EVI-HD1
High-Definition PTZ Color Camera

Flexible full 1080i HD remote Pan/Tilt/Zoom camera enables you to output in one of 14 formats—eight HD and six SD video formats (including 1080/60i, 1080/30p, 720/60p, 720/25p, NTSC/PAL and HD-Analog and HD-Digital). It incorporates a 1/3" CMOS (2 MP) image sensor, 10x optical wide angle zoom lens, and HD-SDI output. The EVI-HD1's direct drive motor ensures quick but quiet movement, while the newly developed lens takes in a wide field of view.

#SOEVIHD1

SONY

BRC-Z330
High Definition PTZ Camera

Designed for a wide variety of remote video applications, the BRC-Z330 is a high definition PTZ camera featuring a 1/3" 2-MegaPixel CMOS image sensor and 18x optical zoom lens. The camera's wide pan/tilt ranges and smooth pan/tilt/zoom capability make it perfect for deployment in houses of worship and auditoriums, as well as educational facilities, conferences and concerts halls. The camera simultaneously delivers stunning high definition images in 1080i and 720p, while still having capability for output standard definition. Easy to install, it has a quiet operation that minimizes interference with ongoing events, helping it blend in naturally with the surrounding environment. #SOBRZ330.....**4200.00**

SONY

EVI-D70
1/4" PTZ Color Video Camera

Pan/Tilt/Zoom remote desktop or ceiling-mounted communication camera with a 1/4" EXview HAD image sensor, long 18x zoom lens, image inverting capability, high-speed operation, quiet direct drive operation, and six camera position presets. It includes a wireless remote control and can be controlled by optional RS-232C and RS-422 serial controllers.

#SOEVID70

SONY

PRO POV CAMS

Remote Head and Micro Camera Systems

Designed for industrial video, diagnostics, scientific imaging, and specialty programming such as reality TV, these tiny, high-resolution cameras can be mounted in places inaccessible to standard cameras—providing unique points of view for a range of uses. Whether focusing on an auto plant or a petri dish, an operating table or a poker table, these fixed focus professional systems will capture details otherwise impossible to record. Each camera head is connected by cable to a dedicated camera control unit (CCU), purchased separately, and requires a C-mount, bayonet or micro mount lens.

SONY HXR-MC1 Compact HD POV Camera and Recording System

A stunning full high-definition compact point-of-view (POV) camera, the HXR-MC1 consists of a small camera unit and a handheld controlling unit with LCD panel and recording function. This all-in-one tiny camera system needs no extra equipment, take it out and just start shooting. The camera unit is also splash-proof. Moreover, the unique style of the HXR-MC1 enables shooting in unordinary conditions and angles, such as shooting sports scenes from the user's point of view and onboard shooting in motor sports. Thanks to the LCD-equipped main unit, once the shot is taken, users can check the material immediately.

- Achieves its balance of compact size, light weight and superb image quality through the use of solid-state recording onto Memory Stick PRO™ Duo media using AVCHD compression. The HXR-MC1 can record up to six hours of high-definition content onto a 16GB Memory Stick media.
- Offers HD 1920 x 1080 resolution, and features Sony's ClearVid CMOS Sensor system enhanced by Exmor technology for high-quality digital signals with extremely low noise.
- Even with a 10x optical zoom and a built-in mic, the camera measures only 1-1/2 x 1-11/16 x 3-1/2" allowing it to be attached to various devices such as helmets or cars. Screw holes on the bottom of the unit make mounting easier. It is also splash-resistant for use in the rain.
- Recording and playback are performed within the HXR-MC1's control unit, eliminating the need for external recording devices or facilities. The combination of Exmor and CMOS sensor technologies result in low power consumption and maximum battery operation of up to 405 minutes.

- Control unit has a 2.7" 16:9 touch-screen LCD panel. Set-up during shooting or video operation can be carried out simply by touching the LCD panel.
- The control unit is also equipped with a recording button, zoom lever, and manual control dial, so users can control the camera remotely while watching the images. External monitors are not needed.
- HD video is recorded in AVCHD, which uses MPEG-4 AVC/H.264 compression, the same method used in Blu-ray Disc technology. **#SOHXRMCIACC** **2349.95**

MN-43H

1/2" CCD Color Lipstick Camera

This high-performance micro camera is ideal for medical and scientific applications as well as covert surveillance. Designed mainly for indoor use, the MN-43H offers low-light sensitivity down to 5 lux, and 470 lines of horizontal resolution.

- 1/2" CCD delivers 768 x 494 effective pixels
- Accepts 14 different lenses
- Manual white balance and shutter

AG-HMR10 • AG-HCK10

Full HD Portable SD Memory Card Recorder and Multi-Purpose Camera Head

Ideal for applications in video production, sports coaching, health-care, law enforcement, remote operation/ surveillance, and much more, the AG-HMR10 is a handheld, battery-operated portable recorder with HD-SDI input and output, while the AG-HCK10 camera head features three 1/4" native HD resolution 3-MOS imagers, 12x optical zoom, and Optical Images Stabilizer (OIS).

When connected via included 3m detachable cable (optional 10m cable is also available), iris, focus and zoom can be remotely controlled from the recorder. The HMR10 records in HD formats including 1080/60i, 1080/50i, 720/60p and 720/50p.

- Equipped with an HD-SDI input and output, the HMR10 recorder is also suitable for back-up recording from any HD-SDI-enabled camera or for use in studio or event production.
- In addition to HD-SDI in/out the recorder features HDMI out and USB 2.0, internal speaker and headphone mini jack, and 3.5-inch color LCD monitor that displays content in thumbnail images for quick viewing.
- For editing or playback, users can instantly transfer content from the SD memory card to Mac or PC computers with an SD/SDHC card reader or by connecting the HMR10 recorder directly via its USB 2.0 interface.
- To simplify shot selection, you can add a mark to the thumbnail images of each clip. You can then display and play only the clips that have shot marks.
- Pre-REC function ensures you always get the shot you want by letting you continuously store, and subsequently record, images and sounds for 3 seconds before the REC button is pressed.
- Plays back the last 2 seconds of the most recently recorded clip for quick confirmation.
- The date, camera operator, location, title and other information can be added to the image data.

XH-A1s • XH-G1s

Professional HDV Camcorders

The XH-A1s and XH-G1s encapsulate a wealth of features in a compact, 3-CCD camcorder that captures 1080i HD video at frame rates of 60i, 30p and 24p. Genuine Canon L-series 20x wide-angle (32.5-650mm equivalent) HD zoom ensures outstanding resolution and color reproduction.

Behind the lens are three 1/3" 16:9 1440 x 1080 CCDs delivering superior picture quality and wide dynamic range with virtually no color noise. Other features include an analog-digital converter, built-in XLR inputs with external leveling, a 2.8" widescreen LCD (207K pixels), and two built-in ND filters. Otherwise the same, the XH-G1s steps up with the Professional Jack Pack which offers HD-SDI and SD-SDI output, Genlock input and SMPTE timecode input/output, for multi-camera shoots.

- Whether shooting handheld, from a moving car, or on a swaying bridge, Canon's super-range OIS combines gyro- and image sensors to keep your picture steady.
- DIGIC DV II technology processes the HDV signal with 4:2:2 color sampling, ensuring optimal color reproduction in skin tones and in high-contrast scenes. For more precise image control there are 7 Program AE modes and nine custom presets, to adjust hue, gain, sharpness, setup level, and Cine gamma settings. Then save the settings on an SD memory card for future use.
- Instant AF uses two sensors to provide fast and accurate focus, even in low light.
- Audio capabilities include two-channel audio performance; two built-in XLR terminals with separate audio-input sensitivity settings; the ability to simultaneously record sound from the supplied internal microphone and an external microphone; line output level switching; an audio (manual) limiter and a new metal headphone jack for reliable connectivity. The result is better overall flexibility and control of the camera by enabling the use of one cameraman to do the job of many.

Canon 72mm 0.8x Wide Angle Lens (B&H# CAWDH72) 339.95

XL-H1A • XL-H1s

The Canon XL-H1a is designed to meet the needs of broadcast ENG producers, documentary, film, and commercial videographers. Genuine 20x HD optics and exceptional image processing result in brilliant HD image capture. Achieve 1080i HD resolution at 25 Mbps with selectable frame rates of 60i, 30p, and 24p. Fully customizable system has a 1/3" XL mount w/three native 16:9 image sensors (1440 x 1080), Cine control, multiple output options, and a well-balanced design—an ideal tool for meeting the demands of advanced video work. Otherwise the same, the XL-H1s steps up with the Professional Jack Pack which offers HD-SDI and SD-SDI output, Genlock input and SMPTE timecode input/output, for multi-camera shoots.

- The standard lens offers unprecedented control over zoom, focus and iris settings, delivering an even higher level of creative expression. Canon 20x Zoom (38.9-778mm equivalent) Professional L Series Fluorite features an SR multi-coating which minimizes ghosting and veiling of the image, and ensures the highest level of resolution and color fidelity.
- One of the most useful and desirable features that distinguishes the XL line is the interchangeable lens system. This flexibility of optics opens the door to total creative freedom, which is further enhanced by adaptors that are available for the camera's XL mount.
- Complete customization brings a high level of tuning to achieve creative objectives with precision.
- 2.4" widescreen combination EVF/LCD Monitor (215,000 pixels) with adjustable brightness, contrast, color and sharpness as well as Black & White mode. Offers comfortable shooting for any operator.
- Total Cine control • Optical image stabilization • SD slot to save camera settings
- Combination flip-up 16:9 EVF & LCD panel • Aspect guides in viewfinder
- SMPTE time code and color bars with 1kHz reference tone
- Dual XLR (line/mic level) inputs with +48v Phantom power (4-channel option with MA-300)
- Clear Scan • 2 built-in ND filters • LANC terminal

XF100 • XF105

HD 1920 x 1080 4:2:2 CCD Camcorders

The XF100 and XF105 feature 50Mbps MPEG-2 4:2:2 recording of 1920 x 1080 HD video onto Compact Flash (CF) cards for unsurpassed image quality and efficient workflow at an affordable price. Ideal for documentary and independent filmmaking and event videography, they utilize file-based MPEG-2 compression with an MXF File Wrapper to ensure full compatibility with existing industry infrastructure, metadata and non-linear editing systems. They are equipped with Canon 10x (30.4- 304mm equivalent) HD lens; enable the easy set-up and capture of high-definition 3-D video when two XF100 or XF105's are paired; and have built-in infrared low-light enabling the capture of HD video in complete darkness. Otherwise the same, XF105 adds HD-SDI output, genlock, and SMPTE time code (I/O) terminals for multi-camera or 3-D productions.

XF100 (CAXF100) or XF105 (CAXF105) Call or Log-on

XF100 • XF105 • XF300 • XF305 All Feature

- Single or three 1920 x 1080 CMOS image sensor delivers outstanding Full HD video recording with minimal noise. 50Mbps constant bit rate provides the bandwidth needed to capture their superior resolution and color in spectacular detail.
- 4:2:2 color sampling provides ultra-fine transitions in tone and color and maintains the highest quality image for use in post production processes such as chroma keying, color grading, advanced compositing and effects.
- In addition to rugged, solid-state construction and the speed and ease of file transfer to computers, CF cards are cost effective and widely available. They feature hot-swappable dual card slots and support UDMA CF cards for maximum performance.
- The Canon XF Codec is supported by Adobe, Apple, Avid, and Grass Valley, to ensure compatibility with widely used software programs.
- Canon's proprietary DIGIC DV III Image Processor, ensures natural, lifelike colors and captures tonal gradations and shadow detail with remarkable accuracy. DIGIC DV III also powers Canon's innovative Face Detection Technology, an autofocus option that can significantly reduce the effort required when camera operators work alone, such as in news applications.
- To maximize their adaptability across various production environments, they are equipped with the ability to record at multiple bit rates, resolutions and variable frame rates for slow and fast motion.
- Additional professional features include variable-interval (for time-lapse) and frame-record for stop-motion animation, and a photo feature for frame-grabs.
- XF100 and XF105 features a 3.5-inch (920,000 dot) LCD monitor, while the XF300 and XF305 features a rotating 4-inch, 1.23-megapixel LCD monitor that can be positioned at either the right or left side of the camcorder, allowing for easy viewing even in the most difficult shooting positions.
- The LCD monitor also provides a display of the built-in waveform monitor and (XF300, XF305 add a vectorscope) to aid in achieving accurate exposure and color levels while shooting. Additionally, the LCD can show peaking, edge-monitor-focus and magnify the image, enabling users to confirm critical focus, an essential objective in all HD production. They also come equipped with 0.24", 260,000-dot (XF100/300) and 0.52" 1.55-megapixel color electronic viewfinder (XF300/305), providing ample resolution for critical focus and 100% field-of-view coverage for accurate judgment of composition.
- For audio, they feature a built-in stereo mic as well as dual XLR inputs for external audio sources. They support 16-bit PCM audio at 48 kHz with automatic and manual audio level adjustment.

XF300 • XF305

HD 1920 x 1080 4:2:2 3-CCD Camcorders

The XF300 and XF305 step up with three 1920 x 1080 CMOS sensors which deliver outstanding Full HD video recording with minimal noise. They also feature Genuine Canon 18x HD L-series lens which has a focal length of 29.3-527.4mm (35mm equivalent) and a Full Manual Focus mode with mechanical "hard" end stops and distance markers for professional operability and repeatable manual focus. HI-UD (high-index, ultra low dispersion), UD and aspherical lens elements minimize chromatic aberrations and provide a compact size and weight to the lens – while also delivering a resolution of 1000 TV lines. The lens also features a SuperRange Optical Image Stabilizer (OIS) system featuring Dynamic and Powered modes for optimal performance in the greatest variety of situations. Otherwise the same, XF305 adds HD-SDI output, genlock, and SMPTE time code (I/O) terminals for multi-camera or 3-D productions.

Canon XL-2

Professional MiniDV Camcorder

The only prosumer camcorder to offer an interchangeable lens system, the LX-2 also offers a host of professional functions including 16:9 aspect ratio, scan-matching, time code and custom picture looks. It also has 30-frame and 24-frame interlaced and progressive modes.

- 3 1/3" CCD's (680k pixels) with horizontal pixel shift
- Separate progressive scan CCD for each primary color
- Interchangeable XL lens system
- Complete image control including custom presets
- 2-bit DSP (Digital Signal Processor) allows customizable Cine look
- 20x Fluorite zoom lens (5.4 - 108mm) with OIS
- 16:9 and 4:3 aspect ratio shooting formats
- 4-channel audio, two XLR audio inputs with phantom power (+48v)
- SMPTE time code
- Variable frame rates—60i / 30p / 24p (2:3 and 2:3:3:2)

Interchangeable Lenses for XL-H1A, XL-H1s, XL-2

The XL-H1A, XL-H1s and XL-2 accept a host of interchangeable XL lenses or Canon's extensive range of photographic lenses. For wide-angle imaging, Canon offers a 3x Wide-Angle Lens with a resolution in excess of 600 TV lines, while the 16x Mechanical Servo Zoom Lens gives you the flexibility of calibrated focus and zooms. For added optical lens magnification, apply the 1.6x Extender between the camcorder and the zoom lens. There is also a 16x Automatic Lens with Super Range Optical Image Stabilization. Using the optional EF Adapter opens you to a wealth of Canon EOS EF photographic lenses, a tremendous super telephoto boon to those producing wildlife, astronomy or surveillance videos.

3x Wide-Angle Zoom Lens: The 3x (3.4-10.2mm f/1.8-2.2) short zoom gives your camcorder a 70° field of view, making it ideal for shooting interiors as well as landscapes. It incorporates 18 high-quality precision-crafted optical elements to deliver extraordinarily sharp images. Six-blade iris for minimal light flare. Manual zoom and focus ring. Built-in 1.5x ND filter. (24mm—72mm in 35mm). (B&H# CA3XXL1).....**1,199.95**

16x Manual Zoom Lens: The 16x (5.4-86.4mm f/1.6) manual servo zoom lens gives you the flexibility of calibrated power zoom, power iris (has auto iris capability), two built-in ND filters and calibrated manual focus. Has a macro and flangeback adjustment mechanism. Includes soft case. (B&H# CAM16XXL1S).....**1,499.95**

RC-72 Aspect Ratio Converter: When shooting in 4:3 mode, this 0.8x converter provides the same angle of view as 16:9 mode. (B&H# CARCXL2).....**279.95**

EF Adapter: Allows the attachment of over 50 high-quality Canon photographic EF lenses—ranging from Fisheye to Super Telephoto to a choice of versatile zoom models. (B&H# CAEFAXL1).....**449.95**

1.6x Extender: Fits between body and lens to increase the focal length of Canon XL lenses by 1.6x. (B&H# CA1.6XXL1).....**399.95**

Reconnaissance, Intelligence and Target Acquisition

These versatile night vision solutions are specifically designed to capture high-resolution imagery directly to various standard and high-definition video camcorders. Using a modular system to facilitate high-performance video capture, these scopes exhibit extraordinary sensitivity in critical low-light operation, and will transform any dark scene into bright, high-resolution video. Both the AstroScope and Prowler systems can not only attach directly to fixed- and interchangeable-lens camcorders, their front-end C-mounts allow use of any number of professional-grade 35mm cameras and lenses.

AstroScope™ 9350XL-3PRO

This advanced night vision module is designed for Canon's XL series standard and HD camcorders. Utilizing Canon's 20x zoom lens enables long-range surveillance and evidence capture, at the same time permitting you to take advantage of the vast array of Canon-quality EOS EF still imaging lenses (with the addition of Canon's EF Lens Adapter—B&H #CAEFAXL1).

- Intensifier (CIU) module powered by the camcorder
- Maintains all camera functions including image stabilization
- No backfocus adjustments needed

9350XL-3PRO System Includes:

- Gen III Common Module Central Intensifier Unit
- Back Body Adapter (BBA)
- Front Lens Adapter
- Simple "Start Here Card"
- Soft-Sided Drawstring Lens Bag
- Lens Cleaning Cloth

#ASNVCXL (914657).....**5,849.95**

AstroScope™ 9350BRAC Systems

The AstroScope 9350BRAC systems are designed for video camcorders with a fixed (non-removable) lens. They require an optional standard C-mount objective lens, per your intended requirements for high performance.

9350BRAC systems include:

- Gen III central intensifier unit module (powered by AAA Batteries)
- Custom-designed relay lens
- Camera platform bracket with standard 1/4" x 20" tripod mount
- Eyepiece adapter (EPA) with cold shoe accessory adapter
- C-mount front lens adapter (FLA-C)
- Simple "Start Here" card
- Standard AAA batteries
- Lens-cleaning cloth

GY-HM100U • GY-HM700U

ProHD Memory Card Camcorders

GY-HM100U

The hand-held GY-HM100 and shoulder-mounted GY-HM700 are solid state 3-CCD camcorders that record 35Mbps HD video and uncompressed audio directly to SDHC media cards in the native Quicktime format used by Apple Final Cut Pro. This eliminates the need to transcode or re-wrap prior to editing — allowing instant editing of recorded material without file conversion, and a media cost approaching the economy of tape. Video clips are dragged directly from the storage media onto the editor's timeline, eliminating the need for transcoding while maintaining original first generation image quality.

In addition to 35Mbps per second, a bit rate supporting full 1920 x 1080 encoding in the HQ mode, they can record 720p (19/35Mbps) and 1080i (25Mbps) in SP mode, assuring compatibility with most NLE systems. Both record on SDHC memory cards up to 32GB. The cameras have two memory card slots, for a total of up to 64GB of on board storage—enough for up to 6 hours of continuous HD recording. The cameras automatically record on the second card when the first card is full.

GY-HM700U

GY-HM100 Hand-held

- Ultra-compact handheld form factor makes it ideal for use in tight quarters. For even less conspicuous shooting, the handle can be removed and the audio can be recorded via the built-in 2-channel mic.
- Incorporates a Fujinon 10:1 Zoom HD Lens with three aspherical elements and an EBC for reduced flaring and ghosting. Flip-in cover integrated in the lens hood, eliminates the need for an external cap.
- Focus is controlled manually or automatically. A smooth servo zoom is controlled with a rocker on the handgrip, or manually with the lens ring. Macro mode lets you record subjects as little as 2" away from the lens. Automatic and manual iris let you adjust the depth of focus.
- Camera's hand grip accommodates hands of all sizes. A single ring is used for both manual focus and manual zoom. Additional manual controls include white balance, shutter, gain, and audio levels.
- Audio levels can be controlled manually, or automatically using AGC. Audio meter in the LCD and VF facilitates adjustment. Balanced XLRs with 48v phantom power on the handle for external mic and/or wireless receiver. Shotgun mic is provided, as well as a built-in stereo mic for ambient sound pickup.

