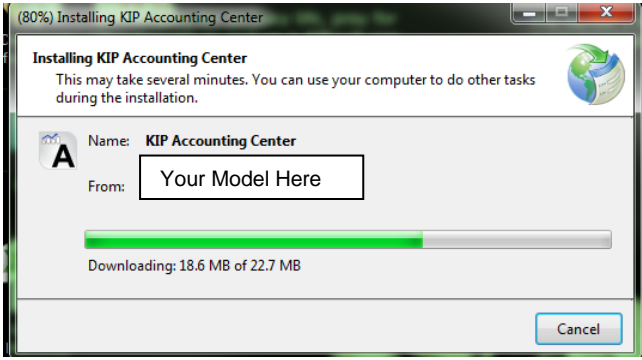

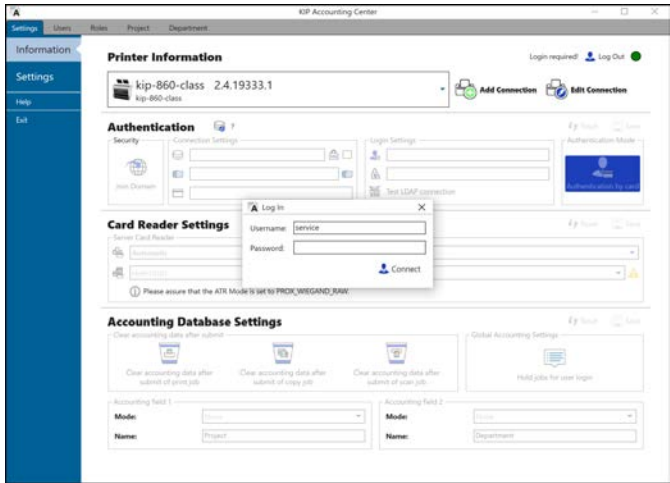

The KIP Accounting Center can be installed in multiple ways. The first way is to install the software by using the Click once Technology installer location on the KIP printer itself. This can be accessed via KIP PrintPro.net. The second method for installing the KIP Accounting Center is by using the Installer that is on the KIP Software and Operation Guide DVD (ships with all KIP Printers). The third method would be to download the Installer from the KIP Web Site (www.kip.com) and then run the installer on the work station.

The first method using the Click Once Technology installer is the recommended method. This will allow automatic updates to take place at the workstation if the KIP Printer is updated.

### 1.2a. How to install KIP Accounting Center from PrintPro.net

Step	Function
1. Open Browser window (this example uses Chrome). Enter the KIP Printer Name on the address line.	
2. Once PrintPro.Net opens select the Home Icon.	<div> <div>Not Selected</div> <div>  </div> <div>Selected</div> </div>

Step	Function
<p>3. Maximize the Download Software section and select the KIP Accounting Center link.</p>	 <p>Software and Drivers</p> <p>Click Once Auto-Install Software Applications (Connect by DNS)</p> <p>Please use the following link to install KIP ImagePro.</p> <p>Please use the following link to install KIP Accounting Center.</p> <p>Please use the following link to install KIP Status.</p> <p>Please use the following link to install KIP PrintPro.</p>
<p>4. Select the Install Button</p>	 <p>KIP Accounting Center</p> <p>Name: KIP Accounting Center</p> <p>Version:</p> <p>Publisher: KIP</p> <p>The following prerequisites are required:</p> <ul style="list-style-type: none"> <li>• Microsoft .NET Framework 4.5 (x86 and x64)</li> <li>• .NET Framework 3.5 SP1 Client Profile</li> <li>• .NET Framework 3.5 SP1</li> <li>• Windows Installer 4.5</li> </ul> <p>If these components are already installed, you can <a href="#">launch</a> the application now. Otherwise, click the button below to install the prerequisites and run the application.</p> <p>Install</p>

Step	Function
<p>5. Application Install window will open. Select Install to begin.</p>	
<p>6. Installation will begin</p>	
<p>7. The Application will Auto Launch when installation is complete.</p> <p>For Username enter Service or Administrator and the password associated with each. If User names have already been created it is possible to log in as a specific user as well.</p>	

## 1.3 Main Screen (Information Tab)

Once Logged in the Information Screen will be displayed.

The screenshot shows the main interface of the KIP Accounting Center. At the top, there are tabs for Settings, Users, Roles, Project, and Department. The 'Settings' tab is active, showing a sidebar with 'Information', 'Settings', 'Help', and 'Exit'. The main content area is titled 'Printer Information' and shows 'kip-860-class' as the selected printer. Below this are sections for 'Authentication' (with 'Join Domain' and 'Login Settings' options), 'Card Reader Settings' (with 'Automatic' and 'HidH10301' settings), and 'Accounting Database Settings' (with 'Clear accounting data after submit' and 'Global Accounting Settings' options). Numbered callouts 1 through 12 point to various elements: 1 points to the 'Information' tab, 2 to 'Settings', 3 to 'Help', 4 to 'Exit', 5 to the 'Users' tab, 6 to 'Roles', 7 to 'Project', 8 to 'Department', 9 to the 'Printer Information' section, 10 to the 'Authentication' section, 11 to the 'Card Reader Settings' section, and 12 to the 'Accounting Database Settings' section.

Component	Function
1. Information	Displays overall information for the connected KIP printer.
2. Settings	Used to select the Language Preference.
3. Help	Displays the current Software Version
4. Exit	Closes the Application
5. Users (See sec. 1.4)	Used to create Users for accounting purposes.
6. Roles (See sec. 1.5)	Used to create Roles for accounting purposes.
7. Project (See sec. 1.6)	Used to create Projects for accounting purposes.
8. Department (See sec. 1.7)	Used to create Departments for accounting purposes.
9. Printer Information	Shows connected KIP Printer and allows for the addition of new printers.
10. Authentication	Used to Join Domain and set up LADP configuration to pull in Domain Users
11. Card Reader Settings	Used to configure card readers on the KIP printer.
12. Accounting Database Settings	Used to set requirements for the accounting fields.

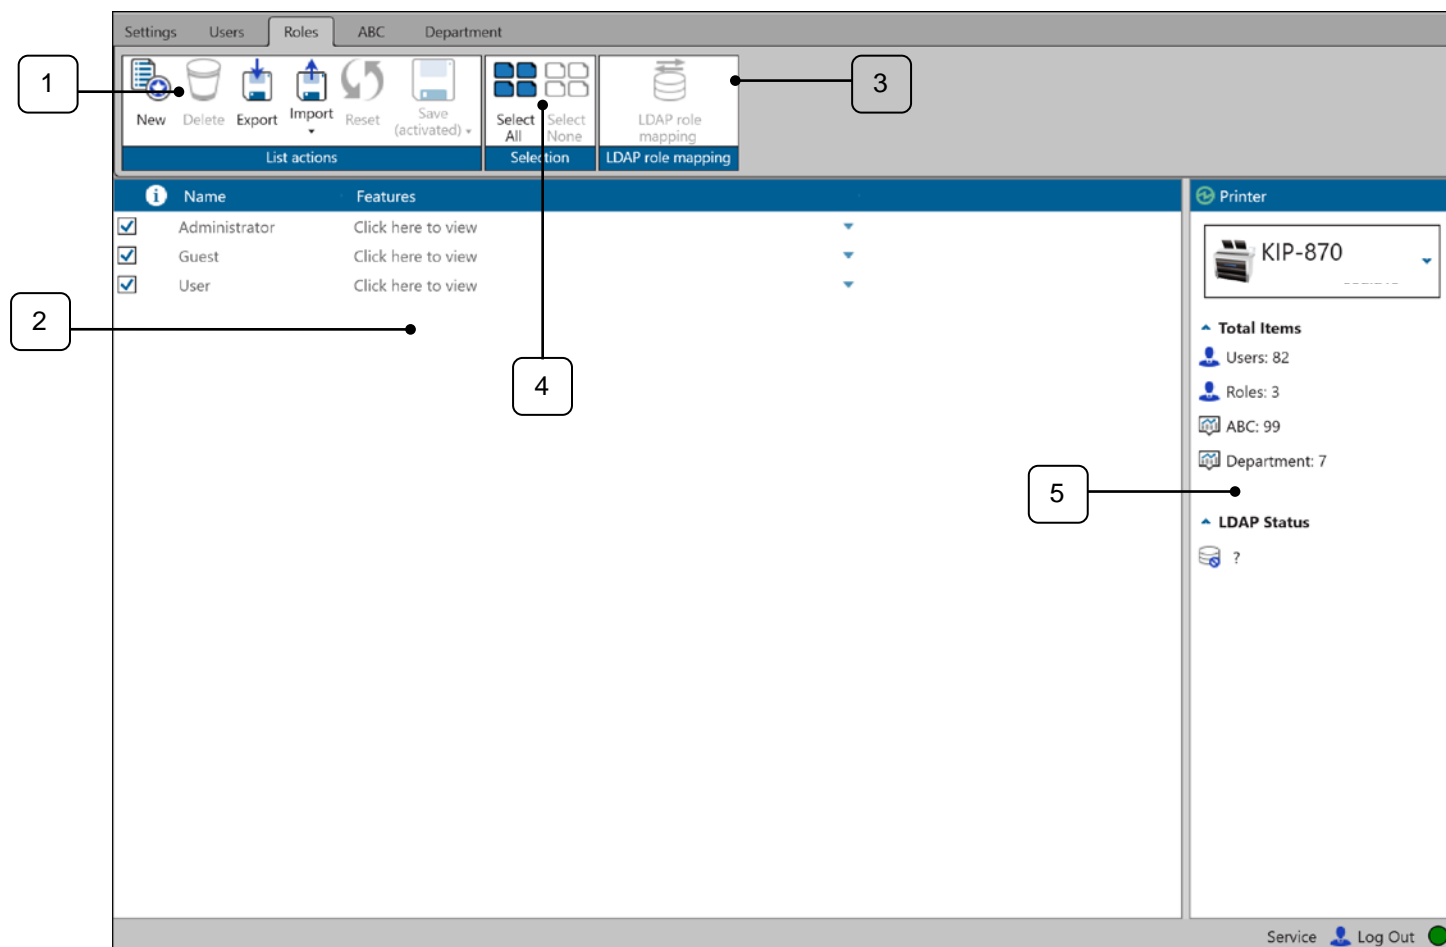

## 1.4 Accounting Setup - User Name

The screenshot displays the 'Users' management interface. At the top, there are tabs for 'Settings', 'Users', 'Roles', 'Project', and 'Department'. Below these is a toolbar with icons for 'New', 'Delete', 'Export', 'Import', 'Reset', and 'Save (activated)', along with 'Select All' and 'Select None' buttons. A table lists users with columns for 'User Name', 'First Name', 'Last Name', 'Roles', and 'eMail'. The table contains two entries: 'Administrator' and 'Service'. To the right of the table, there is a sidebar with a 'Printer' section showing 'kip-970' and a 'Total Items' section showing 'Users: 2', 'Roles: 3', 'Project: 0', and 'Department: 0'. At the bottom right, there is a 'LDAP Status' section showing 'No LDAP connection'. Numbered callouts 1 through 4 point to specific UI elements: 1 points to the toolbar, 2 points to the user table, 3 points to the selection buttons, and 4 points to the printer and summary information.

