Light visible up to 1 mile away

The OC™ (Optimized Clarity) Technology creates a perfectly dispersed beam of pristine light when used in flood mode.

CHARGING INSTRUCTIONS

SLYDE™KING should be connected to a power source using the Micro Charging Cable. Place the Micro USB input into the Port under the silicon cover. Charging light indicator will remain RED until the unit is fully charged, then it will turn BLUE.

Recharging may take up to 4 hours based on battery status.

C-O-B is a new innovation in LED technology featuring smaller clustered LED chips that are mounted directly to the circuit board and work together as a single lighting module. C-O-B outperforms traditional lighting by up to 50 times the light output per centimeter of light source.

**DESIGNED IN TEXAS
MANUFACTURED IN CHINA**

Warning: Do not disassemble product. Do not charge the battery if the product / battery is cracked or damaged. Do not short terminals, crush, heat above 140°F (60°C) or incinerate. Please recycle.

QUALITY GUARANTEE

This product is guaranteed against all defects in workmanship and materials for the original owner for one year from the date of purchase. Damage to or failure of the flashlight or any component thereof due to alteration, misuse, battery leakage or lack of maintenance will void any and all warranties. Damage by leakage of batteries should be taken up with the manufacturer of the battery using their damage claim instructions. For any additional information call 1-800-525-5269.

LIGHTING INSTRUCTIONS

- Press button 1x to activate flashlight (top light)
- Slide up to activate work light
- Press 1x to activate red light
- Press 2x to activate red flasher
- Slide down to turn OFF C-O-B

DIMMABLE BEAM

Each light mode is fully dimmable. Hold button for 1.5 seconds to activate dimming function. Flashlight, C-O-B White and Red are dimmable.

- Light will dim from 100% to 10% over 3 seconds
- Light will flash quickly when it reaches 10% or 100% to indicate it has reached the lowest or highest light output
- Release button at any time to achieve desired brightness
- Light will continue to dim/brighten between 100% and 10% until button is released

MEMORY POWER SETTING

SLYDE™KING is equipped with memory settings for each light mode. To program memory settings, start in the OFF position. Flashlight, C-O-B White and Red have this feature.

- Double-tap the button to activate Memory Power Setting. Flashlight (top) will activate
- Follow Dimming Instructions to adjust light to desired brightness
- Press button again to move to next setting. Light will cycle through each light mode sequentially
- Set each light mode at desired brightness level
- If 100% brightness is desired amongst light modes, simply press button to move to the next mode
- Press again to turn OFF

To reprogram, simply repeat the previous steps.

DIRECT-TO-RED

Press and hold the button while opening the C-O-B section to activate RED directly. Press button again to cycle through remaining C-O-B light modes.

Red C-O-B is a low-signature light, which ensures stealth in the dark, enhances night vision and makes reading in little to no light possible.