GY-HM700 Shoulder-Mounted

- Utilizes three precisely aligned 1/3" progressive scan full HD CCDs and exclusive Adaptive Pixel Correlation Technique to produce resolution comparable to cameras with larger image sensors.
- Includes a detachable 14x Canon HD lens based on the superb optics found in more expensive HD lenses. Its superior MTF provides higher resolution than typical "stock" lenses.
- Create a single clip file from multiple trigger presses. This is ideal when "in camera editing" is preferred. The complete shot sequence is instantly available as a single clip.
- Optional adapters allow 1/2" and 2/3" bayonet mount lenses to be used. Optional HZ-CA13U film lens mount adapter enables mounting of 16mm film camera lenses—expanding production lens options.
- In 720p 35Mbps mode, the camera can be set to record at a frame rate different (under/over crank) than the playback rate.

GY-HM100U (JVGYHM100) and GY-HM700U (JVGYHM700U) Call or Log-on

GY-HD250U 1/3" 3-CCD Professional ProHD Camera

Designed for ENG, field production and cinematography, the GY-HD250U records full-frame 720/60p and real 24p, 25p, 30p, 50p, and 60p. Offers 24p full HD image capture for cinematographic applications and easy transfer to 16mm and 35mm film. 1280 x 720 HDV format produces crisp, native HD images, while full-frame 60p eliminates the degenerative process of de-interlacing. MPEG-2 compression allows high-quality HD recording on standard DV media. Direct digital transfers to HDD via FireWire maintain quality throughout the transfer process. Archive on tape or plug the drive straight into an NLE—no need to make dubs or transfer data.

- Composite video input (for SD pool feed) , genlock, time code input/output
- Studio capability with optional multicore adapter
- HD/SD-SDI output with embedded audio & TC, Varicam flags (HD mode only); HD-SDI output of 1080i from built-in cross converter

GY-HD250U with 16x Fujinon Lens (JVGYHD250U) 5995.00

GY-HM790U ProHD ENG / Studio Camera

The GY-HM790U is a modular 3-CCD shoulder-mount HD video camera with solid state recording capability as well as studio functionality. Capable of recording 1920 x 1080 (60i, 50i, 30p, 25p, 24p), 1440 x 1080 (60i, 50i (MOV only), 1280 x 720 (60p, 50p, 30p, 25p, 24p) at 35Mbps or 19 Mbps and 720 x 480i video to native MP4 or Final Cut Pro files for the most efficient workflow. Also offers a full complement of broadcast features, including HD-SDI output, 4:2:2 sampling, timecode, genlock, and variable frame rates. Records to dual, hot-swappable SD/SDHC cards which can be coupled with the optional KA-MR100G SxS recorder for extended or backup capture, or simultaneous recording to high-speed SxS media. Optional studio components allow the camera to meet the most demanding studio applications.

- With full recording compatibility with the following formats, users can take advantage of accelerated workflow enabled through Native File Recording capability.
 - QuickTime™ MOV, native file format recording (HD/SD) for direct file access to Apple FCP
 - XDCAM EX MP4 (HD), Seamless integration into XDCAM EX™ HD workflow
 - AVI (SD), DV codec AVI file support for existing SD workflow
- When recording in 720p 35Mbps mode, the camera can be set to record at a frame rate (10, 12, 15, 20, 24, 30, 40, 48 or 60 fps) different than the playback rate (overcrank/undercrank). This makes it possible to record slow or fast motion when the recording is played back at 24p or 30p.
- Stunning high-resolution (852 x 480 x 3) LCOS 0.45" 16:9 viewfinder is crisper and more detailed than conventional LCD viewfinders, with higher vertical resolution and superior RGB color separation. Helping the operator stay focused on the action is a focus assist system that highlights the edges of objects in the image. Also visible in the viewfinder are indicators for the audio input level, the battery time remaining, and the recording time available on each memory card.
- 4.3-inch (800 x 480) 16:9 LCD monitor provides a wide array of monitoring and setup indications.
- SD composite, HD/SD component, SDI and IEEE1394 outputs. The SDI output (BNC) can be switched between HD and downconverted SD with embedded uncompressed audio.
- When shooting high-contrast scenes, the camera features a spot exposure meter to monitor the dynamic range of the image in various ways so that the exposure may be controlled more accurately.

GY-HM790 Body (no lens) (JVGYHM790CHU) 8795.00

Optional Studio Components:

KA-M790G Multicore Studio Interface: Small and compact unit enables studio/EPF operation. Features intercom, call camera control, video/genlock, tally and other signals interface via 68-pin multi-connector. Has a 26-pin RM connector on the back compatible with cables from JVC and Sony to connect with a camera control unit (CCU). (JVKAM790G) **2495.00**

KA-790G Studio Sled: Supports the VF-HP790 LCD studio viewfinder on the top and stabilizes the entire system including an optional teleprompter. A hinged side panel makes it easy to remove the camera for shoulder use. (JVKA790G) **1995.00**

VF-HP790G LCD Studio Viewfinder: 8.4" XGA (1024 x 768) LCD studio viewfinder for the GY-HM790 or GY-HM700. Mounting to the KA-790 Studio Sled, it is equipped with a large tally indicator and screen hood. Provides all of the camera's viewfinder indications: safety markers, focus assist, power and clip management. Also has an HD-SDI input for monitoring an external signal. (JVVFHP790G) **3895.00**

SR-HD1250 • SR-HD1500 Blu-Ray and HDD Recorder Combos

Record and author professional BDMV (with menu) or BDAV discs. Advanced MPEG-2 and MPEG-4 encoding provides support for HD and SD

sources, and a built-in format converter can downconvert HD content for recording to a standard DVD. They also support BD-R or BD-RE (erasable) Blu-ray discs. The SR-HD1250 has a 250GB hard drive and includes component and HDMI outputs for flexible monitoring options. The SR-HD1500 steps up with a 500GB hard drive, RS-232C and support for .MOV files (for Apple Final Cut Pro), making it compatible with footage recorded with the JVC GY-HM100, GY-HM700 in the SP mode.

- USB, SDHC slot and i.LINK input for connection to camcorders
- Multiple file formats such as AVCHD, HDV, DV are compatible; digital dubbing can be performed.
- Copy videos to a Blu-ray disc from HD camcorder, from the HDD, or downconvert videos and record them onto a DVD. The internal HDD also enables easy editing and dubbing of multiple discs.

SR-HD1250 (JVSJRH1250US) and SR-HD1500 (JVSJRH1500US) Call or Log-on

Panasonic

AW-HE100

Multiformat HD/SD Integrated PTZ Camera

The HE100 integrates super-smooth pan/tilt/zoom (PTZ) mechanisms within a unique ergonomic design, making it a cost-effective robotic camera solution for a wide range of applications—from surveillance to video-conferencing to event production. The HE100 supports 1080i, 720p, and 480i formats and can simultaneously output both HD and SD signals, creating broadcast-quality video through its three 1/3" CCD's and 13x f1.6 zoom lens. The integrated PTZ unit has a True Servo pan-tilt head that offers precise, fast, fluid movement in all directions, delivering a maximum pan/tilt speed of 60 degrees per second. Outputs HD/SD analog component and composite video. Includes: Wireless remote control, power cable, tbletop/ceiling mounting bracket, main mounting bracket, drop-prevention wire, cable cover, mountig screws and rubber feet.

AW-HE100 (#PAAWHE100) **Call**
HD/SD-SDI Output Board (#PAAWHD100) **Call**

AW-HE50H • AW-HE50S

Multiformat HD/SD Integrated PTZ Cameras

The AW-HE50H and AW-HE50S combine outstanding image quality, smooth pan/tilt/zoom operation and easy integration for superior HD/SD production and communications. They feature full HD 1920 x1080 MOS sensor and support 1080i, 720p, 576i and 480i. They can be controlled via RS-422 or Internet Protocol (IP) via 3rd party control or automation systems or via computer. Up to 100 HE50's can be operated by the Panasonic AW-RP50 remote camera controller. Otherwise the same, the HE50H has an HDMI output making it ideal for HD videoconferencing and distance learning; the HE50S has HD/SD-SDI output and genlock, making it a great choice for multi-camera systems and for demanding applications such as TV/cable production, sports video, A/V and conference facilities, houses of worship, and professional staging applications.

- High-quality 18x HD optical zoom lens, plus a 10x digital zoom.
- Dynamic Range Stretch (DRS) enables multi-zone digital image processing over a wide dynamic range, for exceptional results in difficult shooting conditions.
- Hybrid Noise Reduction function reduces noise without image latency or loss of resolution by combining 3D and 2D noise reduction algorithms.
- "Flesh Tone" function enables accurate and pleasing reproduction of live subjects.
- Smooth and highly accurate pan-tilt head offers precise, fast, fluid movement in all directions (±175° pan; +90° to -30° tilt). These capabilities enable the capture of a wide range of slow and fast moving objects without visually distracting vibration or "bounce". Moreover, the unit delivers quiet operation.
- Also feature 3-step gamma correction, 7-step chroma level adjustment, 100 pre-set memories, up to 1/10,000 electronic shutter with synchro scan, tally light, and a ceiling mounting bracket.

Panasonic

AG-DVX100B 1/3" 3-CCD MiniDV Camcorder

The lightweight AG-DVX100B records in standard definition 60i or 30p or lets you achieve film-like images with 24p shooting and Panasonic's exclusive CineSwitch™ technology. Adjust every aspect of your picture, with manual control of iris, shutter, gain, white balance, gamma, color matrix, detail, chroma, and pedestal. Three user-assignable buttons and six scene files allow you to save settings and transfer them between projects. Leica Dicomar 10x wide-angle zoom lens provides mechanical zoom and focus rings for precise control, along with professional barrel markings for correct pull-focus and take-to-take consistency. To make sure you're seeing exactly what you're shooting, a BW/color viewfinder and LCD both offer full overscan and anamorphic 16:9 display. Also offers two zebra settings, and has two XLR audio inputs.

Shown with optional Mic

AG-DVC20 3-CCD MiniDV Proline Camcorder

Shoulder-mounted SD camcorder with an advanced digital image processing system that captures sharp and vivid images with true colors. Perfect for educators, event videographers, sports coaches and entry-level shooters, the camera is equipped with three 1/6" CCD's, 10x optical zoom lens with electronic image stabilization, multi-speed zoom rocker and 2.5" LCD monitor. Lightweight (4.4 lb.) and easy to use with a one-touch navigation joystick for easy and fast control over basic operations. Different shooting modes—Cinema (letterbox), tele-macro, and soft skin—and five AE settings give you more advanced image control, while the Color Night View mode produces bright, vivid colors even in dimly lit locations. IEEE-1394 input and output, plus composite and S-Video output. Built-in stereo microphone and external stereo mini-mic input. Includes two 1350 mAh batteries, AC adapter and wireless remote control.

AJ-HDX900 2/3" 3-CCD 16:9 1080i/720p DVCPRO HD Camcorder

The AJ-HDX900 is a full 2/3" DVCPRO tape-based HD camcorder that records pristine 100Mbps HD images in any of 11 video formats, encompassing 60Hz and 50Hz production. Provides higher-quality 4:2:2 intra-frame recording that holds up through layers of special effects, graphic overlays and constant editing and processing. With 1080i, 720p, 24p and 25p capabilities, the AJ-HDX900 is perfect for long-form HD programming and an invaluable tool for digital cinematography, cable and television production in any format, sports, events and documentaries.

- Three CineGamma modes to replicate the look and feel of film
- Supports 1080 at 59.94i, 50i, 29.97p, 25p, 23.98p, 23.98pA and 720 at 59.94p, 50p, 29.97p, 25p, 23.98p
- HD-SDI output plus built-in downconverter to produce an SD output; IEEE1394 digital output
- Outstanding low-light shooting down to 0.032 lux (at +62 dB gain)

AJ-SD930B DVCPRO 50/25 Editing VCR with DVCAM and DV Playback

The AJ-SD930B is a versatile, cost-effective studio VCR designed for high-end digital video production. Use of the DVCPRO50 50Mbps format makes it suitable for creating high-end programming. With 4:2:2 digital component recording and four channels of digital audio, it delivers the superior picture and audio quality professionals need. Equipped with SDI I/O, RS-422A remote and jog & shuttle dial. Switchable between DVCPRO50 (50Mbps) and DVCPRO (25Mbps) for recording and playback. In DVCPRO50 mode records up to 92 minutes on a AJ-5P92LP 1/4" cassette tape. In DVCPRO mode, recording time is doubled. Also plays back DVCAM and standard DV tapes. Mini DV tapes can be played back using the optional AJ-CS455P adapter. In playback mode, it automatically detects the recording format used (DV, DVCAM, DVCPRO or DVCPRO50) and plays accordingly.

PAAJSD930B **Call or Log-on**

AJ-HD1400 DVCPRO HD-EX VCR with DVCAM and DV Playback

From field recording to nonlinear to studio editing, the AC/DC-powered AJ-HD1400 is an invaluable solution for HD production. It records at 100 Mbps with 4:2:2 color sampling and intra-frame compression in multiple HD/SD formats including 1080/59.94, 1080/50i, 720/60p, 720/59.94p and 720/50p. Features HD-SDI and IEEE1394 input/output, RS-422 interface and a built-in up/down converter. Lightweight, the AJ-HD1400 offers a handle for on-the-go use and its compact design makes it a great space-saver for desktop use and in-studio editing.

Panasonic AG-HMC40

3-Chip AVCCAM Handheld Camcorder with 10.6MP Still Capability

Weighing less than 2.2 pounds, the AG-HMC40 features three full resolution 1/4" 3-MOS image sensors to produce stunning 1920 x 1080 HD images with high sensitivity. The camera can also capture still images with 10.6 MP resolution directly onto the SD card. It is equipped with a 12x optical zoom (includes 2x, 5x, 10x) and professional image functions like Dynamic Range Stretch (DRS) that helps compensate for wide variations in lighting, and a Cine-Like Gamma mode which gives recordings a more film-like aesthetic.

- Supports 1080/59.94i (in all modes) and 1080/29.97p, 1080/23.98p native, 720/59.94p, 720/20.97p, and 720/23.98p native (in PH mode only).
- Offers a wide variety of valuable professional features including waveform monitor display, focus assists such as focus bar display and enlarged display, time date stamp, user assignable focus ring, auto focus with face detection, zebra display, synchro-scan shutter function, three programmable user buttons, time code/UB recording, and remote control terminal (for zoom, focus, aperture, REC start/stop controls).

- Comes standard with HDMI output, USB 2.0, composite output (AV multi/ch1, ch2), analog component (mini-D), detachable XLR audio input and audio REC level adjustment dials. Also offers 2-channel input (mic/line switchable) with +48V phantom power.
- 2.7" LCD monitor offers simple touch-panel operation and access to various solid-state recording functions such as pre-record, interval recording, shot marker and metadata capture.

AG-HMC40 (PAAGHMC40)Call or Log-on

Panasonic's AVCCAM series provides the flexibility of low cost, SD memory card based recording and full 1080 and 720 resolution capture. Utilizing AVCHD, an MPEG-4 /AVC Hi Profile-based format, the AVCCAM series provides a near doubling of bandwidth efficiency with improved video performance over MPEG-2 compression used in HDV formats. It also brings the benefits of solid-state recording to budget-conscious professionals. Like digital still photography, recording onto inexpensive SD/SDHC cards offers a fast and simple, file-based workflow with ultra-reliable performance and resistance to shock, vibration and extreme temperatures and weather. Since AVCHD records video as digital data files, content can be transferred and stored on affordable, high-capacity hard disk drives (HDD) or optical storage media and transferred to future storage media as technology advances.

- Using just one 32GB SDHC memory card, a user can record 3 hours of full resolution 1920 x 1080 video and audio in PH mode (average 21 Mbps/max. 24 Mbps), four hours at HA mode (17 Mbps) and 5.3 hours at HG mode (13 Mbps). In the HE mode (6 Mbps), the camera can record up to 12 hours of 1440 x 1080 HD content on a single 32GB SDHC card.

- AVCHD is supported by a wide range of editing options including Apple Final Cut Pro, Adobe Premier Pro CS4, EDIUS Pro 5 and EDIUS Neo 2. In addition, a free transcoder can be downloaded from Panasonic to convert AVCHD files to DVCPRO HD P2 and downconverted DV files for use with most existing professional editing systems.

Panasonic AG-HMC80

3-Chip AVCCAM Shoulder-Mount HD Camcorder

With a high-resolution 3-megapixel imager, four AVCCAM HD recording formats, 12x optical zoom (40.8-490mm equivalent) DV support, and enhanced professional functions, the AG-HMC80 delivers the full benefits of AVCCAM for schools, event videographers, government and corporate users who prefer to work with a shoulder-mount camera and need flexible connectivity and format support. The camera, utilizing a professional 3-chip imager, can also take 10.6-megapixel still images and store them as standard JPEGs on the solid state card. AVCHD recordings and stills can be played back from the SD card on Blu-ray players, laptop PCs and advanced game consoles.

- 3-megapixel 3MOS imager produces stunning 1920 x 1080 or 1280 x 720 AVCHD video with high sensitivity. Plus, using MPEG-4 AVC/H.264 high profile encoding – recordings look clean and crisp, even during fast motion, without image degradation or dropouts.
- At 60Hz, the camcorder supports the following HD formats in PH mode: 1080/60i, 1080/30p, 1080/24pN, 720/60p, 720/30p, 720/24pN; in HA, HG and HE modes, it records in 1080/60i.
- Record DV (480/60i, 480/30p, 480/24p) on SD cards with squeeze, letter box and side crop options.
- User-assignable manual focus ring (Focus/Iris/Zoom) for added control; time code/UB recording; time/date stamp; no wired remote control terminals (for zoom, focus, iris, REC start/stop controls).
- Optical Image Stabilizer (OIS) for smooth stable shooting; Dynamic Range Stretch (DRS) compensates for wide variations in lighting, and a Cine-Like Gamma mode to give recordings a more film-like look.
- Two XLR inputs (mic/line) with +48v phantom power, built-in stereo mic, and external mic-in jack. Also HDMI output, USB 2.0, composite (BNC), analog component (BNC x3), and IEEE1394 output.
- Offers waveform monitor display, focus assists such as focus bar display and enlarged display, auto focus with face detection, zebra display, color bar, tally lamps, slow smooth zoom and soft landing, slow shutter and synchro-scan shutter functions, and three programmable user buttons.

AG-HMC80 (PAAGHMC80).....Call or Log-on

Panasonic AG-HMC150

3-Chip AVCCAM Handheld HD Camcorder

The AG-HMC150 is a production-level camera featuring three 1/3" progressive CCD imagers to produce stunning 1920 x 1080 resolution picture quality. It comes with a 13x Leica Dicomar zoom lens (28-364mm equivalent)—the widest in its class, auto or manual operation of focus and iris, and automatic optical image stabilization (O.I.S.) to ensure stable, smooth and precise shooting. It handles full-pixel (1920 x 1080 and 1280 x 720) 24p progressive recording, and offers advanced features such as SMPTE time code reader/generator, focus assist functions, six scene files, three neutral density filters and three user sets and simplified waveform and vectorscope display.

- Cam-driven (mechanical) manual zoom ring provides the same fast, precise zooming and feeling as cameras with interchangeable lenses. The servo-driven zoom also allows slow zooming. Also offers a 2x, 5x or 10x digital zoom that instantly magnifies the image —without the light loss that happens when using a lens extender.
- Records in 1080/60i, 1080/30p, 1080/24p; 720/60p, 720/30p, 720/24p HD formats
- Advanced gamma functions address eight shooting scenarios and enhance your creative abilities. This includes the cinelike gamma, which produces the characteristic warm tone of film recordings.
- In addition to a built-in stereo mic, it has two XLR mic/line switchable inputs with +48v phantom power, auto/manual level, and internal/external assignment
- Equipped with both composite (RCA) and component (Mini D4) video outputs, allowing HD images to be down converted and output as SD images. Also has an HDMI output and USB port.
- Any remote controller compatible with the AG-DVX100 or AG-HVX200 can be used (for Zoom, Iris, Focus, Start/Stop)
- Handle grip contains both the Rec Start/Stop button and a lens zoom control (with three speeds) to ensure easy shooting even at low angles.
- Large 3.5" LCD monitor offers a monitor mirror mode which is convenient when shooting interviews.
- Time/date stamp for applications like legal depositions or surveillance

AG-HMC150 (PAAGHMC150).....Call or Log-on

AG-HPX170 1/3" 3-CCD P2 HD Handheld Camcorder

The AG-HPX170 is a solid-state P2 HD handheld camcorder equipped with three 1/3" 16:9 CCDs, high-performance digital signal processor with 14-bit A/D conversion and 19-bit processing to assure high-quality recordings necessary for top-level production and broadcast. Weighing only 4.2 lbs, the camcorder has a 13x Leica Dicomar zoom lens with a 28mm wide-angle setting (the widest in its class) and a cam-driven manual zoom for smooth, easy and precise operation. For added flexibility, the camera provides auto or manual focus and iris.