Component	Function
1. List Actions	Allows for New User Entry, Delete, Export, Import and Save
2. User Name Details	Matrix used for new entries
3. Selection	Select All\Select None
4. Printer Information	Shows Printer information as well as Total User accounts and LDAP Status

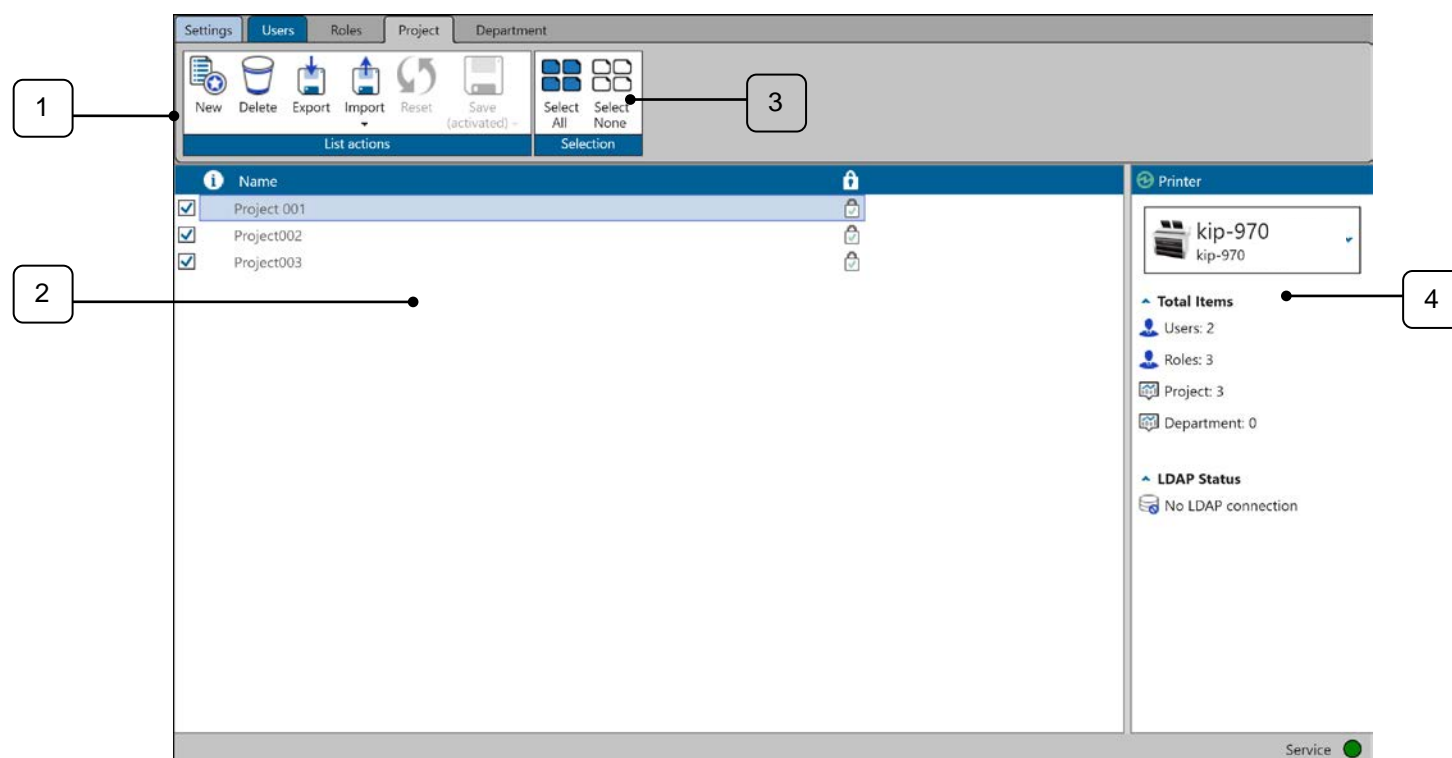

## 1.5 Accounting Setup - Roles

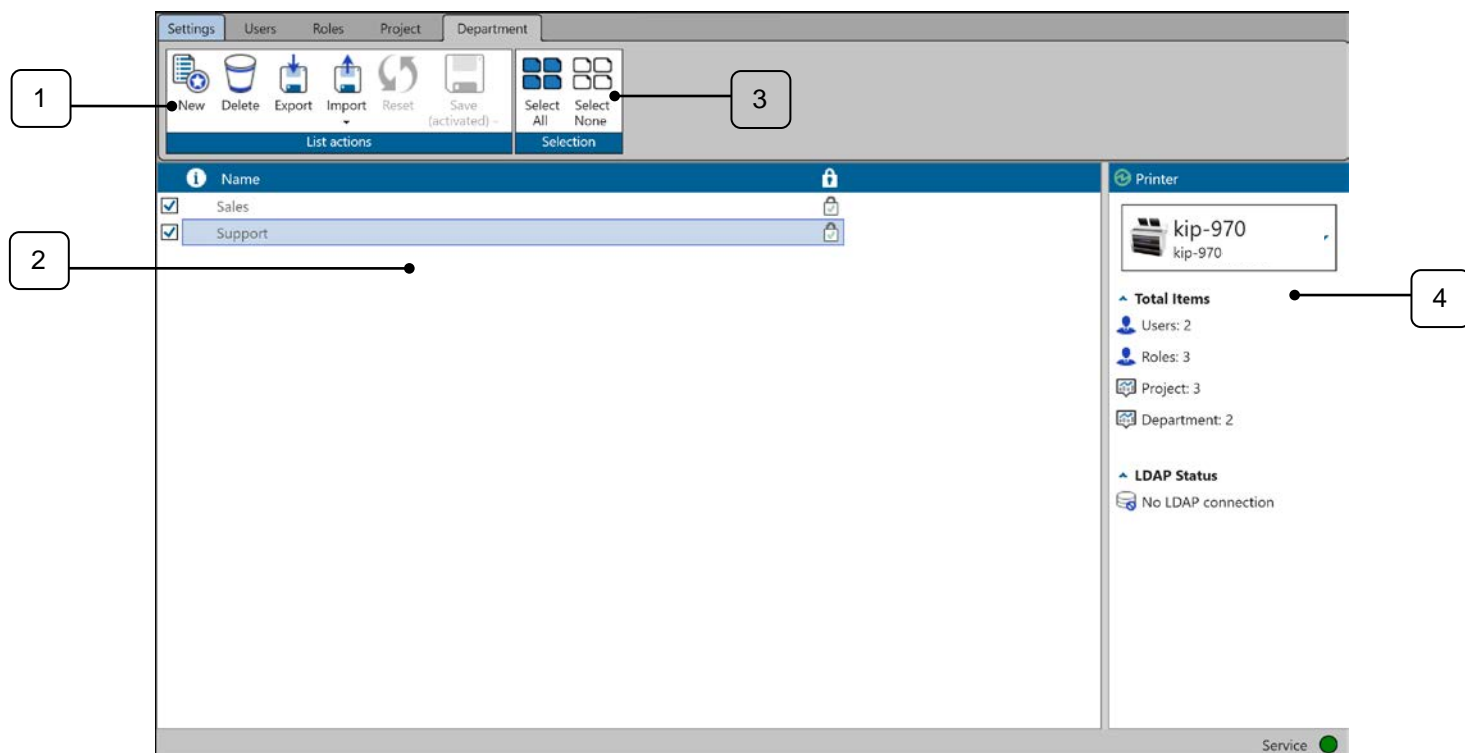

Component	Function
1. List Actions	Allows for New User Entry, Delete, Export, Import and Save
2. User Name Details	Matrix used for new entries
3. LDAP Role Mapping	Used to set up LDAP
4. Selection	Select All\Select None
5. Printer Information	Shows Printer information as well as Total User accounts and LDAP Status

## 1.6 Accounting Setup - Project

Component	Function
1. List Actions	Allows for New User Entry, Delete, Export, Import and Save
2. User Name Details	Matrix used for new entries
3. Selection	Select All\Select None
4. Printer Information	Shows Printer information as well as Total User accounts and LDAP Status

## 1.7 Accounting Setup - Department

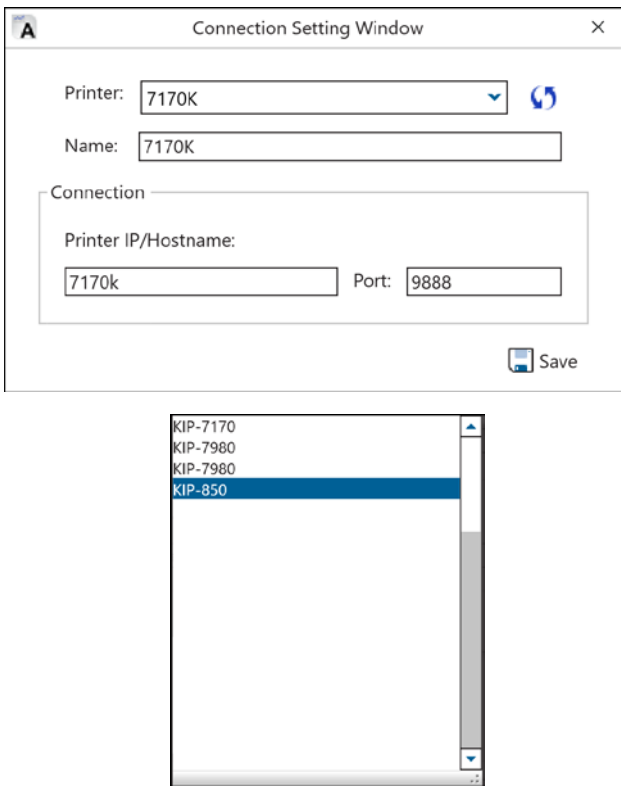

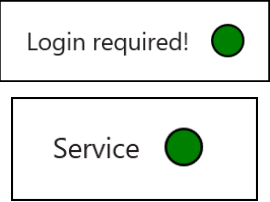

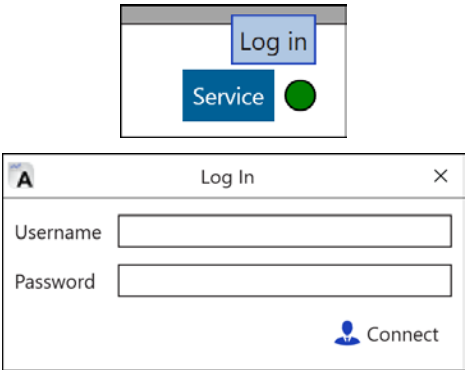

Component	Function
1. List Actions	Allows for New User Entry, Delete, Export, Import and Save
2. User Name Details	Matrix used for new entries
3. Selection	Select All/Select None
4. Printer Information	Shows Printer information as well as Total User accounts and LDAP Status

## 2. Using KIP Accounting Center

The KIP Accounting Center is used for entering in large amounts of accounting information in a quick and easy manner. Additional information/changes are made immediately on the KIP Printer no other steps are necessary.

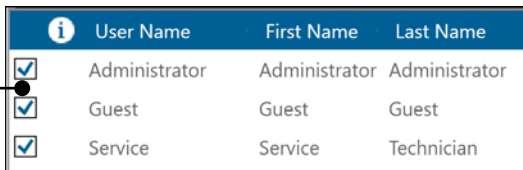

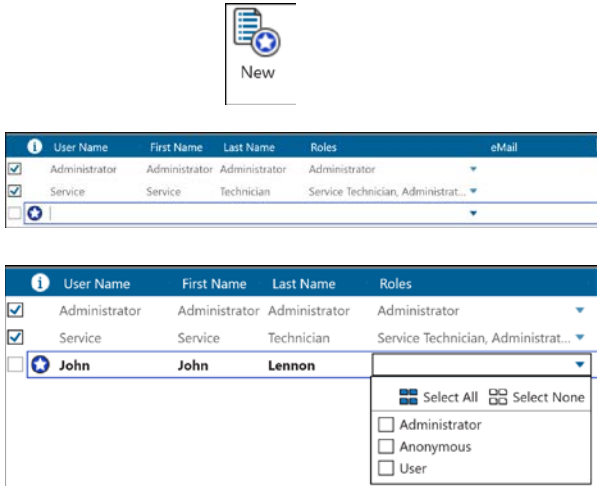

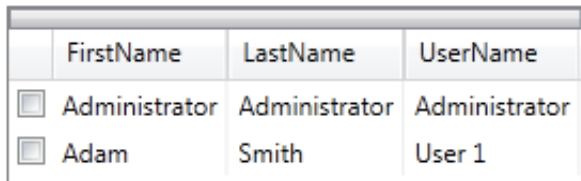

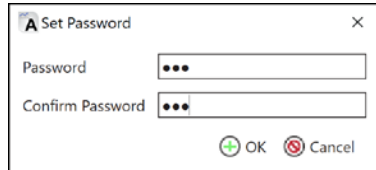

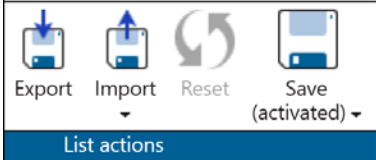

### 2.1 Connecting to KIP Printer(s)

Step	Action	Illustration
1.	<p>If KIP Accounting center was pulled from the KIP Printer via KIP PrintNet it will auto launch connected to printer pulled from. If KIP Accounting center was loaded via the executable from the KIP Software and Operation Guide, it will be necessary to connect to the KIP Printer the Accounting Information will be pushed to.</p> <p>To create a new connection, click the “Add Connection” icon.</p> <p>To edit an existing connection, click the “Edit Connection” icon</p>	 <p><b>Printer Information</b></p> <p>kip-970</p> <p>Add Connection Edit Connection</p>
2.	<p>When Add Connection is selected the KIP Accounting Center application will search the Network for any installed KIP Printers and display them in a list. Select the desired printer and click Save.</p> <ul style="list-style-type: none"> <li>Printer – Display Name for the connection</li> <li> Refresh – Refreshes connections</li> <li>Connection – Shows IP Address or Hostname of the KIP Printer and Port</li> <li>Save – Saves settings</li> </ul>	 <p><b>Connection Setting Window</b></p> <p>Printer: 7170K</p> <p>Name: 7170K</p> <p>Connection</p> <p>Printer IP/Hostname: 7170k Port: 9888</p> <p>Save</p> <p>KIP-7170 KIP-7980 KIP-7980 KIP-850</p>

