THE HP COMPUTER USERS CATALOG

One-stop shopping for more than 1700 products!

Check out this easy-to-use four-color catalog for our wide selection of computer supplies, accessories, software, and office furniture.

- **Making the right decision.** We've provided detailed descriptions, full-color photographs and product compatibility guides to help you make a knowledgeable choice.
- **Locating the right product.** To help you quickly find the product you want, we've listed our catalog items under three index categories—by alphabetical order, computer equipment, and product number. Or, you can turn to the appropriate section.

- **For fast, easy ordering.** To order from the catalog, just give us a call at 800-538-8787 (in Calif., Alaska or Hawaii, call 408-538-4133). Our telemarketing professionals are ready and waiting to accept your calls between 9 a.m. and 5 p.m. in all time zones.
- **Complimentary catalog copy.** To receive your free copy of the *Computer Users Catalog*, call the appropriate number listed above, or, request a copy from your local HP sales office. (Please reference its publication number, 5953-2450D.)

Watch for our new Data Communications section in the Spring/Summer 1985 edition of the Computer Users Catalog.

For your quick reference:

- 800-FOR-HPPC** Handheld/Personal Computer pre-sales information including dealer referrals and literature requests (Series 10–200).
(367-4772)
- 800-HPCOACH** Personal Computer post-sales information and software assistance (Series 80–200).
(472-6224)
- 800-835-HPHP** Personal Computer repair and service agreements (Series 80–200).
(835-4747)
- 503-754-6666** Handheld calculator customer technical support (Series 10–70).
- 503-757-2000** Handheld calculator repair and service (Series 10–70).
(ext. 2181)
- 503-757-2000** Series 40, 70, and 80 Users' Libraries.
- HP Sales Offices** Other sales and service information.
(see page 2.)

Phone us! It's the **FAST, EASY** way to order

For fast, easy ordering . . .

**JUST GIVE US A CALL
800-538-8787**

California 408-738-4133

Fast, easy and friendly? You bet! When you call for any of our publications, we want you to feel you've received the best service anywhere. It's that simple.

When you call, our computerized on-line HP order entry system helps us quickly give you current price and real-time availability information. We're almost always able to ship your order within 24 hours from one of our distribution centers.

So give us a call, we're looking forward to serving you.

More savings . . . our prices include shipping!

Our prices include regular UPS or truck shipment to your address (however, "inside delivery," or other extra-cost carrier charges are not included in our prices).

We ship promptly from East and West coasts.

The manuals you order will be shipped from our California or New Jersey distribution centers, right off the shelf. Depending on your location, your order will typically reach you within two to seven working days.

Emergency requirement?

In an emergency, when you need even faster service, we can ship same day provided we have your credit-approved order by 2 p.m. Pacific Time. Note that this is an extra-charge service, since you will be billed the total cost of a premium air express carrier serving your area.

Ordering is easy—here's how.

Just call our Direct Phone Order Service any weekday between 9 a.m. and 5 p.m. in your (Eastern, Central, Mountain or Pacific) time zone. One of our telemarketing professionals will be pleased to serve you.

Use your VISA, MasterCard or American Express credit card—or purchase against your HP Direct Order Open Account. We are required to collect all state and local taxes unless we have your tax exempt certificate on file at the Direct Order Center.

To help us serve you efficiently and accurately, please have these three things available when you order:

- Index product number for each manual ordered.
- Exact quantity of each product number unit needed.
- Your purchase order number, if ordering on an HP Direct Order Open Account.

Using the Documentation Index

The Documentation Index contains manuals, binders and all types of non-promotional publications for HP computer systems and peripherals. For convenience, the index is divided into three distinct sections.

The first two sections, Computer Types/Systems and Peripheral Types, list manuals under the computer or peripheral to which they belong. The third section lists all publications in numerical order (by part number).

The first two sections are helpful when the part number of a manual is not known. If the part number is known, use the third section to quickly locate the desired publication. In all cases the listing includes part number, title, latest print date and latest update (if any).

Revisions and Updates

Print dates—are listed for most publications in this index. Print dates are current as the index goes to press. Manuals may be updated after this index has been published. At the time you place your order, we will automatically ship the most current, updated manual available.