- Fully solid-state, the HPX170 has no moving parts, features fast IT compatible file-based workflow, and is resistant to temperature extremes, shock and vibration.
- Two P2 card slots let you record up to 128 minutes of the highest quality DVCPRO HD recording using 64GB P2 cards. Other user-friendly recording modes include hot swapping for non-stop recording, loop record, pre-record, interval and one-shot recording. A time/date stamp function makes it ideal for use in law enforcement environments.
- 20-step frame rate selection in 720p mode for variable-speed shooting in the 12 fps to 60fps range to acquire fast- or slow-motion in-camera effects.
- For added creative flexibility, offers a variety of advanced gamma functions and settings including a CineGamma mode.
- HD/SD-SDI output for live feed, editing and monitoring. Also has IEEE1394 and USB 2.0 interfaces.
- Records in 20 HD and SD formats (1080i and 720p formats in DVCPRO HD, as well as 480i in DVCPRO50, DVCPRO and DV) and is switchable between 16:9/4:3 aspect ratios.
- Convenient features include clip preview on the camera's 3.5" color LCD monitor; instant recording startup, scene files, assignable user buttons, focus assist and a camera remote function.

Camera Rain Cover (for AG-HVX200A):

Protects the camcorder from rain, dust and poor weather conditions, while allowing full operation. There are extra-large clear vinyl windows to view camera controls and cassette opening with a microphone opening, pockets for a viewfinder and a wireless receiver antenna. It has an opening for a sungun and is equipped with a thermoforming gasket to keep out dampness. This rain cover is contoured to protect flip-out monitor screens. (PAAGYURC100) **86.95**

AG-HPX370 P2 HD Camcorder with AVC-Intra

Equipped with 17x interchangeable lens, three 1/3", full-HD 2.2 megapixel U.L.T. 3-MOS imagers and 20-bit Digital Signal Processor, the AG-HPX370 acquires full 1920 x 1080, 10-bit 4:2:2 AVC-Intra recording to bring true master-quality HD recording – with the benefit of P2's fast independent frame, file-based workflow. Delivers high-resolution recording using AVC-Intra and DVCPRO HD, but also supports SD recording in DVCPRO50, DVCPRO and DV formats for complete flexibility. Native 24p (23.98 fps), makes it an affordable solution for indie film production. Lightweight (only 8 lbs.) with a well-balanced design, the AG-HPX370 offers a broad range of creative features including variable frame rates, advanced gamma functions, Chromatic Aberration Compensation (CAC), built-in scan reverse, Dynamic Range Stretch (DRS) function, waveform and vector scope display and focus assist tools. High-res LCOS color viewfinder (1,226,000-pixels) and 3.2" LCD color monitor (921,000-pixels) provide clear image reproduction even in bright outdoor areas. The two-slot HPX370 provides instant random access to recorded HD or SD content and operates reliably in harsh environments, with resistance to temperature extremes, shock and vibration. (PAAGHPX370) **Call or Log-on**

AG-HPX500 2/3" 3-CCD P2 HD Camcorder

With three 2/3" progressive image sensors, an interchangeable lens system and four P2 card slots, the AG-HPX500 is built for professionals. Supporting all HD/SD recording formats and tapeless P2 work flow, it uses advanced 14-bit A/D digital conversion and 19-bit inner processing for exceptional image accuracy. It records in 1080 (60i/50i/30p/25p/24p) and 720 (60p/50p/30p/ 25p/24p) resolution, with a variable frame rate function (12fps–60fps) that allows for under- and overcranking. Footage can be captured in DVCPRO HD, DVCPRO50/25, and DV, in a variety of gamma modes, while exclusive CAC technology minimizes any blur caused by lens chromatic aberration. Offers instant recording startup, clip thumbnail view, shot marker, hot swap, pre-rec, loop-rec and SD card metadata/scene files.

AG-HPX500: with 1.5" B/W viewfinder (PAAGHPX500) **Call or Log-on**

AJ-HPX2000 2/3" 3-CCD 16:9 P2 HD Camcorder

The AJ-HPX2000 integrates native HD progressive 2/3" 3-CCD performance with the ultra-high reliability and speed of P2 solid-state recording. An incredibly flexible, full production-quality camera, it can record pristine high-quality images in over 30 HD and SD formats ranging from 1080p, 1080i, 720p, 480p, 480i and 576i. With the AVC-Intra codec option board (AJ-YBX200G), the AJ-HPX2000 can deliver 10-bit, 4:2:2 master-quality video for outstanding video production and news acquisition. Extensive signal connectivity and control capability includes IEEE1394 (AVC) and USB 2.0 interfaces, HD/SD-SDI, genlock, SMPTE time code and composite video. A 10-pin RCU terminal connects the optional AJ-RC10G remote control unit. GPS mapping connection is also available. Features high sensitivity of F11 at 2000 lux and a minimum illumination of 0.007 lux (at +74 dB gain), powerful digital super gain, time lapse, 12-color correction matrix for precise color adjustments. Records 48-kHz/16-bit digital audio on four channels. Holds up to five 64MB P2 cards to record over 10 hours of content with AVC-Intra 50 and over 13 hours in DVCPRO HD 720p native.

AJ-PCD2 Single-Slot P2 Solid-State Memory Card Drive

Basically a P2 card reader, the AJ-PCD2 supports all P2 card sizes, P2 formats and frame rates in HD and SD for fast, reliable video offloads. Supplied with two USB 2.0 cables, the PCD2 requires no separate power supply for file transfers and offers total compatibility with Mac OS X and Windows desktop and laptop computers.

(PAAJPCD2).....**Call or Log-on**

AJ-PCD20 • AJ-PCD35 5-Slot P2 Card Drives

These P2 Drives are conduit between P2 cards and a computer. When connected to your computer, the P2 cards appear as one drive. The AJ-PCD20 can ingest up to 5 P2 cards at one time over FireWire or USB 2.0. When connected to either a Mac or PC the P2 cards will appear as one drive, making it extremely easy to browse through video footage. For even faster data transfer, the AJ-PCD35 drive can also ingest up to five P2 cards at once. However, it connects via a "PCI-e" card slot of a tower computer to support a peak transfer speed of up to 1.2 Gbits/sec. This is 3x faster than USB 2.0 and 1.5x faster than Firewire/1394b.

AG-MSU10 Portable P2 Media Storage Unit

Easily back-up or aggregate P2 content to a large removable solid-state drive. This allows users to quickly download P2 content, and then walk away with a featherweight SSD unit that can be powered by virtually any computer. Delivering fast, stable data transfer, the compact AG-MSU10 eliminates the need for computers or larger, more expensive appliances in the field and frees up card space for additional shooting. Battery operated, the compact AG-MSU10 has two slots: one for a P2 card, and the second for the AG-MBX10 removable housing that encloses a standard 2.5" SATA solid-state drive (SSD). Equipped with USB 2.0 and eSATA connectors, the drive can then be connected to PC or Mac. Has a 3.2" LCD screen for simple one-touch operation. It provides P2 thumbnail display and supports master-quality 10-bit AVC-Intra (100/50) and DVCPRO HD, DVCPRO50, DVCPRO and DV recording formats. Content is transferred from a P2 card to the solid-state drive at 4x real-time when recording in AVC-Intra 100 or DVCPRO HD. (PAAGMSU10) (no SSD included)**Call or Log-on**

AJ-HRW10 Portable P2 Rapid Writer

The AJ-HRW10 lets you copy content from up to five of your P2 cards onto two 3.5" removable SATA drives configured for RAID-1 mirrored operation. This lets you reuse your P2 cards on the next shoot while knowing that your previously recorded footage is safely stored away in its original pristine format. You can also configure the drives as JBOD if more storage space is needed rather than fail-safe backup. Supports all P2 frame rates, formats and codecs (AVC-Intra 100/50, DVCPRO HD/50/25/DV), and offers simple VCR-like controls. All system information is displayed on the 5" LCD monitor, including playback status from disk drives, assuring your data was successfully copied over. Equipped with a Gigabit Ethernet port for network integration, and speakers and a headphone jack for audio monitoring. Removable hard disk drives, power supply, rack enclosures and rack slides are not included (available separately). (PAAJHRW10)**Call or Log-on**

AG-HPG20 Portable P2 Player/Recorder

Featuring AVC-Intra recording, the powerful, 2.5 lb. AG-HPG20 brings easy playback, recording and file copying of 10-bit, 4:2:2 content to field and studio work. Equipped with two P2 card slots and a 3.5" LCD monitor, the P2 lets you view content in a variety of formats — whether it's 10-bit, 4:2:2 AVC-Intra or DVCPRO HD or in standard definition in DVCPRO50, DVCPRO and DV. Professional inputs/outputs include IEEE1394, USB 2.0 and HD-SDI). Shock-resistant and solid-state, the recorder features a wide range of clip playback and management functions (including metadata editing), speakers and easy-to-use controls. (PAAAGHPG20)**Call or Log-on**

AG-3DA1

The AG-3DA1 is a professional, fully-integrated Full HD 3D camcorder that records to SD card media. It makes 3D production more democratic by giving professional videographers an affordable, flexible, reliable and easier-to-use tool for capturing immersive content as well as providing a training tool for educators.

At less than 6.6 pounds, the AG-3DA1 is equipped with dual lenses and two full 1920 x 1080 2.07 megapixel 3-MOS imagers to record 1080/60i, 50i, 30p, 25p and 24p (native) and 720/60p and 50p in AVCHD. It can record for up to 3-hours on dual 32GB SD cards in Panasonic's professional AVCHD PH mode, and offers dual HD-SDI outputs, HDMI (1.4) interface, two XLR connectors, built-in stereo mic and twin-lens camera remotes. It also features a remote terminal for focus iris, zoom, REC start/stop and convergence point. Its 3.2-inch LCD screen provides the option to switch from Left, Right or overlay image display.

- The AG-3DA1 incorporates stereoscopic adjustment controls making it easier to use and operate. The twin-lens system adopted in the camcorder's optical section allows the convergence point to be adjusted. Functions for automatically correcting horizontal and vertical displacement are also provided. Conventional 3D camera systems require these adjustments to be made by means of a PC or an external video processor. The AG-3DA1 however, will automatically recalibrate without any need for external equipment, allowing immediate 3D image capture.
- The AG-3DA1 is lighter weight and smaller than current 3D rigs, while providing the flexibility of handheld-style shooting. Setup and transportation is simplified, making it ideal for sports, documentary and filmmaking projects.
- Right and left Full HD video streams can be recorded on SDHC/SD Memory Cards, significantly reducing maintenance costs.

AG-3DA1**Call or Log-on**

AG-HMX100 3D Compatible Digital AVV Mixer

The AG-HMX100 is a compact, all-in-one, digital AV mixer with a built-in HD/SD multi-format compatible video switcher, audio mixer, frame synchronizer and digital effector. It serves as an audio/video switcher, adds a variety of effects, and transmits signals - all by itself. A Multi-View function displays all source images on a single monitor, while keeping the system configuration simple and clean. Users benefit from easy delivery, set-up and removal at event sites, as well as low-cost operation. Wide-ranging SDI (HD/SD), PC (DVI-I) and HDMI (HD only) inputs, versatile digital effects, and comfortable Matrix Menu operation combine with advanced functions to configure a low-cost system that supports a wide variety of applications, from live relays and broadcasting to production. The AG-HMX100 can also operate as a 3D video switcher with dual SDI inputs. Combined with the Panasonic AG-3DA1 3D HD cam corder, and the 3D-compatible BT-3DL2550 LCD Video Monitor, which lets you view 3D footage on-site, this professional HD 3D production system makes it easy to produce and transmit high-quality 3D images. (PAAAGHMX100)**Call or Log-on**

BT-3DL2550 3D LCD Video Monitor

The BT-3DL2550 provides everything needed for 3D monitoring in the field. It supports older frame compatible 3D formats and connects easily with common professional interfaces, so it can integrate into any production. The display utilizes an Xpol® polarizing filter that is built in to the screen which brings the 3D content to life. The content can be viewed using polarized (passive) 3D glasses which come included with the monitor. It supports 1080i, 1080p and 720p playback and it offers a pixel to pixel function in the 720p display mode. The monitor also uses two HD/SD-SDI inputs for the simultaneous display of the left and right images and 3D signals. The 3D signals can be supported side by side or line by line through the monitors DVI-D input.

- Offers six different color settings such as: SMPTE, ITU-R BT.709, EBU, Adobe 2.2, Adobe 1.8 and D-Cinema (which offers a 3D look-up table (LUT) for calibration.)
- Includes two HD/SD-SDI inputs, component and RGB, RS-232C (9-pin) and GPI (9-pin) remote inputs. A headphone jack, green and red tally lamps are on the front. Has a time code display, an embedded audio decoder, closed caption and an audio level meter display of up to eight channels.

SONY

HXC-100 HD/SD System Camera

Equipped with Sony's newly-developed digital triax transmission technology, the multi-format HXC-100 allows users to use their facility's existing triax cable infrastructures for a seamless and cost-effective transition to digital transmission and ultimately to HD. The HXC-100 camera supports versatile applications for HD with a high-quality SD output. It uses the latest 14-bit A/D conversion circuit as well as the superb 2/3-inch Power HAD™ FX CCDs to bring out high picture quality. Together with the highly compact 1.5 RU HXCU-100 Camera Control Unit and a remote control panel from Sony, the HXC-100 camera offers a fairly simple system. With a variety of beneficial functions packed into the camera, such as its Focus Assist function, the HXC-100 provides genuine user-friendliness. Features three 2/3-inch Power HAD™ FX CCDs with 2.2 million pixels each, and is switchable between 1080i and 720P 50/60 Hz, with 525i and 625 SD modes available from the camera head and CCU. It offers comprehensive image controls with wide dynamic range and a 14-bit A/D. It also offers a range of automatic features designed to minimize the adjustments necessary during production, including auto iris with multi-zone weighting, auto skin tone detail, auto knee, electronic color correction, focus assist function and hyper gamma.

HXCU-100

Camera Control Unit for HXC-100

The HXC-100 camera offers flexible configuration with the highly compact 1.5 RU-size HXCU-100 Camera Control Unit, creating a standardized 19-inch rack system that is ideal for space-limited production areas. Combined with the HXCU-100, the HXC-100 can be configured as a simple studio system. Equipped with the latest Sony-developed digital transmission technology, the HXCU-100 can transmit high-resolution pictures between the camera and CCU, regardless of the cable length. The HXCU-100 features flexible interfaces of selectable inputs/outputs between HD-SDI and SD-SDI. What's more, the optional HKCU-FP1 CCU Front Control Panel is also available. When the front panel of the HXCU-100 is replaced with the HKCU-FP1, a simple remote control system can be configured. Many functions of the camera can be controlled by the control knobs and switches on the HKCU-FP1. (SOHXC100K)..... **Call or Log-on**

- Offers a high sensitivity of f/10 for 59.94 Hz and f/11 for 50 Hz with high S/N ratios of -55 dB (HD) and -65 dB (NTSC)
- A wide range of capturing modes are available including 1080/50i, 1080/59.94i, 720/50P, 720/59.94P, 576/50i, and 480/59.94i.
- High-performance 14-bit A/D converter enables images captured by the high-performance CCDs to be processed with maximum precision.
- Auto Lens Aberration Compensation function optimizes lens performance to provide stunning picture quality.
- Offers long cable runs of up to 1200m (3937 feet) via ø14.5 mm cable between the camera and the CCU.
- Provides a wide range of inputs and outputs via the connector panel such as HD-SDI output, SD-SDI output, VF signal, return signal, and SDI Prompter signal. What's more, an intercom channel (ENG/PROD) is also provided.

DSR-45A DVCAM Player/Recorder

The DSR-45 is a compact, comprehensive DVCAM VCR with a variety of convenient functions for recording, playback, and simple editing (assemble only). It features RS-422 and RS-232 (and LANC) machine control, composite, S-video, and component output I/O as well as XLR-balanced audio output. Built-in 2.5" LCD monitor for menu set-up and AV monitoring.

DSR-45 (#SODSR45A)

SONY

HXR-MC50U

NXCAM AVCHD Camcorder

The optimum HD tool to add to your production arsenal, the HXR-MC50U HD fits comfortably in the palm of your hand, but has HD picture quality to rival that of much bigger cameras. In addition, it can shoot still images as well as video, offers low light capability for nighttime shooting, has an intuitive touch screen viewfinder, a detachable shotgun microphone, and a built-in GPS that keeps track of locations. Just stick it in your vest pocket or stuff it in your camera bag, and you're good to go. Affordably priced, feature-packed and adaptable, this innovative tool is ideal for journalists, documentarians, and government and military operations – or for shooters needing a handy, dependable second camera to get that unobtrusive shot. Designed for performance, built for convenience, and packed with intelligent features, this is the small camera with big capabilities.

- Full raster 1920 x 1080i AVCHD HD recording at up to 24Mbps
- Super sensitive Exmor R CMOS sensor reduces noise for clearer images. In conjunction with the powerful BIONZ processor you'll get great results in low light.
- Sony G 10x wide angle (29.8-298mm equivalent) optical zoom lens delivers brilliant, accurate color reproduction and sharp, amazingly detailed images. The six-bladed iris offers superb shallow depth of field videography.
- Optical SteadyShot Active Mode delivers '3-way' camera shake correction at all zoom settings, even when you're walking.
- Assignable dial allows for control of focus, exposure, white balance, iris, and shutter speed. Adjusting the iris lets you control depth of field, while shutter speed allows control of motion blur.
- Intelligent Auto mode analyzes your shot and then automatically selects the appropriate settings from 10 distinct scene modes.
- Smooth Slow Record mode increases the frame rate from 50 frames per second (fps) to 200 fps, allowing you to capture 3 seconds of fast motion and play the video back in 12 seconds.
- IR illuminator enables effective nighttime imaging under low light conditions. With the NightShot function turned on, images can be recorded in virtually total darkness of 0 lx (lux).

HXR-MC50U: Includes lens hood, ECM-CG1S shotgun mic, NP-FV70 battery, AC Adapter/charger (SOHXRMC50U) **Call or Log-on**

HXR-NX5U NXCAM AVCHD Camcorder

The HXR-NX5U incorporates AVCHD technology, three Sony Exmor CMOS sensors with ClearVid array, and state-of-the-art 20x G Lens, to deliver full high-definition resolution and low light sensitivity with low noise. The camcorder will record AVCHD up to 24Mbps, delivering 1920 x 1080 HD images with both interlace and progressive modes along with native 1080/24p, 720/60p and MPEG-2 SD recording. It includes both HD-SDI and HDMI outputs, as well as two-channel linear PCM audio capabilities. It features SMPTE Timecode I/O, built-in GPS function, and an upgrade option for 60i/50i switchable. Utilizing the revolutionary AVCHD format, the HXR-NX5U offers long recording time with dual memory slots - on affordable memory cards. In addition to facilitating a totally IT-based workflow, simultaneous hybrid recording is available in HD/SD formats, using the optional HXR-FMU128 flash memory unit.

- Records Full HD 1920 x 1080 video as well as 720/60p, 60i, 30p and 24p. Offers a choice of bit rates (24/17/9 or 5 Mbps), as well as selectable audio recording – Dolby Digital stereo or LPCM (Linear PCM) stereo which provides uncompressed audio quality.
- Three 1/3" Exmor™ CMOS Sensors improve the color reproduction of video recordings and capture sharp, detailed images even in low-light environments with sensitivity of 1.5 lux.
- 20x zoom "G Lens" zoom 29.5-590mm focal length (35mm equivalent). Two ED glass elements reduce chromatic aberrations.
- Active SteadyShot offers additional stabilization by increasing the optical lens coverage area and by improving detection with state-of-the-art compensation.
- 3.2" (16:9) Xtra Fine LCD with 921,000 dots and 0.45" Xtra Fine electronic viewfinder with 1,227,000 pixels for high-resolution and high-contrast images with remarkable color reproduction.
- Manual zoom, focus and iris for even more flexibility. Offers the same operability as interchangeable lenses.

