

INTRODUCTION

What once started in 1992 out of a garage is now an international business with manufacturing and distribution facilities in four different countries. Leapers, Inc. develops, manufactures, and distributes a wide array of practically innovative hunting and shooting sports oriented products. After 29 years of hard work and dedication, our company headquarters consists of a 3-building complex with over 150,000 square feet of space located in Livonia, Michigan. Fully equipped and staffed to accomplish our very own in-house product design, development, manufacturing, order fulfillment and distribution, our UTG® and UTG PRO® brands have gained wide spread recognition with a loyal customer base around the globe. We continue to dedicate our efforts to promote and uphold the hunting and shooting sports lifestyle.

MISSION

The Leapers UTG mission is to promote a quality lifestyle for the hunting and shooting sports by offering innovative and solution-oriented accessories with complete concept-to-delivery services to customers around the world. Innovation, quality, value, and service are the central themes for the UTG brand.

MILESTONES

Currently underway is the continued advancement and procurement of our UTG PRO Michigan manufacturing facility and headquarters. In addition to tooling up, setting the stage for our USA optics division at the Livonia, Michigan branch are several new onsite expansions to include a new 100 yard indoor shooting range, dedicated dust-free optics assembly rooms, and an optics control and verification lab. All of which will ensure that quality execution is met before, during, and after production.

2021

2022

30 YEAR ANNIVERSARY

Established UTG Taiwan manufacturing center to add new product lines and further support customers globally.

2016-2020

Established UTG Europe Distribution Center in Germany to support international customers.

2010-2015

Established UTG China manufacturing plant for wide scale production. Established UTG PRO USA manufacturing plant.

