

Backyard Project Packages

HOME OWNERS HELPING YOU DO-IT-YOURSELF WITH EXPERT ADVICE

packages

Is the inner builder inside you anxious to get out - dust off the tools, sharpen up the pencil and get into a new project? Then Home Hardware Building Centre is the best place to find a great project package. We have projects for everyone from the first time DIYer with basic skills and tools, to comprehensive packages for the professional contractor.

All Home Hardware Building Centre project packages include quality materials, comprehensive plans, detailed cutting and assembly instructions*, and a side serving of expert advice.

Check out our great project selection and discover the satisfaction of building it yourself, or with your friends and family. Then sit back and enjoy your accomplishments with a tall cool one and a burger on the grill – what could be more satisfying than that?

A complete project material list.

* Included for most projects with the exception of agricultural buildings and loft garages.

Project package experts

Not sure if you have the skills or experience to take on a new project? Speak with one of Home's project package experts to review the requirements of the job. They can help you determine the difficulty level of the project, the materials required, site preparation, permit requirements, and the best tools for your project. Stop in today to see how we can help.

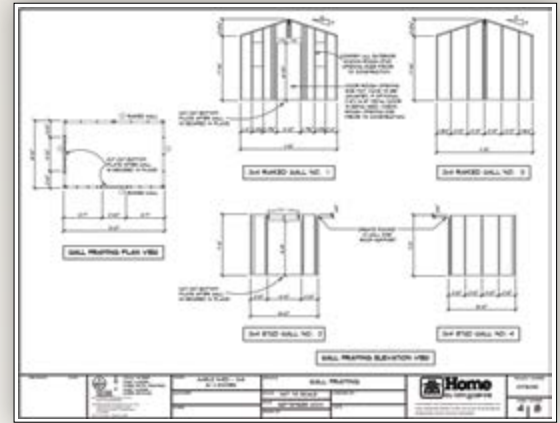

Complete packages, plans and instructions, with permit quality blueprints available

