

WEST COASTth COMPUTER FAIRE PROGRAM

				
	<p>The Conference & Exposition On Inexpensive Computing For Home, Business, Industry & Education</p>			
				
				
				
				
				

April 3 - 4 - 5, 1981

San Francisco Civic Auditorium & Brooks Hall

If you want a choice in print wheels, there's only one choice in printers.

The Diablo 630.

It's the only printer that lets you use either metal or plastic print wheels. So you can choose the print wheel that's just right for the job.

The 630 works as well with a 96-character plastic daisy print wheel as it does with an 88-, 92-, or 96-character metal daisy print wheel. In over 100 different type styles.

Every 630 has fewer moving parts than competitive printers, which makes it more reliable. And it offers unsurpassed print quality. Compatibility with Diablo supplies. And bi-directional printing capability.

The 630 is the only printer in the world that uses both metal and plastic wheels.

So if you want to change your print wheels, you'll just have to change your printer.

To a Diablo 630 printer.

Diablo Systems

XEROX

Unique Professional Seminar
for the first time
Computer Faire sponsors a Professional Training Program

Designing User Interfaces for Users

Lecturer: Dr. Jack Grimes, Tektronix

Friday, April 3, 1981, 1pm-5pm
at the
6th West Coast Computer Faire

enrollment limited to 75

The Lecturer:

currently:

Manager, Advanced Development for Desktop Computers,
Tektronix

Adjunct Professor of Computer Science, Oregon State
University

Researcher in visual perception, Tektronix & University of
Oregon

internal consultant to management on technology issues,
Tektronix

recently:

Co-chair, 2-day "User Interface Design" Workshop, SIGGRAPH
'80

Distinguished Visitor, IEEE Computer Society lecturer program
Technical Editor, IEEE Computer magazine

Manager, 4051 Graphics Computer Systems Software Group,
Tektronix

International Tutorials Lecturer, e.g.

China Technology Exchange Program, 1979

Computer Architecture Workshop, Nexdorf, 1976

2nd USA-Japan Computer Conference, Tokyo, 1975

published over 20 papers on user interface design, computer
architecture, and silicon technology

frequent guest lecturer before professional and technical groups

The Seminar:

1. Introduction — brief!

2. Knowledge acquisition — *How do users acquire and utilize
information in interactive systems?*

3. Time — *What makes a user interface interactive?*

4. Emotional — *Why do some systems make users nervous?*

5. Real systems — *What are the strengths and weaknesses of
existent systems?*

videotapes and discussion of a number of
commercial and experimental systems

As the number of computer-naive people using computer-based
systems grows, the design of the user interface increasingly effects
the success of those systems.

This professional seminar will cover the user side of user inter-
faces to computer-based equipment. The seminar is aimed at systems
designers and programmers who are interested in learning more about
current issues and questions, for example:

When are menus a good technique?

What role does the CRT display play?

What makes a system friendly?

How do you measure interactivity?

The emphasis will be on pragmatics and applications; not
theory.

The seminar presents the results of five years of research into
the human factors as they apply to how users interact with computer
systems.

User interfaces to several experimental and commercial systems
will be presented and analyzed to illustrate key principals.

Seminar registration is \$70 and includes:

- registration for the 6th West Coast Computer Faire
conference & exposition
- complete set of handouts, including lecture notes and article
reprints

Attendance is limited to the first 75 who enroll.

Please enroll me in the Professional Seminar, "Designing User Interface for
Users", taught by Dr. Jack Grimes, to be held Friday, April 3, 1981, 1pm-5pm,
at the West Coast Computer Faire in San Francisco's Civic Auditorium & Brooks
Hall.

A check for the \$70 enrollment fee is enclosed (payable to "Computer
Faire Seminar Program").

I understand that, if this application arrives after the seminar is filled to ca-
pacity, the check will not be deposited and will be promptly returned to me.

Turn in this form & payment to Computer Faire Office.

This seminar is a condensed, updated version of the 2-day "User
Interface Design" program co-chaired by Dr. Grimes during the
SIGGRAPH '80 Conference. This was the largest of six tutorials
given during that Conference, attended by 275 systems designers and
programmers. Evaluations of that program included such comments
as:

"Well surveyed and organized"

"Liked Jack Grimes post-mortem of successful systems"

"Both content and presentation excellent"

"Good handouts"

The program was so well-received that it will again be offered at
SIGGRAPH '81.