2004-2009

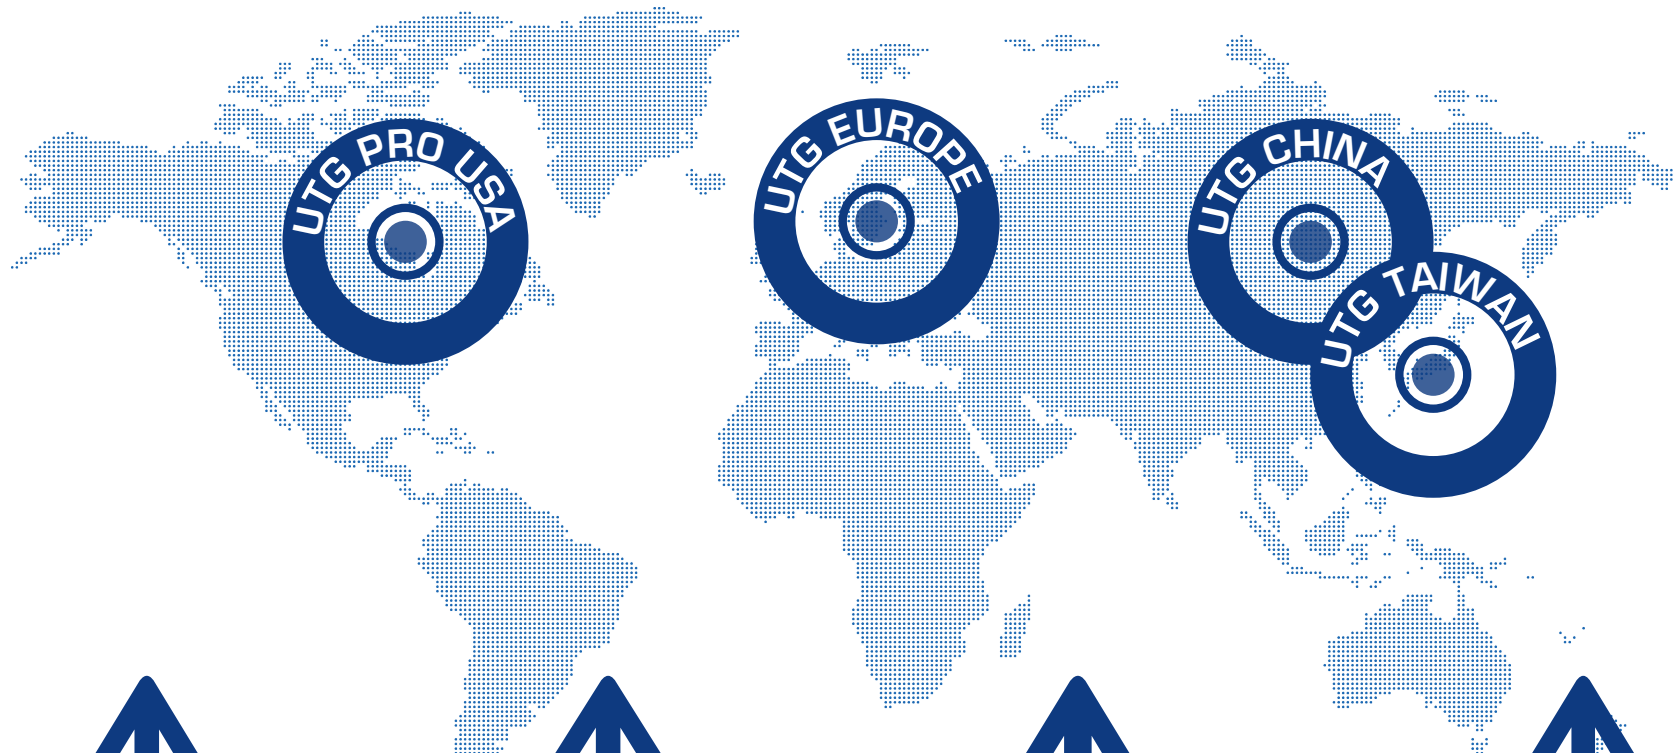

Purchased our 1st 14,000 sq. ft. commercial building for business growth. Began exhibiting at the IWA SHOW.

1998-2003

Founded our garage business and made our first sale of a 4X28 scope. Began exhibiting at SHOT SHOW.

RESEARCH AND DEVELOPMENT

PRACTICAL INNOVATION & EXCEPTIONAL VALUE

INTRODUCTION

Research, analytical, thoughtful, and thorough product considerations is behind every one of our products. We cater to our consumers every year, basing each and every one of our products off of their feedback. Product concept considerations are gathered together and analyzed by multiple teams and industry experts, each with their own eclectic shooting background, providing perspective from different points of interest and understanding.

PRACTICAL VALUE MINDED

Stringent requirements ensure practical value is met during the developmental ages of our products. This puts more products in the hands of more consumers. Access to real solutions should not be a privilege to just a select few, but to all with a price point that can be budgeted alongside other necessities. This is not simply a trend, but a commitment set by us to tether practical and innovative solutions with that of exceptional value. From there, design elements are considered based on durability, aesthetics, and ergonomics. An eclectic team of dedicated electrical, mechanical and industrial engineers is assigned to each individual product category to include: optics, dot sights, mounting systems, bipods, and more.

CONCEPTUAL DESIGN

Designed and certified in Michigan, over 700 products and counting are put through our vigorous product roadmap where complete product solutions and market segment considerations such as product enhancements, series determination, feature sets, and variety demand are all intricately mapped out. Rapid prototyping, industrial-grade 3D printing, and rendering confirm or deny product concept iterations and their validity and usefulness early on and with precise accuracy. Individual product feature testing reveals areas of improvement and ensures areas of stress are reinforced to ensuring the value found in the longevity of a product is met. Research is conducted on the latest in electronic components, machining and molding materials.