Older manuals—are referenced for two reasons. First, new HP equipment is often designed to be backward compatible. In these cases, manuals with older print dates are still the correct reference documents. Secondly, when HP discontinues the manufacture of products, we continue to promptly provide supporting manuals for a period of five years beyond the last date of manufacture.

Updates—are indicated for those publications having them. You may receive an update having a later print date than the one listed. You will always receive the most current update available together with the version of the manual it updates. This insures you will have complete current information.

Abbreviations

The following abbreviations appear throughout this index.

information = Info
instruction = Instr
operating = Oper
operator's = Oper
program = Prgm
programs = Prgms
programmer's = Prgmmers
programming = Prgmming
reference = Ref
input/output = I/O
new = ▶
not applicable = n/a
to be announced = TBA

Special books for special interests

We are pleased to offer for your convenience a selection of computer-related books, which can be ordered without leaving your desk. These books have been carefully selected for excellence in their subject areas and also provide a selection of topics that should interest many people in different parts of any organization. For easy reference, titles are organized into major subject areas and all Hewlett-Packard personal computer-related books are accompanied by this special symbol  Browse through the list and remember—these books are only a phone call away!

Handheld calculators

NEW *An Easy Course in Using the HP-12C* C. Coffin and T. Wadman/Grapevine Publications 1984

A self-paced, easy-to-follow course book for your HP-12C Financial Calculator. Devoid of highly technical and confusing jargon, its rich conversational style and classic illustrations make learning about the HP-12C easy and fun. Filled with examples, explanations, self tests, and solutions, this text introduces you to the "How's and Why's" of loans, mortgages, investments, NPR and IRR calculations, and much more. Take your time, set your own pace, and enjoy learning to use your HP-12C.

92234S \$22.00 ea.

NEW *An Easy Course in Programming the HP-41* T. Wadman and C. Coffin/Grapevine Publications 1984

Get to know your HP-41 Advanced Programmable Calculator. In understandable and friendly terms, this self-paced course leads you on an enjoyable learning excursion, complete with review questions, explanations, self tests, and lots of examples. Learn about data, stack and alpha registers; the keyboard, its functions and arithmetic; program memory, labels, flags and conditional tests; indirect addressing and alphanumerics; and much more. Soon you will be programming like an expert. Applicable to the HP-41C, HP-41CV, and HP-41CX.

92234T \$22.00 ea.

Programming languages

BASIC 2nd Edition R. Albrecht, L. Finkel and J. Brown/Wiley & Sons 1978

Teach yourself BASIC with this step-by-step beginners' guide. Every BASIC command is explained using a short working program and illustrated in a variety of business applications. BASIC varies slightly from computer to computer so consult your machine's reference manual for clarification of these differences.

The BASIC used here is very similar to the Dartmouth version, which can be considered the "common denominator" of most versions of BASIC.

92233D \$10.00 ea.

 *BASIC for Home Computers* R. Albrecht, L. Finkel and J. Brown/Wiley & Sons 1978

Learn Microsoft™ BASIC with this step-by-step, self-teaching guide. Microsoft BASIC is a version of BASIC used on HP's Series 100 computers. Written by the same authors of the popular book "BASIC 2nd Edition," this book utilizes the same successful style and format. It is suitable for the novice who has never programmed before. Commands are explained using a short working program and then illustrated in a variety of applications. See also: "Microsoft BASIC" below.

92234D \$11.00 ea.

 *Microsoft™ BASIC* K. Knecht/Dilithium Press 1983

An excellent tutorial on programming in Microsoft BASIC. Its approach is more advanced than "BASIC for Home Computers" and it covers more sophisticated features. Appropriate for a person who already programs in another version of BASIC or in another language. Also appropriate as a follow-up to the previous book.

92234E \$18.00 ea.

Inventions of Opportunity: Matching Technology with Market Needs Introduction by William R. Hewlett/Hewlett-Packard

Learn about HP's most significant technological developments of the last three decades. This book presents selections from the *HP Journal* which, in the opinion of William Hewlett and a panel of HP experts, best illuminate HP's most significant technological contributions to the marketplace.

