Designed by the accounting and technology professionals at Crowe LLP, Crowe Lease Management brings the functionality and features needed by any company that leases equipment, property, vehicles or other business assets to their customers.

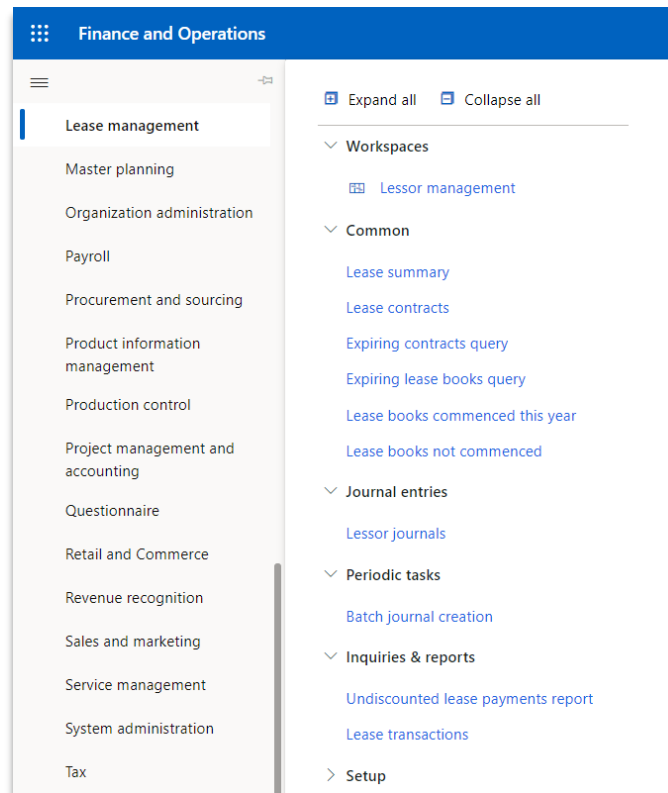

Built for Dynamics 365

Built by Accountants

Learn more about the solution:

<https://www.crowe.com/services/consulting/lease-management-software>

Centralized lease management

Get as detailed as you would like with a certain lease or entity, or take the 1,000-foot view to analyze what is happening within your overall lease population.

Multi-company tracking

Now you can manage multiple legal entities with complete accounting functionality and financial consolidations.

Calculation of schedules

No longer a manual process, you will find everything you need in one place for deferred revenue, lease classifications, and more.

Built-in workflow system

Increase productivity with consistent processes, process visibility, and centralized work lists.

Disclosure reports

Generate all your required disclosure reports from a lessor perspective. They will also be aggregated by the system for you - across different entities and currencies.

Multi-currency

Support multiple currencies through the system, following all applicable accounting standards.

Document management

Everyone on your team will have easy access to all your lease documents now. You can save and organize them in one place.

Invoicing and payments

Configure formats for both incoming and outgoing documents, including invoices, statement, payments, and electronic documents.