The seminar at the Computer Faire has been updated from the
SIGGRAPH '80 program, based on extensive feedback and evalua-
tions, including requests for case studies of actual systems (presented
via videotape) for review and discussion.

	Conference Room 1	Conference Room 400	Conference Room 2	Conference Room 415

WHAT Makes your old mill run?

It ain't hardware, folks.

It's SOFTWARE

systems software
applications software

and DATA —

fuel for your software to use,
to get you places, fast!

and DOCUMENTATION —

quickie reference cards & charts for speedy users
tutorial documentation for new users
reference documentation for ol' users

Software — Documentation — Data
that's what

DataCast™

(the hardcopy version)
is all about.

DataCast is a users' reference newsletter.
It's for USERS.

It's not for hardware tinkerers (except as they may also be software tinkerers).
It's not for game players.

Most particularly, its for users of certain

Software —

CP/M and MP/M from Digital Research
UNIX from Bell Labs
AMOS from Alpha Micro
DEC-8 and DEC-11 software from Digital Equipment Corporation

Documentation & document preparation —

DataCast will carry readable, usable documentation — tutorials, reference chapters, and quickie cards & sheets — for all of the above.

It will also address text processing & computerized typesetting under the above systems.

Mass digital data communications —

What's available — MicroNet offerings, Source stuff, etc. — and how to access and use them
What's developing — Teletext, Prestel, Datacast (the broadcast version), etc.

If you want to USE the hardware you have — DataCast is for YOU!

Subscribe Now! Don't Miss an Issue!

(first issue will be out by July)

Can you afford to not subscribe?

Would good documentation save you two hours/year?

Is your time worth \$9/hour?

Subscriptions are only \$18/year, published bimonthly.

Send to: DataCast, 345 Sweet Road, Woodside CA 94062, (415)851-7075.

YES! Please enter my subscription to **DataCast™** (the hardcopy version), Jim Warren's new users' reference periodical.

Be sure to start my subscription with the **first issue**. I want to have all of these reference volumes.

I enclose \$18 (U.S.) for one year's subscription (bimonthly). I am particularly interested in articles about the following:

<input type="checkbox"/> Please send me foreign rates.	<input type="checkbox"/> CP/M system (make & CPU)
<input type="checkbox"/> Please bill me. I will promptly pay, so my subscription can promptly begin.	<input type="checkbox"/> MP/M system (make & CPU)
<input type="checkbox"/> Bill to my charge card; <input type="checkbox"/> MasterCharge, <input type="checkbox"/> Visa	<input type="checkbox"/> UNIX system (make & CPU)
No. _____	<input type="checkbox"/> DEC-8 system (model)
expires _____	<input type="checkbox"/> DEC-11 system (model)
M/C bank code _____	<input type="checkbox"/> memory size (x8 or x11)
(please type or print)	<input type="checkbox"/> memory (size, x8 or x12)
name _____	<input type="checkbox"/> floppy disc (make & size)
mailing _____	<input type="checkbox"/> hard disc (make & capacity)
address _____	<input type="checkbox"/> daisywheel printer (make & model)
city _____	<input type="checkbox"/> CRT terminal (make & model)
state _____	<input type="checkbox"/> multiuser system (max. simultaneous users)
ZIP/postal code _____	<input type="checkbox"/> datacomm equipment (make & model)

S62W

The person honchoing *DataCast* is Jim Warren.

He was the first editor of *Dr. Dob's Journal*, the first periodical to address micro-computer software — and built an international reputation for the definitive quality of *DDJ's* editorial content.

He created the Computer Faires, which consistently have the best Conference programs and information exchange of all micro-computer conventions.

He created the *Intelligent Machines Journal* — now *InfoWorld* — to offer a fast-turn-around news medium to the fast-changing micro world.

Now, he's returning to his first love (and 15-year profession) — software, his recent fascination — publishing readable and useful information, and his future goals — inexpensive, useful mass information communications.

THE LAST ONE[®] YOU'LL NEVER NEED BUY ANOTHER PROGRAM.

Say goodbye to the delays and frustrations associated with software: The Last One[®] will soon be available.

Quite simply, The Last One[®] is a computer program that writes computer programs. Programs that work first time, every time.

Unbelievable?

Contact your computer dealer for further details. Or send for an information pack.

Better still, The Last One[®] will be on demonstration at the Holiday Inn Convention Centre, San Francisco from April 3 to 5 (same dates as the 6th West Coast Computer Faire).