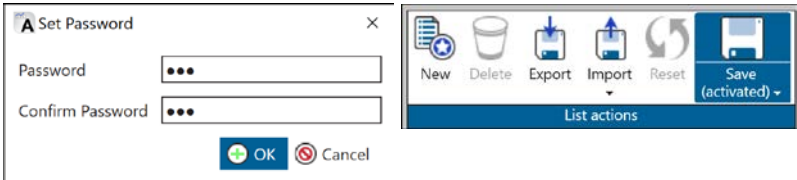

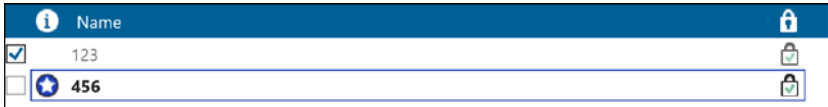

Step	Action	Illustration
3.	<b>Logging In:</b> The username of the currently logged on user is displayed in the bottom right corner of the screen.	
4.	To login/change user click the button (current logged in name) and the User logon screen will be displayed.	

## 2.3 Configuring Accounting

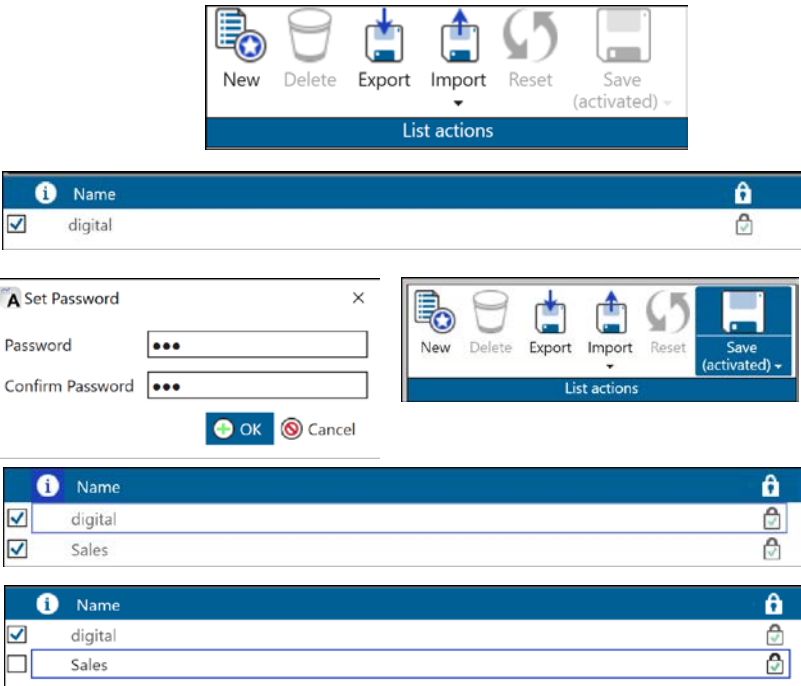

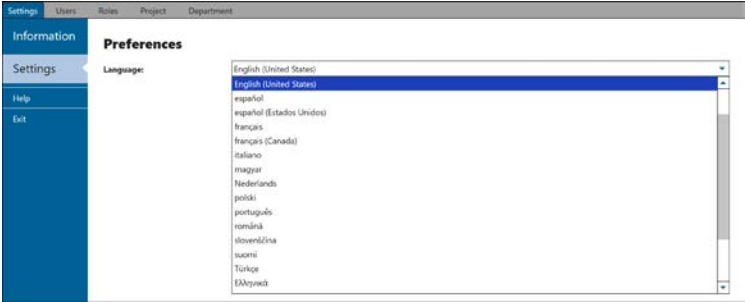

The KIP Accounting Center is used by an administrator to add/remove accounting information on the connected KIP Printer.

Action	Illustration
<p><b>User:</b></p> <p>By default, there will be an Administrator Account, a Service account and a Guest Account set up.</p>	
<p>Adding a user:</p> <ul style="list-style-type: none"> <li>Click the New Button.</li> <li>A new field will become active in the build area.</li> <li>Available fields (use Tab button to move from one cell to another): <ul style="list-style-type: none"> <li>User Name – Enter the User Name</li> <li>First Name – Enter Users First Name</li> <li>Last Name – Enter Users Last Name</li> <li>Roles – Pick from list of available roles</li> <li>E-mail – Enter users E-mail (Optional - used for sending notification)</li> <li>Language – Choose the desired language for the user (Optional, defaults to English)</li> <li>Allow Card Reader – When checked allows for the use of a Card reader.</li> <li>Card Number - This field shows the Number of the Card being used.</li> <li>Read Card - This will read the number of the card for association to assigned Role.</li> <li>Password – Set the password for the use of the card. Box will open to allow password to be set (<b>Required Field</b>).</li> </ul> </li> <li>Export Data – Exports data to a .csv file</li> <li>Import Data – Imports data from a saved .csv file.</li> <li>Reset – clears fields</li> <li>Save /Save Activated – Saves entry/Saves and Activates entry</li> </ul> <p><b>Note:</b> to edit or remove the entry must not be active (box unchecked)</p>	   

Action	Illustration																				
<p><b>User Roles:</b></p> <p>Three levels of permissions by Default:</p> <ul style="list-style-type: none"><li>Administrator – All permissions set up of Users, Meters, and Reports etc. However, no Hardware related setup.</li><li>Guest – Every day operation of print, copy, scan; creation of presets, job-based notifications</li><li>User - Every day operation of print, copy, scan; creation of presets, job-based notifications</li></ul>	<table><tr><th></th><th>User Name</th><th>First Name</th><th>Last Name</th></tr><tr><td><input checked="" type="checkbox"/></td><td>Administrator</td><td>Administrator</td><td>Administrator</td></tr><tr><td><input checked="" type="checkbox"/></td><td>Guest</td><td>Guest</td><td>Guest</td></tr><tr><td><input checked="" type="checkbox"/></td><td>Service</td><td>Service</td><td>Technician</td></tr></table>		User Name	First Name	Last Name	<input checked="" type="checkbox"/>	Administrator	Administrator	Administrator	<input checked="" type="checkbox"/>	Guest	Guest	Guest	<input checked="" type="checkbox"/>	Service	Service	Technician				
	User Name	First Name	Last Name																		
<input checked="" type="checkbox"/>	Administrator	Administrator	Administrator																		
<input checked="" type="checkbox"/>	Guest	Guest	Guest																		
<input checked="" type="checkbox"/>	Service	Service	Technician																		
<p><b>Roles:</b></p> <p>The Roles section allows for the creation of specific settings (roles) that can be assigned to a specific user. Once a new role is created this will be added to the “Roles” list associated with the User creation (see User step above).</p> <p>Note: The above Role “Black &amp; White User” has been created with specific settings related to Black &amp; White only. This role was assigned to Adam Smith when this user was created.</p>	<div><div>All Roles</div><div>No Roles</div><div>B&amp;W USER</div></div> <table><tr><th></th><th>User Name</th><th>First Name</th><th>Last Name</th></tr><tr><td><input checked="" type="checkbox"/></td><td>Administrator</td><td>Administrator</td><td>Administrator</td></tr><tr><td><input checked="" type="checkbox"/></td><td>B&amp;W User</td><td></td><td></td></tr><tr><td><input checked="" type="checkbox"/></td><td>Guest</td><td>Guest</td><td>Guest</td></tr><tr><td><input checked="" type="checkbox"/></td><td>Service</td><td>Service</td><td>Technician</td></tr></table>		User Name	First Name	Last Name	<input checked="" type="checkbox"/>	Administrator	Administrator	Administrator	<input checked="" type="checkbox"/>	B&W User			<input checked="" type="checkbox"/>	Guest	Guest	Guest	<input checked="" type="checkbox"/>	Service	Service	Technician
	User Name	First Name	Last Name																		
<input checked="" type="checkbox"/>	Administrator	Administrator	Administrator																		
<input checked="" type="checkbox"/>	B&W User																				
<input checked="" type="checkbox"/>	Guest	Guest	Guest																		
<input checked="" type="checkbox"/>	Service	Service	Technician																		

Action	Illustration
<p><b>Project:</b></p> <p>Allows adding, editing or the removal of Project ID's</p> <ul style="list-style-type: none"> <li>Adding a Project – Click “New”</li> <li>A new field will become active in the build area.</li> <li>Enter project description</li> <li>Select the Lock to enter Password</li> <li>Select Save Activated</li> </ul> <p><b>Note:</b> To edit or remove, the entry must not be active (box unchecked)</p>	   

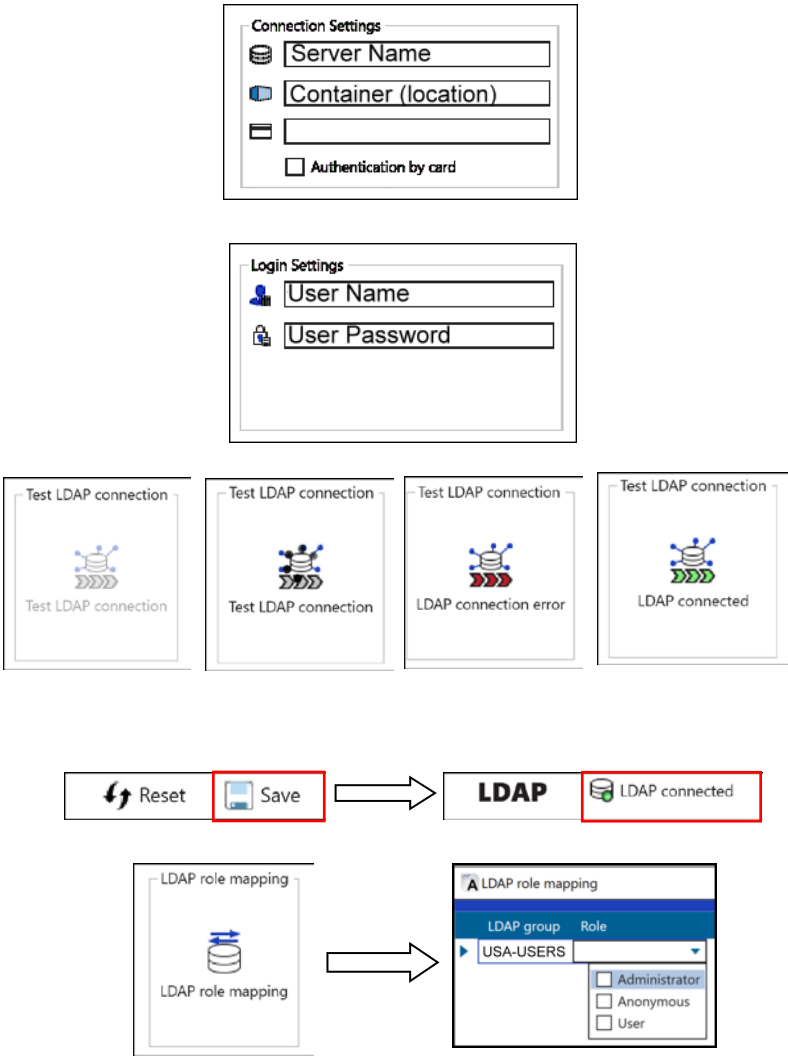

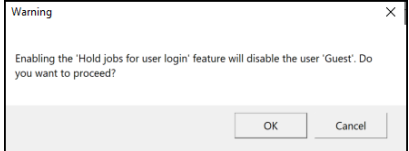

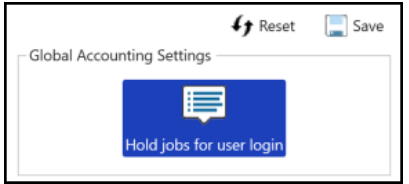

Action	Illustration
<p><b>Department:</b></p> <p>Allows adding, editing or the removal of Department ID's:</p> <ul style="list-style-type: none"> <li>Adding a Department – Click “New”</li> <li>A new field will become active in the build area.</li> <li>Enter Department description</li> <li>Select the Lock to enter Password</li> <li>Select Save Activated</li> </ul> <p><b>Note:</b> To edit or remove, the entry must not be active (box unchecked)</p>	
<p><b>Settings:</b></p> <p>Allows the Administrator to configure the language settings of the connected printer.</p>	

