R8F Series 4K ULED TV
MODEL 55R8F

4K ULED

More than a smart TV — a better TV

If you love movies, shows, sports, and gaming, then the R8F 4K ULED HDR Smart Hisense Roku TV is perfect for presenting your favorite entertainment. Featuring 4K ULED resolution, the R8F packs incredible detail into an HDR (Dolby Vision®, HDR10 and HLG) to create astonishing images with enhanced color and more depth. With Motion Rate processing tech, you can enjoy the fastest action without lag or judder. The Hisense Roku TV serves up a massive library of free and premium content at the touch of a button. Simple to set-up and easy-to-use, connect to the internet, activate, and start streaming.

4K ULED™

Take your TV experience from great to incredible. The picture quality of the R8F is driven by our exclusive ULED technologies including the Hi-View chip which drives the PQ enhancing algorithms to boost color, contrast, brightness and motion. All are calibrated to work together in perfect harmony—to upgrade the performance of every pixel and create a picture that transforms your favorite entertainment into your Ultra-new reality.

Brightness & Local Dimming

The more you can control the better. See which areas of the screen are brighter and which are darker with 56 Local Dimming zones. What could be better than a TV that offers you increased contrast and color accuracy? That was just one of the many bright ideas we had when we created the R8F.

ROKU TV OS

Watch. Stream. Play. Listen. Laugh. Repeat. Kick back and enjoy streaming movies and TV episodes, plus live-streaming news, TV, sports and more, across thousands of free and paid channels. Start streaming your favorite shows. Access your cable box or HDTV antenna. Even fire up your gaming console—all from the simple home screen.

Works with Google Assistant and Alexa

Quickly access entertainment and control your TV with a Google Assistant or Alexa device that you already own. With the touch of your remote or ROKU mobile app, and a simple voice command, you can take control of your smart home, turn on and off the TV, change channels, and much more.

Dolby Vision HDR*

Dolby Vision High Dynamic Range offers an incredible new vision for experiencing your favorite HDR games, movies and shows by adding dramatic color, contrast and brightness to every second of every scene. And with Dolby Vision, HDR10 and HLG formats supported, the R8F gives you more ways to dive deeper into epic-level color and detail as it transforms your viewing experience.

Wide Color Gamut

It's simple: The more colors you have and the more accurate they are, the more life-like your picture becomes. The R8F features Wide Color Gamut which increases the total array of colors on display. This means you can experience the full spectrum of colors with more intensity.

Motion Rate

The R8F is built with motion in mind. Premier hardware and smart image-processing work in sync to deliver Motion Rate 240, so you can keep your eye on the ball, a chase scene, or a multiplayer battle. Captivating scenes grab your attention – and keep it with smooth motion.

Dolby Atmos®

Experience how Dolby Atmos transports you from the ordinary into the extraordinary with breathtaking, moving audio that fills your room and flows all around you.

*HDR viewing experience will vary by model, content availability and internet connection.