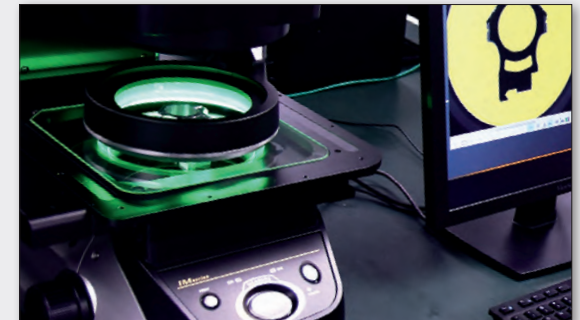

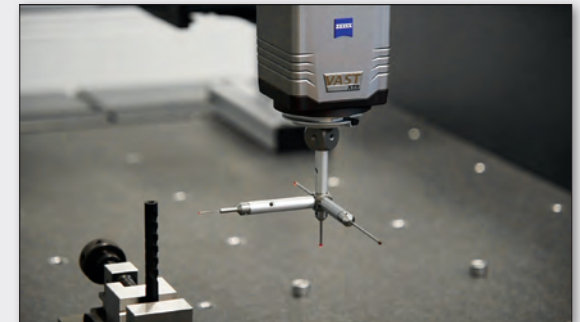

THOROUGH TORTURE TESTING

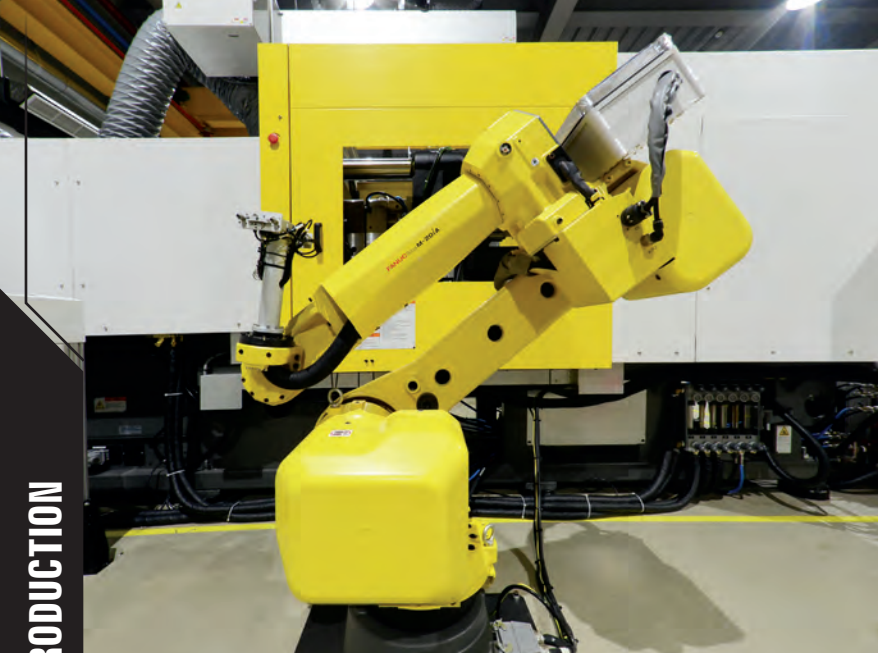

A battery of testing procedures to include: live-fire, simulated shock, temperature extremity, drop testing, and salt spray corrosion testing are used early on in our product's development. Determining when and where things go wrong and at what limits, allow us to take the necessary measures to ensure designs are accommodated, changes are accounted for, and products are reliably reinforced before reaching our customers. Strictly scheduled quality control inspections, tight tolerances, precise machining, and industry standard finishes keep our products at the ready for the everyday shooter.

PRODUCT QUALITY VALIDATION

Beyond torture testing, every product at the production level undergoes quality validation before being boxed up and ready to ship using advanced equipment like the Leitz and Zeiss automated coordinate measuring machines (CMM), optical collimators, and more. Validation requires stringent quality control measures that ensure products are to the correct specifications and includes testing for critical dimensional tolerances, screw thread integrity, overall product function, optical resolution, contrast, and focus, and parts fitment and installation.

ADVANCED MANUFACTURING & TECHNOLOGY

PROFESSIONALISM FROM START TO FINISH

In total as of 2020, Leapers, Inc. is equipped globally with over 160 turn and mill, CNC, milling, Lathe, and injection-molding machines total. Having this level of machining capability and capacity produces not only quality products set to the strictest of standards, but quality products at quantity. Businesses domestic or international, too can enter our original equipment manufacturing (OEM) business partnership with potential to grow their business and expand their product production to new heights.

UTG PRO® USA MANUFACTURING CENTER

Leapers, Inc. started the UTG PRO® line of Made in USA products in 2009. Since then, our manufacturing operations equipped with industry-leading aerospace grade MAZAK CNC machines and advanced RoboShot polymer injection molding machines produce quality USA made products and OEM parts to consumers and manufacturers on a daily basis. A dedicated part of our manufacturing space implements our fully in-house Cerakote® finishing facility, as well as, our Miyano 9-axis CNC Super Turning Centers to extend our capabilities towards providing additional opportunities to our business partners looking for an end-all manufacturer. The growing popularity of our UTG PRO® products continues to fuel our commitment to provide consumers with USA made products that compete at every level. You can count on Leapers, Inc. to persevere and we value the continuous support from our loyal customers.

