

ACVATIX™

Electromotoric actuators for valves

SAX..

Actuators with 20 mm stroke and 800 N force

- SAX31.. Operating voltage AC 230 V, 3-position control signal
- SAX61.. Operating voltage AC/DC 24 V, positioning signal 0...10V, 4...20 mA
With position feedback, forced control, characteristic changeover
- SAX61../MO operating voltage AC/DC 24 V,
RS-485 for Modbus RTU communication
- SAX81.. Operating voltage AC/DC 24 V, 3-position control signal
- For direct mounting on valves; no adjustments required
- Manual adjuster, position and status indication (LED)
- Optional functions with auxiliary switches, potentiometer, function module, stem heating

Use

Electromotoric actuators to operate Siemens 2-port and 3-port valves, types V..F21.., V..F22.., V..F31.., V..F32.., V..F40.., V..F41.., V..F42.., V..F52.., and V..F53.. with 20 mm stroke as control and safety shut-off valves in heating, ventilation and air conditioning systems.

Functions

Function	Description	Type
3-position control	A 3-position signal controls the actuator via connection terminals Y1 or Y2. The desired position is transmitted to the valve.	SAX31.., SAX81..
Modulating control	The modulating positioning signal provides stepless motor control. The positioning signal range (DC 0...10 V / DC 4...20 mA / 0...1000 Ω) corresponds to the positioning range (closed...open, or 0...100% stroke) in a linear manner.	SAX61..
Positioning signal and characteristic changeover	Setting with DIL switch. Factory setting: - Characteristic curve: log = Equal percentage (switch set to Off) - Positioning signal: DC 0...10 V (switch set to Off)	
Position feedback U	Signal returned to acquire the position via input.	SAX61.., SAX61../MO
Forced control (Z-mode)	Forced control helps override automatic mode and is implemented via higher control.	
Calibration	Carry out during initial commissioning. The actuator drives to the top or bottom end position; the measured values are saved.	
Valve seat detection	The actuators have power-dependent seat detection. After calibration, the exact valve stroke is stored in the actuator's memory.	
Foreign body detection	After clogging is detected, three attempts are made to get past clogging. If unsuccessful, the actuator continues to follow the positioning signal only within a limited range, and the LED blinks red.	SAX61../MO
Modbus RTU (RS-485), not galvanically isolated	Setpoint 0...100 % valve position Actual value 0...100 % for valve position Override control Open / Close / Min / Max / Stop Setpoint monitoring and backup mode	

Type summary

Type	Item NO.	Stroke	Positioning force	Operating voltage	Positioning signal	Spring return time	Positioning time	LED	Manual adjustment ³⁾	Auxiliary functions	
SAX31.00 ¹⁾	S55150-A105	20 mm	800 N	AC 230 V	3-position	-	120 s	-	Push and fix	-

SAX81.03U ²⁾	S55150-A103-A100						30 s	-		-	

1) Approbation: CE

2) Approbation: CE, UL

3) Not designed for continuous operation.

4) Position feedback, forced control, characteristic changeover

5) Position feedback, forced control

Scope of delivery

Actuators, valves and accessories are supplied in individual packs.

Notes

Safety

	⚠ CAUTION
	National safety regulations Failure to comply with national safety regulations may result in personal injury and property damage. Observe national provisions and comply with the appropriate safety regulations.

	⚠ WARNING
	Risk of burns from hot actuator brackets The actuator brackets on heating plants can also become hot from the contact with the hot valve during operation. The temperature of the actuator bracket can reach 100 °C. When servicing the actuator: - Switch off both pump and operating voltage. - Close the main shutoff valve in the piping. - Allow the piping to cool off.

SAX31.. / SAX81..

3-position actuators must be controlled by a controller, see Connection diagrams [→ 14].

SAX61..

Up to 10 actuators can drive in parallel on a controller output with a rating of 1 mA.
Modulating actuators have an input impedance of 100 kΩ.

SAX61../MO

The Modbus converter is designed for analog control at 0...10 V.

Keep the analog signal setting on the actuator as is (switch 1 to OFF); adjustment not permitted.

The actuators are factory configured for equal-percentage characteristic.

DIL switch (internal actuator characteristic changeover) to "log" (switch 2 to OFF).

ASZ7.5

Actuators with a DC 0...9.8 V feedback signal are recommended for the combination SIMATIC S5/S7 and position feedback.

Signal peaks in potentiometer ASZ7.5 may result in error messages on Siemens SIMATIC. This is not the cause, however, when combined with Siemens HVAC controllers. The reason is the higher resolution and faster reaction time on SIMATIC.

Use the potentiometer as voltage divider on the 3-wire connection. Powering the potentiometer over the wiper may shorten the life cycle of the potentiometer. Signal peaks increase in frequency and scope over the lifespan in this operating mode.

Mounting positions

1) Only together with weather shield ASK39.2. IP54 housing protection remains unchanged.

2) SAX61.../MO is not intended for outdoor use.

Maintenance

The actuators are maintenance-free.

Disposal

	The device is considered an electronic device for disposal in accordance with the European Guidelines and may not be disposed of as domestic garbage. • Dispose of the device through channels provided for this purpose. • Comply with all local and currently applicable laws and regulations.