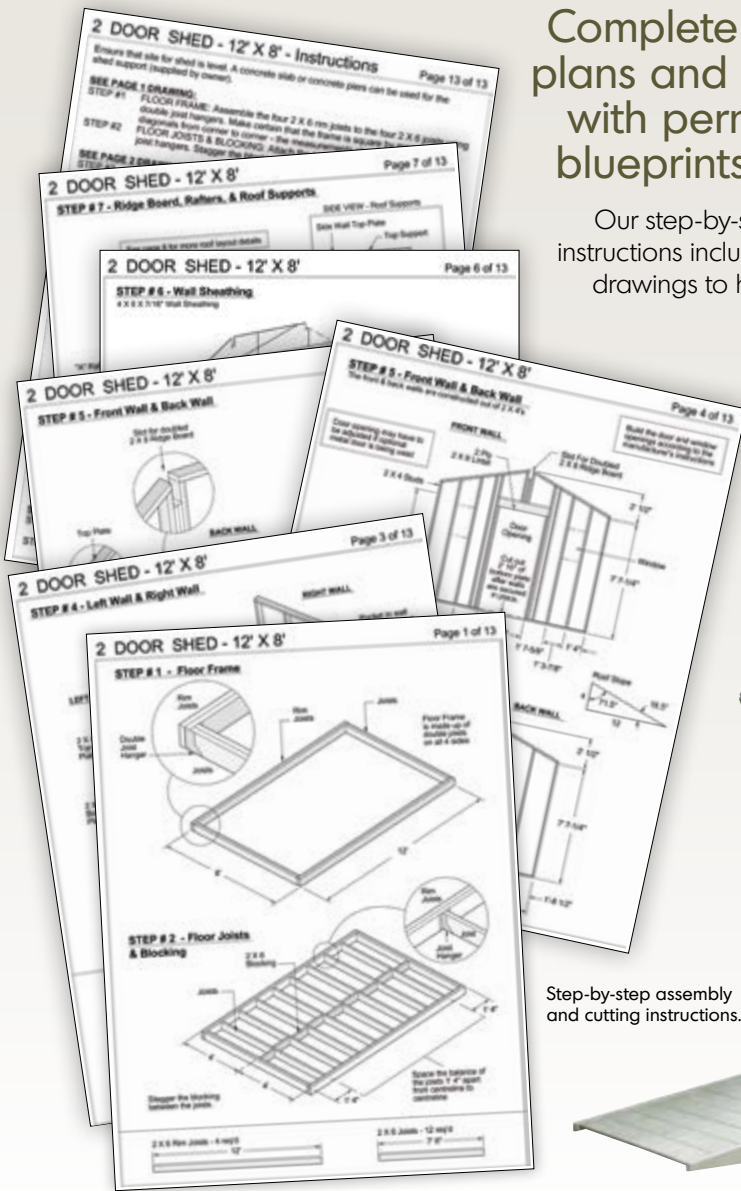

Our step-by-step assembly instructions include easy to follow drawings to help you build.

See page 5 for details

A complete set of project plans are included with each Project Package.

Step-by-step assembly and cutting instructions.

Double Entry Shed 12' x 8' 2758-091

decks

Our deck material packages start with the basic structure for a raised or slightly raised deck. Deck projects can be sized to fit your home and yard and are available in treated, cedar, spruce or composite decking.

Our Project Experts can help you select options, including railings or stairs, for your perfect outdoor living space. If you are thinking of building one of our Deck Projects, but are unsure about the level of difficulty, come in and talk to one of our Project Experts. They can offer advice on necessary tools, and give you an idea of what's involved in successfully completing your project. Some projects will require foundations, site grading, municipal approvals or building permits* and these are the responsibility of the owner.

*See page 19 for more information

A backyard oasis is yours with these functional and fun projects

All Premium deck packages include 6"x6" posts, 2"x8" beams, joists, fascias and all necessary hardware materials. All joists are 16" on centre. You can decide if this is a project you want to build or have your Home Hardware Building Centre install it for you, see below for details.

Make sure you follow the proper guidelines as indicated in your local by laws, e.g. if attaching a deck to your home there may be height restrictions and approved fastening procedures.

We install it right. Guaranteed.

Canada's Installation Experts. We offer a one year warranty on all labour plus the full manufacturer warranties on every project installed by Home.

Your Home Installs Project Expert:

- does a no charge, in-home consultation.
- provides a detailed written proposal, including project price and completion date.
- schedules deliveries and supervises installation by insured, qualified, local installers.
- does a post-project follow-up to ensure satisfaction.

Visit us online at homehardware.ca/homeinstalls for a list of participating stores.

fences & gates

Fence packages are available in a variety of woods. We will help you calculate your fence requirements, and work out all the finishing details.

When planning to build your fence:

- Check local building code for zoning regulations.
- Check location of buried cables and service lines.
- Ensure you keep within the guidelines for height restrictions from your local municipality.
- Maintain the proper set back requirements or property boundaries.
- Decide what style and height is required.
- Inform your neighbours of your plans. A fence can increase value.
- You can choose from treated, cedar, spruce, aluminum or vinyl material.
- Home carries a wide range of products to finish your fence.

greenhouses playhouses and sheds

So many projects, which one is perfect for you? Looking to build a storage shed for garden tools or wood? How about somewhere the kids can call their own, or a place to explore your artistic side or green thumb? Whatever purpose you have in mind, we can help you choose the perfect structure for your needs. Talk to your local Home Hardware Building Centre Project Expert today.

All our standard shed packages include the necessary construction material:

- Floor, walls, roof framing and sheathing materials.
- Necessary blocking, trim and fascia.
- Roof shingles.
- Nail hangers, hinges and fasteners.
- Optional vinyl or grooved plywood sidings available.
- Some shed packages will include manufactured framing arches.
- Some shed packages will include factory built entrance doors and window units.

workshops bunkies studios

A personal space dedicated to doing what you love can be a wonderful project, one that can be very fulfilling and will inspire you to spend more time doing what you love. Think about constructing a new space dedicated to your hobbies or downtime. Home Hardware Project Packages supply a mixture of buildings to suit any usage you have in mind. Our gable style workshop is designed with high ceilings for maximum function for larger projects. The office/workshop and studio feature lots of windows for plenty of natural light.