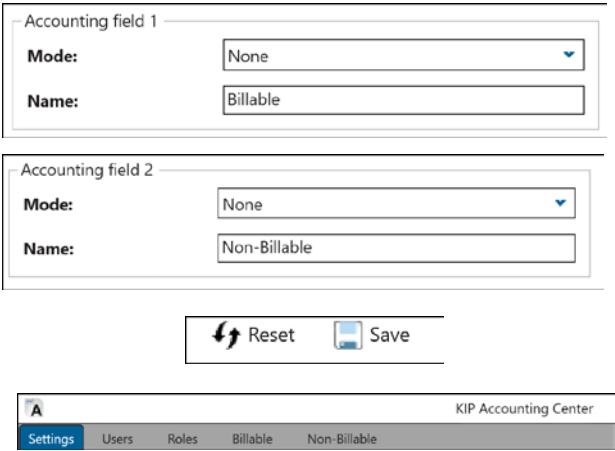

## 2.4 Configuring LDAP Settings

The KIP Accounting Center is designed to use onsite LDAP settings if available. This section will show how this section can be set up. **This functionality will require onsite Administrator to configure.**

**Please Note: LDAP Entries are not populated with the KIP Windows Driver and KIP AutoCAD Driver (HDI). Normal accounting data as well as logged in user will still be available.**

Action	Illustration
<p><b>LDAP Accounting Settings:</b></p> <p>LDAP (Lightweight Directory Access Protocol) allows for the selection of users from a list gathered from the locally connected PC.</p> <p>All selected users can be added and activated with permission level "Administrator", "Guest" or "User".</p> <ul style="list-style-type: none"> <li>• Connection settings – This is used by the Administrator to enter the necessary "Server", "Container" and "Card Number" as well as turn on Authentication by card if used.</li> <li>• Login Settings – Allows the administrator to enter the necessary credentials to access the desired location.</li> <li>• Test LDAP connection – allows the administrator to test the connection. Could see the following indicators: <ul style="list-style-type: none"> <li>○ Test LDAP Connection – becomes active when location and credentials are entered.</li> <li>○ LDAP Connection Error – occurs when something is incorrect in the information entered or the location is not accessible.</li> <li>○ LDAP Connected – When all information is correct and location is accessible.</li> </ul> </li> <li>• Reset/Save – Once connection is established this becomes active so the information may be saved. Once saved the LDAP section will show connected.</li> <li>• LDAP Role Mapping – allows the administrator to assign roles to the LDAP users being added.</li> </ul>	 <p><b>Note: When making changes to LDAP accounts there is a default 1-hour refresh before the changes will be seen. It is possible to bypass this 1-hour refresh by re-booting the KIP System Controller.</b></p>

Action	Illustration
<b>Accounting Database Settings:</b> <ul style="list-style-type: none"> <li>Clear accounting data after submit of print job</li> <li>Clear accounting data after submit of print job</li> <li>Clear accounting data after submit of print job</li> <li>Accounting field 1</li> <li>Accounting field 2</li> </ul>	<div>  <p>Clear accounting data after submit of print job</p> </div> <div>  <p>Clear accounting data after submit of copy job</p> </div> <div>  <p>Clear accounting data after submit of scan job</p> </div> <p><b>NOTE:</b></p> <ul style="list-style-type: none"> <li>Clear accounting data after submit of print job – Selecting this will clear the entered accounting information after each submit.</li> <li>Clear accounting data after submit of print job– Selecting this will clear the entered accounting information after each submit.</li> <li>Clear accounting data after submit of print job– Selecting this will clear the entered accounting information after each submit.</li> </ul>
<b>Global Accounting Settings:</b> <ul style="list-style-type: none"> <li>Hold Jobs for user login – When users are logging in prior to submitting jobs, this setting will hold their jobs in the queue until they log in at the touchscreen.</li> </ul> <p><b>Note: when activating a warning message will appear “Enabling the “Hold jobs for user login” feature will disable the user “Guest”. Do you want to proceed?”</b></p>	  
<b>Setting the requirement (Mode):</b> <ul style="list-style-type: none"> <li>None – No requirements for this field.</li> <li>Required – Entering some information into this field is required to print.</li> <li>Dropdown – Allows for the selection of data from a dropdown window.</li> <li>Dropdown/Password Required – Requires a password in conjunction with the dropdown selection.</li> </ul> <p><b>Please Note: in order for the requirements Dropdown and Dropdown/Password Required to be available there must be Accounting Information created. If no accounting information is created only None and Required will be available as options.</b></p>	<div> <p>Accounting field 1</p> <p>Mode: <span>None</span></p> <p>Name: <span>Project</span></p> </div> <p>Same Dropdown for both fields</p> <div> <p>Accounting field 2</p> <p>Mode: <span>None</span></p> <p>Name: <span>Department</span></p> </div> <div> <p>None</p> <p>None</p> <p>Required</p> <p>Dropdown</p> <p>Dropdown / Password required</p> </div>

Action	Illustration
<p><b>Changing field designation (Name):</b></p> <ul style="list-style-type: none"> <li>This field can be re-named to whatever the customer would like it to say. Simply change this field to the desired description. This will automatically change the description/labels on the icons in all the KIP applications.</li> </ul>	 <p>The illustration shows a web interface for configuring accounting fields. It contains two sections, 'Accounting field 1' and 'Accounting field 2'. Each section has a 'Mode' dropdown menu (both set to 'None') and a 'Name' text input field (set to 'Billable' and 'Non-Billable' respectively). Below these sections are 'Reset' and 'Save' buttons. At the bottom, there is a navigation bar with tabs for 'Settings', 'Users', 'Roles', 'Billable', and 'Non-Billable', and the text 'KIP Accounting Center'.</p>

## 2.5 Configuring Card Reader

The KIP Accounting Center is designed to use Card readers for quick authentication for walk up users.

### Card Reader Settings

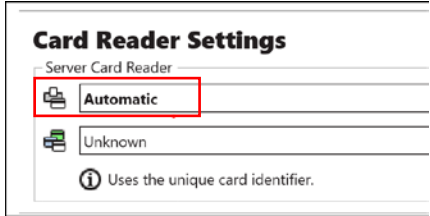

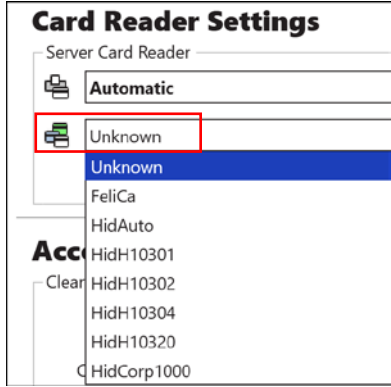

Reset
Save

Server Card Reader

Automatic

Unknown

*Uses the unique card identifier.*

Action	Illustration
<p><b>Server Card Reader:</b> Card Reader on server</p> <p>The KIP Sysytem is set up to detect the two Card readers compatible with the system:</p> <ul style="list-style-type: none"> <li>Sony Card Reader RC-S380</li> <li>OmniKey C2457</li> </ul>	<div>  <p><b>Card Reader Settings</b></p> <p>Server Card Reader</p> <p>Automatic</p> <p>Unknown</p> <p><i>Uses the unique card identifier.</i></p> </div> <p><b>Note:</b> The driver for the two card readers are pre-loaded on the KIP System. Once the card reader is plugged in it will be autodetected and loaded. A renooot will be necessary.</p>
<p><b>Card Type on Server</b></p> <p>It is necessary to tell the system the card type that will be being detected. Select from the list of available card types.</p>	<div>  <p><b>Card Reader Settings</b></p> <p>Server Card Reader</p> <p>Automatic</p> <p>Unknown</p> <p>Unknown</p> <p>FeliCa</p> <p>HidAuto</p> <p><b>Acc</b> HidH10301</p> <p>Clear HidH10302</p> <p>HidH10304</p> <p>HidH10320</p> <p>C HidCorp1000</p> </div>

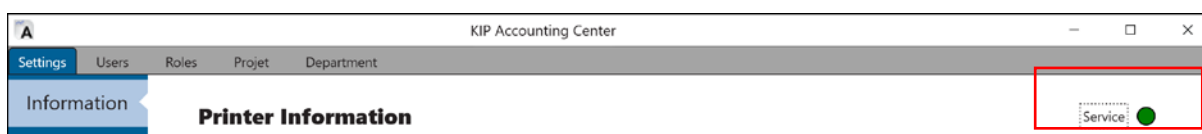

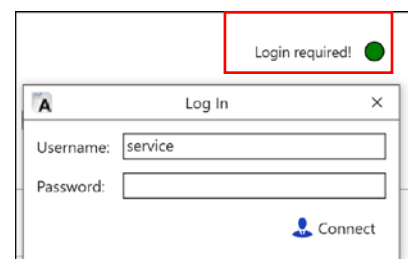

## 3 How to use KIP Accounting Center Application

This section will show the basics for how to use the KIP Accounting Center application to set up Users, Projects and Departments. As well as how to use Role Based Access Controls that will allow management of print output and device usage easily and efficiently.

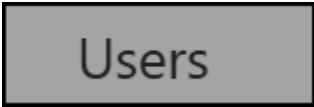

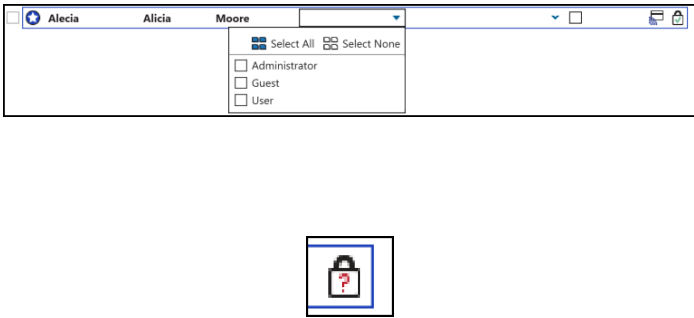

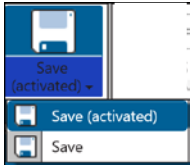

### 3.1 KIP Accounting Center Usage

The KIP Accounting Center Application is used to add multiple Users, Job Numbers and Job Descriptions to KIP Printers for accounting purposes. This tool is used by Administrators and is Password protected.

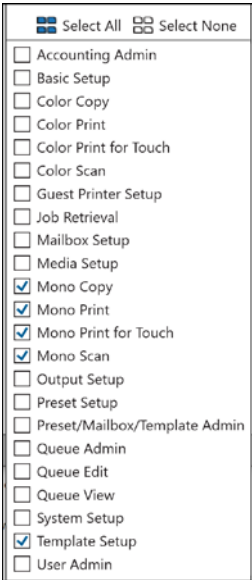

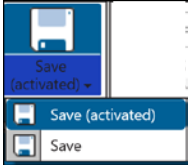

- Launch the KIP Accounting Center the bottom right corner shows “Login Required”
- Clicking the “login required!” text in the top right corner will connect to the KIP Printer. The logged in user name will display when the connection is established successfully.
- To login, enter a valid username and the corresponding password and click “Authenticate”.
- The application starts and is ready to be configured (or used, depending on the credentials used to login).