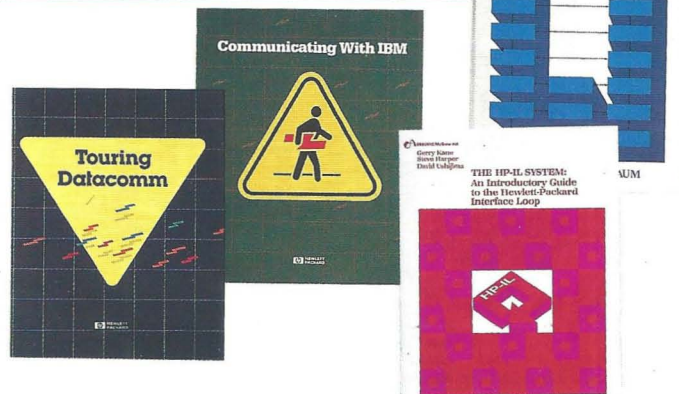

The introduction by Mr. Hewlett provides rare insights into the dynamics of innovation—where a need, a technology, and creative people come together to produce a successful invention. This handsome volume is clothbound, comes with a dust cover and is more than 350 pages in length.

92233B \$13.75 ea.

Data communications

The C Programming Language B. Kernighan and D. Ritchie/Prentice Hall 1978
Learn to program C quickly and easily. This book contains a tutorial section to get you started, separate chapters on each major feature, and a reference manual. Considered "the" book on the C language. See also "Introducing UNIX™" in the Operating Systems section.
97089-90000 \$25.00 ea.

Structured FORTRAN 77 Programming with Hewlett-Packard Computers Seymour V. Pollack/Boyd & Fraser 1983
Learn structured FORTRAN 77 programming from the ground up. This book is an effective introductory text for beginners. For those with experience, it provides an orderly presentation of FORTRAN 77 and its effective use. And numerous well-structured examples illustrate the use of key features of this language. All examples and programs have been tested on the HP 1000/9000.
92836-90005 \$19.95 ea.

NEW Programming in Pascal with Hewlett-Packard Pascal Peter Grogono/Hewlett-Packard 1984
"Programming in Pascal" is a revised version of "Programming in Pascal with Pascal/1000." It explains the computer programming language Pascal, as described by the DRAFT ANSI Standard, and the enhancements to standard Pascal provided by HP Pascal/1000 and Pascal/9000 compilers. Throughout the 10 chapters, each extension to standard Pascal is identified, and a separate appendix section summarizes the differences between standard Pascal and HP Pascal/1000 and Pascal/9000. The book assumes no prior knowledge of other programming languages and is intended for people who want to write programs in Pascal.
97082-90002 \$25.00 ea.

An Introduction to Programming & Problem Solving in Pascal M. Schneider, S. Weingardt and D. Perlman/Wiley & Sons 1978
An excellent general introductory book that teaches Pascal by using it as a vehicle to illustrate the fundamentals of programming and good style. Appendices contain the complete syntax of Pascal and a list of all standard Pascal identifiers, along with a description of all functions and operators. A recommended reference tool for the HP 9000 Series 200 Pascal users.
09826-90072 \$27.00 ea.

OH! Pascal! D. Cooper and M. Clancy/Norton 1982
A self-teaching guide offering a clear, nonmathematical introduction to the standard version of Pascal. Detailed enough for independent study, "Oh! Pascal!" emphasizes: general program solving techniques; early discussion of procedures; examples suitable for interactive use—which are then modified for batch; antidebugging and debugging sections in each chapter; self-check questions; and chapter tests.
92233C \$25.00 ea.

Software Tools in Pascal B. Kernighan and P. Plaugher/Addison-Wesley 1981
Writing good programs that make good tools is the subject of this book. This goal is accomplished by presenting a set of programs, each of which provides lessons in design and implementation. The programs are tools that have proved valuable in the production of other programs. They are complete, documented, written in standard Pascal, and tested directly from the text. Top-down design and structured programming are emphasized throughout the book, as are principles of sound design, testing, efficiency and portability. "Software Tools in Pascal" takes a pragmatic approach in that principles of good programming are not treated as abstract sermons. Rather, they are concrete lessons presented in the context of actual working programs.
92234J \$22.00 ea.

Data communications

Touring Datacomm: A Data Communications Primer Hewlett-Packard 1983
The Data Communications Primer introduces you to the basic concepts of data communications, beginning with a discussion of simple communications concepts and gradually moving toward more complex topics. Covers hardware and software, transmissions methods and channels, line configurations and interfaces, signal conversion, multiplexing, common carrier services, network structures and capabilities, protocols, and architectures. Designed for readers with little or no previous knowledge of data communications.
5957-4622 \$6.00 ea.