THE LAST ONE[®]

THE PROGRAM THAT WRITES PROGRAMS.

CARL HELMERS PERSONAL COMPUTER LETTER

*An honest, professional
evaluation each month
of technologies, trends
and events in the field
of personal computers.*

Carl Helmers

Carl Helmers has been a pioneer in the growth of personal computing. He has observed and commented on the developments in this dynamic industry over the past five years as co-founder and the first editor of BYTE Magazine. Now his insight and invaluable comments are available to you exclusively through the Carl Helmers Personal Computer Letter.

Topics covered in each monthly letter will concern the design, marketing and support of small computer hardware and software. **Upcoming topics include:** The State of Personal Computing, 1981 • Mass Storage Technology • Configurable Software • Standards: Are They Necessary? • Local Communication Networks In Home, Office and Factory • Interactive Operating Systems — and much more.

Subscribe now...and receive the January 1981 Charter Issue FREE. Be among the innovators, manufacturers, marketing executives, analysts and writers of the small computer industry who keep informed by reading the monthly CARL HELMERS PERSONAL COMPUTER LETTER. Complete and mail the coupon TODAY.

SHORTEN THE JOURNEY TO KNOWLEDGE.

SAMS COMPUTER PRIMERS

The popular Sams series of Computer Primers provide a working knowledge of computers without being dry and complex. The Primer Books guide you through the subject at an easy pace. Your journey to understanding is short, exciting, and fun. The Sams Primers offer good graphics ... a good balance of data ... an upbeat, positive style ... and are organized so that you can read them straight through like a novel.

CP/M™ PRIMER,

by Mitch Waite and Stephen Murtha. A non-technical discussion of CP/M disk operating systems for 8080 and Z-80-based microcomputers. No. 21791. \$11.95.

PASCAL PRIMER

A complete guide to the hottest new language in computers by Mitch Waite and David Fox. No. 21793. \$16.95.

COMPUTER GRAPHICS PRIMER

An easy-to-understand guide to creating drawings, plans, maps, and schematics on a computer monitor. By Mitch Waite. No. 21650. \$12.95.

MICROCOMPUTER PRIMER

(Second Edition)
Up-to-date facts on popular microcomputers. Don't buy a computer without reading this book by Mitch Waite and Michael Pardee. No. 21653. \$11.95.

BASIC PROGRAMMING PRIMER

A valuable guide to BASIC, today's most widely used microcomputer language. By Mitch Waite and Michael Pardee. No. 21586. \$10.95.

AVANT-GARDE CREATIONS HAS SOFTWARE

Over 50 disks available in areas of education, art/design, games, business, utilities, and self transformation!

Write for catalogs!

THE CREATIVITY TOOL BOX Draw, write poetry, music. Includes Action Sounds, Hi-Res Scrolling, routines, shape tables with shape view program, utilities, animation demo, and fonts. **\$44.95**

"...Impressive...satisfying...Interesting...fun!" Peellings (The Magazine of Software Reviews)
"Truly different...unique...the program is an enjoyable one...cute...very interesting...new...nice...a good value!" Apple Orchard (Winter)

We have MORE!

CHAMBERS OF ZENOBIA A new adventure game with Hi-Res & sounds **\$15.95**

5 Great Games! Animal Bingo, Jungle Safari, Space Defense, Sky Watcher, Air Traffic Controller **\$29.95** (or \$9.95 each)

5 MORE GREAT GAMES! Deep Sea Treasure, Mystery Code, Depth Charge, The Mine Fields of Normalcy, Turn 'Em Loose **\$29.95** (or \$9.95 each)

THE COMPLETE MAILING LABEL & FILING SYSTEM Filing, label-making, binary sort, dynamic sorting, directory, quick-find, formatted reports, character code sorts, zip or alphabetical order, two-level sorting and more! **\$59.95** (4 disks & 3 manuals)

SENTENCE DIAGRAMMING Educational, grades 6-12 **\$19.95**

ACTION SOUNDS & HI-RES SCROLLING Designed to give your program the excitement of action & sound **\$15.95**

SUPER DRAW & WRITE Fonts, drawing, and useful utilities **\$15.95**

SUPER SHAPE DRAW & ANIMATE The best system yet, it works...create and/or animate shape tables like a dream... **\$34.95**

DEMO DISK I Some of our best stuff **\$9.95**

DEMO DISK II More of our best **\$9.95**

AND INTRODUCING: THE ZENITH EDUCATION SYSTEMS Easy-to-use programs designed to aid in creation, modification, monitoring and grading lesson material. **Demonstration package available for \$10.00 (Includes 2 disks and a booklet)**

Complete Z.E.S. System **\$250.00**

**if He'd used select[™]
it wouldn't have taken seven days**

Learn SELECT^{*} in just 90 minutes. A whole new word processing software concept that kicks the coded key habit and frees you from complicated instruction manuals. *SELECT* is fast. *SELECT* is logical. With single key mnemonics, you'll use dozens of commands that instantly access the rich capabilities of this system. There's nothing like it.

