Have you ever heard someone say it was “raining frogs”. You might have thought that it was just a figure of speech. But in rare cases, it has actually rained frogs? How could this happen. It sounds impossible. During a tornado or a powerful thunderstorm, water from a pond or lake can be sucked into the air. This includes anything that is in the water.

The storm continues to move? As it travels, it releases the water into the air. Does this mean that frogs and fish come raining down from the sky. Yes, this is exactly what happens.

Cases of strange things falling from the sky have been reported for many years? People have seen small frogs, fish, grasshoppers, and snails drop from the sky in places like France, India, Louisiana, and Kansas. Are animals the only things that get swept up by storms. I'm sure he will hide them carefullier next time. The little dachshund standing next to us fetched more eagerly of all the dogs. Lesson 4.1 Writer's Guide: Planning

Before you start writing, you need to make a plan. **Brainstorming** is one way to come up with ideas. You may not use all of your ideas. Still, you will find the one or two great ideas you were looking for.

Sit down with a pen and a piece of paper. Make a list of things you know a lot about or would like to learn more about.

life in the Sahara desert

Eiffel Tower

basketball

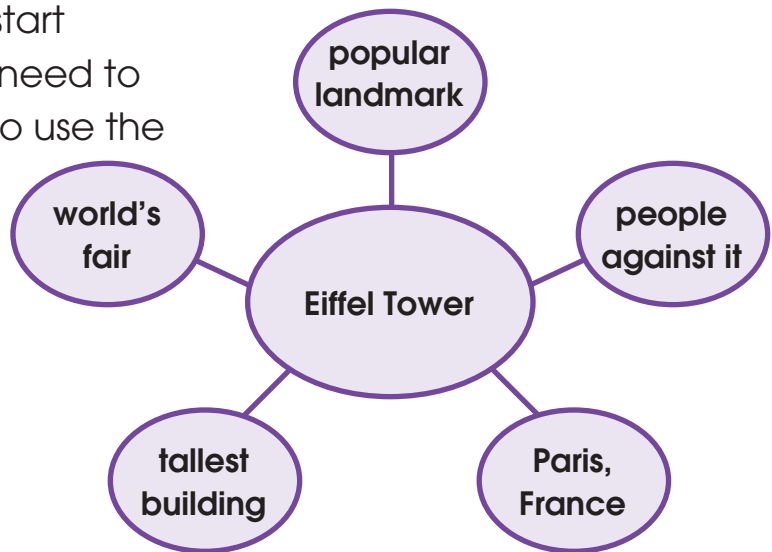

space shuttles

islands

being an artist

Which topic is most interesting? Once you choose your topic, you can start learning more about it. You may need to go to the library. You may need to use the Internet. You may even need to interview someone.

Once you have all your information, make an **idea web**. It can help you put your ideas in order before you start writing.

Try It

On a separate piece of paper, brainstorm your own list of ideas. Let your imagination go, and have fun! Choose the most interesting topic. If you need to, look for more information. Then, create an idea web.

Lesson 4.2 Writer's Guide: Writing

When you first begin writing, do not worry about mistakes. You are just writing a **rough draft**. Look at the idea web you made when you were planning. Turn your ideas into sentences and paragraphs.

Do not worry about editing right now. After you have written your first draft, you can make changes and corrections. For now, just write. Here are some things to keep in mind as you write:

- Stay on topic.
- Include all the important details.
- Use complete sentences.

Here is an example of a rough draft. Can you see how the writer used the idea web to help write this paragraph?

The Eiffel Tower is an intresting place to visit. It was built in Paris France. It was made for a world's fair The Louvre is a famous museum in Paris. The tower is very tall. It was the tallest building in the world many people did not think it should be built. it looks like they were wrong, though. Millions of people visit it every year! It is one of the most famus landmarks.

Try It

Use the idea web you made to write a rough draft on another piece of paper. Remember, this stage is all about writing, so write! You'll be able to edit your work later.

Lesson 4.3 Writer's Guide: Revising

Now that you have finished writing, it is time to **revise**. Read what you have written. Sometimes it helps to read your work out loud. Ask yourself these questions:

- Do all of my sentences tell about the main idea?
- Can I add any details that make my writing more interesting?
- Are there any words or sentences that do not belong?

The Eiffel tower is an intresting place to visit. It was built ^{in 1889} in Paris France. It was made for a world's fair. ~~The Louvre is a famous museum in Paris.~~ ^{986 feet} The tower is ^{very} tall. It was the tallest building in the world ^{for 41 years} many people did not think it should be built. ^{They thought it would be ugly.} it looks like they were wrong, though. ^{About 6} Millions ^{the Eiffel tower} people visit ~~it~~ ^{in the world} every year! It is one of the most famus landmarks.

In the paragraph above, the writer added some details. For example, explaining that the Eiffel Tower is very tall does not tell the reader much. It is more helpful to know that the Eiffel Tower is 986 feet tall.

The writer also took out a sentence that was not needed. The Louvre is in Paris, but it does not have anything to do with the Eiffel Tower. The writer decided that the sentence about the Louvre was not on topic.

Look at all the changes the writer made. Can you see why each change was needed? Now, revise your rough draft. Doesn't it sound better already?