A few considerations when planning to build your own special space:

- What size building would suit your needs, remembering if it's over 10 meters sq. you will properly need a building permit.
- List your intended contents and sketch out positions and sizes.
- Consider positioning for your building. Would your planned usage mean the building is best attached, close to or far from the house.
- Avoid building on sloping land or poorly drained soil.
- Will you need power? If so make sure you have a clear path for overhead or underground cables.
- Consider how shade from surrounding trees and plants will effect the levels of natural light at different times of the day.
- Bring your ideas into your local Home Hardware Building Centre, and let our project planners help you get the right shed, the right materials and the right advice.

Garden Studio 16' x 12' 2863-505

garages

Our attractive and practical garage designs give you quality features at very affordable prices. A standard package design features an easy-to-erect truss gable roof, or ask our expert Project experts how to change the design to a cottage-roof style. Still not quite right? You can change the sizes and specifications to suit your requirements. Your Home Hardware Building Centre can help you get exactly the style you need.

Garage packages include gable, side entry and cottage roof styles, single, double or triple doors. Packages include all framing materials, engineered roof trusses, asphalt shingles, insulated sectional steel overhead doors, insulated walk-in door with lockset, window(s), siding, rain goods, soffit, fascia and

all required hardware. Lights are sold separately. Before building visit your local municipal office to determine the process to obtain a building permit*. Permit quality blueprints are available ask your Project Package Expert for details.

farm and ranch

Our Hobby Barn packages are a traditionally styled, versatile solution for equipment storage, livestock housing, workshop, garage or stable. These are our largest project packages. Designed for farm use, these structures can be customized to suit your requirements or location.

We have both post frame and stud frame buildings that are a cost efficient way to build. It does require site preparation, foundations*, permits and approvals.

To meet these specialist requirements, construction should be completed by someone qualified. Your Home Installs Service available at some local Home Hardware Building Centres might be the answer. Our installation experts will ensure you get a quality construction at an affordable price.

Hobby Barn 28' x 40' x 8' 2844-505

Hobby Barn 16' x 24' x 8' 2844-501

Hobby Barn 24' x 32' x 8' 2844-503

Hobby Barn with Dormers 24' x 32' x 8' 2844-507

Not just for the farm, Hobby Barns are also perfectly suited for use as a workshop, storage space or garage

Clear span trusses provide complete use of space, and a variety of sizes allow you to adapt this simple design for machine storage, harvest storage or livestock. Customization* of our plans are possible offering alternative sizes or to adapt layout to suit light industrial applications. Your Project Package Expert will be happy to provide more details.

*Approvals to suit local municipal by-laws remain the responsibility of the owner, see page 19 for details.

Building a Pergola or Gazebo

Outdoor garden structures enhance your outdoor space by providing a focal point with which to offer continuity and definition for your landscaping and gardens. Structures deliver immediate framework to visually define areas for playing, gardening, entertaining or just contemplating life in a quiet secluded sanctuary.

Gazebos, trellises, pergolas and planter projects will add flavour and atmosphere to your private space, while a flowering vine-clad arbor is a great way to create vertical garden space and add some whimsy.

If you want to turn your backyard into a landscaped oasis, speak with our Project Package Experts on how to get started today.

Beauti-Tone
CANADA'S COLOUR EXPERTS

Beauti-Tone paints and stains are exclusive to Home Hardware. Beauti-Tone offers a full range of the highest quality exterior coatings. Every product is formulated for the extremes of our Canadian climate and is backed by our HOME OWNER'S GUARANTEE.

Wood-Shield Acrylic-Alkyd Stain
Semi 1866-843/845/847/849
Solid 1866-851/853/855/857/859

New low VOC Acrylic-Alkyd emulsion offers mildew resistance, long lasting protection and excellent colour retention. Ideal for decks, outdoor furniture, siding, shakes and shingles. Moisture content in the wood should be < 20% before staining.