- Has three built-in neutral density filters, plus manual settings for iris, gain, white balance, shutter speed and focus for increased creativity and control.
 - Equipped with two memory slots for recording to Memory Stick PRO Duo media and SD/SDHC cards, with the HXR-NX5U automatically cycling between the two of them. Using two 32GB memory cards, six hours of continuous HD footage can be recorded.
 - Built-in GPS locator allows satellite data to be recorded directly onto footage for reference. Bundled Content Management Utility software lets you create mapping data and to extract GPS data from video files in latitude/longitude NMEA format.
 - Hardware switch for headphone monitoring lets users change the output to CH-1 or CH-2, or mix both channels together.
 - Outputs HD-SDI, HDMI, component with AV/R, USB and RCA composite and audio. A remote terminal and a TC Link allows two camcorders to be synchronized when they are connected.
- SOHXRNX5U **Call or Log-on**

VCT-PG11RMB 2-Stage Tripod

Features the RM-1BP remote LANC controller on the pan arm for fingertip control of zoom, focus and recording functions, and a 75mm leveling ball-mount for rapid setups. The dual-tubed upper stage provides superior torsional resistance, and the mid-level spreader provides greatly increased vertical strength.

SOVCTPG11RMB **1099.95**

HVL-LBP Battery-Powered LED Light

Ideal for wide-angle shooting, the HVL-LBP features LED reliability and low power consumption, wide uniform light for 16:9 aspect ratios, and operates with daylight-balanced color temperature. Spot or flood lighting with an attached condensing lens. A dimmer dial adjusts the light intensity from 10% to 100%, and an indicator shows the remaining

battery strength even when the light is turned off. Use as a hand-held battery light or on top of a light stand to act as a back-light. Powered by NPF-970 InFoLITHIUM battery for up to 3 hours at maximum brightness. (SOHVLBP)..... **519.95**

VCT-SP1BP Camcorder Support

Weight support for stable/comfortable shooting. Support several shooting styles (eg. high-angle shooting). Quick release function from harness for excellent mobility.

SOVCTSP1BP **714.95**

VCT-SP2BP Camcorder Support

Offers simple but efficient stabilization capable of a variety of shooting styles. Three point support includes shoulder, chest, and operator's hands. Quick release from tripod including tripods which require VCT-U14. Fast and easy transformation from tripod mode to support mode.

SOVCTSP2BP **479.95**

HXR-FMU128 128GB Flash Memory Unit

Designed exclusively for the HXR-NX5U, the optional HXR-FMU128 is a 128GB flash memory unit that enables hybrid recording of video footage. Other capabilities include simultaneous recording of HD and HD video footage, and even the combination of HD and SD, realizing an instant backup in the desired format. The 128GB storage capacity provides continuous recording for up to 11 hours at the highest bit-rate—making it the ideal option for recording music festivals, seminars, and weddings, and for making documentaries, all of which require extended recording times. SOHXRFMU128 **Call or Log-on**

SONY HDV

HVR-A1U CMOS Hand-Held HDV Camcorder

An extremely compact and lightweight camcorder, the The HVR-A1U is equipped with a 1/3" CMOS sensor with 2.97-megapixels and an Enhanced Imaging Processor to deliver outstanding picture quality.

In addition to HDV 1080i recording and playback, the HVR-A1U offers DVCAM/DV recording and playback capabilities, and down-conversion capability of its 1080i recordings for a flexible choice of production systems in HDV, DVCAM, or DV format.

It features a Carl Zeiss Vario-Sonnar T* 10x high-definition zoom lens with four types of zoom control, electronic Super SteadyShot stabilization system, and simultaneous operation of 2.7" LCD monitor and B/W or color 0.44" viewfinder with peaking, histogram and zebra pattern functions. It also incorporates convenient and professional features such as two XLR audio inputs with 48v phantom power, time code capability, automatic shooting modes, and still image recording to Memory Stick Duo media. Other advanced features include Tele Macro function, SuperNight Shot, Skin Tone Detail, Black Stretch and Shot Transition function for smooth automatic scene transitions.

SOHVR/A1U **Call or Log-on**

HVR-Z5U 3-CMOS Handheld HDV Camcorder

A compact HDV camcorder designed to enhance creativity and deliver the highest standard of optical and audio quality, the HVR-Z5U incorporates Sony's 3 ClearVid™ CMOS Sensor system with Exmor™ technology to provide excellent low-light sensitivity and Sony's 20x "G Lens" for superb resolution, color, and contrast, for breathtaking images that rival expensive interchangeable lenses.

This sophisticated lens incorporates Sony's unique optical technology and unparalleled quality control. Moreover, it's been optimized to perfectly complement the camcorder's image sensor and image-processing technology, thus expanding shooting possibilities. The 29.5-590mm (35mm equivalent) wide-angle zoom offers a field of view that's ideal for many shooting situations. Zoom, focus, and iris control rings can be controlled using just one hand. Moreover, the built-in digital extender system increases the zoom ratio to approximately 30x while Sony's optical Super SteadyShot system helps you achieve a stable picture.

SOHVR/Z5U **Call or Log-on**

HVR-HD1000U CMOS Shoulder-Mounted HDV Camcorder

Designed for mobility and professional appearance, the HVR-HD1000U features a shoulder-mount design and black matte body similar to that of professional camcorders. Ideal for corporate communications, colleges, wedding and event videography, the camera is equipped with premium design characteristics, and can record high-definition 1080i on a standard mini DV tape.

A 10x Carl Zeiss Vario-Sonnar lens with SteadyShot image stabilization ensures the perfect shot every time. A built-in down-converter creates DV material, perfect for standard DVD productions. Plus, a special still photo mode is ideal for producing DVD cases and making wedding photo albums.

SOHVR/HD1000U **Call or Log-on**

Sony's HDV Format

The HDV tape transport mechanisms are based on the DV helical scan format. Therefore, videotapes used for DV recording can also be used for HD recording, and the recording time is equivalent. HDV1080i and HDV 720p devices are downward compatible with DV from which both HDV tape transports mechanisms were derived.

The HDV 1080i specification does not follow the DV tape footprint as HDV 720p does. In order to accommodate a higher bit-rate, the HDV 1080i specification adopted a unique track and sector structure that maximizes the length of the track for MPEG-2 payload recording. The video payload bit-rate is 25.4Mbps, which is 28% higher than what is possible by strictly adhering to the DV track and sector structure.

Content originated by HDV 1080i products is routinely used as "contribution" for high end productions, inter-cut with other high definition formats and eventually aired on network broadcasts. The HDV 1080i specification compresses HD video at 25 Mbps (same as DV). The 25Mbps data stream consumes only 2GB for every ten minutes of recording.

HDV 1080i has a very high vertical resolution of 1080 lines. It is possible to deliver 1.85:1 or 2.35:1 film formats with excellent visual quality. The high spatial and temporal resolution of HDV 1080i produces very detailed 35mm film out.

Blu-ray Disc recorders can be connected directly to compatible HDV devices via their i.Link® ports for an efficient and cost effective distribution of high quality prerecorded HD content. One single layer Blu-ray Disc media provides 115 minutes of native HDV 1080i recording. It is not necessary to resort to high compression schemes or to use expensive, time-consuming multi-pass encoders for long form program distribution.

HVR-Z5U • HVR-Z7U • HVR-S270U All Feature

- They incorporate three Sony ClearVid™ 1/3" CMOS sensor chips for high sensitivity, deep resolution, low noise and a wider dynamic range. The sensors capture full HD 1920 x 1080 resolution, resulting in better picture quality when recorded onto mini DV tape in the HDV format (1440 x 1080).
- The 3 ClearVid CMOS Sensor system is enhanced by Exmor technology providing superb performance in low-light environments with sensitivity of 1.5 lux.
- They can switch between HDV 1080i, DVCAM, and standard DV recording for supreme flexibility. Native editing in the HDV format is supported by most popular NLE (nonlinear editing) software.
- They can convert material from 1080i down to 480i and output the video signals through their i.LINK interface and other SD output connectors.
- HDV can also be recorded as a memory file on inexpensive CompactFlash cards using the supplied (optional with the HVR-Z5U) HVR-MRC1K Memory Recording Unit, allowing a streamlined nonlinear editing workflow to be achieved. The cameras have a special shoe connector for direct attachment of the HVR-MRC1K without having to use a cable. The recording unit automatically synchronizes with the cameras, and various recording options (are available when using it in HYBRID operation. Store over two hours of HDV, DVCAM or DV on a 32GB CompactFlash card.
- They feature 24p/30p HDV native progressive recording and 24p/30p progressive scan mode
- They are equipped with Sony's 3.2" XtraFine LCD (921,000 pixels) and 0.45" XtraFine EVF (1.2 million pixels) for high-resolution and high-contrast images with remarkable color reproduction.
- They have three built-in ND filters to help reduce light intensity under bright shooting conditions.
- The HVR-Z5U and HVR-Z7U have HDMI output, the HVR-S270U has an HD/SD-SDI output connector.
- A host of functions enhance operational versatility. These include -6 and -3dB gain settings, Smooth Gain function, advanced histogram, picture profile with up to 6 picture-quality settings, Color Correction and Skin Detail functions, White Balance Shift function and Smooth Slow Rec function which enables smooth slow-motion playback by capturing images 4x faster than normal.

HVR-Z7U • HVR-S270U

3-CMOS Handheld and Shoulder-Mount Interchangeable Lens HDV Camcorders

Ideal for documentaries, electronic newsgathering, independent production, music videos, web streaming, and more, the handheld HVR-Z7U and shoulder-mounted HVR-S270U step up from the HVR-Z5U with a 1/3" bayonet interchangeable lens system. This allows the use of a wide range of lenses from Canon and Fujinon.

Both come standard with a 12x high-quality, multi-purpose Carl Zeiss lens for HD video, with a Vario-Sonnar T* coating to reduce reflections. A specially designed 8x wide-angle lens is also available as an option. These lenses give them the same functionality as Sony's professional fixed-lens camcorders with built-in features such as auto-focus, optical stabilizer, and automatic back-focus adjustment. Using a special adaptor, users can also attach Sony's Alpha series (digital still camera) lenses.

The HVR-Z7U uses InfoLithium batteries and has an HDMI output. The HVR-S270U also supports standard-size cassettes for extended recording times (up to 4.5 hours), has four-channel audio input and has an HD/SD-SDI output connector.

SONY HDR-FX1000 3-CMOS HDV Camcorder

With its 24p progressive scan mode, the HDR-FX1000's high-quality film-like motion lets you realize brilliant, broadcast-quality HD imagery. CinemaTone Gamma and CinemaTone Color give your footage an even more film-like feel. Three 1/3" ClearVid CMOS image sensors with Exmor technology capture sharp, detailed images even in low light (to 1.5 lux). The 29.5mm G-Lens with 20x optical zoom allows for wider-angle shooting, while three built-in neutral density filters and three manual rings provide even greater flexibility.

HDV

- 3.2" Xtra Fine LCD display (921k pixels)
 - Smooth slow record (6 seconds)
 - 6 picture profiles
 - 2:3 pull-down to 60i for editing on most HDV software
 - Manual gain/shutter/white balance
- SOHDRFX1000.....**Call or Log-on**

SONY GV-HD700

HDV Portable Video Walkman

A portable player/recorder well suited for ENG and EFP work, the GV-HD700 offers the ability to record SD resolution and playback HDV resolution, view content on its built-in 7" TFT 16:9 LCD screen, or output 1080i/720p signals to an HD display through the HDMI output. Features include x.v.Color Technology, crystal clear still/slow-motion playback, MiniDV SP/LP record/playback, IEEE-1394 (DV) interface, component output, and 12-Bit/16-bit PCM digital audio recording.

- 7" color LCD screen with Active Matrix technology provides clear, accurate colors for on-the-spot playback of recordings.
 - Built in assemble editor lets you mark cut-in and cut-out points for up to 20 separate scenes.
 - Edit images by zooming in up to 2x and cropping (up, down, left, right).
 - Capture digital still images from tape, analog or i.LINK input, directly onto Memory Stick Duo media
 - Analog in/out lets you preserve your analog library by copying it onto a digital format.
- SOGVHD700.....**1049.95**

SONY HDR-FX7

3-CMOS HDV Camcorder

Shoot like a pro with the HDR-FX7 high definition Handycam camcorder. Capture amazing video and still images in high definition with the HDV 1080i 3CMOS sensor, while a Carl Zeiss 20x optical zoom Lens maintains image clarity. Record still images at the same time that you're shooting video. So no matter what the occasion, the HDR-FX7 is the perfect camcorder for the situation.

HDV

- Carl Zeiss 20x HD lens plus a 1.5x digital extender available throughout the entire zoom range
 - 3.5" wide (16:9) Hybrid Clear Photo LCD Plus display
 - Smooth slow record
 - Manual zoom and focus rings
 - Super SteadyShot Optical Stabilization System
 - Picture Profile lets you make adjustments for a scene (color, sharpness, white balance, etc.) into any one of six presets
 - Simultaneously record HD video and 1.2-megapixel still images directly to Memory Stick Duo Media
- SOHDRFX7.....**Call or Log-on**

SONY HDR-V1U

3-CMOS Professional HDV Camcorder

Equipped with a 3-chip ClearVid CMOS sensor combined with Sony's Enhanced Imaging Processor (EIP) technology for higher sensitivity and higher resolution, the HVR-V1U natively captures progressive images at 24p, 30p or 60p, while maintaining full 1080i HDV resolution. It features a Carl Zeiss 10x Vario-Sonnar T* Lens with extra-low dispersion glass, huge 3.5" Clear Photo LCD screen, XLR audio input, time code capability, various automatic shooting modes, and still picture recording. In addition to HDV/1080i, it offers DVCAM/DV recording and playback as well. Down-conversion of 1080i recordings is also provided for a flexible choice of production systems in HDV, DVCAM, or DV format. For added flexibility and versatility, the HVR-V1U enables simultaneous or "hybrid" recording to tape with the optional HVR-DR60 hard-disk recording unit.

SONY HVR-M15AU • HVR-M25AU • HVR-M35AU

HDV Videocassette Recorders

These HDV videocassette decks both offer HDV 1080i, DVCAM, and DV SP recording and playback capability on mini-size DV as well as standard-size cassettes, for easy migration from standard- to high-definition production. They can convert material from 1080i down to 480i and 576i, and output these video signals via its i.LINK, analog component, composite or S-Video connectors.

HVR-M35AU

HVR-M15AU

HVR-M25AU

They can output three types of color bars via i.LINK, HDMI, analog component, S-Video, and composite connectors, as well as a 1kHz audio tone signal via the i.LINK, HDMI, and analog audio connectors.

They copy external timecode through the "HDV/DV in TC" feature and connectivity options include—i.LINK (IEEE-1394), component output, S-Video, composite, and analog audio I/Os. Auto repeat function enables them to automatically rewind the tape to either the beginning of the tape, the first complete blank portion, or an index point on the tape, and start playback again from there. Built-in tape cleaner with high-grade sapphire blade helps prevent signal dropouts and improve the reliability of recording and playback.

- The HVR-M15AU is compact and unobtrusive. Can be placed horizontally or vertically to conform to existing work environments.
- The HVR-M25AU deck adds a 2.7" wide 16:9 ClearPhoto LCD and an HDMI output. DUPLICATE PLUS function makes it easy to copy video and audio from an i.LINK compatible VCR or camcorder. When down-converting signals, the Edge Crop Adjust function is provided to adjust the edge crop position. By displaying the edge crop marker on the LCD monitor, operators can conveniently check the edge crop position before outputting down-converted signals. All Scan Mode—similar to the Underscan mode of ordinary monitors—displays all effective scanning lines in the LCD monitor when 1080i mode is selected. This is useful if you want to check pictures for web applications, for example.
- The HVR-M35AU adds support for "native progressive" recording modes, down-conversion playback, and has HD/SD-SDI output with embedded audio and timecode data, allowing straight duplication to a similarly equipped deck. It can also play back the 4-channel audio data in HDV 1080i format recorded by the HVR-S270U as well as the four-channel audio data in DVCAM format.

SONY HVR-1500A

Digital HD Video Cassette Recorder

The HVR-1500A is an HDV/DVCAM/DV player and recorder. It offers many must-have professional features such as quick mechanical response, multi-format DV playback, and a robust set of video and audio interfaces ranging from analog to digital SDI and AES/EBU. Additionally, it offers HD-SDI input/output, allowing it to be used as an HD recording deck for cameras with HD-SDI outputs. The HVR-1500A can also be used as a standard definition DVCAM recorder. Designed as a bridge between HDV and HDCAM format, as well as between HDV and XDCAM HD format, use it for dubbing from HDCAM decks for off-line production, such as viewing or distributing content on lower-cost HD media, or for baseband, real-time writing back from an HD non-linear editing system.

- Records in 60i, 50i, HDV 1080i, DVCAM, and DV (SP mode) formats, with DVCPRO 25 playback
- Inputs include SD-SDI, AES/EBU and 6-pin i.Link (HDV).
- Analog video is selectable from HD/SD component, SD composite, S-video, and analog XLR (x2)
- Optional HVBK-1505 Analog Input Board enables analog SD component, composite or S-video, and balanced audio via XLR connectors.
- Optional HVBK-1520 enhances the unit by giving it both up-conversion and cross-conversion capabilities; up-convert DV to either 1080i or 720 or cross-convert 1080i HDV footage to 720p.

SONY XDCAM EX

PMW-EX1R 3CMOS XDCAM EX Pro HD Camcorder

A successor to the award-winning PMW-EX1, the PMW-EX1R adds DVCAM recording, cache recording, picture inversion and a host of additional refinements such as HDMI output, a higher-resolution viewfinder and one-push auto iris. It also features a range of ergonomic enhancements, including an improved hand grip for better balance, smooth handle zoom start/stop, one-click S&Q (Slow & Quick) mode and easy-to-access switches. Incorporating all the benefits of the XDCAM HD optical disc-based recording system – tapeless workflow, selectable bit rates and outstanding picture performance, the PMW-EX1R redefines the standard for a compact professional camcorder. It features three 1/2" Exmor CMOS sensors – each with an effective pixel count of 1920 x 1080, to produce images in full HD resolution. Combining the moderate bit rate of MPEG-2 Long GOP compression with the SxS PRO memory card, the PMW-EX1R offers cost-effective long form recording coupled with non-linear capabilities such as random access and high speed file-based operation. The PMW-EX1R supports multiple frame rate recording such as 59.94i, 50i, and native 23.98P and 25P as well as being 1080i/720P switchable. Equipped with two SxS PRO memory card slots, it can record over four hours of HD footage using two 32GB SxS PRO memory cards. (SOPMWE1R)**Call or Log-on**

PMW-EX3

3CMOS XDCAM EX Pro HD Camcorder with Interchangeable Lenses

Utilizing the same electronics as the PMW-EX1R, the EX3 features an interchangeable 1/2" lens mount, removable viewfinder, and an easy-to-hold body that includes a retractable shoulder pad. It incorporates three 1/2" type "Exmor" Full HD CMOS Sensors, each with 1920 x 1080 effective pixels to deliver stunning-quality HD images in 1080P, 720P and 1080i HD resolutions. Frame rate is selectable from interlace and progressive, such as 59.94i, 50i, 59.94P, 50P, 29.97P, 25P and native 23.98P recording. For creative shooting, it features "Slow & Quick Motion" (over- and-under-cranking), selectable gamma curves, slow-shutter, interval recording and Picture Profile feature. Filmmakers and wildlife/event videographers requiring variable lenses can take advantage of the outside dials for peaking, brightness and contrast, a push-button frame rate dial, and zebra switches for easier viewfinder calibration. Additionally, the PMW-EX3 features genlock and timecode in/out for multi-camera operation. For studio configuration, the RM-B150 or RM-B750 remote controllers adjust camera parameters such as gain, iris, white balance, pedestal, and gamma via the the 8-pin remote connector on the camcorder. (SOPMWE3)**Call or Log-on**

PMW-320 • PMW-350

XDCAM EX Shoulder-Mount Camcorders

Featuring three 1/2" (PMW-320) or three 2/3" (PMW-350) Full-HD CMOS sensors, multiple-format recording, 4-channel audio and solid state SxS workflow, these camcorders set the standard for affordable, high-end videography. They provide an excellent sensitivity (F12 for the PMW-350 and F10 for the PMW-320), remarkable S/N ratio (59dB for the PMW-350 and 54dB for the PMW-320) and high resolution of 1000 TV lines. Whether in HQ 35Mbps HD setting or optional 25Mbps DVCAM recording mode, images are captured quietly and efficiently to SxS PRO or lower-cost SxS-1 memory cards — storing over 4½ hours of MPEG-2 HD video on two 32GB cards. Advanced features include scene file settings, adjustable gamma, and Matrix settings that can be stored on memory cards. They are also studio-configurable, with timecode in/out, genlock in, HD/SD SDI and HDMI out. Compact and well-balanced, they weigh just over 7 lbs., providing a high level of mobility and comfort in many shooting situations. In addition, a low center of gravity, ensures outstanding stability on the shoulder. Miserly users of power, means they can run on a single 90WH battery for up to 5 hours.