NEW Communicating with IBM: An HP-to-IBM Communications Primer Hewlett-Packard 1984
"Communicating with IBM" is one of a series of HP primers on data communications. The first book in the series, "Touring Datacomm," presented a broad overview of computers and data communications. This primer builds on that base and focuses on the world of HP-to-IBM communications. An overview of HP-to-IBM networks is discussed, followed by an introduction to each of the main components of those networks. Topics include: IBM mainframes, IBM operating systems, job entry subsystems, communications access methods, communications controllers, basic SNA concepts, emulation, IBM remote devices, and HP-to-IBM data communications products. As you progress through this primer, you will read about HP products that run on various systems, including the HP Touchscreen, 250, 1000, 3000, and 9000. This book provides a valuable introduction to IBM and HP-to-IBM data communications. Written for individuals who have a general background in computers and data communications, but little or no previous experience with IBM systems or with HP-to-IBM products.
5957-4623 \$6.00 ea.

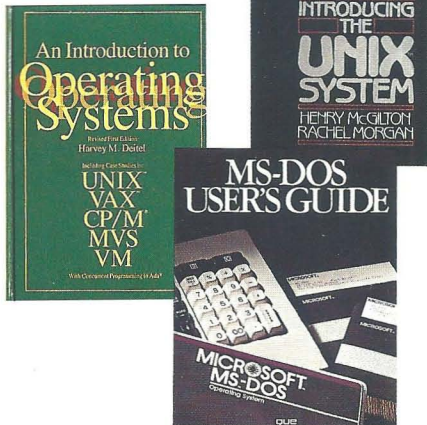

The HP-IL System: An Introductory Guide to the Hewlett-Packard Interface Loop G. Kane, S. Harper, and D. Ushijima/Osborne/McGraw-Hill 1982
Use this definitive guide to learn about the Hewlett-Packard Interface Loop (HP-IL), an eight-bit serial interface designed for portable battery-operable systems. HP-IL makes a new generation of portable systems and peripherals possible by linking the HP Series 40 Programmable Calculators, Series 70 Handheld Computers, Series 80 Personal Computers, and The PORTABLE (HP 110) Computer to low-power, low-cost peripheral devices and test equipment. The first third of this book is an overview of HP-IL and the remainder presents an in-depth discussion of HP-IL and its inner workings.
92233A \$22.00 ea.

Computer Networks A. Tanenbaum/Prentice Hall 1981
A comprehensive introduction to the expanding field of computer networks. Discusses network architectures and protocols from the physical layer to the application layer, and from local networks to satellite networks. No prior background in computer networks is assumed, though a general familiarity with computer systems and programming is desirable.
92233V \$35.00 ea.

Operating systems

Operating systems

An Introduction to Operating Systems H. Deitel/
Addison-Wesley 1983

An up-to-date professional reference covering all the fundamental concepts of operating systems. Major topics include: an introduction and history of operating systems, process management, storage management, processor management, auxiliary software management, system performance, networking and security issues. A final section presents five detailed case studies of major operating systems including UNIX™.

92234K \$35.00 ea.

Introducing UNIX™ H. McGilton and
R. Morgan/McGraw-Hill 1983

This book is both an introduction for beginners, as well as a reference for those with some UNIX™ experience. Beginners will learn to use UNIX™ in a simple fashion and how to gain more information by reading available documentation. Experienced readers will learn how to use some of the more sophisticated features such as the VI editor, nroff, and systems administration.

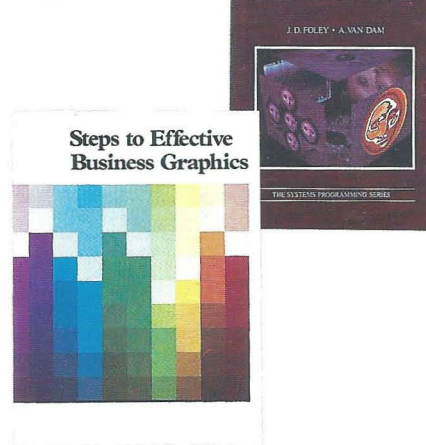

98680-90025 \$20.00 ea.