Simply hit "C" and you'll be ready to Create a document.

Key "I" and you'll be in the Insert mode.

Key "M" and Move entire blocks of text . . . and key dozens more.

That's all there is to it. You'll get all that word processing software promises . . . plus a few surprises.

SELECT with SUPERSPELL.^{*} The only microcomputer software with an integrated spelling dictionary. To proof your text all you do, of course, is to key "S". *SUPERSPELL* with its 10,000 word dictionary scans your text at computer speed then displays and corrects all your typing errors. You can increase *SUPERSPELL*'s word power and customize the dictionary by adding new words, one at a time. Ask to see it today at your local dealer.

SELECT with SUPERSPELL . . . just a little byte more.[™]

SELECT will run on any machine that uses CP/M or MP/M** or its derivatives. It needs 40K of RAM and two disk drives. Special version now available for Radio Shack Mod II*** and Apple II****.

When You Have To Face A Deadline

Arm Yourself With Pascal/MT+®

See you at Computer Faire Booth #1608

You know what a monster a deadline can be if you have to face it without the proper tools. Arm yourself with an integrated set of programs, designed from the beginning for production use, all tuned to the single goal of producing reliable software. **Pascal/MT+** is a fully integrated program production system including our compiler, debugger, disassembler and inker.

Used by many companies, large and small, **Pascal/MT+** produces high quality reliable products in an amazingly short amount of time. Our run-time library contains all the tools needed to begin program construction immediately. **Pascal/MT+** produces efficient, small native machine code demanded by today's product developers. All of our library routines and features work exactly the same on 16-bit systems as they do on 8-bit systems so you can increase your capability without re-writing any of your software. Your production quality products demand production quality tools. Order **Pascal/MT+** now, call us today!

Pascal/MT+ Features:

An International Standard:

Pascal/MT+ conforms to the ISO Standard for Pascal, our competition doesn't even come close! A report on the performance of **Pascal/MT+** on the Pascal validation suite is included with each compiler.

Modular Program Compilation:

The **Pascal/MT+** modular compilation mechanism allows construction of fully coupled modules and programs allowing the modularization of large programs without any sacrifice in either space or time efficiency.

Efficient Native Code:

All versions of **Pascal/MT+** produce efficient, compact NATIVE OBJECT CODE. In an independent benchmark **Pascal/MT+** outperformed all other Pascal compilers on our target machines. In addition it produced the smallest final programs by including only the minimum run-time overhead necessary.

Totally Portable:

Pascal/MT+ has been designed from the beginning to generate code for many different microprocessors. **Pascal/MT+** programs you create today can be re-compiled to run on a more powerful machine tomorrow. All of the extended language features are present in every version of the compiler. This means you won't have to start over when the customer demands more, more and more.

Extensions:

Pascal/MT+ has many extensions to the Pascal language too numerous to describe in detail here. Our 160 page user's guide describes the features and gives examples of how to use them. A short summary of features is listed below: dynamic strings, BCD and Floating point reals, AMD9511 support, bit, byte and unsigned word manipulation, I/O port access, a full implementation of the NEW and DISPOSE heap and many others.

Target Machines:

Available now 8080, 8085 and Z80
Available soon 8086, 8088
Coming 68000, 6809 and Z8000

AMERICAN LEASING

2175 De La Cruz, Santa Clara, CA

IMAGINE THE STORAGE ON AN 8 INCH FLOPPY

315K BYTES PER SIDE ON 5 1/4" - OF COURSE. Micropolis the world's largest manufacturer of high density 5 1/4" disk drives has been doing it for years. And reliably at that.

An ordinary 5 1/4" floppy provides just 35 tracks per side and stores only 70K bytes. This is not nearly enough for anything useful, so instead, Micropolis uses 77 tracks per side. Each track is then formatted with 16 sectors (hard) at 256 bytes per sector yielding an impressive 315K bytes per side.