UTG® TAIWAN MANUFACTURING CENTER

Equipped with world class Japanese Fanuc and Brother CNC machines, Tsugami 6-axis Swiss machines, Fanuc polymer injection molding, and Fanuc and Yushin automated robotics UTG Taiwan, with its world-class automated manufacturing operations, answers the international demand for quality shooting sports products. In addition, to ensure industrial and mil-spec standards, the facility is equipped with German precision inspection and testing equipment for executing stringent quality control testing, validation, and certification requirements. Product manufacturing includes a unique range of high quality mounts, sights, magazines, OEM components, and a line of integrated optics.

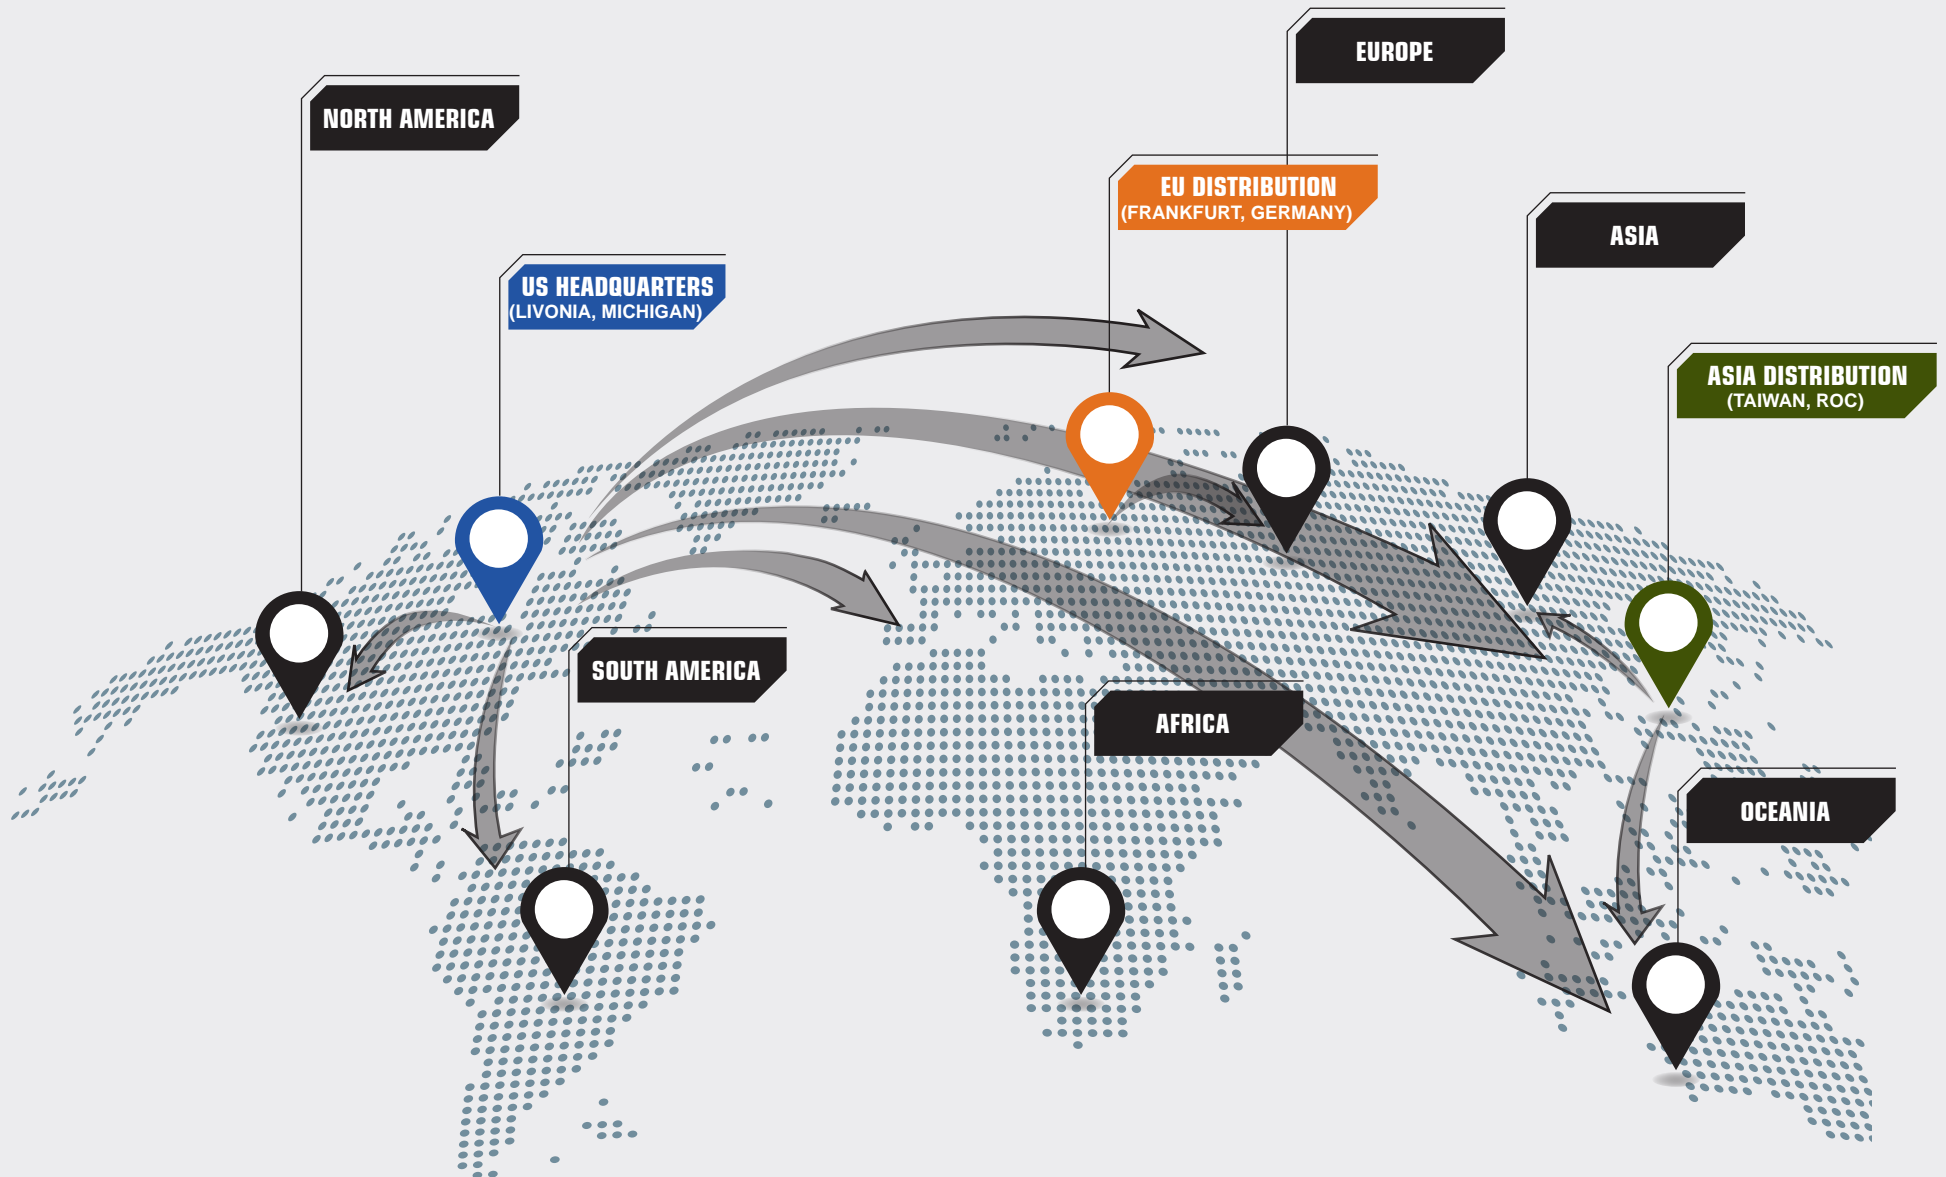

UTG® CHINA MANUFACTURING CENTER

The UTG® business philosophy is complete vertical integration. In the past 2 decades, we have consolidated our overseas operations into a wholly owned subsidiary with R&D engineering, manufacturing, and production guided by UTG® quality control and management. To date, our overseas operations have the sophisticated technical equipment required for light/laser production, specialized dust-free rooms for optics assembly, automated CNC machines for a wide variety of metal parts production and more. When buying UTG® products, you are not buying any sub-contractors' products from unknown sources. You are getting US designed products made from UTG® controlled manufacturing processes, technical assistance, and customer support.

GLOBAL DISTRIBUTION

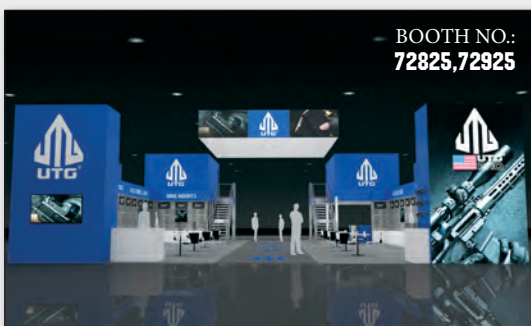

GLOBAL SERVICES & CUSTOMER TRUST