PHU-120R

120GB Hard Disk Recorder for XDCAM EX Camcorders

Designed for use with XDCAM EX camcorders, the 120GB drive can be formatted in either one 120GB partition or two 60GB partitions, letting you record up to 400 continuous minutes in HQ (35Mbps) mode or 520 minutes in SP (25Mbps) mode. The ability to record uninterrupted is especially useful for event coverage, sports and documentary-style shooting. The PHU-120R doesn't have—or need—transport controls, record time displays or multiple inputs and outputs. The unit simply plugs into a media slot on the host camcorder or deck, where it is recognized as if it were just another memory card. All read, write and file access operations are controlled by the host recorder. The disk drive itself is suspended inside the PHU-120R chassis by four specially engineered dampers that help protect against shock. (SOPHU120R)**746.95**

MEAD-MS01 Memory Stick Adapter

The same shape as SxS memory cards, the MEAD-MS01 allows you to use Memory Stick media with XDCAM EX camcorders. Since there aren't any protrusions the media cover can be closed during shooting. Memory Stick media recorded with MEAD-MS01 works on a PC without any need for drivers. Folders and files of XDCAM EX are shown in the NLE operation window or in Clip Browser in the same way as with SxS media. (SOMEADMS01)**119.95**

MEAD-SD01 Media Adapter

The MEAD-SD01 media adapter allows the use of SDHC memory cards in XDCAM EX equipment such as the PMW-EX1/EX1R, PMW-EX3, PMW-350 and PMW-EX30. The adapter is recommended for emergency use only. (SOMEADMS01)**110.95**

HVR-MRC1 CompactFlash Recording Unit

The HVR-MRC attaches directly to XDCAM EX camcorders and records up to 144 minutes (on a 32GB card) of HDV ready-to-edit footage. The card records the same .M2T files that are created when capturing HDV footage from tape and provides seamless integration with virtually all non-linear editing systems. Footage can be recorded to both tape and CompactFlash simultaneously, instantly archiving footage while still gaining the workflow efficiency of tape-based media. (SOHVRMRC1)**49.95**

PMW-EX30

XDCAM EX Recording Deck

The PMW-EX30 is a versatile and compact recording deck that can be used for many different applications. It allows simple viewing of recorded materials with a monitor, dubbing to other format/media such as HDV, XDCAM HD and HDCAM, and feeding to nonlinear editing systems. In addition, the PMW-EX30 can be used as an affordable full HD recorder for event recordings — it can record HD signal outputs from a switcher. The PMW-EX30 is equipped with a wide array of interfaces including HD-SDI input and output, HDMI output, HD analog component, composite outputs and more. Equipped with two SxS PRO memory card slots, the PMW-EX30 can record up to 140 minutes of HD footage using two 16GB SxS PRO memory cards. The recording time can be further extended up to approximately 260 minutes when an optional PHU-60K Professional Hard Disk Unit is attached to the deck.

- Highly compact design - can be placed either horizontally or vertically
- MPEG HD recording /playback at 35 and 25 Mb/s
- Equipped with two SxS PRO memory card slots
- Built-in 3.5" LCD monitor
- Adjustable audio input volume (CH1 and CH2)
- HD-SDI input/output, i.LINK (HDV) input/output and component output
- Down-converted SD outputs for migration to SD environments – SD-SDI, i.LINK (DVCAM), component, S-Video and composite
- HDMI output for connection to HDTV displays

(SOPMWE30)**Call or Log-on**

XDCAM HD Versatile, Disc-based Recording System

Sony's XDCAM HD system is suitable for all types of users – including cinematographers, broadcasters, and video professionals – and complements the other products in the Sony range such as the HDCAM Series for high-end video production and the affordable, entry-level HDV Series. One of the major characteristics of the XDCAM HD system is its use of an optical disc as a recording medium. Ideal for broadcasters, production facilities, corporate, government and educational facilities, the tremendous benefits of disc-based operation include instant random access and network capability to name just a few. Sony's XDCAM HD brings these disc-based benefits to HD programming, providing much improved workflows and cost efficiencies as well as offering striking-quality HD images.

#SOPDF335L or #SOPDW355L

SONY PDW-F335L • PDW-F355L

XDCAM HD 1/2" 3CCD Camera with Viewfinder

The PDW-F335L and PDW-F355L are highly versatile and cost-effective HD camcorders. Equipped with three 1/2" HD CCDs they offer HD recording in 1080/59.94i, 50i, 29.97P, 25P, and 23.98P modes – as well as DVCAM-format recording. They incorporate a rich variety of features useful for creative shooting such as interval recording, slow-shutter, and selectable gamma curve. Additionally, the PDW-F355 provides a "Slow & Quick Motion" function, which is also commonly known as "over-cranking" and "under-cranking". They record high-quality uncompressed four-channel audio in HD recording mode. They are also equipped with a range of audio interfaces. They offer highly advanced image control features such as Skin Tone Detail and Dynamic Contrast Control, allowing operators to create stunning images. Picture Cache recording provides up to 12 seconds of loop recording using solid state memory. When in Standby mode and the REC button is pressed, everything that happened up till 12 seconds before that moment can be recorded to disc. Valuable shots, which would otherwise have been missed, are now captured. Disc recording provides users with a number of benefits that are especially useful during shooting. For example, because new footage is always recorded onto an empty area of the disc, there is no need to cue-up to the next recording position before shooting. This means that operators can start shooting without the worry of accidentally recording over existing footage. In short, the XDCAM HD camcorders are ideally suited to a broad array of shooting opportunities such as event shooting, news gathering, field productions, and indie productions.

SONY PDW-700 2/3" XDCAM HD422 Camcorder

The PDW-700 offers striking-quality HD recording at a rate of up to 50MB/s (on 50GB Dual Layer discs) using the MPEG-2 4:2:2P@HL compression, "MPEG HD422. It also provides multi-format recording capability including 1080i, 720p and SD, which comes with HD/SD conversion and cross conversion between 1080i and 720p. The PDW-700 is equipped with three 2/3" CCDs – a "Power HAD FX" progressive CCD with 1920 x 1080 effective pixels. Stunning-quality HD images are captured by this high-resolution CCD in conjunction with the 14-bit A/D converter, 4:2:2 sampling and recording, and advanced digital signal processing. It features two HD/SD-SDI outputs and a composite/HD-Y output, as well as a pool-feed input (HD/SD-SDI and composite) input options. The camera's ruggedness and durability have been enhanced with dust and water resistant mechanisms, as well as features to cool the camera and reduce fan noise. The camcorder maintains XDCAM's file-based architecture and use of proxy video and metadata. It also features a digital extender, picture cache, interval recording, slow shutter, focus magnification, clean switching between the "live and playback" function, and a large 3.5" LCD screen. The PDW-700 has a Live & Play function that can simultaneously output both playback signals (images already recorded) and incoming camera signals (images seen through the viewfinder). Both signals are fed to their respective output and viewfinder connectors independently, and can be viewed at the same time. This allows users to frame the next shot, adjust the exposure, and even focus the lens while the camcorder is playing back recordings from the disc. With fast file-based operations and superb picture quality, the PDW-700 is an invaluable tool for news gathering, TV, documentaries, and entertainment programming where a high-quality look is everything.

#SOPDW700

SONY PDW-F800 2/3" XDCAM HD422 Camcorder

The PDW-F800 CineAlta® camcorder offers a frame rate of 23.98P natively in 1080 mode and multi-format recording flexibility as standard – including standard-definition recording to support legacy formats (MPEG IMX®, DVCAM™ and 4:2:0 HD content). It also provides multi-format (1080i/720P) recording, as well as HD/SD conversion and cross-conversion during playback between 1080i and 720P. Record HD content (95 minutes at 50 Mbps) to the dual-layer PFD50DLA 50GB optical disc. The PDW-F800 adds variable frame rate recording for slow and quick motion capabilities, also known as "over-cranking" and "under-cranking." The camcorder uses three of Sony's new 2/3-inch Power HAD™ FX progressive CCDs that can produce a resolution of 1920 x 1080, delivering high quality, four-channel 24-bit audio recording. An image inverter feature enables the camera to be used with cinema lens adaptors, and a variety of gamma settings includes HyperGamma and user-selectable gamma curves. A focus assist bar-graph display is visible on the camera's viewfinder, and users can record proxy data to USB removable media to make transferring data easier and faster, especially in the field or on location between the camera and a PC or editing system.

Also features auto tracing white balance hold, output markers such as safety, aspect, and center on the HD-SDI output, slow shutter, interval recording, picture cache recording (up to 30 seconds), disc exchange cache and "shock-less" gain control. Option boards are

available to enable pool-feed operation. The camcorder features a 2x digital extender to enhance zoom capabilities, enabling images to be doubled in size without any loss of image sensitivity. It also has slow shutter, 2x focus magnification, clean switching between the "live and playback" function, and a large, easy-to-view 3.5" color LCD screen. (SOPDF800)

PDW-1500 XDCAM Compact Deck

A half-rack XDCAM recorder for Sony's line of non-linear optical cameras. Features include high speed file transfer, Metadata recording and multiple format capability. Thumbnail search operation means no more winding through endless amount of recorded tape; each shot is right at your fingertips.

PDW-HD1500

DCAM HD Compact Deck

The Sony PDW-HD1500 is a half rack XDCAM HD recorder for Sony's line of optical disc-based cameras, including the PDW-700. Built upon blue laser technology, the XDCAM HD line of products takes advantage of non-linear workflow, while keeping the same tape-based archiving infrastructure that professionals are accustomed to.

SOPDWH1500.....**Call or Log-on**

**Compact Prime CP.2 Lenses**

Compact Prime CP.2 lenses are the latest members of the Zeiss family of lenses for digital and film cameras. This second generation delivers even greater flexibility by offering interchangeable mounts that allow the lenses to be used with a wide range of

cameras from traditional cine to HDSLR systems. They also offer a wide choice of lenses – from wide-angle to tele (18 to 100mm, including a 50 mm macro lens). With precision and speed – Compact Prime CP.2 lenses are the perfect tool for Independent filmmakers, professional still photographers expanding their services or large studios using HDSLR equipment as a second camera unit for TV and film productions.

- Compact Prime CP.2 lenses offer professional quality on a budget and have been designed for both film cameras and the next generation of digital motion picture cameras. Covering the Super 35 as well as the full-frame still format, makes these lenses a safe investment for the future.
- Allows a mix of HDSLR systems with traditional cine cameras, for maximum flexibility on set
- No need for adapter solutions anymore
- Three different mounts available (PL, EF and F mount)
- Changing the lenses is fast and easy and offers great flexibility, regardless of the camera equipment used.
- Cover a full-frame image format without vignetting. Combined with the interchangeable mount, the Compact Prime CP.2 offers the possibility to upgrade to any number of existing or future cine and still cameras while still utilizing the same set of lenses.
 - Full-frame coverage (24 x 36mm) for focal lengths 21-100mm
 - Common aperture of T2.1 for the standard lens set
 - Sweet spot effect with APS-C sensors
- The iris opening is created by 14 high precision blades. It stays consistently round and symmetrical over the entire T-stop range. This translates into natural and pleasing out-of-focus highlights and a smooth bokeh. Together they help create and capture special moments on film.
- The modern lens design as well as the cine manufacturing process and tight tolerances ensure low distortion, high resolution and excellent color rendition for sharp, punchy images.
- Improved functionality of Compact Prime CP.2 lenses means better ergonomics compared to standard SLR lenses:
 - Standard housing dimensions
 - Standard focus and iris gear positions
 - Consistent front diameter
 - Robust construction
 - Longer focus rotation and a manual focus
 - Stable exposure due to manual operated aperture

SRW-9000 2/3-inch HDCAM-SR Camcorder

The SRW-9000 is a one-piece, modular 24P camcorder platform that redefines "future proof." Designed as a next-generation younger sibling to Sony's renowned CineAlta F35 digital cinema camera, the SRW-9000 manages to introduce new technology while trimming costs and adding unprecedented levels of flexibility. The world's first shoulder-mounted HDCAM-SR camera, the SRW-9000 uses the F23's chipset and the lossless capture afforded by the MPEG4-SSIP (Simple Studio Profile) recording format, to create professional-grade 1080p images with customizable gammas and up to 12 stops of dynamic range for true film-like images. This makes the SRW-9000 the perfect tool for features, commercials, documentaries or music videos – either as a low-budget 'A' camera or as a 'B' or Steadicam camera on larger productions.

But the SRW-9000 isn't just a camera, it's a system. Sony's first truly open-platform product, it can be tailored to the specific needs of each production. As with previous CineAlta camcorders, its B4 lens mount allows for the full range of professional 2/3" HD lenses. But the SRW-9000 goes even further. Need to shoot in 4:4:4 color? Or with incremental, variable frame rates? Optional processing boards let you go there.

Even more revolutionary, the SRW-9000 can switch out its 2/3" sensor for a 35mm sensor and 35mm PL mount – allowing the highest image quality possible. Add the 1TB SR Memory Pack, and the camera will be able to switch from standard HDCAM-SR tape recording to solid state capture. Offering an unprecedented 5Gbps data rate and Raid-5 security, the Memory Pack allows shooting in 3D, 4K, and 8 different HD streams, at the same time improving post-production workflow by recording color information in the video stream's metadata to provide a built-in color management system.

- Providing improved operational flexibility and cost benefits, the SRW-9000 is the perfect choice for anyone in the broadcasting industry seeking HDCAM-SR picture quality and a high level of creative freedom. Used for stunning visual productions in digital cinema, commercial programs, TV dramas, and documentaries.
- In standard confuration, the SRW-9000 is capable of top-quality 4:2:2 Y/Cb/Cr 10-bit recording at 1080/23.98p, 24p, 25p and 29.97p, and at 1080/50i and 59.94i. In addition, the SRW-9000 can record 1080/50p and 59.94p signals, and 4:2:2 720/50p and 59.94p* signals, making it ideal for DTV programming and transmission applications. For users who require further creative performance, a variety of option cards can be added, allowing the benefits of full-bandwidth 1080 RGB 4:4:4 capturing, SR Motion™ variable frame rate capturing and recording, S-Log Gamma, and additional signal inputs and outputs.

- Sony's BP-GL Series of on-board batteries can be attached to further extend shooting times.
- State-of-the-art 2/3" sensor can be upgraded with the same Super 35mm sensor used in Sony's F35, while the internal HDCAM SR tape deck can be swapped out for a revolutionary solid state unit.
- Accepts three types of viewfinder, including the HDVF-20A/200, HDVF-C35W, and HDVF-C30WR. The HDVF-C30WR offers improved focus assist functions, a color brightness level indicator, and numerous other beneficial features. Moreover, with pre-installed viewing LUTs for S-Log Gamma, this viewfinder provides users with easier focus adjustment and a more intuitive photo-shooting operation.
- Versatile gamma settings include the unique S-LOG Gamma (HKSR-9003), HyperGamma, and customizable gamma curve (standard).
- With Picture Cache Re-recording capability, everything captured up three seconds before the REC button is pressed is recorded to HDCAM SR tape when the camcorder is in stand-by mode.

HDW-S280

HDCAM Half-Rack Field Recorder

The HDCAM recorder is ideal for field and mobile playback. The CineAlta brand has become synonymous with high quality film and TV digital acquisition.

- Features a small, lightweight frame
- Betacam SX/SP tape playback
- Built-in down-conversion and up-conversion
- Front panel LCD • HD-SDI in/out
- Runs on AC, DC 12V, and battery power
- Records at 24P, interlaced or progressive, 1080/59.94i, 50i, 23.98PsF, 24PsF, 25PsF and 29.97PsF
- Dimensions: 8.375 x 5.25 x 16.75"
- Weighs 13.3 lb

HDWM2000/20 Series

HDCAM Video Cassette Recorder/Player with Legacy Playback

The HDW-2000 Series bridges the gap between HD and SD. These powerful workhorse solutions offer full HDCAM record and editing abilities, and legacy playback of BETACAM/BETACAM SP, Digital BETACAM, BETACAM SX, and MPEG IMX 1/2-inch tape recordings.

- Can record HDCAM at variable frame rates
- Built-in down-conversion
- Down-convert 1080 HD signals on the fly
- Frame accurate recording without preroll
- They measure 16.8 x 9.3 x 20.5" (WxHxD) and weighs 50 lbs. each

HDW-1800 / HDWD-1800

HDCAM Studio Editing Recorder

The CineAlta HDCAM studio editing recorder features a wide variety of advanced options, making the adoption of and integration of professional-grade high definition acquisition a more seamless transition than ever before.

- Record and playback HDCAM 1080/59.94i, 50i, 25PsF, 29.97PsF, 23.98PsF, and 24PsF formats
- Built-in down-converter enables output at 480/59.94i or 576/50i • Color LCD monitor
- HDW-D1800 adds SD to HD playback/mastering for Digi Betacam and MPEG IMX

SRW-5100/2 • SRW-5800/2

HDCAM SR Studio Player and HDCAM SR Studio Recorder

The SRW-5100/2 and SRW-5800/2 support 2K recording and playback at both 2048 x 1080 and 2048 x 1556 modes, MXF file transfer of the SStP codec and the "SR-Lite" 220 Mbps data rate, and 96KHz audio. They also support double speed record and playback, as well as 3D content record and playback of 4:2:2 & 4:4:4 RGB.

The SRW-5100/2 is a top-quality player for viewing, screening, dubbing, and ingestion. It plays HDCAM-SR recordings in 1080 50/60i, 1080 24/25/30PsF and 720 50/60P. Format conversions such as 1080i from/to 720P and 2-3 pull down are available with the optional HKSR-5001. Plays 880Mbps mode, such as 4:4:4 HQ, 1080 50/60P and dual stream materials (3D) with optional HKSR-5103 board. HDCAM and Digital Betacam tapes can be played back with optional HKSR-5802 board. Create HDV editorial copy of HDCAM-SR and HDCAM format materials with the optional HKSR-5105 board.

The SRW-5800/2 records 1920 x 1080 10-bit HD signals using MPEG-4 Studio Profile with virtually loss-less compression. 12 channels of 24-bit discrete uncompressed audio can also be recorded.

SRW-5000/2 • SRW-5500/2 HDCAM SR VTR's

The SRW-5000/2 and SRW-5500/2 are designed to be used in conjunction with Sony's top-quality CineAlta line of cameras, to deliver the pinnacle in HD acquisition. Providing the highest quality solutions for the most demanding cinematographers, the HDCAM SR format records full bandwidth video at nearly 3.5x the data-rate of HDCAM, providing the highest quality image available. This virtually loss-less image acquisition represents video comparable to that of film. Otherwise the same, the SRW-5000/2 is exclusive for HDCAM-SR recording, while the SRW-5500/2 adds HDCAM recording as well.

They can record in the 4:2:2 format and be combined with current HDC series studio cameras to form a system that is ideal for high-end studio/OB production applications. Or they can be combined with the HDC-F950, to form a full-bandwidth 4:4:4 (RGB) image capturing-system. They support multi-frame-rate recording on the HDCAM SR format, and feature integrated up-conversion, down-conversion, 2-3 pull-down, and legacy playback of HDCAM and Digital Betacam tapes. For digital content mastering applications and for future content delivery methods, they come with 12 channels of digital sound.

HLM-920WP • HLM-1510R • HLM-1750W • HLM-2450W

The HLM-920WP (9") and HLM-1510R (15") are LCD monitors designed to save space and consume low amounts of power. This makes them ideal for OB vans and outside broadcasting. Features include an on-panel protective overlay, HD-SDI, tally, as well as both VESA and rack mounting compatibility. They also offer built-in 3 remote types, 10 color-temperature memory presets, waveform monitoring, marker, and a test signal generator. For audio they have full XLR analog audio input capability and built-in speaker for easy sound monitoring. Additionally the HLM-920WP is equipped with an Anton Bauer Gold battery mount and has the ability to convert to a V-mount system, making it ideal for field work. Otherwise the same, the HLM-1750W (17-inch) and HLM-2450W (24-inch) are designed specifically for professional editing workstations and broadcast studios.