Micropolis drives have a larger capacity than many 8" disk drives, though it only occupies the space of a 5 1/4" floppy. The 315K byte capacity is roughly 4 times the capacity of a standard 5 1/4" drive. This is what we call QUAD DENSITY.

To achieve the high density capability, you may think Micropolis had to sacrifice speed or reliability. NOT SO! The track to track access time is only 30ms with a high speed data transfer rate of 250,000 bits per second.

By creating this high density format, Micropolis is able to keep your initial subsystem costs to a minimum. Your cost is less than \$600 per byte. That's a BIG VALUE in a small package.

MICROPOLIS disk subsystems are expandable to keep up with your ever increasing needs. Up to four drives/heads may be daisy-chained on one 5-00 controller board. With all four drives/heads in operation, you have access to over 12 MEGABYTES of on-line storage. **FILE PROTECT**

WITH MICROPOLIS, complete means COMPLETE. Each subsystem comes complete with controller interface, cable, and software. The software includes the MDOS operating system, extended basic, assembler and editor. Everything you need to get "On Line" in one complete package.

MICROPOLIS provides total integration which means they control everything from beginning to end. The result is a better drive for you, backed by a full 120 day factory guarantee.

Anyone can cut price by cutting out capacity or valuable features. But there's no long term advantage in it. Not for the user. Or the builder.

MICROPOLIS takes a better approach, even though it's harder, using advanced design to provide more capability while also lowering cost.

For example, most 5 1/4-inch floppy disks cut costs by using a cheap, less accurate plastic cam or cam follower to position the read/write head. Most 8-inch floppy disks use a better approach, with a rolled steel lead screw for this function.

We go them one better and use an all-steel system, with a precision-ground steel lead screw and steel follower. It costs more but gives us greater storage capacity with lower cost per thousand bytes. Not so incidentally, our steel construction (compared to plastic) significantly increases reliability, too. There's even a built-in File Protect feature that prevents accidental loss of valuable data. (A file protected diskette cannot be written on.)

Heat can cause numerous read and write errors that can become hazardous to your data. The major heat producing power supply components are mounted to a large heat sink, external to the cabinet, by the power switch and fuse (located at the rear of the cabinet). This design is to assure that the drive components are kept as cool as possible to assure reliable data recovery.

MICROPOLIS has a reputation for getting along with most everybody. Compatibility is not a problem with MICROPOLIS. Their disk drives and/or subsystems can be easily integrated into systems such as Polymorphic, Cromemco, CCS, Itica Intersystems, Godbout, Northstar, Jade Big Z, GF 5BC 2/4, and many others. Many OEM manufacturers rely on MICROPOLIS to get the job done efficiently. Companies like Commodore, Eridy, Harris, and Vector Graphics to name just a few. Years from now, you can look back with a secure feeling knowing you made the best choice. MICROPOLIS.

AGE CAPACITY OF IN 5 1/4" FORMAT

SHOW
SPECIALS

THIS

NOT THIS

Because of our incredible purchasing power, PRIORITY ONE ELECTRONICS is able to buy MICROPOLIS disk drives by the thousands and receive special pricing. That special pricing we receive is passed on to you in the form of tremendously discounted prices. Now all that remains is for you to take advantage of this truly incredible buy.

GOOD NEWS FOR TRS-80* OWNERS

We now have a complete line of TRS-80* Model I compatible MICROPOLIS add on drives in matching colors. These drives simply plug into the expansion interface via a disc data cable.

197K BYTES PER SIDE FOR YOUR TRS-80*, that's easy! Just order a 77 track add on drive and the New DOS-80 operating system. Among the many features of NEW DOS-80, is its ability to control any mix of 35, 40 or 77 track drives on the same cable.

in 1981's
Golden Opportunity

- The schedule of shows will be **1981**
- 1 Cleveland, Ohio — August 14-16
 - 2 Milwaukee, Wisconsin — August 20-23
 - 3 St. Paul, Minnesota — September 9-11
 - 4 Detroit, Michigan — September 24-26
 - 5 Pittsburgh, Pennsylvania — October 1-3
 - 6 St. Louis, Missouri — October 15-17
 - 7 Dallas, Texas — October 22-24
 - 8 Los Angeles, California — November 8-10
 - 9 San Francisco, California — November 19-21
 - 10 Denver, Colorado — December 3-5

Comp-U-Con Company presents — 10 Home and Business Computer Festivals — From Coast to Coast.

