Our Services

DIGITAL FORENSICS

Hawk Eye Forensic uncovers and interprets all kinds of electronic data. In this process, we preserve the evidence in its most original form while performing a structured investigation by collecting, identifying, and validating the digital information for the purpose of reconstructing past events.

The context is most often for the usage of data in a court of law, though digital forensic can be used in other instances.

Digital forensic services we offer:

- Computer Forensic.
- E-discovery.
- Data recovery from Digital media.
- Data acquisition and preservation.
- Expert witness testimony.
- Forensic reporting.
- Consultation.

MOBILE PHONE INVESTIGATION

Mobile forensic investigators help to unlock and perform full data extraction from a phone, whether it's an Android or an iPhone device. They can acquire data such as call records, chats, text messages, documents, graphics, pictures, emails, app data, and much more from a suspect's device

We offer recovery of :

- Call history, Phonebook or Contact lists, SMS text by any application.
- Pictures, videos, and audio files, and sometimes voicemail messages.
- Internet browsing history, content, cookies, search history, analytics information.
- Documents, spreadsheets, presentation files, and other user-created data.
- Passwords, passcodes, swipe codes, user account credentials.
- Data from various installed apps
- Deleted data from all of the above etc.

HANDWRITING AND QUESTIONED DOCUMENTS EXAMINATION

A comprehensive range of forensic questioned documents and handwriting analysis expert services designed to support the investigation of criminal and civil offenses.

Hawk Eye Forensic has a highly experienced expert team of Forensic Document Examiners and is accustomed to giving evidence in court. Our document examiners provide a full range of services including handwriting comparisons, signature analysis, and the examination of counterfeit documents.

Within the questioned documents service, we provide:

- Handwriting comparisons.
- Forensic signature analysis.
- Forensic analysis of alterations and obliterations.
- Forensic analysis of word-processed and type-written documents.
- Forensic analysis of counterfeit documents.

IMAGE/AUDIO/VIDEO AND CCTV FOOTAGE ENHANCEMENT SERVICE

Hawk Eye Forensic offers a full range of services regarding image, audio, video, and CCTV footage analysis, enhancement, and authentication through the expertise and the latest software tools.

We offer:

- Enhancement and authentication of images and videos using different contrast and filters to see the other hidden things.
- Extraction of the CCTV footage from the DVR.
- We also help in writing a report to the police or to the court based on the crime scene recorded in the DVR.
- We promise to provide the best and maximum possible enhancement depending upon the camera quality, DVR encryption and setting used for No. of capturing frame/second.

FINGERPRINT ANALYSIS

Hawk Eye Forensic offers fingerprint expert services to help in the identification, enhancement, preservation, examination, and comparison of fingerprints. Due to the fact of being unique, fingerprint plays a vital role in most crime scenes and other forensic investigations.

Our fingerprint analysis services include:

- Fingerprint identification/enhancement
- Recovery and preservation of fingerprint evidence from the scene of the crime.
- Fingerprint examination & comparison through various chemical and digital techniques.
- Fingerprint examiner's training
- Fingerprint expert witness assistance to the courts.

CONSULTANCY SERVICES

We have the best team of legal experts who provide legal assistance required by an individual/organization. We also provide advice in criminal and civil cases.

Services that we provide in legal cases are :

- Legal Advice in Civil Cases.
- Legal Advice in Criminal Cases.
- Legal Advice in Cases containing Forgeries such as Fingerprint and Handwriting Forgeries.
- Legal Advice on Cyber-Crime Cases.
- Preparation of Questionnaire for Cross-Examination in Fingerprint Cases.
- Preparation of Questionnaire for Cross-Examination in Handwriting & Documents Cases.

Our Products

CRIME SCENE INVESTIGATION KIT

Essential items for crime scene investigation including, Biohazard bags, Bodily fluid collection kit (sterile swabs, distilled water, optional presumptive tests, and sterile packaging that allows the swabs to air dry), Evidence seals/tape, airtight containers, markers, magnifying glass, etc.

FINGERPRINT EXAMINATION KIT

It contains Finger Print Basic Powders, Finger Print Magnetic Powder, Finger Print Fluorescent Powder, Finger Print Fluorescent Magnetic Powder, Finger Print All-Purpose Brush, Finger Print Brush Magnetic Applicator, Fingerprint Lifting Tape, Gloves, Scissors, Portable UV Light and much more to completely makes the process handy.

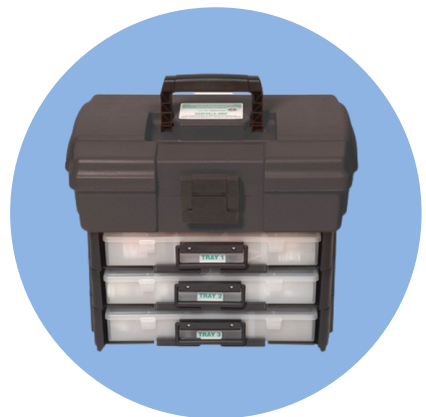

EXPLOSIVE DETECTION KIT

Capable of detecting practically almost all military explosives from unknown samples. it's designed and developed based on compound-specific color-producing spot tests. It is sensitive, simple, rapid, precise, and economical. It can be used by Police forces, Paramilitary forces, Armed Forces, Forensic Science Labs, etc.

MASTER QUESTIONED DOCUMENTS EXAMINATION KIT

One of the most complete kits available for the examination and analysis of questioned documents. The kit includes equipment like UV light, 5X magnifier, optical analysis instrument, and document analysis plates also included.

PRESUMPTIVE BLOOD DETECTION KIT

A presumptive blood test is a more sensitive test used in the field and forensic laboratory to indicate the presence of blood. This kit is particularly useful when suspected stains are dilute or questionable. This kit is packaged in a plastic Blo-Mold case that contains all the pre-mixed chemicals and supplies required to conduct a Presumptive blood test.

BARRICADE TAPE

It's a quick and effective way to limit entry to Crime Seen areas. Their high visibility can help prevent pedestrian traffic from entering a temporary hazard. Barricade Tapes are lightweight, economical, reusable polyethylene with a continuously repeated Warning message for indoor and outdoor use.

SEARCHLIGHT (OR SPOTLIGHT)

Searchlights have now been upgraded with the latest LED technology increasing the running time to 6hrs on full and 3hrs on half power. The unique deep-dish reflector enables maximum distance to lumen ratio achieving a 1200m beam from only 1500 lumens; weighing under 1kg it is our lightest in the range and offers exceptional value for money.

FORENSIC INSPECTION FIELD LED KIT

The World's Most Powerful, Portable, and Versatile Multi-LED Forensic Light Source. It features a rugged, cordless, battery-operated, rechargeable black-anodized flashlight body with interchangeable LED head assemblies of different wavelengths: UV-A (365nm), blue (450nm), and white light (400-700nm).