With facilities present across the globe providing points of access to products, support, and services we are able to reach out to our customers in multiple ways, fulfilling their needs when it comes to catering to their customer base and region's demand, and further upholding their passion for the shooting sports and great outdoors lifestyle. Customers can expect on-time delivery of their orders and high level professionalism in regards to product knowledge, regional regulations, import/exports, and the logistics required for a smooth, painless, and safe transit. Reaching our customers internationally and providing them the same level of support, enjoyment, and unfaltering commitment we preciousely have here domestically is our ultimate goal.

PROFESSIONALISM FROM START TO FINISH

With a network of manufacturing and distribution facilities around the globe and our 28 years of industry experience, we at Leapers, Inc. have the capacity, the knowledge, and the persistent drive to ensure our customers are satisfied before, during, and after they order from us. From taking in a customer order, whether domestic or international, allocating products for fulfillment, to palletizing skids or boxing up a single package, we take pride in the thoroughness and precision of our world-wide distribution.

WORLD-CLASS ORDER FULFILLMENT

In tandem with our sister companies, our Michigan-based order fulfillment center and headquarters is our most advanced shipping and receiving hub capable of executing a plethora of different logistical feats simultaneously. Providing a one-stop shopping experience requires seeing the whole picture from concept to delivery. Customers receive a wide variety of innovative products to choose from, designed and prototyped entirely in-house and backed by our very own customer service team. They also receive the care and attention to detail when it comes to their individual order fulfillment. Receiving