These shows will be directed toward the home user/hobbyist and small businessman and will be promoted by a full scale publicly appealing package of inducements — such as speakers on subjects of particular interest to the targeted groups and a drawing for a \$3000.00 computer system.

If your company has an interest in greatly increasing its sales this fall and does business within a 300 mile radius of any or all of the targeted cities. These shows are exactly what your looking for.

You may participate on two levels. You may either purchase Booth space, in which you can present and demonstrate your goods directly to the public, or you can purchase advertising space in each shows handout brochure that will be given to all that attend.

The average attendance is expected to range from 20,000 up to 35,000 people with additional information going out by mail to those who can't attend.

Please Call or Write today for complete details and costs. Write to — The Weston Research Institute, P.O. Box 175, Waverly, IA 50677 or Call Jeff Weston, Collect at (319) 268-1953.

Note - Because of limited space availability, an early reservation is recommended to assure you of space.

SZ Software Systems

1289 Rubio Vista Road, Altadena, Calif. 91001
(213) 791-3202

TRS-80 SERIAL I/O

- Can input into basic
- Can use LIST and LPRINT to output, or output continuously
- RS-232 compatible
- Can be used with or without the expansion bus
- On board switch selectable baud rates of 110, 150, 300, 600, 1200, 2400, parity or no parity odd or even, 5 to 8 data bits, and 1 or 2 stop bits. D.T.R. line
- Requires +5, -12 VDC
- Board only \$19.95 Part No. 8011D, with parts \$76.63 Part No. 8010A, assembled \$29.25 Part No. 8010 C
- No connectors provided, see below.

GAME PADDLES & SOUND FOR TRS-80

Includes: 2 game paddles, interface, software, speaker, power supply, full documentation including: schematics, theory of operation, and user guide; plus 2 games on cassette, Pong and Starship War \$157.29 Complete Part No. 7922C

OPTO-ISOLATED PARALLEL INPUT BOARD FOR APPLE II

Part No. 120, with parts \$69.95, Part No. 120A.

There are 8 inputs that can be driven from TTL logic or any 5 volt source. The circuit board can be plugged into any of the 8 sockets of your Apple II. It has a 16 pin socket for standard dip ribbon cable connection. Board only \$15.65

SUPER MODEM

Originate, RS-232 and 20mA compatible. Full duplex, and half duplex, direct connect or a-coustical coupled, on board power supply, carrier detect light, DB25 plug, 300 BAUD, Type 103 compatible frequencies. Bare board Part No. 2000 \$21.85, Kit Part No. 2000A \$133.80

SERIAL/PARALLEL INTERFACE

- Converts serial to parallel and parallel to serial
- Low cost on board baud rate generator
- 110 to 19.2K
- Low power drain +5 volts and -12 volts required
- TTL compatible
- All characters contain a start bit, 5 to 8 data bits, 1 or 2 stop bits, and either odd or even parity.
- All connections go to a 44 pin gold plated edge connector
- Board only \$11.95 Part No. 101, with parts \$42.89 Part No. 101A, 44 pin edge connector \$4.00 Part No. 44P

8K EPROM SAVER

- Programs 2708's address relocation of each 4K of memory to an other 4K boundary
- Power on jump and reset jump option for "turnkey" systems and computers without a front panel
- Program saver software in 1 2708 EPROM \$25. Bare board \$45.59 including custom coil, board with parts but no EPROMS \$164.69.

APPLE II SERIAL I/O INTERFACE

Baud rate is continuously adjustable from 0 to 30,000

- Plugs into any peripheral connector
- Low current drain.
- RS-232 input and output
- On board switch selectable 5 to 8 data bits, 1 or 2 stop bits, and parity or no parity either odd or even
- Jumper selectable address
- SOFTWARE
- Input and Output routine from monitor or BASIC to teletype or other serial printer
- Program for using an Apple II for a video or an intelligent terminal.
- Also can output in correspondence code to interface with some electricrics.
- Also watches DTR
- Board only \$14.95 Part No. 2, with parts \$51.25 Part No. 2A, assembled \$62.95 Part No. 2C

PARALLEL TRIAC OUTPUT BOARD FOR APPLE II

This board has 8 triacs capable of switching 110 volt 6 amp loads (660 watts per channel) or a total of 5280 watts. Board only \$15.65 Part No. 210, with parts \$119.95 Part No. 210A.