## 3.2 Creating Users

Action	Illustration
1. To add Users, select the User Tab	
2. Click <b>New</b> .	
<p>3. Enter the desired information to be associated with the user being added.</p> <ul style="list-style-type: none"> <li>Under Roles select the level for this user (see pg. 12 for descriptions). <ul style="list-style-type: none"> <li>Administrator</li> <li>Guest</li> <li>User</li> </ul> </li> <li>Select the Lock to set the password</li> </ul> <p><b>Note: A Password is REQUIRED for all users.</b></p>	
4. Click “ <b>Save (activated)</b> ” when finished. This will save the entry in an active (ready for use) state. Click the drop-down arrow for a Save option. This will save the entry but not make it active. This can be activated at a later time.	 
5. User will be added as an active account (if Save (activated) was clicked).	

## 3.3 Creating Roles

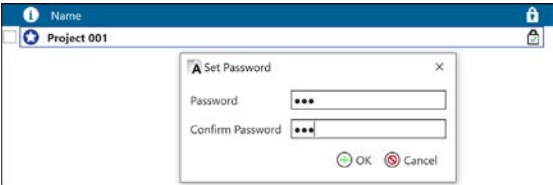

Action	Illustration
1. To add Create a new Role select the Role Tab	
2. Click <b>New</b> .	
3. Create a name for the new Role.	
4. Select the appropriate features that will be associated with this new Role. Selected are: <ul style="list-style-type: none"> <li>○ Mono Copy</li> <li>○ Mono Print</li> <li>○ Mono Print for Touch</li> <li>○ Mono Scan</li> <li>○ Template Setup</li> </ul>	
5. Click <b>"Save (activated)"</b> when finished. This will save the entry in an active (ready for use) state. Click the drop-down arrow for a Save option. This will save the entry but not make it active. This can be activated at a later time.	 

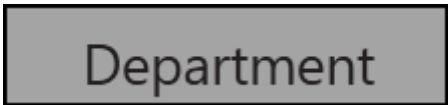

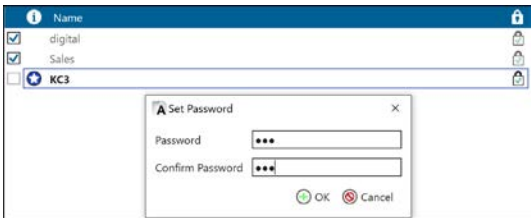

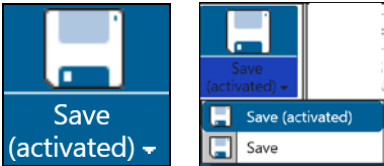

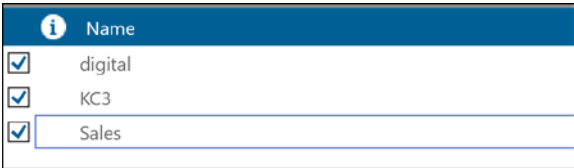

Action	Illustration																																			
6. This new role will be added as an active account (if Save (activated) was clicked).	<table><thead><tr><th></th><th>Name</th><th>Features</th></tr></thead><tbody><tr><td><input checked="" type="checkbox"/></td><td>Administrator</td><td>Click here to view</td></tr><tr><td><input checked="" type="checkbox"/></td><td>Anonymous</td><td>Click here to view</td></tr><tr><td><input checked="" type="checkbox"/></td><td>Black and White User</td><td>Click here to view</td></tr><tr><td><input checked="" type="checkbox"/></td><td>User</td><td>Click here to view</td></tr></tbody></table>		Name	Features	<input checked="" type="checkbox"/>	Administrator	Click here to view	<input checked="" type="checkbox"/>	Anonymous	Click here to view	<input checked="" type="checkbox"/>	Black and White User	Click here to view	<input checked="" type="checkbox"/>	User	Click here to view																				
	Name	Features

<input checked="" type="checkbox"/>	John	John	Lee																																	
<input checked="" type="checkbox"/>	Ringo	Ringo	Starr																																	
<input checked="" type="checkbox"/>	Service	Service	Technician																																	
<input type="checkbox"/>																																				
8. When Alecia Moore Logs in the only available option for her is B&W Copy, B&W Scan and B&W Print as well as the ability to save templates.  Guides are always active, so the user can get to the manuals.	<div><div>KIP</div><div>Ready</div></div> <div><div>COPY</div><div>SCAN</div><div>PRINT</div><div>MEDIA</div><div>LOG OUT</div><div>GUIDES</div><div>TONER</div><div>JOB INFO</div></div> <div><div>Roll 1</div><div>Roll 2</div></div> <div><div>C</div><div>M</div><div>Y</div><div>K</div></div>																																			

Please the Section 4 Appendix for further examples of Role Based Accounting Control

## 3.4 Creating Project Numbers

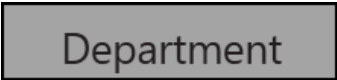

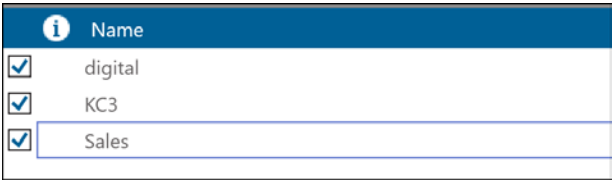

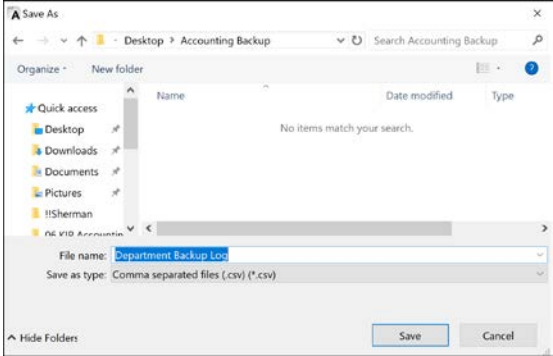

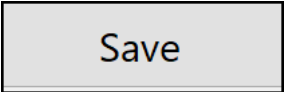

Action	Illustration
1. To add Project information, select the Project Tab	 A rectangular button with a grey background and the word "Project" in a dark grey font.
2. Click <b>New</b> .	 A button with a blue border. It features a document icon with a blue star and the word "New" below it.
3. Enter the Project Information to be added with an associated Password (optional). Select OK to set the password.	 A screenshot of a software window titled "Name" with a sub-header "Project 001". Overlaid on this is a "Set Password" dialog box with fields for "Password" and "Confirm Password", each with three asterisks. It has "OK" and "Cancel" buttons at the bottom.
4. Click "Save (activated)" when finished. This will save the entry in an active (ready for use) state. Click the drop-down arrow for a Save option. This will save the entry but not make it active. This can be activated at a later time.	 Two screenshots of save buttons. The left one is a blue button with a floppy disk icon and the text "Save (activated)" with a downward arrow. The right one is a screenshot of a menu with "Save (activated)" selected and a dropdown arrow.
5. Project Information will be added as an active Project (if "Save (activated)" was clicked)	 A screenshot of a list box titled "Name". It contains a single entry "Project 001" which is preceded by a checked checkbox.

## 3.5 Creating Department Numbers

Action	Illustration
1. To add Department information select the Job Description Tab	
2. Click <b>New</b> .	
3. Enter the Department information to be added with an associated Password (optional).	
4. Click "Save (activated)" when finished. This will save the entry in an active (ready for use) state. Click the drop-down arrow for a Save option. This will save the entry but not make it active. This can be activated at a later time.	
5. Department information will be added as an active Department (if "Save (activated)" was clicked)	

## 3.6 Exporting Accounting information

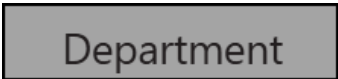

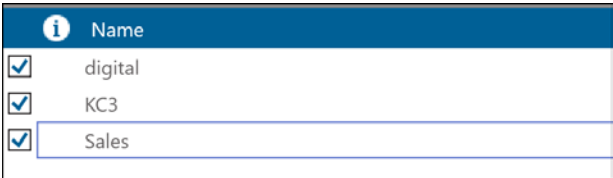

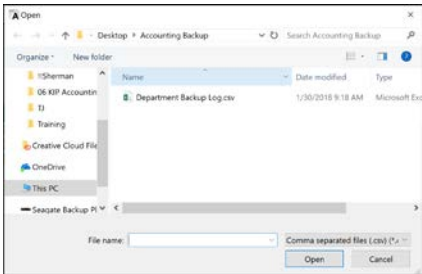

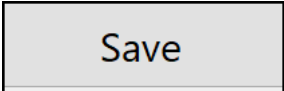

The KIP Accounting Center has the ability to Export the entered data so that this can be backed up or manually edited. The steps below will show how this is done.

Action	Illustration
1. To Export the entered data, in this example the Departments. Select the Departments Tab.	
2. This will Display the entered departments.	
3. Select the Export Button at the bottom of the screen.	
4. Select the Desired Location to save the data to.	
5. Select Save	
<b>See Appendix for description of exported .csv and columns in spreadsheet.</b>	

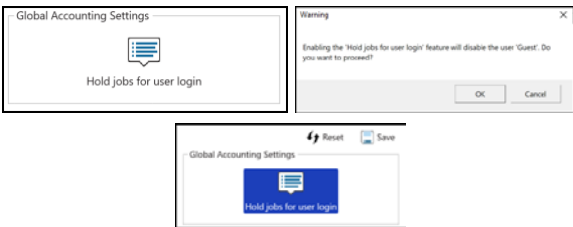

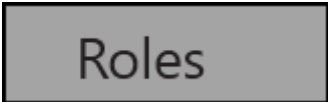

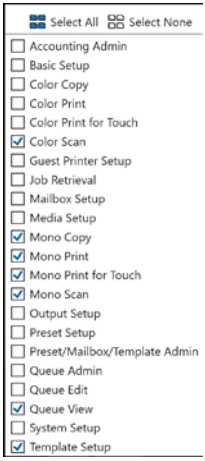

## 3.7 Importing Accounting information

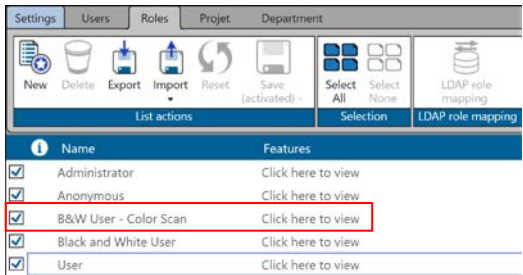

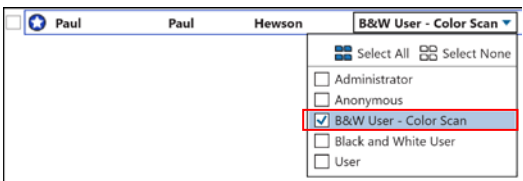

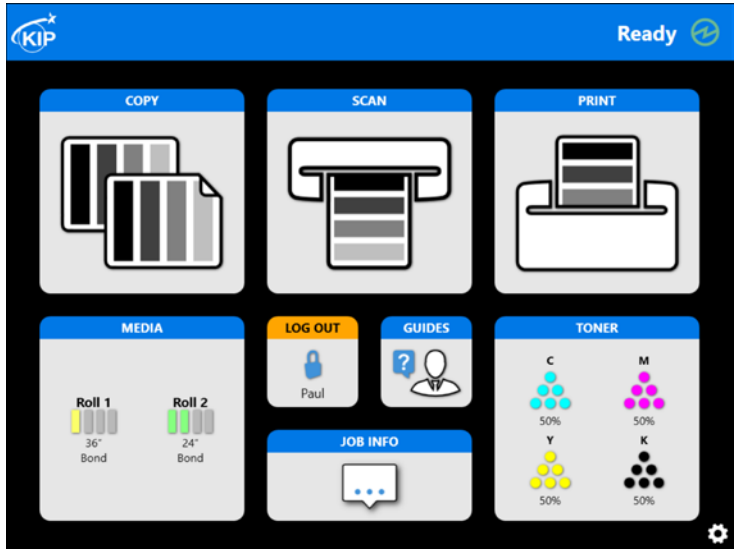

The KIP Accounting Center has the ability to Import the saved data. This can be used on the same KIP Printer or on multiple KIP Printers. This process makes it easy to set up on KIP Printer with all of the necessary accounting data and then use this (exported data) to quickly set up another KIP Printer (import data) the steps below will show how this is done.

