# SCREEN MIRRORING

## For iOS System

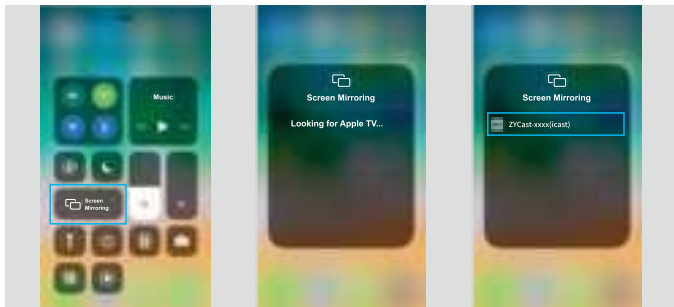

Step 1: Connect your iOS device and the projector to the same WiFi network.

Step 2: Go to Homepage > iOS Cast to display the following interface.

**Step 3:** Activate Screen Mirroring/AirPlay Mirroring on your iOS device and search for the projector.

**Step 4:** Select ZYCast-xxxx(icast) from the searching list.

**Step 5:** Your iOS device display will be projected on the wall/screen.

## For Android System

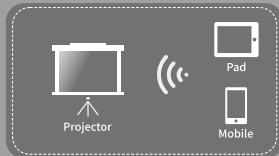

To activate this function, please make sure your Android device supports **Multi-screen/Wireless Display**. Names may differ from different Android devices.

**Step 1:** Turn the WiFi to ON status in the settings of your Android device. To make smoother streaming, please do not connect to any WiFi on your projector(only for Android devices).

**Step 2:** Go to **Homepage > Miracast** to enter the following interface.

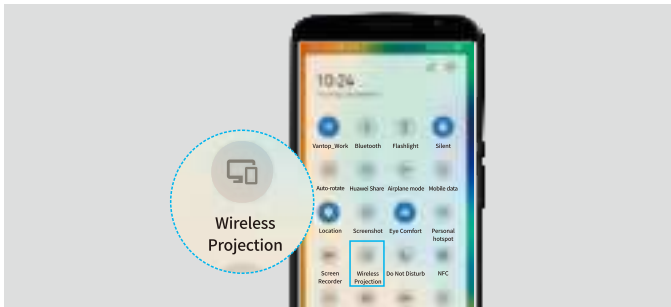

# Miracast

To connect Android Mobile/Pad Device with Projector Based on WiFi-Display Technology

1. On your Android Mobile/Pad, open the settings menu.
2. Access your display settings or screen-mirroring.
3. Select your Miracast receiver: ZYCast-xxxx(mcast).

**Step 3:** Activate Multi-screen(Wireless Display, Wireless Projection, Smart View, etc.) function on your Android device and search for the projector.

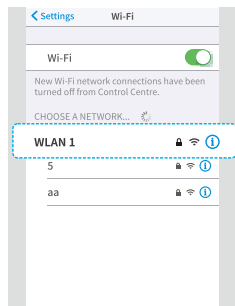

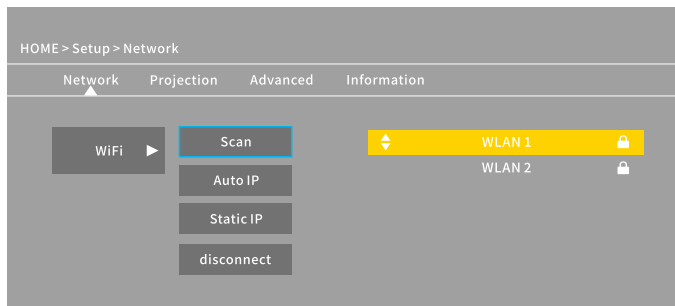

**Step 4:** Select ZYCast-xxxx(icast) from the searching list.

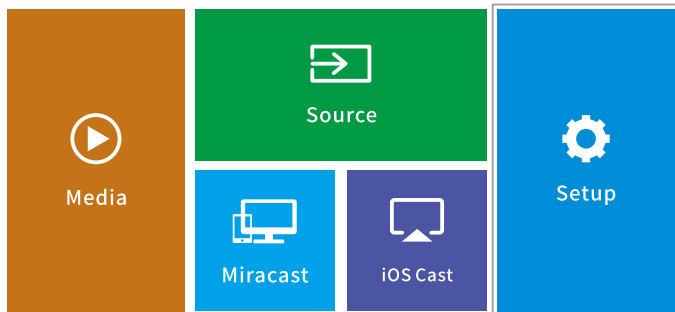

**Step 5:** Your Android device display will be projected on the wall/screen.

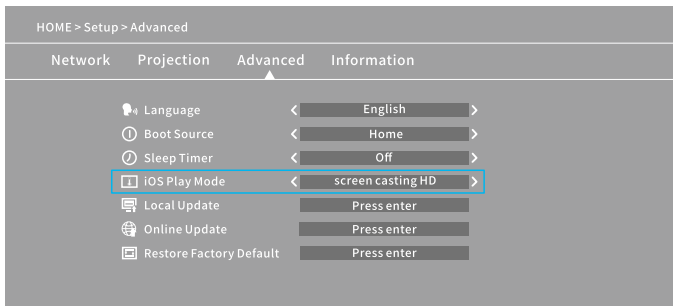

# SCREEN CASTING(For iOS System Only)

**Step 1:** Connect your iOS device and the projector to the same WiFi network.

**Step 2:** Select **Setup** on the homepage, enter **Advanced > iOS Play Mode**, then press the right button on the remote to select screen casting HD/SD.

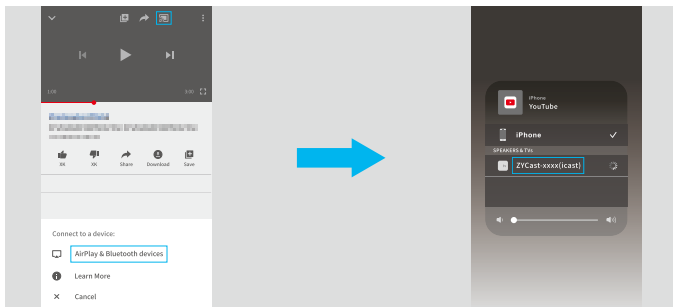

**Step 3:** Go back to the **Homepage** and select **iOS Cast**.

**Step 4:** Launch a video player on your iOS device and select a video to play.

**Step 5:** Tap  > **Airplay&Bluetooth devices** > **ZYCast-XXXX(icast)** to cast the video on your iOS device to the wall/screen via the projector.

#### **Tips:**

- ① Once the video is casted to the wall/screen, you can close the app and do other things without interrupting the video as long as your iOS device is still connected.
- ② Always connect your projector to power.