NEW MS-DOS™ User's Guide Chris
DeVonye/QUE Corporation 1984

An excellent source of essential information about one of your computer's most important software programs, the Operating System. This tutorial explains the simple tasks you need to know as you begin to use MS-DOS™, such as disc formatting and file copying. The book also offers a wealth of information on more advanced topics, including the MS-DOS™ hierarchical directory and I/O redirection. Particularly useful are the many hands-on learning sessions that guide you step-by-step through important procedures. The final section explains each of the MS-DOS™ commands, including examples of command syntax. An exceptional generic MS-DOS™ tutorial.

92234Q \$15.95 ea.

Graphics

Graphics

Steps to Effective Business Graphics
B. Matkowski/Hewlett-Packard 1983

A well-illustrated guide to the production of professional business graphics for information, presentation or publications. Clearly written instructions and full color examples lead the reader through all the steps involved in the preparation of effective 35 mm slides, flip charts, overhead transparencies and report graphics. Other topics include audience analysis, effective graphics techniques and selecting a computer graphics system to do the job you need.

5957-6979 \$12.00 ea.

Fundamentals of Interactive Computer Graphics
J. Foley and A. Van Dam/Addison-Wesley
1982.

An excellent presentation of basic graphics concepts and recent advances in graphics hardware and software. A graphics applications program is developed in Pascal, using the new Core System of standard graphics subroutines. The sequence of subjects presented allows you to quickly begin programming projects and then study hardware and software issues in parallel.

- Topics include:
- Systems organization, and device technology of raster and vector devices
 - Core system-like subroutine package including 2D and 3D viewing, clipping segmentation, interaction handling and device driver structure
 - 3D geometrical transformers, projections and bicubic surfaces
 - Hierarchical data structures for graphics
 - The first comprehensive treatment of color theory practice for computer graphics

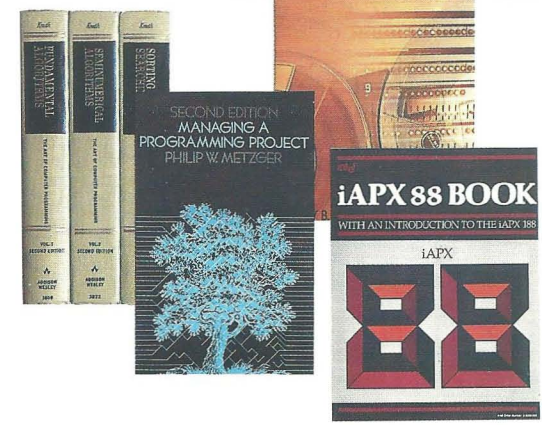

92233X \$40.00 ea.

Professional reference

Art of Computer Programming—Volumes I, II & III
Donald Knuth/Addison-Wesley 1973,
1981 and 1973

These books are known worldwide as "classic" technical references in their subject areas by programmers, system analysts and software developers. They may be purchased as a set or individually to complete your collection.

Professional reference

Volume I: Fundamental Algorithms

A unified, readable and theoretically sound summary of computer programming techniques for information structures. Discusses representation of information inside the computer, and structural interrelationships between data elements and how to deal with them efficiently. Also covers applications to simulation, numerical methods, software design and other factors.

92233S \$35.00 ea.

Volume II: Seminumerical Algorithms

Readable, coherent and up-to-date summaries of the major paradigms and basic theory of seminumerical algorithms.

Topics:
Random Numbers: generation, statistical tests, other random quantities, and random sequence.
Arithmetic: positional number systems, floating point arithmetic, multiple precision arithmetic, radix conversion, rational arithmetic, polynomial arithmetic, and manipulation of power series.

92233T \$35.00 ea.

Volume III: Sorting and Searching

Though largely self-contained, this is a logical sequel to Volume I. It includes a comprehensive survey of computer techniques for sorting and searching and extends the treatment of data structures, considering both internal and external memories and both large and small databases.

92233U \$35.00 ea.

Managing a Programming Project P. Metzger/
Prentice Hall 1981

Learn practical approaches to managing a typical, modern computer programming job of any size and complexity. Everything needed to successfully organize and manage a project is discussed as you are guided through a project from start to finish. Topics include: the cycle, definition, design, programming, testing, acceptance, installation, and operation. Also, how to construct plans for: outlining, introduction, organization, testing, change control, documentation, training, reviewing, installation and operation.