**Please Note: Roles MUST be imported FIRST before Users, Projects and Departments are imported.**

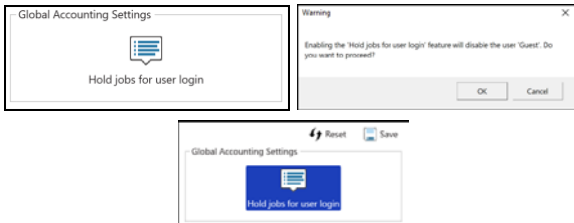

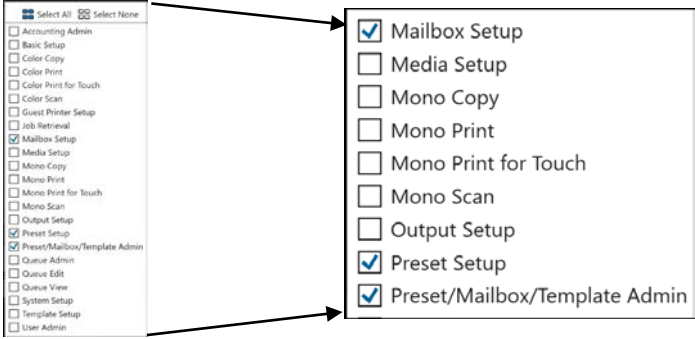

Action	Illustration
1. To Import the saved data, in this example the Departments. Select the Departments Tab	
2. This will Display the entered departments.	
3. Select the Import Button at the bottom of the screen. The Drop-down will give a second option of Import (Overwrite). <ul style="list-style-type: none"> <li>• Import – Appends current data with new data.</li> <li>• Import Overwrite – Overwrites all data with the saved data.</li> </ul>	
4. Browse to the location of the saved data. Select the Correct .csv file.	
5. Select Save	

## 3.8 How to Create a Black and White Only Role with Color Scan to File

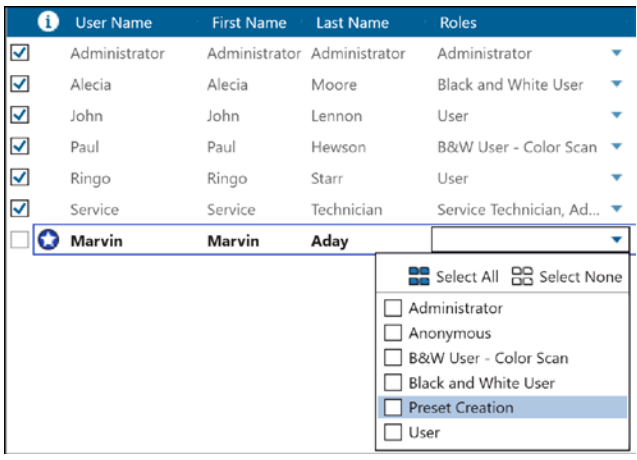

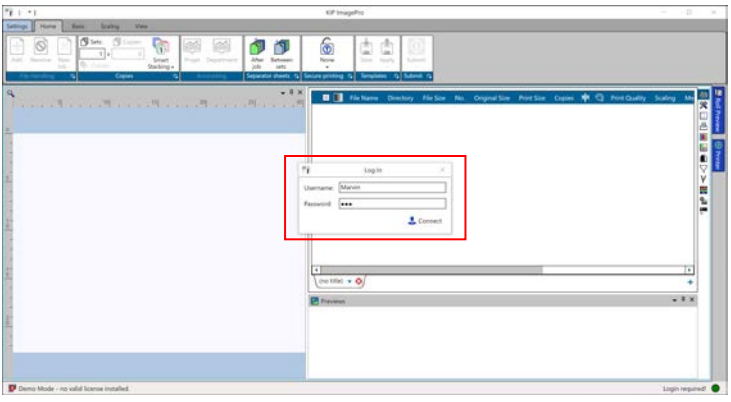

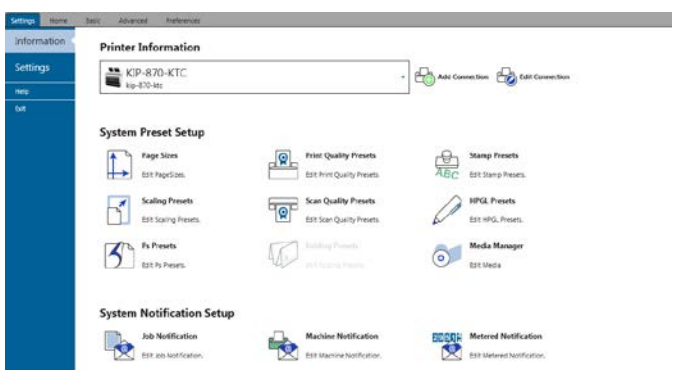

Action	Illustration
1. Begin by selecting the "Hold job for user login". This will force users to have to log in to the KIP Software.	
2. To add a new Role for Black and White User with Color Scan only, select the Roles Tab	
3. Click New	
4. Create a name for the new Role.	
5. Click the "Select None" button to clear the selected data.	
6. Select the appropriate features that will be associated with this new Role.	
7. Select Save Activated.	

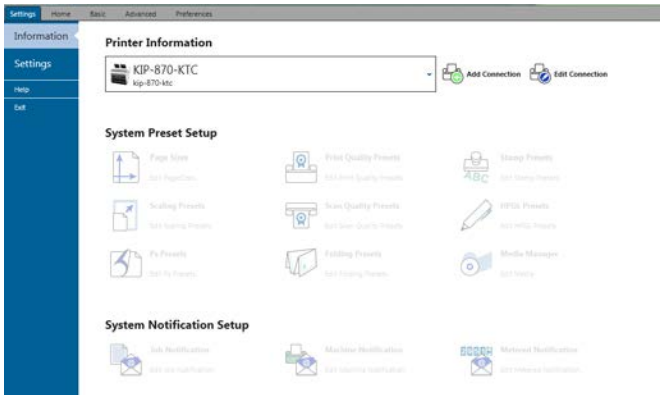

Action	Illustration
8. This new role will now be available along with the default roles when creating a new user.	
9. Create a new user and assign the role Black and White User - Color Scan, to the User Name.	 <p>Note: Multiple Roles can be assigned to the user being created</p>
10. When Paul Hewson Logs in the only available functions available for him are B&W Copy, B&W Scan B&W Print, Color Scan, Queue View and Template Set up. All other functions are greyed out.	

## 3.9 How to Create a Role to Allow Preset Creation

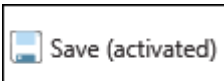

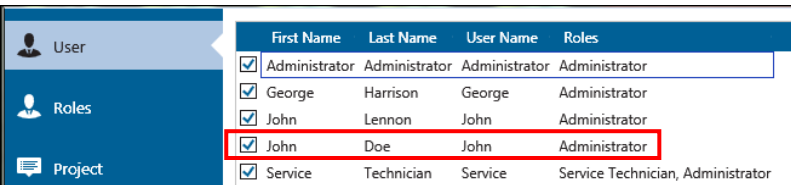

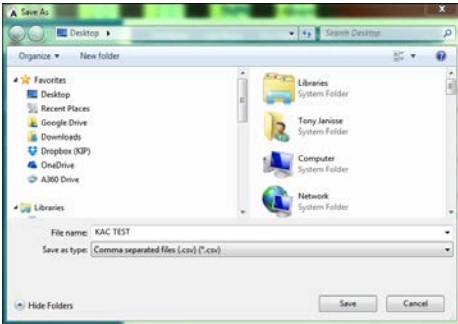

Action	Illustration
1. Begin by selecting the "Hold job for user login". This will force users to have to log in to the KIP Software.	
2. To add a new Role for Preset Creation, select the Roles Tab	
3. Click New	
4. Create a name for the new Role.	
5. Click the "Select None" button to clear the selected data.	
6. Select the appropriate features that will be associated with this new Role.	
7. Select Save Activated.	
8. This new role will now be available along with the default roles when creating a new user.	

Action	Illustration
9. Create a new user and assign the role Preset Creation to the User Name.	 <p>Note: Multiple Roles can be assigned to the user being created.</p>
10. When Marvin Aday Opens KIP ImagePro a login window will open and the application will say Login Required! Once logged in the only available functions for her are the ability to go to the Settings Tab and create System Presets.	
11. System Presets/Notifications will be available.	

Action	Illustration
<p>12. If someone without the Preset Creation role assigned to their name logs in they will not be able to use this section.</p>	<p>Logged in as Gary Moore all System Presets and Notifications are grayed out.</p>  <p>The screenshot shows the 'Settings' window with a sidebar containing 'Information', 'Settings', 'Help', and 'Exit'. The main area is titled 'Printer Information' and shows 'KIP-870-KTC' as the selected printer. Below this, there are two sections: 'System Preset Setup' and 'System Notification Setup'. In the 'System Preset Setup' section, there are nine options: Page Size, Print Quality Presets, Stamping Presets, Scaling Presets, New Quality Presets, KIPDL Presets, P/L Presets, Folding Presets, and Media Manager. In the 'System Notification Setup' section, there are three options: Job Notifications, Machine Notifications, and Material Notifications. All these options are grayed out, indicating that the user (Gary Moore) does not have the necessary permissions to create or modify presets and notifications.</p>

## Appendix 1: Exported .csv File Column Designations

Action	Illustration
1. Creating a user - Field Designations	
2. Save the user (activated)	
3. New user added to user list	
4. Export the file to a .csv	
5. Save the .csv	
6. Open the saved .csv file.	

7.

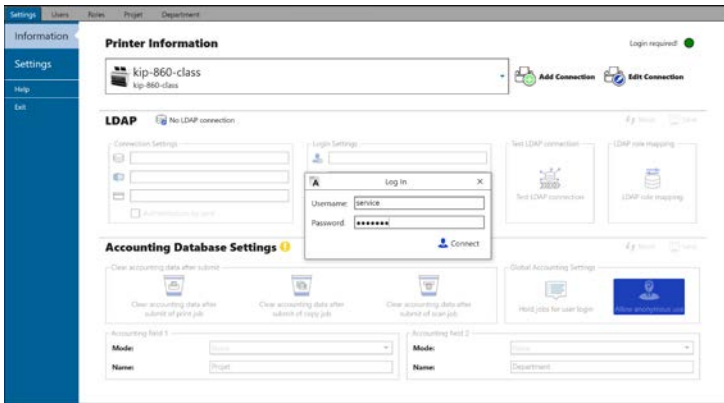

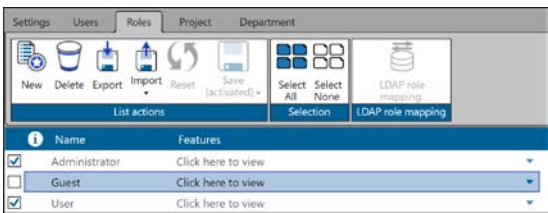

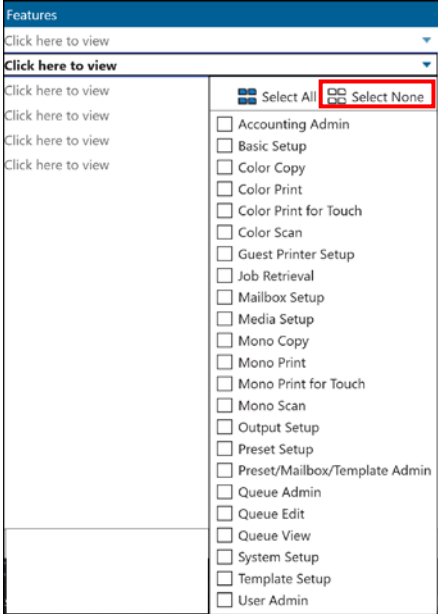

Columns as shown if the file is opened in Excel													
A	B	C	D	E	F	G	H	I	J	K	L	M	N
JohnDoe	D6420...	7A...		JD@jd.com	John	Doe	English	123456	True	945D...	F51DB.	False	User