JVC DTV-17G1Z • DTV-24G1Z

17- and 24-inch Verité 3G HD-SDI/SDI Studio Monitors

The 17-inch DT-V17G1Z and 24-inch DT-V24G1Z set the standard for picture quality. They are 3G/Dual-Link ready for monitoring of 60 frames/3GB per second uncompressed 1080p digital video input signals. They feature 10-Bit 4:4:4 video processing for superior image gradation and have built-in high quality vectorscope and ultra high resolution waveform monitor with adjustable over-level indicator function. There is a 12-channel embedded audio metering display with peak hold viewable above or below active picture area. They also offer computer automated calibration capability of black and white levels, color temperature and gamma for mission-critical monitor matching.

Connections include:

- HD/SD SDI (x2 In, x1 switched out), component/RGB and composite video input/output
- DVI-D (HDCP Video and PC) Input • Audio inputs with built-in speakers
- ASCII Code Input for Source ID
- RS-232C, RS-485 (RJ-45 In and Out) and Make/Trigger (RJ-45 In) external control connections

Panasonic BT-LH1710 • BT-LH1760 • BT-LH2550

Widescreen HD/SD LCD Video Monitors

The versatile AC/DC powered BT-LH1710 provides production-tough, HD broadcast-quality performance for a wide range of applications—in the studio or in the field. 10-bit image processing engine has a 3D look-up table (LUT) that calibrates it to reproduce accurate images according to the specific color standard selected. It features built-in waveform monitor and vectorscope, embedded audio support, pixel-to-pixel display, cross hatch overlay, audio level meters, time code and closed caption displays. Equipped with two HD-SDI/SDI auto-switching inputs with a switched output, and a DVI-D input for connection to digital devices with a DVI-D output. Otherwise the same, the BT-LH1760 has a 120Hz double-speed drive, twice that of the BT-LH1710 to handle fast motion content exceptionally well and reduce image blur to a level never before seen in a professional LCD display. With full 1920 x 1200 HD resolution, the 25.5" BT-LH2550 LCD production monitor delivers stunning picture quality and greatly expands the range of colors you can view on screen. Designed for applications that require the highest resolution and color performance, it surpasses the ITU-R BT.709 standard (130%), enabling it to display a greater range of colors than conventional LCD and CRT displays.

SONY LMD-1530

15-inch WXGA HD Monitor with HDMI

Ideal for HDV monitoring, the LMD-1530W incorporates a 15:9 aspect ratio and WXGA (1280 x 768) LCD panel. It offers HD input via HDMI and analog component interface. It also offers a full range of analog SD inputs including composite (NTSC/PAL), S-Video and component and RGB. SD-SDI input can be achieved with the optional BKM-320D adapter. It can display various area markers, including a center marker and aspect markers with selectable brightness. It also offers selectable color temperatures and gamma modes and 3-color tally lamp. SOLMD1530W.....**Call or Log-on**

SONY High-Grade LUMA SERIES

17-, 20- and 24-inch Professional HD Monitors

Designed for broadcast and multimedia applications where performance and reliability are critical, Sony's high-grade type LUMA monitors incorporate the latest DSP engine, ChromaTRU color-matching technology, and high functionality. They accept a variety of signals in both digital and analog, and HD and SD formats. The LMD-2451W also offers 3G SDI input capability.

- Standard interfaces include composite (NTSC/ PAL), S-Video, 525i/625i component and RGB. Optional digital interfaces including HD-SDI and SD-SDI are also available.
- With HD-15 and DVI-D interfaces and built-in high-performance scan converters, they can display PC signals from VGA to WUXGA as well.
- They can display various area markers, including a center marker, aspect markers, and a safety zone marker. The brightness of these markers can be selected from three different levels: white, gray, and dark gray. Black or gray matte can also be used to fill the outer area of the aspect markers.
- Selectable color temperatures (9300K, 6500K, or a user preset value)
- Selectable scan size (5% over scan and 0% scan modes and aspect ratio (16:9 and 4:3)
- Equipped with three-color tally lamp that can be lit via a parallel remote connector.
- They can be controlled remotely via a parallel and serial remote connector.

- #SMF700 Remote interface cable
- #SOBKM37H Controller attachment stand

ELIPZ 10K Battery
Lithium-Ion Under-Camera
Battery System

The ElipZ 10K 75Wh battery is an excellent high-capacity power source for popular 7.2v camcorders—it can provide runtime of as much as 2 to 5 times of the battery provided with the camcorder, it can run a 10W camcorder for more than 7.5 hrs.

Camcorder shown with Elipz Battery and light

Kits include: Battery, camera-adaptor cable and charger

Available for: Canon #ANELIPZCK, Panasonic #ANELIPZPK, Sony #ANELIPZSK or for Sony HVR-Z1U #ANELIPZS1K..... **279.95**
Elip Z Cable for JVC GY-HM100 #ANJ100ADPELP **79.09**

Battery and Power Kits
for Sony PMW-EX3

ANQREXK1 Battery and Power Kit 1 features a Gold Mount, charger and battery to professionally power the Sony camcorder for an extended period of time. Kit Includes: • Dionic 90 Battery • Tandem 70 Charger • QR-EX3 Gold Mount For Sony PMW-EX3 #ANQREX3K1 **1017.95**

ANQREXK2 Battery and Power Kit 2 Kit Includes: • QR-EX3 Gold Mount for Sony PMW-EX3 • Two Dionic 90 Lithium-Ion Batteries • T2 2-Position Charger and 70-watt AC Power #ANQREX3K2 **1764.95**

Coco-EX3 Power Adapter

Specially designed for the Sony PMW-EX3, the COCO-EX3 is a compact and cost-effective method of powering accessories such as a light, on-board LCD monitor, or audio receiver. Designed to draw voltage from high capacity Anton Bauer Gold Mount or V-mount batteries, the Coco-EX3 attaches to the back of the camera in place of the battery. The Anton Bauer Gold Mount or V-mount battery then simply snaps onto Coco's special mounting plate.

- Run a camera light, hard-disk recorder, or an external LCD via a unique Twist D-Tap connector.
- Four Hirose 4-pin connectors to operate wireless audio accessories.
- COCO-EX3 and battery enhances the balance of the camera.

For use with V-mount Battery #BECOCOEX3V **429.95**
For use with Anton Bauer Battery #BECOCOEX3AB **429.99**
For use with BP-U60 Battery #BECOCOEX1 **394.95**

SERIES7 SL-50 Lithium-Ion 7.2V Battery System

The SL-50 battery will power 7.2v camcorders which is a considerable upgrade in runtime of up to 50% longer than batteries offered with the camcorders. Coupled with the Series-7 camera mount adapter, incorporating a 4-stage LED readout with temperature and fuse protection. Requires the Series-7 BC-L1 Quick Charger.

7.2V Lithium-Ion 50W/7000mAh Battery #SESL50 **104.95**

Adapter Plates available for:

LibertyPak

LB400V Power-Belt

The pack features 12VDC 4-Pin XLR power output capable of powering video cameras at 26A, with an output of 320W. The pack features SLIC technology which allows the unit to function in extreme weather conditions. The pack can function up to 2000 cycles, for 6 hours without a recharge. Additionally, the LB400V can be charged by a number of sources, including their own portable solar panel system.

- LB400V Power Belt #LILB400V..... **2099.95**

LP 800 Portable PowerPak

Portable 24VDC power with a peak output of 1100W. The battery is encased in a durable and lightweight case, with an operating temperature rating of -4°F (-20°C), making it extremely useful in extreme climate situations. With a cycle life of over 2000 charges, rest assured that the PowerPak is ready to go the extra mile.

- LP 800 Portable PowerPak #LILP800..... **3493.95**

COOL-LUX™

L-10 SERIES

12V Smart Power Battery Packs

The memory-free Smart Power 12V/120Wh battery belts come complete with heavy-duty 16-gauge wiring, slip-proof connectors, and reliable operating power. They feature five color LED power-indicator lights.

- BC-3074 with 4-pin XLR and cigarette connector #COBC3074..... **269.95**
- BC-3070 with Two 4-pin XLR connectors #COBC3070..... **279.95**

UL-2 Series

On-Camera Pro 12/14V Ultralight-2 Series

The most widely-used ENG compact on-camera light, the UL-2 series incorporates a 25W (BAB) lamp, Power-Tap connector and patented camcorder mount system.

- UL2-6** Light with 6" PowerTap Cable (#ANUL26).....**184.19**

UltraDAYlight

On-Camera HMI Light

Incorporating a built-in ballast in its housing, the UltraDAYlight adds the high efficiency of HMI lighting to any Ultralight system. Provides 5600K light at less than half the power required by tungsten or halogen lamps, all without the need of dichroic adapters. Perfect for daylight fill situations, the UltraDAYlight can be converted to tungsten with the addition of the optional UL-GEL KIT (not included).

- UltraDAYlite** On-Camera HMI Light (#ANUDL).....**888.95**
- UL-GF Gel Frame** Gel or Silk Holder (#ANULGF).....**49.99**
- UL-GELKIT** Includes 40 Pre-Cut Gels (#ANULGK).....**30.59**

ULHM-LED

9W LED Head Module

Add another look to your on-camera lighting by easily swapping out already available HMI and tungsten modules. No need to remove the entire mount—just slip the ULHM-LED into a UtraLight 2 base (not included). Heat-and flicker-free, the module's 0-100% dimmable 5600K light consumes only 1/3 the power of a tungsten lamp. Included filter provides adjustable color temperatures down to 3200K, so you can match light sources. Great for dealing with unpredictable lighting at news events and in documentary settings.

- ULHM-LED** 9W LED Head Module (#ANULHMLD).....**514.95**
- UL2-20BASE** UtraLight 2 Base Mount (#ANUL220B).....**144.50**

EledZ

4.5W On-Camera LED Light

Designed to mount atop today's smaller handheld camcorders, the EledZ produces heat-free, flicker-free illumination while drawing power from the ElipZ 10K battery (optional), which can power both camera and light for up to 5 hours. A dimmer allows you to control the level of light from 0 - 100%, while an included filter lets you change color temperature from 3200K to 5600K. You can also adjust the light's angle of view using the multilateral arm built into the mount.

- EledZ** 4.5W On-Camera LED Light (#ANELEDZ).....**344.95**

LED-25

25-Watt On-Camera LED Light

Compact, daylight-balanced 25-watt LED light allows daylight balanced light without filters or ballasts and doesn't burn out like regular lamps. Includes 2 AA batteries for up to 4 hours of shooting time. Mounts to a standard camcorder shoe mount. With side bracket.

- #BELED25.....**34.95**
- With VB-50 Universal Shoe Mount Adapter (BELED25K1).....**44.95**
- With Pearstone Cold Shoe Adapter for Sony (BELED25K2).....**49.95**
- With Pearstone Cold Shoe Adapter for Canon (BELED25K3).....**49.95**

LED-40 On-Camera 40W LED Light

On-camera, daylight balanced LED light that provides the equivalent of 40W of illumination. Suitable for both video and DSLR cameras, the LED-40 offers a wide beam that reaches over 20 feet and runs on standard alkaline or NiMH AA batteries (housed in an easy-access internal battery compartment). With its universal shoe mount and included side arm bracket, this bright, compact light can also be mounted to one side or on a stand, for off-axis illumination.

- LED-40** 40-Watt LED Light (#BELED40).....**49.95**
- LED-40** Shoe Mount Adapter Kit 1 (#BELED40K1).....**59.95**
- LED-40** Swivel Shoe Adapter Kit 2 (#BELED40K2).....**59.95**

LED-50DA On-Camera 50W LED Light

On-camera, dimmable, daylight balanced (6500K) LED light. Its 30 LED bulbs produce an ultra bright beam that's the equivalent of a 50W tungsten bulb, with a reach of up to 25 feet. Suitable for both video and DSLR cameras, the LED-50DA is powered by 4 standard alkaline or NiMH AA batteries, and includes a clear frosted filter for softening glare as well as an amber 4300K correction filter for shooting indoors.

- LED-50DA** 50-Watt LED Light (#BELED50DA).....**94.95**

MPL12V Multi-Watt On-Camera Lights

Compact, 12v DC on-camera light utilizes switchable 20W and 35W bulbs for both single and tandem multi-watt output. Twin barn doors aid in direction, while diffusion filter softens. An excellent choice for large or small camcorders.

- Includes:**
- Compact lamp head • Diffusion filter
 - 20W and 35W 12VDC bulbs • Vertical barn doors
- MPL12V** Multi-watt, On-Camera Light with Cigarette Plug Connector (#BEMPL12V).....**59.95**
 - MPL12VX** Multi-watt, On-Camera Light with XLR 4-pin connector (#BEMPL12VX).....**59.95**

LED-150

150W Dimmable LED Video Light

The LED-150 uses 5 LED bulbs powered by any 12V battery with cigarette socket. Draws minimal power even at full wattage for long battery life while its aluminum alloy case is never too hot to touch. The light's 80° spread and 1100Lux/1M intensity is dimmable from 150 to 25 watts, and its 5800K color temperature can be warmed to 4500K with the included filter. A combined universal shoe and 1/4" x 20 mounting thread allow use on any tripod, stand, or camera shoe mount.

- LED-150** (#BELED150).....**134.95**
- LED-150** with NMH-54NC NiMH Battery and Charger (#BELED150K1).....**279.95**

Multi-K Variable Color Temperature LED Light

No longer will you need to fumble with gels or fiddle with white balance when mixing light sources.

The Multi-K lets you dial in the color temperature you need, using a combination of three differently colored lights – red, white, and yellow – to provide a range of color temperatures from 2800-6500K. So whether you're shooting inside, outside, in front of a window or next to a candle, the Multi-K lets you match the available light source.

• 144 LED Bulbs (Red, White, & Yellow)

• 50W Tungsten Equivalent • Less Than a Pound

• Takes 6 AA Batteries. With case, shoe mount and AC adapter.

PEARSTONE

4.2- and 8.3-inch Articulating Israeli Arms

Pearstones articulating "Israeli" arms are used to mount small displays on prosumer and professional camcorders. The arm's unique design features a single-point locking mechanism, which gives the user maximum flexibility. Moving the display on multiple axes is quick and easy, allowing users to find the best possible viewing angle.

4.2" Articulating Israeli Arm (PEAA42).....64.95

8.3" Articulating Israeli Arm (PEAA83).....74.95

DM-3105

5" HD/SD LCD Monitor

The DM-3105 is a versatile, lightweight field monitor that supports 21 types of HDTV input signals and two SDTV video formats. It features frame markers, aspect ratio settings, and waveform and vectorscope displays — making it the perfect companion for field productions and mobile video monitoring. For added convenience, there are numerous picture adjustments, as well as audio level metering and selectable color temperatures of 5500K, 6500K, and 9300K.

ASDM3105 **3499.95**

DM-3011

8.4" TFT Professional LCD Monitor

High-quality flat panel monitor designed for monitoring at remote broadcasting and location sites, field monitoring, and studio applications. Displays information such as audio channels, time code, peaking and markers. Virtually all HD format signals are supported through the HD-SDI input. Front switches for brightness, contrast, and chroma make the monitor very easy to control.

#ASDM3011 **6874.95**

HD071A 7.1" HD Pro LCD Monitor

The HD071A is 7.1" widescreen LCD monitor with a bright, high-resolution 1024 x 600 screen that makes focusing on-location a breeze. With its advanced color controls, multiple inputs, anamorphic 16:9 image and 1:1 pixel mapping, it is bigger, sharper, and more versatile than any on-camera LCD screen. Shoot run-and-gun with a video DSLR or loft your rig high on the end of a jib, while framing and focusing your HD images with confidence. Also features image flip (for use with 35mm adapters), NTSC/PAL switchability, and two 1/4"-20 mounting threads. An optional sun hood is also available.

#MAHD071A **589.95**

HD089B 8.9" HD Pro LCD Field Monitor

Bright, fully HD compatible widescreen LCD monitor with a high-resolution 1024 x 600 screen that lets you really see what you're focusing on. With its advanced color controls, multiple inputs, anamorphic 16:9 image and 1:1 pixel mapping. Whether shooting run-and-gun with a video DSLR or lifting your camcorder high on the end of a jib, the HD089B helps you frame and focus your HD images with true confidence--and on a budget you can afford.

Marshall

V-LCD651STX

6.5" Super Transflective On-Camera Monitors

Portable field / on-camera monitor designed for outdoor applications with high ambient light. Marshall's technology minimizes surface reflection of both outdoor and indoor light, while featuring a much wider color reproduction range than typical transflective/reflective LCDs or even those with increased backlight performance. Marshall's outdoor super-transmissive LCDs provide improved visibility by producing high-contrast images and a wider viewing angle, even under diverse and challenging lighting environments. This innovative technology dramatically boosts the efficiency of the LCD backlight's light utilization, while maintaining extended temperature ratings and low power consumption for outdoor operation.

The V-LCD651ST has a durable and lightweight design, weighing only 20 oz. Features a digital TFT-MegaPixel high resolution LCD 1024 x 768 screen with 2.4 million pixels, 4-pin XLR power jack, and optical-grade polycarbonate screen protection. Analog signals are digitized using advanced 10-bit processing with 4x oversampling and adaptive 5-line comb filter.

- 650 cd/m² brightness, 500:1 contrast ratio
- 4 user-configurable function buttons
- RGB gain and bias control
- False Color and Peaking Filter On/Off
- RGB Check Field / Field Detect
- 16:9, 4:3, Pixel-to-Pixel modes • Variety of Markers

Available in three major module configurations:

HDA (Composite, YPbPr)
 HDMI (Composite, YPbPr and HDMI).
 3GSDI (Composite, YPbPr and 3G/HD/SDI)

V-LCD65SB-HDA

6.5" LCD Monitor with Analog HD/SD Inputs

Designed specifically for outdoor applications, the high resolution V-LCD65SB-HDA incorporates proprietary SunBrite technology to boost the efficiency of the backlight's light utilization while minimizing the surface reflection of ambient light. Inputs include composite with NTSC/PAL auto recognition and HD/SD analog component via multi-format connector (BNC x3). Also features 16:9/4:3 aspect ratio, image flip, RGB calibration and safe area. Includes V-Mount battery adapter. (#MAVLCD65SBHD) **1499.95**

V-LCD8-PRO

7.9" High Resolution LCD Monitor

The lightweight (1.7 lbs.) but high resolution (1440 x234) V-LCD8-PRO has a sleek design that makes it ideal for any indoor or outdoor monitoring application. It features composite and S-Video input

with NTSC/PAL auto recognition and loop through capability. Equipped with 1/4-20 mount and a bayonet locking 12v DC power supply that ensures that the power won't be disconnected while being handled. An on-screen display lets you access color, tint, contrast and brightness controls.

MAVLCD8PRO **688.99**

OR-841 'Orchid'

8.4" Rack Mountable / On-Camera Portable Field Monitor

The OR-841 can be used in a rack (4RU), on a desktop, in the field, or mounted to a camera. It has 9 user-assignable function keys as well as a rotary menu system.

The built-in waveform monitor (which includes adjustable White and Black clip level indicators) can be displayed in three different aspect ratios including Full Screen. The built-in vectorscope displays in full color and can also be displayed in three different ratios. The vectorscope has adjustable gain from 1x to 5x. The OR-841 will also de-embed and display up to 16 channels of audio and allow users to monitor any two channels at once through the headphone jack or rear line output jack. Also includes built-in front panel speaker and rear panel stereo input for audio monitoring. The 64-segment tri-color bar graph meters have user-adjustable reference levels.

- Auto White Balance Calibration
- Tri-Color Tally Indicator • On-Screen Time Code
- 7 assignable GPI inputs • Adjustable Color Temperature
- Adjustable Clipping Indicator • Precision Gamma Settings
- Variety of Safety Markers • Support 3 different battery adapters
- Factory-installed Protective Screen

LM-563R • LM-404R • LM-404HD
Rackmount Multi-LCD Monitors

The LM-563R and LM-404R are high performance color LCD monitors in unique rackmount housings that tilt up or down to optimize the viewing angle. This is particularly beneficial when circumstances necessitate that the monitors be mounted above or below normal eye level. Each feature high brightness, active matrix LCD displays with wide viewing angles and excellent contrast ratios. They are flicker-free, low radiation, light weight, space saving and feature low power consumption.

