

## Emergency First Response Course

### 2020 Schedule

Now you can get prepared to save the lives of your family, friends, co-workers and neighbors by taking Emergency First Response CPR and first aid courses.

You do not need to be a diver to do this course.

The Emergency First Response Primary Care (CPR) and Emergency First Response Secondary Care (first aid) courses teach people how to provide emergency care for someone in need. These courses make learning easy by providing a non-stressful environment in which participants practice and apply emergency care skills. The courses are designed to: 1) help participants remember appropriate emergency care procedures during times of need, and 2) encourage them to apply those procedures by assisting those needing emergency care.

Emergency First Response Primary and Secondary Care courses are based on internationally recognized medical guidelines for emergency care – guidelines produced through a consensus process of practicing professionals in the emergency medical fields.

### Course Dates