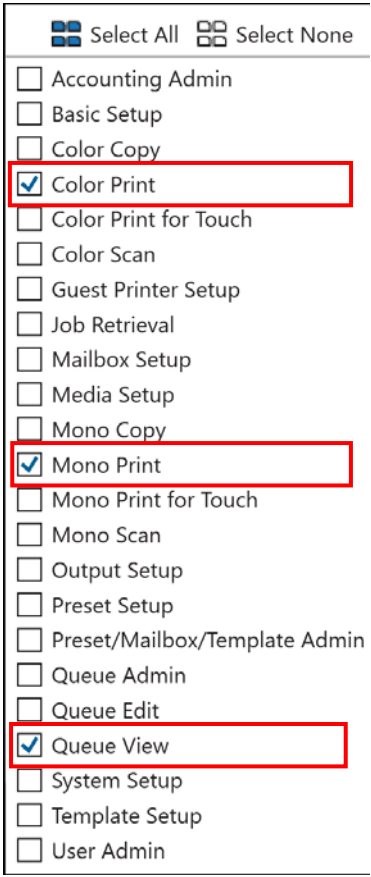

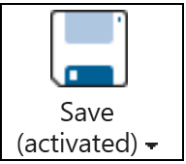

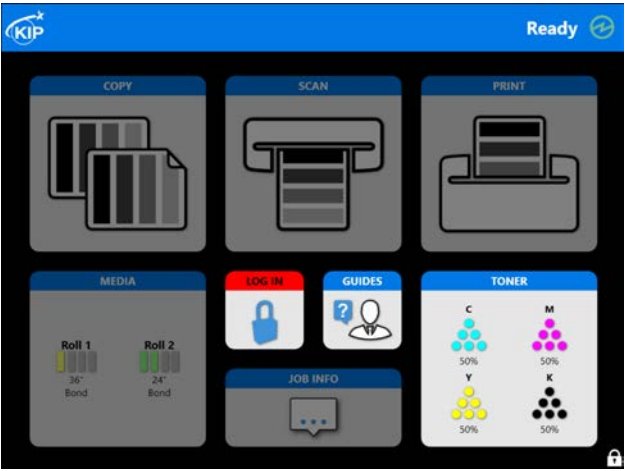

## 8. Field Designations

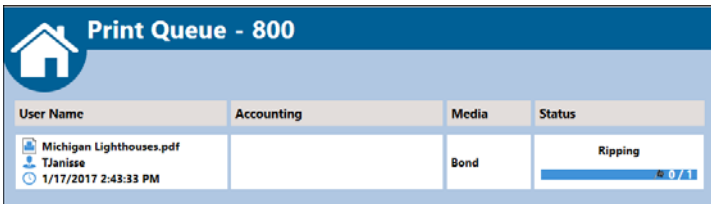

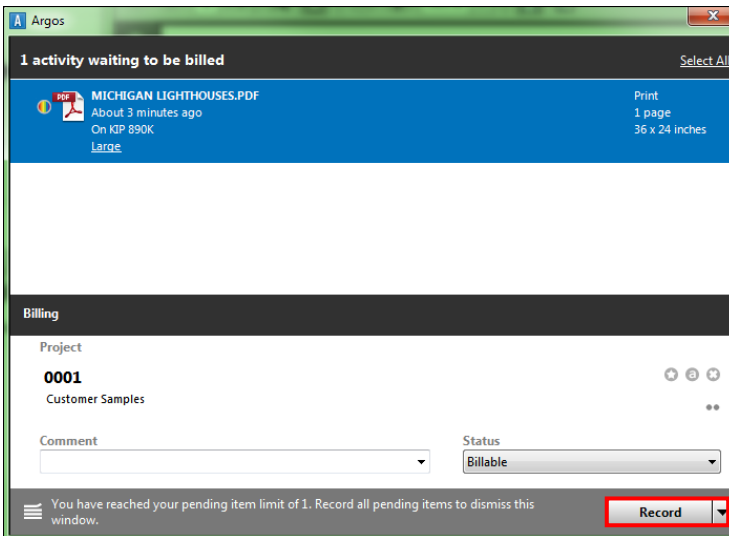

- **A** User Name in this case “JohnDoe”
- **B** Hash value for the Server Authentication Secret. Internal used values, please do not edit.
- **C** Hash value for the Server Authentication Salt. Internal used values, please do not edit.
- **D** This field could be used for applying a new password.
- **E** Email address
- **F** First Name
- **G** Last Name
- **H** language
- **I** Card Number the number used for the authentication by card.
- **J** Allow authentication by card (True or False)
- **K** Hash value for the Client Authentication Secret. Internal used values, please do not edit.
- **L** Hash value for the Client Authentication Salt. Internal used values, please do not edit.
- **M** status if the user is active. (True or False)
- **N** Role of the user

## Appendix 2: Using the KIP Accounting Package with 3<sup>rd</sup> party accounting.

In some instances, the customer will already have their own accounting package (example Argos). In these instances if the KIP Accounting Package is being utilized it may cause a double prompt for accounting (one from KIP and one from 3<sup>rd</sup> party app). Using the following settings, it is possible to set the KIP touchscreen to be locked down (users must log in to use the touchscreen) while still allowing the 3<sup>rd</sup> party application to prompt for information on the Client end.

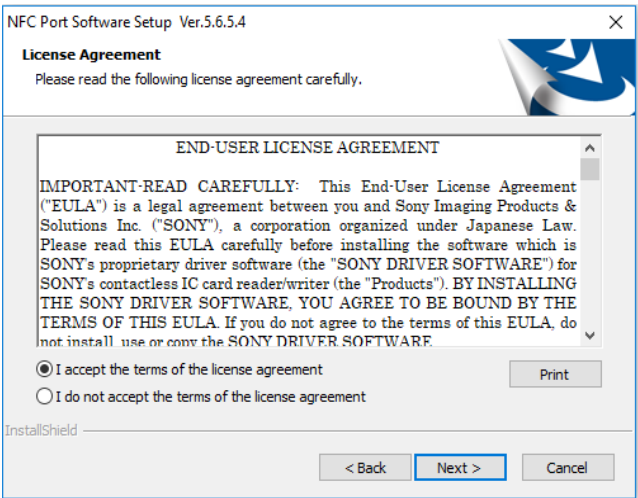

Action	Illustration
1. Open KIP Accounting Center and Log in	
2. Open the Roles Tab and select the Guest user and then uncheck the box.	
3. Features – Select the Select None option to clear all features.	

Action	Illustration
<p>4. From the list of available features select the following:</p> <ul style="list-style-type: none"> <li>Queue View – If users need to be able to see the queue.</li> <li>Color Print – To allow Color Printing from the network</li> <li>Mono Print – To allow Color Printing from the network</li> </ul>	
<p>5. Select Save (activated)</p>	
<p>6. KIP Touchscreen Should look like this. All buttons grayed out except for:</p> <ul style="list-style-type: none"> <li>Toner</li> <li>Log In</li> <li>Guides</li> </ul> <p><b>Note: it will be necessary to have users created for walk up use as with this setup the Touchscreen can only be used by logging in.</b></p>	

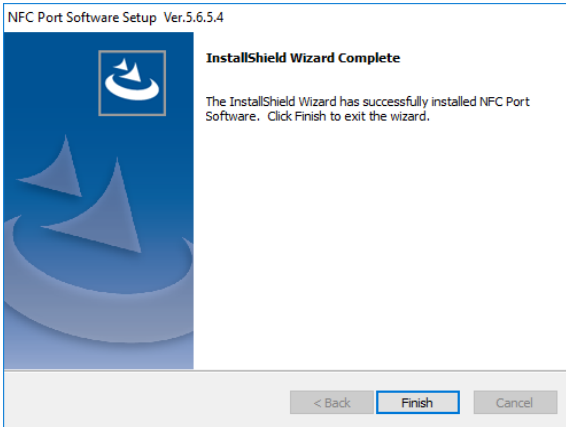

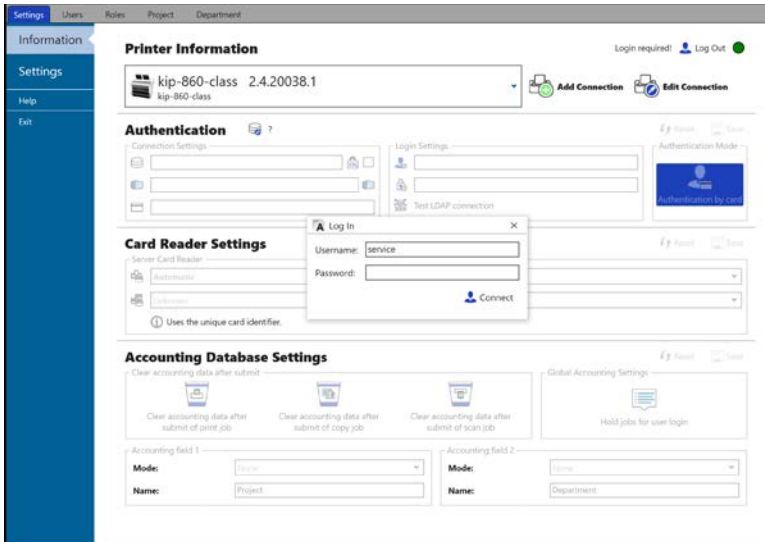

Action	Illustration
7. Once the job hits the queue and prints the 3 <sup>rd</sup> party application will prompt (this example uses Argos).	
8. Enter accounting information and select Record.	

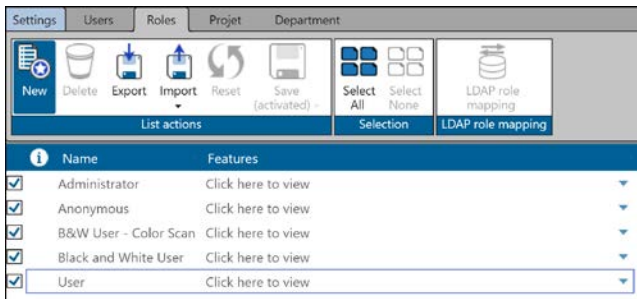

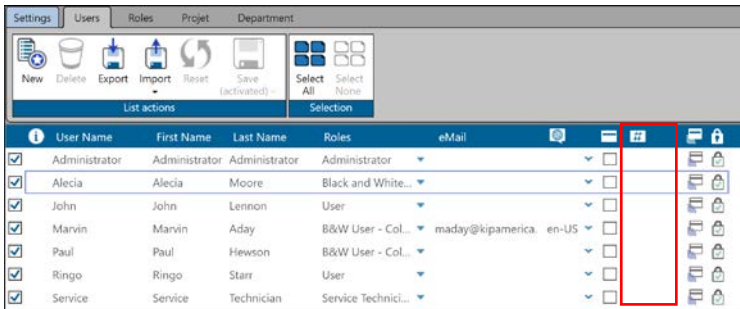

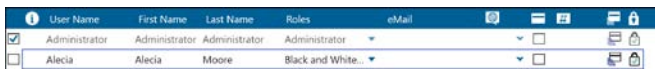

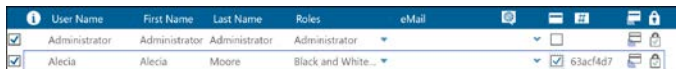

## Appendix 3: How to configure and use a Sony Card Reader

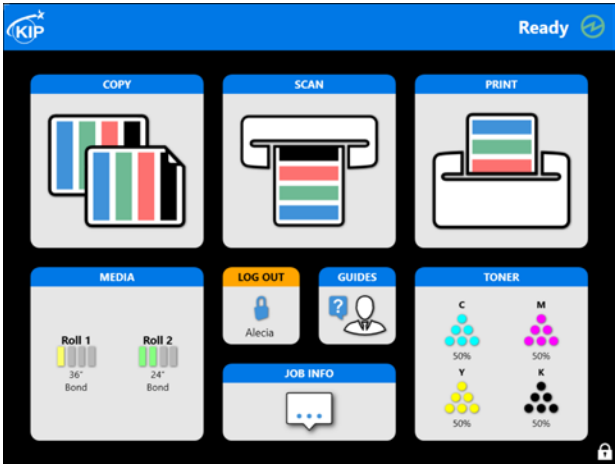

In some instances, the customer may want to use a card reader for the purpose of accountability for use of the KIP Printer. These steps will show how to program the cards and use them connected to the KIP.