APPLE II PROTOTYPING HOBBY/CARD

Part No. 7907 \$21.95

RS-232/20mA INTERFACE

This board has two passive, opto-isolated circuits. One converts RS-232 to 20mA, the other converts 20mA to RS-232. All connections go to a 10 pin edge connector. Requires +12 and -12 volts. Board only \$9.95, part no. 7901, with parts \$14.95 Part No. 7901A.

T.V. INTERFACE

- Converts video to AM modulated RF, Channels 2 or 3. So powerful almost no tuning is required. On board regulated power supply makes this extremely stable. Rated very highly in Doctor Dobbs' Journal. Recommended by Apple
- Power required is 12 volts AC C.T., or +5 volts DC
- Board only \$9.19 part No. 107, with parts \$18.85 Part No. 107A

TAPE INTERFACE

- Converts a low cost tape recorder to a digital recorder
- Works up to 1200 baud
- Digital in and out are TTL serial
- Output of board connects to mic. in of recorder
- Earphone of recorder connects to input on board
- No coils
- Requires +5 volts, low power driver
- Board only \$7.60 Part No. 111, with parts \$29.95 Part No. 111A

RS-232/TTL INTERFACE

- Converts TTL to RS-232, and converts RS-232 to TTL
- Two separate circuits
- Requires -12 and +12 volts
- All connections go to a 10 pin edge connector.
- kit \$9.95 Part No. 232A 10Pin edge connector \$3.00 part No. 10P.

VIDEO TERMINAL

16 lines, 64 columns

- Upper and lower case
- 5x7 dot matrix
- Serial RS-232 in and out with TTL parallel keyboard input
- On board baud rate generator 75, 110, 150, 300, 600, & 1200 jumper selectable
- Memory 1024 characters (7,21,102)
- Video processor chip SFF9364 by Neculonic
- Control characters (CR, LF, →, ←, ↑, ↓, non destructive cursor CS, home, CL)
- White characters on black background or vice-versa
- With the addition of a keyboard, video monitor or TV set with TV interface (part no. 107A) and power supply this is a complete stand alone terminal
- also S-100 compatible
- requires +16, & -16 VDC at 100mA, and 8VDC at 1A. Part No. 1000A \$296.45 kit.

MODEM

- Type 103
- Full or half duplex
- Works up to 300 baud
- Originate or Answer
- Serial TTL input and output
- connect 8 m. speaker and crystal mic. directly to board
- Requires +5 volts
- Board only \$7.60 Part No. 109, with parts \$29.95 Part No. 109A

S-100 BUS ACTIVE TERMINATOR

Board only \$18.15 Part No. 900, with parts \$29.89 Part No. 900A.

SERIAL I/O

Four Serial I/O RS-232 ports. S-100 Bus. Software or jumper selectable baud rate (110, 300, 600, 1200, 2400, 4800, 9600, 19.2K), on board Xtal baud rate generator. Addressing switch selectable. Parity or no parity odd or even switch selectable. 1 or 2 stop bits, 5 to 8 bits/character. Board only \$35.19 Part No. 7908. With parts (kit) \$199.95, Part No. 7908A.

RS-232/TTY INTERFACE

This board has two active circuits, one converts RS-232 to 20mA, the other converts 20mA to RS-232. Requires -12 and -12 volts. \$9.95 Part No. 600A Kit.

Send for FREE Catalog... a big self addressed envelope with 80¢ postage gets it fastest!

To Order:

Mention part no., description, and price. In USA shipping paid by us for orders accompanied by check or money order. We accept C.O.D. orders (U.S. only) or a VISA or Master Charge no., expiration date, signature and phone no., shipping charges will be added. CA residents add 6.5% for tax. Outside USA add 15% for air mail postage and handling. Payment must be in U.S. dollars. Dealer inquiries invited. Prices subject to change without notice.