Lesson 4.5 Writer's Guide: Publishing

After all your changes have been made, write or type a final copy of your work. Your paper should look neat and clean. Now, you are ready to publish. **Publishing** is a way of sharing your writing with others. Here are some ways to publish your work:

- Read your writing to your family, your friends, or your classmates.
- Make a copy of your writing. Send it to someone who lives far away.
- Read your writing aloud. Have a teacher or parent record you. You can use a video camera or a tape recorder.
- Make copies, and give them to your friends.
- Ask an adult to help you e-mail your writing to a friend or a family member.
- Get together with some other students. Make copies of everyone's writing. Combine the copies into a booklet that each student can take home.

Subject: Eiffel Tower report

The Eiffel Tower is an interesting place to visit. It was built in 1889 in Paris, France. It was made for a world's fair. The tower is 986 feet tall. It was the tallest building in the world for 41 years. Many people did not think it should be built. They thought it would be ugly. It looks like they were wrong, though. About six million people visit the Eiffel Tower every year! It is one of the most famous landmarks in the world.

Try It

Choose one of the ways listed above to share your work. What kinds of comments do your friends and family have? Can you think of any other ways to share your writing?

Lesson 4.6 Writer's Guide: Writing a Paragraph

A **paragraph** is a group of sentences. Each paragraph is about one main idea. All the sentences tell more about the main idea. When you are ready to write about a new idea, start a new paragraph. When the paragraphs are put together, they make a letter, a story, or a report.

A new paragraph does not start at the left edge of a piece of paper. It starts about five spaces from the edge. Leave an **indent**, or a space, about the size of the word **write**. This space tells the reader a new paragraph is starting.

The first sentence in a paragraph is the **topic sentence**. It tells what the paragraph will be mostly about. The next few sentences give more details about the topic. The last sentence is a **closing sentence**. It sums up the paragraph.

In the paragraph below, each important part is labeled.

	indent	topic sentence
	→	<u>The Eiffel Tower is an interesting place to visit.</u> It was
		built in 1889 in Paris, France. It was made for a world's fair.
		The tower is 986 feet tall. It was the tallest building in the
details	world for 41 years. Many people did not think it should be built. They thought it would be ugly. It looks like they were wrong, though. About six million people visit the Eiffel Tower every year! <u>It is one of the most famous landmarks in</u> <u>the world.</u>

Lesson 4.7 Writer's Guide: Writing a Friendly Letter

Writing a letter can be fun. It is exciting to open the mailbox and see a letter waiting. Writing letters can also be a good way to keep in touch with people who live far away.

Here are some things to keep in mind when you write a letter:

- **Write the date in the top right corner.** Remember to start the name of the month with a capital letter. Use a comma between the day and the year.
- **Begin your letter with a greeting.** Follow it with the person's name and a comma. Most letters begin with the word **Dear**.
- **Share some news in your letter.** What is new in your life? Have you done anything fun? Have you been someplace exciting?
- **Ask questions.** It is polite to ask how others are doing.
- **End your letter with a closing.** Some popular closings are **Sincerely**, **Yours truly**, **Love**, and **Your friend**. Use a capital letter to begin your closing. Use a comma after it.
- **Sign your name below the closing.**

Dear Grandma,

How are you? I am doing fine. Last week, I wrote a report about the Eiffel Tower. Mom helped me do some research on the Internet. I learned many interesting facts. For example, did you know that the Eiffel Tower has 1,665 steps? Mr. Strasser said my report was excellent. I told him that I plan to see the Eiffel Tower in person someday.

Please write back to me, and tell me what's new in Park City. I miss you a lot and hope you can visit soon.

Love,
Tucker

Lesson 4.8 Writer's Guide: Writing to Convince

Have you ever tried to convince someone of something? To **convince** means **to get people to see things your way**. Maybe you have tried to convince your teacher that recess should be longer. Maybe you have tried to convince your parents to give you a later bedtime.

Words can be very powerful. You can change people's ideas with your words. Here are some tips for writing to convince:

- Think of all the reasons you feel a certain way. Make a list of your ideas.
- Now, think about why people might not agree with you. What could you say to change their minds? Add these ideas to your list.
- You are ready to begin writing. First, write a topic sentence about what you want or believe. Next, list your reasons. Finally, write a sentence that sums up your ideas.

Eiffel Tower should be free	it's a public place
	more people might visit if free
	people could donate money
	money used to care for tower

People should not have to pay to visit the Eiffel Tower. The tower is like a park or a library. It belongs to everyone. People should be able to enjoy it at any time. Instead of paying to see it, people could donate money if they wanted to. This money could be used to take care of the tower. More people might visit the Eiffel Tower if they did not have to pay. It should be free for everyone to enjoy.

28

Proof It

Read the following paragraphs. There are seven incorrect end marks. Cross out the mistakes. Then, write the correct end marks above them.

Have you ever heard someone say it was "raining frogs"? You might have thought that it was just a figure of speech. But in rare cases, it has actually rained frogs. How could this happen? It sounds impossible. During a tornado or a powerful thunderstorm, water from a pond or lake can be sucked into the air. This includes anything that is in the water.

The storm continues to move. As it travels, it releases the water into the air. Does this mean that frogs and fish come raining down from the sky? Yes, this is exactly what happens.

Cases of strange things falling from the sky have been reported for many years. People have seen small frogs, fish, grasshoppers, and snails drop from the sky in places like France, India, Louisiana, and Kansas. Are animals the only things that get swept up by storms?