Action	Illustration
<p>1. Connect the NFC Reader to the workstation that will be programming the cards.</p> <p>For example: Sony Model RC-S380 used here.</p>	
<p>2. It will be necessary to install the Drivers for the Sony Card Reader.</p> <p>Double click the Necessary Drivers for the operating system on the PC being used and select Run or Yes.</p>	 <b>NFCPortWithDriver.exe</b>
<p>3. Select "Next", then accept the License Agreement to continue.</p>	

Action	Illustration
4. When complete, select “Finish”. Plug in Device.	
5. Open KIP Accounting center and log in as Administrator or Service. Turn on “Hold for user login”.	
6. Select the Roles Tab.	

Action	Illustration
7. If no roles are created, create the desired roles so that they can be assigned to users. Here we have roles that are created.	
8. Select the Users Tab	
9. There will be no data in the field for Card reader. If the users do not have roles assigned to them, do this first.  Example: Alecia Moore has a role of Black and White User.	
10. Unselect the user to be able to program the card.	
11. Put the card to be used on the Card Reader and click Read Card	
12. Once the card is read, a number will be displayed showing the card has been set with the user and roles. Check the box for "Allow Authentication by card".	

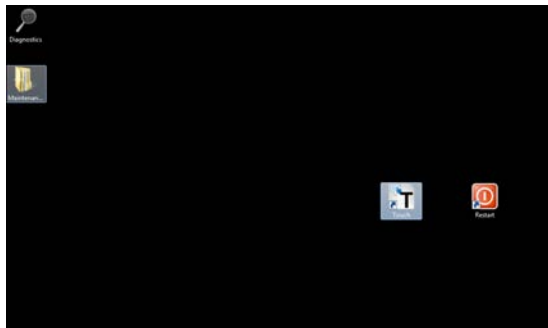

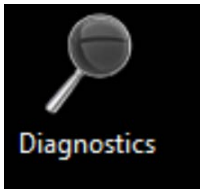

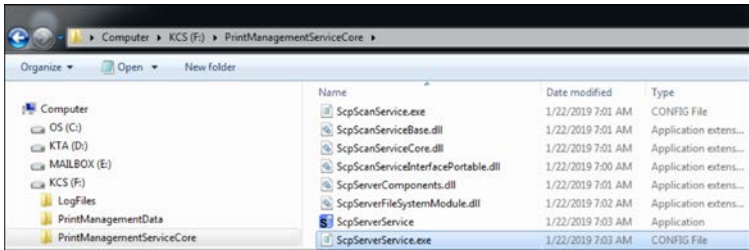

Action	Illustration
13. Click Save Activated.	 <p>Save (activated) ▾</p>
<p>14. Programmed cards are now ready to be read by the KIP printer with the Card reader attached.</p> <p>Simply walk up to the KIP Printer and place the card on the reader.</p>	
<p>15. The User Alecia will be logged in with the roles she has been assigned. From Step 8 above we can see the role assigned to Alecia is Black and White User.</p> <p>Here only the black and white buttons are active.</p>	

## Appendix 4: How to configure and use a 3<sup>rd</sup> Party Card Reader (2.3 and below)

In some instances, the customer may want to use a card reader for the purpose of accountability for use of the KIP Printer. These steps will show how to read the cards and use them connected to the KIP. For this example, the OMNIKEY Card Reader is used.

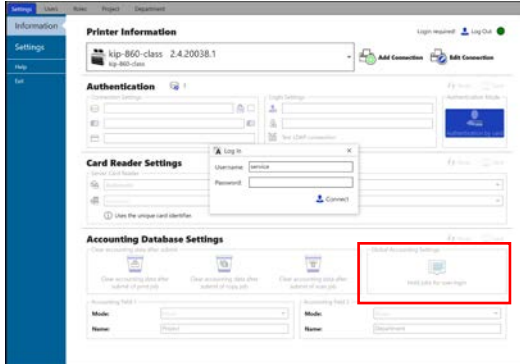

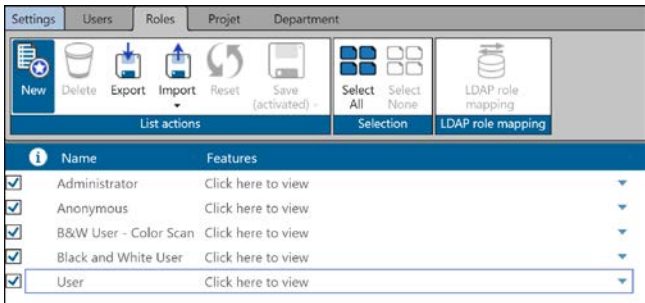

It will be necessary to make a couple of config changes to the KIP so that it will recognize the Omnikey reader.

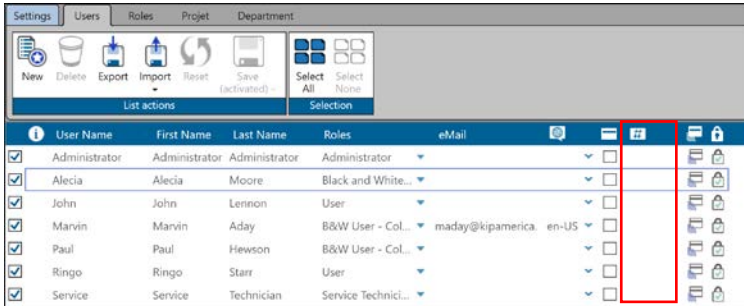

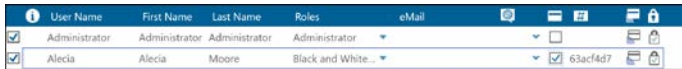

**Follow these steps: to be done at KIP Printer.**

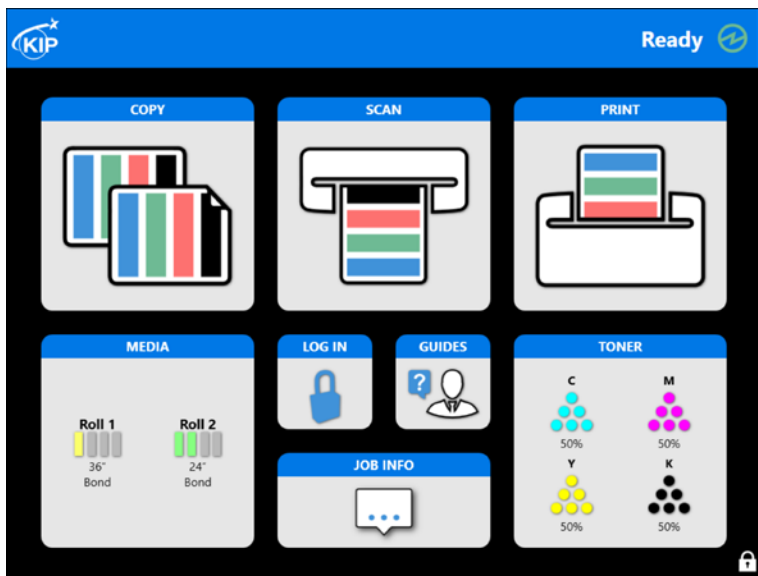

Action	Illustration
1. Begin by closing the User interface on the KIP. This will show the KIP Desktop.	 A screenshot of the KIP Desktop environment. It features a dark background with several icons: 'Diagnostics' (a magnifying glass), 'Print Management' (a printer icon), and 'Restart' (a red circular icon with a white 'X').
2. Open Diagnostics	 A close-up of the 'Diagnostics' icon, which consists of a magnifying glass over a circular graphic, with the word 'Diagnostics' written below it.
3. Browse to the following location: F:\PrintManagementServiceCore and open the ScpServerService.exe.config files	 A screenshot of a Windows File Explorer window. The address bar shows the path 'Computer > KCS (F:) > PrintManagementServiceCore'. The left pane shows the folder structure, and the right pane displays a list of files and folders. The file 'ScpServerService.exe.config' is highlighted in the list.

<p>4. Search for the following lines in this file:</p>	<div data-bbox="617 233 1446 344" data-label="Image"> </div> <ul style="list-style-type: none"> <li>• &lt;add Key="CardReaderName" value="Sony" /&gt;</li> <li>• &lt;add key="CardReaderIdentifierMode" value="0" /&gt;</li> <li>• &lt;add Key="SetSecurePrintingModeToRequireUserForUnauthenticatedUser" value="false" /&gt;</li> </ul>
<p>5. Make the following changes to these lines:</p>	<div data-bbox="644 699 1458 808" data-label="Image"> </div> <pre> &lt;add Key="CardReaderName" value="OMNIKEY" /&gt; &lt;add key="CardReaderIdentifierMode" value="2" /&gt; &lt;addKey="SetSecurePrintingModeToRequireUserForUnauthenticatedUser" value="1" /&gt; </pre> <p>Please note: for the CardReaderIdentifierMode value choose from the following:</p> <ul style="list-style-type: none"> <li>-'0'=legacy (UID, default)</li> <li>-'1'=Auto-CN (most likely not working)</li> <li>-'2'=HID H10301</li> <li>-'3'=HID H10302</li> <li>-'4'=HID H10304</li> <li>-'5'=HID Corp1000</li> </ul> <p>Value selected will be connected with the HID format associated with the card(s) being used.</p>

At the workstation that will be running KIP Accounting Center

Action	Illustration
<p>6. Open KIP Accounting center and log in as Administrator or Service. Turn on “Hold for user login”.</p> <p>This will force Users to enter a User name when using KIP Applications.</p>	
<p>7. Connect the NFC Reader to the workstation that will be Reading the cards.</p> <p>For example: OmniKey 5427CK used here.</p>	
<p>8. Select the Roles Tab.</p>	
<p>9. If no roles are created, create the desired roles so that they can be assigned to users. Here we have roles that are created.</p>	
<p>10. Select the Users Tab</p>	

Action	Illustration
<p>11. There will be no data in the field for Card reader. If the users do not have roles assigned to them, do this first.</p> <p>Example: Alecia Moore has a role of Black and White User.</p>	
12. Unselect the user to be able to read the card.	
13. Put the card to be used on the Card Reader and click Read Card	
14. Once the card is read, a number will be displayed showing the card has been set with the user and roles. Check the box for "Allow Authentication by card".	
15. Click Save Activated.	
16. Programmed cards are now ready to be read by the KIP printer with the Card reader attached.	

Action	Illustration
<p>17. When the system returns ready. Simply walk up to the KIP Printer (with card reader attached) and scan the card.</p> <p>The User Alecia will be logged in with the roles she has been assigned. From Step 8 above we can see the role assigned to Alecia is Black and White User.</p> <p>Here only the black and white buttons are active.</p>	 <p>The screenshot shows the KIP Accounting Center interface. At the top, the KIP logo is on the left and the status 'Ready' with a green checkmark is on the right. The main menu consists of several buttons: 'COPY', 'SCAN', 'PRINT', 'MEDIA', 'LOG IN', 'GUIDES', 'JOB INFO', and 'TONER'. The 'COPY' button shows a document icon. The 'SCAN' button shows a scanner icon. The 'PRINT' button shows a printer icon. The 'MEDIA' button shows two rolls of paper, 'Roll 1' (36" Bond) and 'Roll 2' (24" Bond). The 'LOG IN' button shows a lock icon. The 'GUIDES' button shows a question mark and a user icon. The 'JOB INFO' button shows a speech bubble icon. The 'TONER' button shows four toner levels: C (Cyan, 50%), M (Magenta, 50%), Y (Yellow, 50%), and K (Black, 50%). A small lock icon is visible in the bottom right corner of the interface.</p>