DAC-7 Analog to SDI Converter

The DAC-7 is a small, extremely portable but powerful mini converter that enables users to convert the output from any camera, including prosumer level cameras, to professional SD-SDI for connection to professional or broadcast equipment. Converts component, composite, and S-video input to SD-SDI video output. Audio inputs include balanced XLR and unbalanced RCA. Also has an RS-232 port. Unique design allows it to be mounted between the camera and a tripod.

DAC-7 (#DADAC7).....399.95
DAC-7L Without Tripod Mounting (#DADAC7L).....384.00

DAC-8 HD/SD-SDI to HDMI Converter

The DAC-8 makes it easy to output uncompressed SDI video and audio to a video projector or HDTV. Two BNC connectors receive the HD/SD-SDI video, while two unbalanced RCA connectors handle the audio—all of which is converted to HDMI and output to your display. This is an ideal, affordable solution for using SDI coaxial cable to transmit high-quality HD video over distances up to 300-ft. In combination with the DAC-9 HDMI to HD/SD-SDI converter, system installers now have an affordable solution for distributing HDMI signal over long distances, without quality compromises.

#DADAC8.....374.95

DAC-9 HDMI to SDI Converter

The DAC-9 makes it easy to use small DV/HDV cameras with HDMI output that are available for live production by converting their HDMI output to SD-SDI or HD-SDI. The DAC-9 converts HDMI to HD-SDI or SD-SDI by autosensing the HDMI input and converting it to the same image size as SD-SDI or HD-SDI. This enables signals from DV or HDV cameras to be used with SDI switchers. In cable runs of 100-200 feet there is a cost advantage in using a long SDI or HD-SDI cable, rather than a long HDMI cable. Self-adhesive straps on the back of the converter make it easy to attach to a tripod leg. A power adapter is included.

#DADAC9.....374.95

DAC-50

HD/SD-SDI to Component/Composite Video Signal Converter

The DAC-50 is a HD/SD-SDI to Y:U:V component and composite video signal converter with built in up/down scaling. The built-in scaler allows users to convert from a HD-SDI (1080i & 720p) or SD-SDI signals to HD (1080i & 720p) or SD (480i/50i) Y:U:V component or composite video signal. The DAC-50 can also cross convert from 1080i to 720p.

Housed in a rugged metal frame, making it durable enough to endure even the roughest conditions.

#DADAC50.....474.95

DN-60 DV/HDV Solid State CF Card Recorder

Portable and shockproof, the DN-60 utilizes the latest technology of removable and high capacity CF memory cards to provide hours of continuous DV, HDV, DVC Pro 25 & 50 standard- and high definition recordings. Tripod and hot shoe mountable, it connects directly to DV or HDV camcorders via single Firewire cable. Features an 8 second pre-record buffer, useful in recording unexpected events especially in outdoor recording or security applications. Built-in intervalometer for time lapse recording. Runs on four AA batteries for more than two hours continuous recording or use the included external power adapter

#DADN60.....479.95

DN-200 HD / SD HDD Recorder

Small portable recorder capable of very long record times. A built-in 250GB hard drive (HDD) stores the video. It can record a minimum of 19 hours depending of the format, DV or HD or HDV. Drag and Drop the video files directly in the time-line of your video editing program. Features comprehensive back-lit LCD display for recording status, an 8 second pre-record buffer; and built-in intervalometer for time lapse recording. Also offers manually triggered single frame recording, and play last video feature. Works on 12v DC or local power.

#DADN200.....Call or Log-on

DN-300 DV & HDV Recorder

An instant on, "drag-and-drop" DV/HDV hard drive recorder, the DN-300 accepts DV and HDV (via Firewire), component (YUV), composite and S-Video inputs. Includes a 250GB hard drive for over 19 hours of video. VTR-style controls with large, illuminated buttons and a two-line backlit LCD display let users select play, REW, Ffast reverse, pause, frame advance, file selection and file delete and loop play. Other features include seamless repeat loop play (for trade shows), variable speed forward or reverse play and frame by frame playback in forward and reverse.

DN-300 (#DADN300).....1194.95
DN-300UPG Upgrade Kit f with removable hard-drive enclosure (#DADN300UPG).....272.95

DN-400 Hard Drive Recorder with Removable Hard Drive

The DN-400 allows for file-based tapeless solutions that save you hours of capturing time. Records standard or high definition from component, composite, S-Video or Firewire. The DN-400 comes with a 250GB removable hard drive installed inside an enclosure (additional enclosures/hard drives are available). Once you have completed your recording, simply eject the hard drive enclosure, and use the USB 2.0 port to connect to a PC or Mac based NLE system, (no power supply required, as USB provides power). You can work directly from the removable drive, or copy video files to your NLE's video drives.

#DADN400.....Call or Log-on

DN-500

Rackmountable DV/HDV Hard Drive Recorder

Take advantage of tapeless acquisition in even the roughest conditions by recording in DV and HDV. Records DV from either digital or analog inputs via component, composite, S-Video, or FireWire input. Records HDV via FireWire input. Enjoy confident native DV and HDV recording while monitoring on a standard video monitor. Once you have completed your recording simply eject the harddrive carrier, for easy connection via USB connector to your NLE system - it is as easy as that!

DADN500.....1744.95

HDR-40 HD/SD SDI HDD Recorder

Designed for studio desktop applications, the HDR-40 records from SD and HD video equipment via SDI, with HDMI output, and convenient SDI loop through. Offers a choice of 1080i, 720p, 576i and 480i recording formats. Record HD in either IBP or Intra-frame (i frame), and SD in IBP. When recording is completed, the hard drive enclosure simply ejects and can connect via USB 2.0 to a PC or Mac-based NLE system. Work directly from the removable drive, or copy video files into the NLE's video drives. Includes RS-422, RS-232, and GPI for easy integration with other equipment.

Hard Disk Recorders / Wireless Video Transmission

RFX-NLL-II License-Free Link

The RFX-NLL-II is a state-of-the-art 5.8GHz license

free, digital broadcast microwave audio/video link. The transmitter is designed to mount between an ENG camera and battery. The receiver is designed to be mounted on a tripod or other suitable location. The NLL-II offers a 1500' range, with switchable mic/line inputs, balanced audio, in and out, and microphone phantom power. Video is encoded to MPEG-2, making it ideal for high quality broadcasting environments. Applications include sports arenas, roof top to roof top, and camera to ENG truck.

RFXNLLII **9949.95**

CW-5HD Cam-Wave
HD Wireless Video Transmission System

Transmit HD 1080 and 720 signals wirelessly up to 100 feet (30m) through walls, and up to 150 feet (50m) in line-of-sight, with a transmission delay of less than 1ms. This uncompressed wireless transmitter and receiver system supports both HD-SDI and SD-SDI video signal processing, multiple video formats, and two channels of SDI embedded audio. Wireless transmission operates via MIMO/OFDM, between 5.1-5.8 GHz frequencies—no special FCC license required. It has no visible antenna array, and is powered (10-17v DC) through its V-mount or via 4-pin XLR. Selection of four manual or auto-select frequencies with 256-bit encryption.

Titan Tx/Rx Microwave Wireless Transmitter & Receiver System

This multi-directional, microwave wireless video transmitter/receiver set can broadcast through walls without desynchronization of the video picture. The Titan Tx/Rx system has a 1,000 ft (300 m) line of sight, a 2.4 GHz frequency range, 4 preset channels, and is FCC, IC and CE certified. Transmits/receives NTSC, PAL & SECAM color and B&W signals. Requires camera-specific power cable, as listed below. Both the Titan transmitter and receiver require a minimum 9V of power, up to 36V, available in a variety of connection options (12V and 14V sources supply ample power in the field). Extremely compact, both units are easily velcroed to any camera or monitor.

- Signals remain stable even when in motion
- Can be used in conjunction with any monitor
- Connectivity via BNC (video), Lemo2 (power) and Hirose 6-pin (video and power)
- 4 channels are pre-dialed and accessible with the flip of a switch—no tools required
- Optional "5MDBP" battery pack adapters allow use of 7.2V cam batteries

FS-H200 • FS-H200 Pro
Portable Hard Drive Recorders

The FS-H200 is a portable DTE (direct-to-edit) recorder that captures SD and HD video to Compact Flash cards. The recorder supports both DV and native HDV acquisition in a variety of resolutions and has the ability to record over 2.5 hours of footage to a 32GB card. By simply swapping in a fresh card when one is full, users can shoot the whole day without having to offload. Just shoot, connect, and edit—no more tape to log and capture, your clips are ready when you are. When used with 25Mbps HDV cameras, the FS-H200 supports QuickTime 1080i50/60 and 720p25/30 recording for Final Cut Pro use as well as M2T 720p/1080i recording for use in a number of different applications from Adobe, Avid and Grass Valley (Canopus). Otherwise the same, the FS-H200 Pro steps up with clip thumbnail viewing, proxy content playback, MPEG4 proxy clips, FTP support and wired/wireless custom metadata logging, DV/HDV MXF support, user-definable 10-second retro cache, and lower power consumption.

FS-H200 Pro (FOFSH200PQ) **1099.00**

DSLR-PRO Camera Shoulder Support

Shoulder support system designed for use with DSLR cameras. The unit is intended to stabilize DSLR cameras capable of shooting HD video, such as the Canon EOS 5D MKII and EOS 7D, and Panasonic Lumix Series. Constructed from machined aircraft aluminum for durability. An elevated platform ensures that the DSLR viewfinder is raised to eye level. A short slide channel is included to allow for wide-angle shots without visual interference. Three-axis movement allows for extreme mobility when positioning your shots.

DSLR-PRO Camera Shoulder Support (SWDSLPRO) **259.95**
DSLR-PRO/C Camera Shoulder Support with Series 7 Battery Mount (SWDSLPROC) **294.95**
DSLR-PRO/V Camera Shoulder Support with V-Mount for XP-DSLR (SWDSLPROV) **329.95**

FLEX DSLR Remote

Handle-mounted DSLR remote that triggers HD video start and stop recording for Canon EOS 5D MKII and EOS 7D digital cameras. The FLEX's unique gooseneck arm houses an optic that is to be positioned within line of sight to the remote sensor on the camera. Once positioned, the remote transmits a signal through the optic when the button is depressed. The arm can be extended up to 12" and coils down to approximately 3" in diameter. The FLEX's all metal construction will stand up to the everyday rigors of HD DSLR video production and is powered by 2 AAA batteries (included).

FLEX-RC1 DSLR Remote (SWFLEXRC1) **149.95**

PowerBase 70

Battery Pack for Canon EOS 5D MKII and EOS 7D DSLRs

The PowerBase 70 contains a 70 Wh, 14.8v lithium-ion battery designed to extend HD movie recording time for the Canon EOS 5D Mark II and EOS 7D digital cameras. The PowerBase 70 delivers 6x more power than the original battery supplied with the camera.

It is also intended to streamline your HD movie recording: the PowerBase 70 mounts under the camera and doubles as a grip or can be attached to an HDSL support via its 1/4"-20 release plate or V-Mt mount. Wired as a 14.8v battery pack, it can provide extended power for up to two additional 12v DC devices such as lights, monitors or HD converters as well as other devices requiring lower voltage (an optional XP power regulation cable is needed). The pack is also furnished with 1/4"-20 threads on either side to mount accessories. (Does not include a charger).

- Attaches to the camera with the supplied quick release plate to make attaching and detaching the Powerbase 70 from the DSLR rig easy.
- Furnished with 1/4"-20 threads on either side for easy mounting of production accessories
- Two PowerTap outputs power lights, monitors, HD converters, hard drives, etc.
- A four LED indicator gauge allows you to check charge capacity at any time.

RS5DM2SET-F DSLR Shoulder Mount System

Allows you to work with a HD/SLR utilizing the stability of shoulder-mount equipment. System includes a shoulder pad, rod support, handgrips, follow focus, and a swing-away viewfinder adapter. Height alignment of LCD viewfinder is intended for the Canon EOS 5D MKII and may not align properly with other cameras. For use with the EOS 7D, an additional RPC4580 spacer plate is required.

- Broad chimney viewer for the 3" LCD screen
- Mini DV 15mm aluminum rods support-base allows use of a matte box or other accessories ahead of camera
- Dual handgrips spaced 60mm apart
- Follow focus for DSLR camera with video capabilities

(CAR5DM2SETF).....**849.95**

RS5DM2SET-S DSLR Shoulder Mount System

Allows to work with a video DSLR utilizing the stability of shoulder-mount equipment. Same as above without the follow focus, this package includes rod support, handgrips, and a viewfinder adapter. (CAR5DM2SETS).....**499.95**

RS5DM2SET-BTA DSLR Shoulder Mount System

Same as above, except designed specifically for the Canon EOS 5D MKII when used with either a battery grip or a Beachtek XLR audio adapter. (CAR5DM2SABT).....**499.95**

RS5DM2-VSH

DSLR Single Handgrip Viewfinder Package

An economical yet professional way to capture handheld video with an HD/SLR camera, this package lets you work with a Canon EOS 5D MKII (or similar-sized DSLR) using a stable handgrip and great LCD viewing hood system. Package consists of an attachment point for the SLR, a complete viewing hood system for 3" LCD screens, and an adjustable handgrip which has horizontal and fore/aft adjustment as well as full tilt adjustment. (CAR5DM2VSH).....**199.95**

Ikan Elements

The ikan Elements line is about your needs as a shooter. Simple pieces that allow you to mount your monitor, microphone, light, power supply or whatever else you can think of to your camera setup, while providing you with proper support to get a great hand held shot. The concept is simple... provide you with the parts you need to configure your camera rig how you want it. Order just the parts you need, or get a pre-configured kit. Either way, the choice is yours about how your camera rig turns out.

Starter Fly Kit

Made of anodized aluminum and comprised of three easy-to-assemble parts, the Starter Fly adds comfort and image stability to the often awkward process of shooting video with a digital still camera. Consists of a single foam-grip handle with an attaching, movable arm and a Cheese Plate that can accommodate optional accessories with 1/4"-20 mounts. (IKLEFLYS).....**109.95**

Basic Fly Kit

Stepping up, the Basic Fly kit is comprised of 5 basic parts. Not as heavy or cumbersome as a full rod system, it consists of two foam-grip handles with two attaching, movable arms and a base plate that can accommodate optional 15mm rods to allow for added accessories. (IKFB).....**229.95**

Deluxe Fly Kit

Same foundation as the Basic kit — two foam-grip handles, two attaching, movable arms, and base plate — plus, it adds a rod mount to accommodate the two included 15mm rods. These provide added flexibility to the rig, affording greater control over camera balance and placement while allowing the use of additional accessories. (IKFD).....**329.95**

Super Fly Kit

The Super Fly Kit represents the top of the line in ikan's Elements series of video support equipment — a lightweight, modular support rig designed to work with any DSLR or other small camera. Made of anodized aluminum and comprised of 11 basic parts, the Super Fly adds comfort and image stability to the often awkward process of shooting video with a digital still camera.

Not as heavy or cumbersome as a full rod system, the Super Fly uses the same foundation as the Deluxe kit — two foam-grip handles, two attaching, movable arms, cheese plate, rod mount, and two 15mm rods — to which are added two handle arms and a second cheeseplate. These provide a platform above the camera for mounting your accessories of choice, from lights to monitors to microphones. (IKFU).....**419.95**

Fly Packs (With Super Fly Kit)

Fly Pack 3 DSLR Bundle with VX7:

Includes 7" monitor with power, sunhood, 10" monitor arm, 15mm rod adapter, tripod mounting plate and compact transport bag. Available for Canon (IKFP37C), Panasonic (IKFP37P) or Sony (IKFP37S).....**1634.95**

Talon Kit 1

Designed for use with the Hawk or third-party viewfinders. It consists of a standard talon quick release baseplate, stainless-steel L-bracket, and 90mm stainless-steel rod extensions (female threaded on each end). You can attach the optional Letus Hawk view finder directly to the Talon baseplate or to the quick release camera plate depending on whether you want the viewfinder to remain with the camera or the support rods. The back of the standard Talon base plate is also ported to receive standard, male threaded 15mm support rods. This allows you to easily mount accessories behind the camera if needed. (LELTTLK1)**644.95**

Talon Kit 2

Same as above, except it adds Letus Hawk Viewfinder (LELTTLK2)**994.95**

Talon Kit 3

Same as Talon Kit 1, except it uses the extended base and Talon riser, which allow you to have a 'step' in the telescoping support rods. The 90mm stainless steel front rod extensions can be used for easily repositioning a follow focus or matte box when changing the lenses. The riser also provides more vertical clearance, and is ideally used with large cinema lenses where vertical clearance and adjustments are crucial for accessories. (LELTTLK3)**1044.95**

Talon Kit 4

Same as Talon Kit 2 except it adds telescoping rods that are mounted directly below the Talon quick-release baseplate with the extended base system. This is the most compact method for having telescoping support rods. The extended base can also be used with static / non-telescoping support rods if desired. (LELTTLK4)**1244.95**

Talon Kit 5

Same as Kit 3, except it adds Letus Hawk Viewfinder (LELTTLK5)**1374.95**

Letus Hawk DSLR Viewfinder

The Letus Hawk DSLR carbon fiber viewfinder is made for DSLR filmmakers who want quality optics, solid construction, and the ability to accommodate their specific shooting needs. Uses 3 lenses in 2 groups of fully coated optics rather than a single, off-the-shelf diopter, and offers 2.75x view factor—the ideal zoom for LCD screens. The lenses are adjustable from +1.5 to -2.5 to accommodate near and far sighted users. Also features removable eye cup, talon basic camera plate for mounting, X / Y / Z mounting adjustments, and 1/4-20 mount point for articulating arms (LELTHKVF) **384.95**

Letus Talon DSLR Camera Cage

The Letus Talon DSLR cage has a releasable camera plate along with a sliding / removable top bridge. The camera plate can be attached from the bottom or the front of the cage for easy camera removal when transporting. The top bridge can slide on standard 15mm diameter rods. Add any length of support rods you need to accommodate your top bridge setup. Because the top bridge can slide forward and backward, it makes for a very versatile DSLR rig that is easy to balance. The cage can also be quick released for break down and storage. The bottom of the DSLR cage is ported for battery access. Canon EOS 5D MKII and EOS 7D. Extended side risers are available if you are using the Canon 1D Mark IV or other, taller, DSLR cameras. Provides a myriad of mounting points for virtually any setup you can dream of. A great platform for mounting handgrips, preview monitors, mics, sound recorders, lights, support rods, mixers, batteries, other DSLR cages, etc. (LELTCAGE) **.689.95**

DSLR Rig

By configuring the Proteus Rail System for cameras such as the EOS 5D MKII and EOS 7D, and Nikon D3S, Cinevate gives DSLR filmmaker a perfect blend of support, functionality, and customization. The Monstor grip handles and 15mm carbon fiber rods combine with an adjustable shoulder pad to form a sturdy, lightweight rig that allows for comfortable, all-day shooting.

Fully configurable to each shooter's needs, the DSLR Rig can be outfitted with a wide range of professional accessories, from the Durus Follow Focus and Matte Box to the Proteus Cage. And if you need to shoot with something besides a DSLR, no problem: the DSLR rig will support video camcorders, too.

The base plate ejects straight up and offers a multitude of configurations, none of which protrudes below the rails. Height, XY adjustment, rake angle and placement of the rails blocks are all variable. (CISR)**929.95**

Uno DSLR Rig

With a foundation consisting of a 15mm carbon fiber rod chassis and camera baseplate, the Uno provides a unique link system – and a variety of optional camera platforms – that allow for endless configuration to suit your body type and shooting preferences. Follow focus, long lens support, shoe mounts and other 15mm rod-based accessories can be easily added, allowing for even more professional-looking results. The base plate ejects straight up and offers a multitude of configurations, none of which protrudes below the rails. Height, XY adjustment, rake angle and placement of the rails blocks are all variable. The base plate is also the basis of our shoulder support system. (CISR)**874.95**

Uno Grip

The Uno Grip is designed as an additional grip for Cinevate's Uno, Medusa and Proteus DSLR support systems. Able to be mounted and configured just about anywhere on your rig, the grip uses a single "Kip" handle for no-tools adjustment at just about any angle or in just about any direction. The grip also contains a 1/4"-20 female thread underneath for additional mounting possibilities. (CIGH)**148.95**

Medusa DSLR Cage

The Medusa DSLR Cage brings a dovetailed quick-release plate and 15mm rod support to a highly customizable DSLR accessory frame. Eight swivel joints, 4 kip handles, and two form-fitted handgrips let you adjust the width and height of your rig for maximum comfort and stability. Lights, microphones, and other peripherals – including jibs – can attach to the top accessory plate, while the bottom 15mm rod clamps attach to standard 15mm rod/rail systems, allowing for further levels of customization. (CIMC)**639.95**

microFollowFocus v2 Indie Bundle

Compatible with all camcorders and DSLRs, this bundle lends your video production the precise focus control of a big-budget film. Whether shooting with a fixed-lens camcorder, interchangeable cinema lenses, or and HD/SLR, the precision-machined, gear-driven design provides repeatable, accurate focusing. The included microLensGears enables an exact fit between your 35mm SLR lens and the microFollowFocus, allowing more precise and fluid focus adjustments.