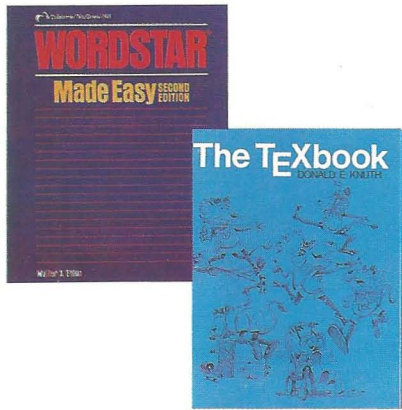

92233P \$30.00 ea.

Flowcharting—A Tool for Understanding Computer Logic H. Stern/Wiley & Sons 1975

Programming in any language requires an understanding of computer logic, which you can acquire with this step-by-step guide. You construct your own flow charts, and develop your knowledge by comparing your work with established guidelines. No experience required.

92234F \$10.00 ea.

Word processing

NEW Intel iAPX 88 Book Reston Publishing Co. 1983

This book describes the popular Intel 8088 microprocessor, the heart of the HP Series 100 Personal Computers. The necessary information is provided for system designers to incorporate the 8088 microprocessor into cost effective microcomputer systems. An overview is presented, followed by detailed discussions which include: the register set, addressing modes, instruction set, assembly language, bus timing and status, bus interface, memory and peripheral interface, wait states, interrupts, direct memory access, and more. In addition, several specific 8088 system design examples are presented; a special supplement provides an introduction to microcomputer concepts and terminology; and an appendix contains data sheets and comparison benchmark reports. A recommended reference for designers of 8088-based systems.

92234M \$20.00 ea.

Word processing

NEW Wordstar® Made Easy Walter Ettlin/Osborne/McGraw-Hill 1982

Learn to use the most popular and powerful word processing system for microcomputers. In 18 easy lessons, this book helps you build the word processing skills applicable to a business environment. You gain hands-on experience producing business letters, sales reports, legal documents, manuscripts, and more. Each lesson provides sample exercises, which allow you to grasp concepts quickly and easily. This revised edition covers Wordstar® versions 1 through 3 and includes lessons on Mailmerge® and SpellStar®.

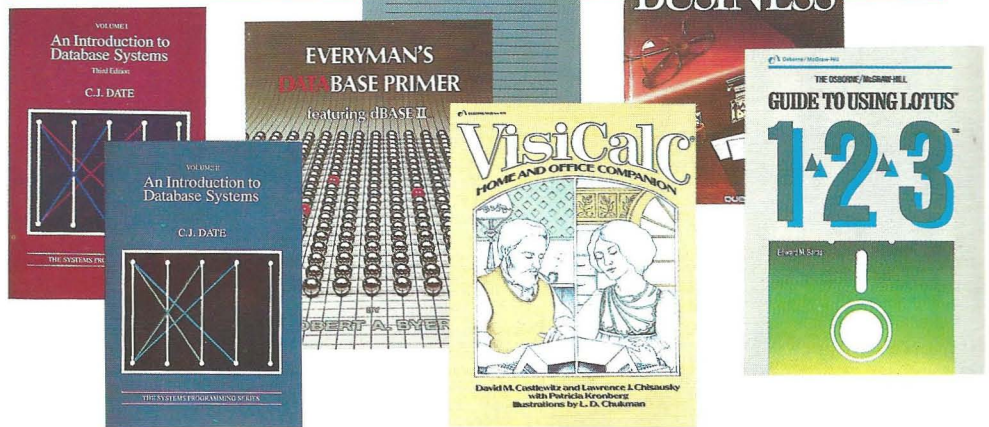

92234P \$15.95 ea.

NEW The TEXbook Donald Knuth/Addison-Wesley 1984

This book is the definitive guide to the use of TEX™, written by the system's creator. TEX™ represents the state-of-the-art in computer typesetting. It is particularly valuable where the document, article, or book to be produced contains a great deal of mathematics, and where the user is concerned about typographic quality. TEX™ software offers both writers and publishers the opportunity to produce technical text in an attractive form, with the speed and efficiency of a computer system. Novice and expert users alike will gain the level of information they seek. The novice need not learn much about TEX™ to prepare a simple manuscript. But for the preparation of more complex documents, this book contains all the details required.

92234L \$19.00 ea.