the correct products and quantities, undamaged out-of-the-box, in a timely manner requires a world-class order fulfillment center capable of high volume turnaround and direct-to-consumer drop shipping. Like our products, we strive to constantly improve our business practices to better our services and have switched to environmentally friendly, energy saving, and resource efficient operations with the use of wireless and paperless fulfillment procedures, gravity-fed pallet flow racks, motion-sensor-controlled conveyors and lighting, and maximized shipping carton space algorithms.

SERVICE BEYOND THE PRODUCT

The business relationships we build from the ground up together with our customers is maximized individually by determining what it takes for them as a manufacturer, storefront, distributor, online retailer, etc. to thrive and prosper with us. When customers choose to buy our products they are not only receiving products in hand, but are receiving our full assortment of solution driven services.

- Brand identifiable and high-visibility retail packaging optimized for storefront display and online retailing
- Access to high resolution images, graphics, manuals, download or in-print complete catalogs, etc. direct from our very own in-house creative design team and tailored to your needs
- OEM Production with competitive pricing, accommodating MOQs, and timely fulfillment
- Wholesaler ready with pricing structures intact with generous tier to tier margins and shipping and marketing allowances strategized and implemented in advance
- All products that bear our name come attached with The Best Never Rest lifetime warranty. Simply put, customers can put their mind at ease knowing their purchase and support of our products is covered for life.