- Completely gear-driven design for slip-free, accurate, and repeatable focus movement. 1:1 gear ratio allows smooth movements for still and motion picture 35mm lenses. Optional reversing gear focuses Nikon and Pentax lenses in the "correct" cinema direction

(RE80030020) **693.50**

microShoulderMount for 35mm Adapters Bundle

Turn nearly any camera into a portable, shoulder-mounted production rig. Whether you're shooting with a tiny consumer camcorder, a video DSLR, or an ENG-style camera and 35mm lens adapter, this kit not only increases the stability of handheld shooting, it provides new levels of flexibility to how you shoot.

The shoulder pad and two rubberized handgrips can be adjusted in nearly any configuration along the included handlebar rods and optional 15mm support rods. At the same time, with the addition of a Redrock microMount, the rods can be used to support a host of accessories, from articulating arms to external monitors, batteries and portable hard drives. (RE80030022) **469.95**

microShoulderMount Deluxe Bundle

Includes everything in the microShoulderMount Bundle, and adds 18" rods. The Deluxe Bundle is great for camera setups that don't already have a rod support system. (RE80030023) **559.95**

microMount (3-pack)

The microMount is a flexible connector that allows just about any item to be connected to 15mm rods. The microMount includes ¼" 20 mounts to accommodate connections with on-board monitors, noga arms, and other accessories. microMounts can also be used to configure entirely new camera support configurations by connecting additional rods and other microMounts. (RE80030024) **199.95**

microFollowFocus v2 Complete Package

Nearly everything you'll need to achieve smooth, accurate, professional focus. Compatible with all camcorders and DSLRs, the microFollowFocus v2 lends your video production the precise focus control of a big-budget film. Whether shooting with a fixed-lens camcorder, interchangeable cinema lenses, or a video-capable DSLR, the precision-machined, gear-driven design provides repeatable, accurate focusing. (microLensGears must be purchased separately.)

Three high-quality Arri-style microWhips – in lengths of 3", 12", and 18" – fit into the accessory port of the microFollowFocus unit, letting you pull focus at a distance from the camera. Solidly built – with rubberized handles and rugged locking inserts – these whips also work with other standard follow focus units.

The included microSpeedCrank is an extended arm that also uses an Arri-style connector to fit into the microFollowFocus, giving you the ability to pull focus much more rapidly. (RE80030025) **825.00**

DSLR Cinema Bundle

The DSLR Cinema Bundle provides you with a modular, tripod-mounted system that includes swing-away matte box, geared follow-focus, top handgrip, DSLR plates, support cage and quick-mounting rod clamps – all on a dual 15mm carbon-fiber-rod system that can be customized as needed.

Compatible with most video DSLRs – including the Nikon D90, D300s, D3s, and Canon EOS 5D MkII, EOS7D, and EOS 1D Mark IV, the DSLR Cinema Bundle provides a platform for a wide range of additional accessories, such as an articulating arm or external monitor. Lens gears must be purchased separately. (RE80030054) **2412.00**

microMatteBox Deluxe Bundle

The Redrock Micro microMatteBox Deluxe Bundle is a universal matte box system that accommodates any lens – whether camcorder, film camera, DSLR or 35mm lens adapter. With its convenient swing-away design, this cinema-grade lens attachment allows the use of 4x4" and 4x5.65" professional filters that can rotate 360° or be easily swapped out for different looks. Light spillage and lens flare are controlled by a top/bottom French flag and a pair of side wings that, like everything else on the microMatteBox, can be easily locked, adjusted or simply removed.

Configurability is key, and not only of filters, flags, and side wings: optional Redrock accessories include the 15mm microSupport system as well as additional filter stages. And since the microMatteBox uses industry standard support and filter sizes, it's completely compatible with existing 15mm and 19mm rod/rail systems. With its high-quality design and affordability, the microMatteBox system is built for productions small, large, or anywhere in between. (RE80030043) **974.95**

microMatteBox Deluxe Bundle for RED One

Upgrades the 15mm swing-away support arm of the Deluxe Bundle to a 19mm/15mm arm. Along with the RED One, this universal matte box system will accommodate any other camcorder, film camera, DSLR or 35mm lens adapter. With its convenient swing-away design, this cinema-grade lens attachment allows the use of 4x4" and 4x5.65" professional filters that can rotate 360° or be easily swapped out for different looks. Light spillage and lens flare are controlled by a top/bottom French flag and a pair of side wings that, like everything else on the microMatteBox, can be easily locked, adjusted or simply removed. (RE80030044) **1094.95**

DSLR Field Cinema Deluxe Bundle

Comprehensive package for converting video DSLRs to useful cinema production rigs. This rig is ideal for DSLRs that have the ability to output an HD picture to an external monitor while recording. Having an HD monitor opens new doors like the ability to allow a Camera Assistant to pull focus as opposed to the operator. It also allows users to take full advantage of the features that professional HD monitors offer.

(RE180010002) **1889.95**

Ultraport DSLR Bundle

Bundled kit designed to turn your DSLR hybrid camera into a professional video rig. This model features a two-grip configuration that minimizes rotation while you shoot. The system makes it easy to remove the camera from the rods with the DSLR baseplate's quick-release system. Choose to shoot with just the camera or shoot handheld with grips. The system can be further customized with a number of separately available accessories. (RE80030089) **524.95**

theEvent DSLR 2.0 Hybrid Rig

Designed to turn your DSLR hybrid camera into a professional video rig. This model is a stabilized rig designed with wedding, event, or photojournalism shooters in mind. It features two handgrips, a microFinder loupe eyepiece (loupe purchased separately), and microBrace body pad. This setup is intended to afford maximum stability and mobility with a very low overall weight. (RE80170016)..... **849.49**

eyeSpy

theEvent DSLR 2.0 Hybrid Rig

Ultraport DSLR Bundle

eyeSpy Standard • eyeSpy Balance • eyeSpy Deluxe

For a more traditional shoulder mount shooting style, try the EyeSpy rigs which come in three configurations:

- A cost-effective base package, the EyeSpy Standard starts with the shoulderpad, 18" 15mm carbon fiber rods, and single rubberized handgrip from the popular microShoulderMount. Then adds additional rod extension to center the camera for viewfinder use, and tops it off with the DSLR baseplate, and microFinder loupe accessory (loupe not included).
- eyeSpy Balance adds microBalance counterbalance weights for a rig that is easier on the arms for extended shooting.
- eyeSpy Deluxe Bundle adds the microFollowFocus v2 for convenient, precise control over focusing your SLR lenses

Z-Finder Jr. DSLR Optical Viewfinder

Whether shooting handheld or on a tripod, the Z-Finder Jr. turns your camera's 3" LCD screen into a clear, easy-to-focus viewfinder that lets you see your image in magnified detail even under the brightest sunlight. It also provides an extra degree of handling comfort and a crucial point of contact — between camera and eye — that adds stability to any handheld video. Features 2.5x focusable magnification, a 40mm diameter Zacuto optical design lens, a large form fitting eyecup preventing extraneous light leakage, and a field of view perfectly matched to 3" LCD screens. (ZAZFINDJR)..... **249.00**

Z-Finder Pro (2.5x & 3x Magnification)

The Z-Finder Pro offer a 40mm diameter optical design lens, an anti-fog coating protective lens cover, a large eyecup preventing extraneous light leakage and a field of view perfectly matched to 3" LCD screens. With the expendable anti-fog protective covers, going between extreme environments won't be a problem. Otherwise the same, if you are nearsighted the 2.5x might be for you as it offers a -4.75 correction, where as the 3x offers a -2.75 negative correction. If you are not nearsighted, then it is just a personal preference on magnification.

Z-Finder Pro 2.5x (ZAZFINDPRO2).....	375.25
Z-Finder Pro 3x (ZAZFINDPRO3).....	375.25

Target Shooter

The perfect solution for no-fuss run-and-gun DSLR video production, the lightweight Target Shooter offers finite adjustability and three points of contact for enhanced stability. Included Gorilla plate attaches to the bottom of your camera via standard 1/4"-20 mount, and is joined to the rest of the Shooter via an included 15mm rod. With the gunstock pressed against your body, you can adjust height and angle for the most comfortable fit, bringing the ergonomics and stability of a camcorder to your DSLR. (ZAZDTS) **449.95**

Striker

Striker takes the gunstock and Gorilla Plate of the Target Shooter and adds a handgrip for waist-level support. (ZAZDSR) **894.95**

Single Action

Single Action is a set of mini-rails and baseplate that attach to your tripod and allow for easy mounting of your video DSLR. In conjunction with the included Z-Focus, two universal Ziggears are cut to size to give you smooth, precise follow-focus ability over two lenses, while a quick-release plate lets you easily switch the camera between tripod and handheld use. (ZAZDSA)..... **1699.95**

Cross Fire

Cross Fire brings together the handgrip, gunstock and adjustable 15mm rods of the Striker with the follow focus of the Single Action kit to deliver a versatile, lightweight support rig for any DSLR. Shoot smooth handheld video one moment, then mount the rig intact to your tripod using the included baseplate. The camera's quick release plate allows for easy removal, while the 0.8 pitch Ziggear can be cut and sized to match your lens of choice for precise, accurate follow focus. Additional Ziggears required for additional lenses. (ZAZDCF) **2474.95**

Fast Draw

Fast Draw helps you turn any video DSLR into a professionally shoulder-mounted camcorder. The adjustable handgrip and shoulder pad provide the stability and comfort needed for long handheld shoots, while the Z-lite Double counterbalance weight keeps your rig from getting too front-heavy--aiding immensely in maneuverability while lessening fatigue. Plus, you can easily mount the entire rig onto a tripod using the DSLR baseplate. The Fast Draw can be configured for either the left or right shoulder, and will support an optional follow focus and matte box with additional 15mm rods. (ZAZDFD)..... **1539.95**

Double Barrel

Combines the Cross Fire with the Fast Draw and adds dual grips and a Z-Finder Pro 2.5x, giving you the ability to virtually wear your DSLR to the shoot. (ZAZDSB)..... **3694.95**

Video Pro Conversion Lenses

Impact's high-quality conversion lenses are manufactured with premium workmanship, resulting in superior, high-resolution image capture. The lenses are available in several categories: telephoto, wide-angle, macro/close-up, and fisheye. They mount directly onto digital and video camcorders. Impact lenses with a magnetic base will magnetically mount directly to your digital camera or camcorder.

35mm Lens Adapters

Depth of Field and the Elusive "Film Look"

Achieving a genuine film look on video takes more than good lighting and 24fps progressive capture. The shallow, controllable depth of field and high-grade optics of 35mm prime lenses are also needed. The Letus 35 and Cinevate's Brevis35 allow you to attach still photography lenses onto nearly any SD or HD camcorder, projecting their rich, film-like images onto an internal translucent screen which your camera then records.

W LENS ADAPTER SYSTEMS

Letus35 Extreme

With its high-grade achromatic lens and 1/2-stop light loss, the Letus35 Extreme exhibits beautiful film look with absolutely no vignetting and superior edge-to-edge sharpness. Its proprietary image orientation technology flips the image upright—without the added expense and inconvenience of an external adapter.

- Interchangeable thread rings and lens mounts for changing cameras on-the-fly
- Virtually silent vibration system
- Built-in LED on/off indicator
- Comes with choice of mount

Letus35 Ultimate

The top-of-the-line successor to the widely acclaimed Letus 35 Extreme, the Ultimate completely raises the bar on 35mm adapters by offering a new multipatented design and the highest-quality achromatic lenses. Along with a quieter, "smart" spinning ground glass element with zero wobble, the Ultimate contains a precision back-focus adjustment and can stop down to f/22. Its built-in flash memory remembers your last settings, while the supplied D-tap power cord is hot swappable. Stunningly beautiful, film-like images were never so affordable. Includes PL mount, choice of optimization kit, D-tap, custom waterproof case, and rod support bracket.

- User-changeable ground glass element
- Variable RPM motor with LED display
- Off-center spinning glass and driving motor

#LELTB4P **4399.95**

LT13FFPRO 1/2" Relay Lens

Designed for camcorders with 1/2" image sensors and interchangeable lens mounts, the Letus 1/2" Relay Lens can be mounted directly to the camera, letting you attach Letus 35mm adapters--such as the Extreme, Elite, or Ultimate--with minimal light loss. These adapters allow your camera to achieve reduced depth of field and thus more cinematic imagery. Compatible cameras for this lens include the Sony PMW-EX3.

RELAY LENSES

Letus 1/3" Pro Relay Lens

The Letus 1/3" relay lens is designed for cameras with a 1/3 inch image sensor and removable lens system. The Letus relay will allow you to bypass the stock lens of your camera and attach a Letus adapter (Extreme, Elite, or Ultimate) directly to your camera body on cameras with removable lenses with standard 1/3" mount such as the Panasonic HPX300 and JVC HD series.

#LELT13FFPRO **2694.95**

Letus 1/2" Pro Relay Lens

The Letus35 1/2" relay lens is designed for cameras with a 1/2" image sensor and removable lens system. The Letus relay will allow you to bypass the stock lens of your camera and attach a Letus adapter (Extreme, Elite, or Ultimate) directly to your camera body on cameras with removable lenses such as the Sony PMW-EX3, XDCAM 350/355, etc.

AMRE SERIES HARD CASES

Waterproof High-Performance Cases

HPRC are premium Italian designed cases that give you the confidence to send your equipment into even the most severe conditions. That's because HPRC shells are injection molded using an advanced patented plastic that creates a light-weight high-strength barrier between your protected items and the outside elements. HPRC protection meets ATA 300 specifications for transit cases as well as rigorous standards for military use. Unbreakable hard resin-shelled waterproof black transit cases have a cubed "pick-and-pluck" foam interior, soft-grip handle, and air pressure release valve. The "WF" series has smooth-gliding wheels.

701HDV Compact Fluid Head

- Designed for compact HD camcorders up to 9.5 pounds
- Updated controls allow a more solid grip and improved fluidity
- Pan-bar rosette and large sliding plate optimize position of camera

Fluid Head	701HDV
Mfg. Item #	MA701HDV
Max Load	9.5 lb
Height	3.7"
Weight	1.8 lbs
Price	149.99

501HDV Pro Fluid Head

- Ideal for small, professional digital cameras • Light but positive fluid movement for smooth control through 360° pan and +90 to -60° tilt
- Teflon friction adjustment to increase drag • Separate pan & tilt locks • Sliding quick-release video plate system

Fluid Head	501HDV
Mfg. Item #	MA501HDV
Max Load	13.2 lb
Height	4.5"
Weight	3.5 lbs
Price	169.81

503HDV Pro Fluid Head

- Supports latest range of pro digital cameras
- Exceptionally smooth control through 360° pan and +90 to -60° tilt • Separate pan and tilt locks • Sliding quick-release video plate system
- Built-in balance spring helps support weight
- Continuous drag adjustment device—0 to max level

Fluid Head	503HDV
Mfg. Item #	MA503HDV
Max Load	17.6 lb
Height	4.5"
Weight	4.4 lbs
Price	338.39

504HD Pro Fluid Head

- PAN fluid drag system for a more ergonomic operation
- 4-step counterbalance system ensures quick set-up and optimal performance • Ball-bearing drag system for precise, smooth movements • Lightweight modern materials for optimum balance of strength and size • 504HLV Pan Handle

Fluid Head	504HD
Mfg. Item #	MA504HD
Max Load	16.5 lb
Height	6.1"
Weight	6.39 lbs
Price	399.90

MERLIN

Handheld Stabilizer Systems

The unique design of the Merlin stabilization system is manufactured to provide you with an ultra-lightweight solution that not only increases stability, but can go simply anywhere. Ultra-light and ultra-compact, the Steadicam Merlin allows you to keep up with the action more easily than ever.

The Steadicam custom-fitted Merlin travel case allows you to securely cradle your camcorder while it is affixed to and balanced on the Merlin. Upright and easily accessible, the case lets you get ready quickly before your next shoot. Offers generous space to store the Merlin Arm and Vest plus additional gear.

With the Merlin Arm and Vest you have the choice of using the Merlin lightweight camera stabilizing system for fluid hand-held shooting in the same manner as the larger Steadicam rigs used in Hollywood film productions.

- "Folding-Caliper" hinge allows for instant fold-up—perfect for shoulder-mounted shooting
- Quick-release mount

SP1 STEDDIEPOD
Camera Stabilizer

BARBERTECH
VIDEO PRODUCTS

Handheld camcorder stabilization system. This system offers many variations in one system. It can be a monopod, a tripod, a camera stand, a body camera mount or a low mode system. Handheld stabilizer for classic moving shots. This device also can be a monopod for excellent quick stability in live situations. It can be extended and pressed against the body and used to shoot and can be used as a low-mode device sometimes called a dog or kitty cam.

GLIDECAM X-10

Camera Stabilization System

This highly advanced professional stabilization system is designed specifically to be used with Glidecam's GL-2000 and 4000 Pro handheld stabilizers. The system works by isolating your body's motion from the camera, leaving your camera balanced and in a relatively motionless state. The support arm can be boomed up and down, as well as pivoted in and out and side-to-side as you to create smooth camera footage. Walk, run, go up and down stairs, shoot from moving vehicles and travel over uneven terrain without any camera instability or shake. The support vest is lightweight, comfortable, and can be adjusted to fit a wide range of operators, while the support arm can be set up and configured so that either a left-handed or right-handed operator can use the system.

X-10 System includes:

X-10 Support Arm, Support Vest, Docking Bracket, Stainless Steel Arm Post, Aluminum Arm Post, (6) Steel Weight Plates.

Prompter/People™

UL-IPAD UltraLight iPad Teleprompter

Works with DV and HD cameras and mounts your iPad and camera together for a portable teleprompting solution. Complete with mounting hardware, HD quality glass beamsplitter, abd hood. • Easily readable to over 12 feet • 11.5" (diagonal) Beamsplitter • Adapter available for iPhone™ / iPod Touch™ • Upgradable to 8" LCD prompter • Software is not included, apps are available at the Apple™ AppStore • iPad™ not included

- UL-IPAD UltraLight iPad teleprompter #PRULIPAD 598.95

PRO-D-DSP-17

ProLine StagePro 17" teleprompter pair

Includes 2 teleprompters, distribution amp, cables and Flip-Q Pro software.

- 17" LCD display • Quick-release LCD and glass
- Heavy tip-proof stan • Adjustable height/angle
- Flip-Q Pro for Mac & PC included on USB stick
- PowerFlip reversing Software for Powerpoint
- Monitor moves up for larger/brighter image
- Includes skirt for raised position
- Premium HD 60/40 beamsplitter
- One or two 6.8m / 25 foot SVGA cables
- VGA and composite video inputs
- 12v DC or 100-240v AC

- PRO-D-SP17P ProLine StagePro 17" teleprompter pair #PRSP17 3199.95

Prompter/People™

PRO-D-11 ProLine 11 Teleprompter

Complete teleprompting package designed to work with any mini DV or HD camera and tripod. The system uses an 11" color LCD display with VGA and composite video inputs. The entire setup sits atop the included tripod riser. This package includes several software applications that enhance its performance. Flip-Q Pro is a prompting application for most PC or Mac computers that feature dual-monitor output.

- PRO-D-11 ProLine 11 #PRPL11 1574.95

TRICASTER SERIES

Portable Live Production System

The TriCaster Studio is NewTek's latest portable solution to live TV production. Harness the power of a live TV truck in a compact, 16-pound package; boost live production capabilities with "live virtual sets," multiple component inputs, multiple upstream effects, dual DDRs and animated alpha channels; and expand broadcast production capabilities with real-time delivery from television and Internet streams. The result is an advanced production studio powerful enough to utilize in network environments, yet portable enough to fit in a backpack.