Data base & spreadsheets

Data base & spreadsheets

An Introduction to Database Systems—Vol. I C. Date/Addison-Wesley 1981

A best seller in the field of relational, hierarchical and network databases. This comprehensive "basic" course is intended as an advanced text or professional reference book. Reasonable knowledge of a modern computer system's capabilities and file-handling features is assumed.

92233W \$30.00 ea.

An Introduction to Database Systems—Vol. II C. Date/Addison-Wesley 1983

Volume II ties together eight loosely related database topics omitted from Volume I. Included are the following system aspects: recovery, integrity, concurrency and security. Also covered are data models, RMI, distributed databases and database machines. The reader is expected to have a general knowledge of database system structures, concepts and objectives. Familiarity with the major aspects of the relational model discussed in depth in Volume I is also expected.

92233K \$32.00 ea.

Everyman's Database Primer: Featuring dBASE II R. Byers/Ashton Tate 1982

A "noncomputer" person's reference to relational database management systems on a microcomputer. dBASE II™ is the database management system used to illustrate the primer's main points. Hence, the primer is an excellent reference for users or potential users of dBASE II, as well as an excellent introduction to the capabilities of a relational database system on a microcomputer. In this regard, it proceeds, in a well-organized and clearly written fashion, from elementary points of introduction to some reasonably sophisticated concepts and capabilities.

92233R \$17.00 ea.

VisiCalc® Programs Made Easy D. Castlewitz/Osborne/McGraw-Hill 1983

A series of easy "hands-on" lessons designed to introduce you to the program's format and its many versatile commands. Numerous exercises and examples allow even first-time users of VisiCalc® to achieve professional results. You begin with the basic skills needed to build and edit a worksheet and move on to advanced uses and special tricks that extend the program's capabilities.

92233Q \$15.00 ea.

VisiCalc®: Home and Office Companion D. Castlewitz and L. Chisausky with P. Kronberg/Osborne/McGraw-Hill 1982

For beginners and experts. This book contains 50 models beginners can use immediately for personal and business applications. And it is a source of new ideas and techniques for those with experience. Arranged by application, the book provides models for loans and investments, advertising and sales, inventory control, personnel, household aids, and more. Each model includes the VisiCalc® entry grid, a descriptive narrative, and sample printed report.

92233Z \$21.00 ea.

NEW Guide to Using Lotus 1-2-3™ Edward Baras/Osborne/McGraw-Hill 1984

Harness the vast capabilities of the Lotus 1-2-3™ software package with this fast-moving tutorial, featuring instructions for both beginning and experienced users. You'll learn how to implement practical application models that take full advantage of Lotus 1-2-3™'s integration of spreadsheet, data base, and graphics functions. With this comprehensive guide to Lotus 1-2-3™, the business profession can more effectively meet needs for financial forecasting, consolidating business statements, simulating dynamic processes, and much more.

92234N \$19.95 ea.

NEW 1-2-3™ For Business D. Cobb and L. Anderson/QUE Corporation 1984

Learn to manage your business more effectively using the powerful integrated program, 1-2-3™. Fourteen practical business applications are presented in an interesting and readable case format. Included are models for managing cash flow, loan amortization, fixed asset management, ratio analysis, projecting cash flow, project management, accounts receivable management, and more. Careful instructions guide you through the construction of each model, and explanations of the business concepts help you apply the models to your particular situation. The models illustrate all of the advanced features of 1-2-3™, including keyboard macros, the data base function, range names, and graphics. Whether you are a beginning or advanced user of 1-2-3™, this book is an excellent investment.

92234R \$17.95 ea.

ORDERING INFORMATION

THREE WAYS TO ORDER

Fastest and easiest . . . order by phone directly from our distribution centers

When you call us between 9 a.m. and 5 p.m. your time (Eastern, Central, Mountain or Pacific zones), we'll immediately confirm publication availability and price—and we'll usually be able to ship your order within one working day of your phone call.

This phone order service is available to all U.S. customers having an open account with HP, or who wish to use a MasterCard, VISA or American Express credit card to purchase items in this index.

Call: **800-538-8787**. (If in California, Alaska or Hawaii, call **408-738-4133**.)

Or order via your nearby HP office

If more convenient for you, the HP office serving your area can accept your order for items in this index, and then forward it to our distribution center for shipment. A minimum of \$20 per order applies.