Wood-Shield Best Acrylic Stain
Semi 1870-827/829/831/833
Solid 1866-804/813/822/840

100% Acrylic resin that offers mildew resistance, long lasting protection with superior colour retention. Ideal for decks, outdoor furniture, siding, shakes and shingles. Moisture content in the wood should be < 25% before staining.

Wood-Shield Best Oil Stain
Semi 1866-866/868
Solid 1866-871/873/875

Linseed oil resin with Tung oil that offers mildew resistance, long lasting protection with good colour retention. Ideal for decks, siding, shakes and shingles. Moisture content in the wood should be < 15% before staining.

Wood-shield stains

This premium line of durable stains are for use on all wood surfaces including decks, furniture, shakes, shingles and sidings. Available in Oil, 100% Acrylic and Acrylic-Alkyd blend, in both solid and semi-transparent finishes. Always the key to a long lasting protective coating on your exterior wood is prep work. Your surface should be clean, dull and dry. Home Hardware has the right product to prepare your surface to save you time, money and labour. For more information about preparation or finish choices for your project talk with our Paint Expert at Home Hardware for advice.

Exterior Latex Suede 1859-608/612/610

Exterior Latex Silk 1859-563/572/581

Exterior Trim & Door 1858-600/605/610

Designer series paints

Exclusive to Home Hardware this 100% acrylic paint is formulated with Duralink offering the latest in paint technology for a quality exterior coating. Exterior sheens available in suede and silk. Plus a specialty Trim and Door paint. Designer Series paints have our lowest application temperature of 5 degrees C.

10 CONSIDERATIONS BEFORE STARTING YOUR PROJECT

1. Check with the building department at your local municipality to determine the requirements for building/demolition permits, setbacks, height restrictions or other by laws that may affect your project.
2. Follow the proper guidelines as indicated in your local by-laws. e.g. if attaching a deck to your home there may be height and approved fastening procedures.
3. Do not disturb any underground utility lines. Prior to disturbing the ground, contact the appropriate utility locating agency, to arrange for the marking of the location of buried facilities before digging takes place. Remember, you are liable for any damage or injury caused by interfering with any buried infrastructure.
4. Obtain suitable drawings for your project. You may also require a site plan to define where on your property the project is located and if it meets setback, lot coverage and height restrictions.
5. Research the variety and quality of materials and finishes available for your project.
6. Decide if this is a project you want to build or have a Home Hardware Building Centre install it for you.
7. Set up a site visit with Home Installs if you have decided to not build it yourself.
8. Determine the tool requirements for your project if you are constructing the project... check with your local Home Store for available selection.
9. Consider future uses for your project and do the necessary prep work now.
10. Prepare your work and delivery schedule.

YELLOW TAIL II 800 sq. ft. Expandable cabin 2853-596

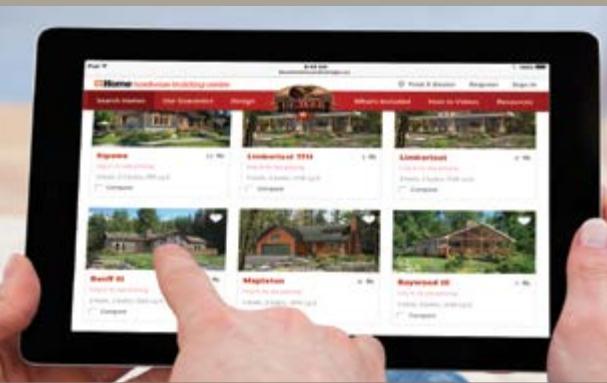

You can also customize your home *Online*

BeaverHomesandCottages.ca

BeaverHomesandCottages.ca is full of great features that will help you envision your perfect home. Search models by number of bedrooms, size, features and other options. Register to create your personal home portfolio, then scrapbook your preferences and save your favourite models. Take virtual tours to see 360° exterior views of all models, and interior panoramas of selected homes. Change building products and colours using the Virtual Design Center and customize the exterior to your liking.