Mail order also available

If you prefer to order by mail, using your MasterCard, VISA or American Express cards—or your check—call our Direct Order number listed above and request copies of our mail order form. No minimum order size.

TERMS OF SALE

Inside the USA

Terms net 30 days from invoice date if credit has already been established with HP. Otherwise shipments are made on receipt of cash in advance or via approved credit card sale.

No minimum order size when ordering by phone or mail.

Minimum of \$20 per order when ordering through HP sales office.

When ordering by mail, receipt of valid unexpired credit card number or check is required.

Puerto Rico—Order through your local sales office.

Outside the USA

Terms are determined by the HP international sales subsidiary or authorized representative/distributor.

BILLING QUESTIONS

If you ordered via our Direct Phone service (our "HP Order Number" shown on packing list, etc. is 10XXXXXX or 20XXXXXX), and you have received the products ordered but have a question regarding our billing, please call 408-720-2567 and ask for the "collections department." This number is for billing questions only.

If you ordered via nearby HP office (the "HP Order Number" is 24XXXXXX, 26XXXXXX, 31XXXXXX, or 44XXXXXX), please contact that office regarding any billing questions.

PRICES

Prices included in this index for your budgetary guidance, (include regular surface freight) via UPS or truck line of HP's choosing to your USA location. Extra-cost carrier charges such as "inside delivery" or air express are not included in our prices, and you will be charged for them when such extra services are requested. Credit for unused surface freight is not issued when air express is requested. (Our prices are *F.O.B. USA destination*.)

They are net prices, effective 1 November 1984. HP reserves the right to correct printing errors and to change prices, and only those prices officially listed on the HP corporate price list and prevailing at the time an order is received will apply.

SHIPPING METHODS

Shipments to USA destinations are made directly from HP computer supplies stocking centers or from other designated drop-ship locations. All shipments are *F.O.B. destination* and are made via HP choice of surface UPS or truck, with regular freight cost included in our HP price.

In an emergency, we'll be pleased to ship your order same day via one of the premium carriers serving your area—however, you will be billed the carrier's *standard rate in addition to the price of the HP product* when premium shipment is requested. Air shipments do not incur HP handling charges, but credit is not issued for unused surface freight.

Similarly, if you require "inside delivery" or carrier service beyond regular surface delivery, you will be billed for such requested services at the carrier's standard rate.

Build up—not out with space-saving keyboard parks

When not in use, simply slide your keyboard into one of these parks to free up valuable desktop space and protect it from spills and other accidental damage.

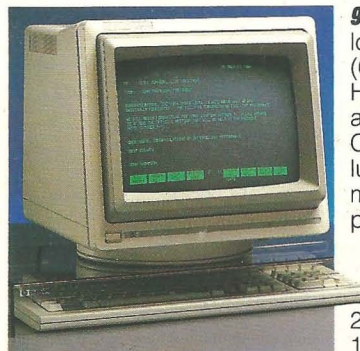

92171C Keyboard drawer park for HP's 120, Touchscreen (150), Model 16 Computers, and 262X Terminals.

92171J Improved keyboard park for extended keyboards on the HP 120, Touchscreen (150) Personal Computers, and HP's 2392A Terminal.

92171C Keyboard drawer park. Is your work surface too narrow to accommodate both a computer or terminal and its keyboard? We have the perfect solution for HP 262X Terminals and HP 120/125/Touchscreen (150) and Model 16 Computers. The 92171C park features a drawer mounted on industrial strength ball bearing glides that can be pulled out a full 11 inches from the support stand. Constructed of 14 gauge steel, the drawer will support up to 100 pounds and can be locked in the open position for stability. Also features a built-in palm rest. Color is pearl gray. Support platform dimensions are: 5 inches (127mm) H x 23 inches (584.2mm) W x 18 inches (457.2mm) D. Keyboard drawer size is 22 inches (558.8mm) W x 9.75 inches (247.7mm) D.

92171J Keyboard park features a lower profile—only 2.6 inches (65mm) high—and will support HP's 2392A Terminal as well as the 100 Series Personal Computers. The color is a translucent gray to further complement and enhance HP's computer equipment. Constructed sturdy formed and bonded acrylic plastic. Exterior dimensions are: 2.6 inches (65mm) H x 19 inches (483mm) W x 11.2 inches (285mm) D.