Best of the Computer Faires

Conference Proceedings of the

West Coast Computer Faires

(1)

THE BEST OF THE COMPUTER FAIRES, VOLUME I
Conference Proceedings of the 1st West Coast Computer Fair

Section	Pages
Banquet Presentations	18
Tutorials for the Computer Novice	16
People & Computers	14
Human Aspects of System Design	9
Personal Computers for the Physically Disabled	7
Legal Aspects of Personal Computing	6
Heretical Proposals	11
Computer Art Systems	2
Music & Computers	46
Electronic Mail	5
Computer Networking for Everyone	14
Personal Computers for Education	38
Residential Energy & Computers	2
Computers & Systems for Very Small Business	4
Entrepreneurs	6
Speech Recognition & Speech Synthesis by Home Computers	14
Tutorials on Software Systems Design	11
Implementation of Software Systems & Modules	14
High Level Languages for Home Computers	15
Multi Tasking on Home Computers	9
Homebrew Hardware	8
Bus & Interface Standards	17
Microprogrammable Microprocessors for Hobbyists	18
Amateur Radio & Computers	11
Commercial Hardware	8

(2)

THE BEST OF THE COMPUTER FAIRES, VOLUME II
Conference Proceedings of the 2nd West Coast Computer Fair

Section	Pages
Banquet Presentations	8
An Introduction for the Absolute Novice	11
Computers for the Physically Disabled	13
Computers for the Visually Handicapped	29
Exotic Computer Games	8
Computers in the Arts	24
Legal Aspects of Home Computers	12
Computer Esoterica	15
Communication Networks & Personal Computers	21
Public-Access Computer Centers	26
Computers in Education	21
Business Computing on Small Machines	41
For Computer Businesspeople & Craftspeople	28
Microcomputer Applications	21
Speech Input & Output	39
Computers in Amateur Radio	4
Hardware & Software Standards	22
Brewing Home Hardware	19
Designing with Microprocessors	25
Commercial Hardware	7
High Level Languages & Translators	35
Block Structured High Level Languages for Microcomputers	40

(3)

THE BEST OF THE COMPUTER FAIRES, VOLUME III
Conference Proceedings of the 3rd West Coast Computer Fair

Section	Pages
Introduction for Novices	18
Visions of Near Future	9
Computer Music Systems	9
Intelligent Machines to Aid the Physically Impaired	4
Low-Cost Computers in Biomedical Environments & Health Delivery Systems	27
Computers for Education & Teaching	40
Computer Games & Puzzle Solving	9
Potential Legislation Affecting Computer Users & Owners	5
Low Cost Aid to Government	8
Legal Aspects of Computers & Software	18
Inexpensive Computing for Business	15
The Business of Inexpensive Computing	18
Business Systems Software	13
Floating Point Standards & Mathematical Micros	28
Microcomputing Software	21
Peripherals: Plain & Fancy	45
Communicating Computers	17
The Unclassifieds: A Potpourri	23
Post Partum Paper: Arrival After the Press Began to Roll	11

(4)

THE BEST OF THE COMPUTER FAIRES, VOLUME IV
Conference Proceedings of the 4th West Coast Computer Fair

Section	Pages
The Effect of Computers on Society	22
Designing Computers for Humans	12
Computer Communications for Human Communication: An Overview	15
Computer Communications for Human Communication: Digital Broadcasting	28
Computer Communications for Human Communication: Bidirectional	28
Microcomputers Energy Management & Environment	38
Low Cost Educational Computing	50
Personal Computing for Physicians & the Physically Impaired	14
Inexpensive Business Computing	33
Microcomputer Applications	29
Miscellaneous Computing	9
Systems Software: Pascal	9
Systems Software: Forth	23
Systems Software: Pilot	4
Potpourri: Plain & Fancy	52
Micro Peripherals	16
Amateur Radio & Microcomputing	15

BULK ORDERS

Computer Fair proceedings may be ordered in bulk quantities at a discount.

For complete details, write or phone Computer Fair, 333 Sweet Road, Woodside CA 94062, (415) 851-7075.

(5)

THE BEST OF THE COMPUTER FAIRES, VOLUME V
Conference Proceedings of the 5th West Coast Computer Fair

Section	Pages
Tutorials for the Novice	14
Artificial Intelligence & Micros	10
Computer Games & Computer Education	11
Low Cost Computing for Education	21
Teaching About Computers & Programming	16
Computer Assistance for the Physically Impaired	8
Medical Computing	11
Business & Low Cost Computing	26
Computer Music	8
Personal Communications & Microcomputers	26
Unusual Microcomputer Applications	5
Legal Aspects of Software Protection	10

Don't buy a computer. Buy a vendor.

See us at Booth
12270

Unpack a solution (not a pile of hardware).

We know the kind of service it takes to turn a computer into a solution. From system selection to financing, installation, software, training, maintenance, future enhancements, and capability or performance upgrades.

And the final cost and ultimate success of your system can vary tremendously, depending on how well your vendor supports you in these critical areas.

So when you want a computer, buy a vendor. Shop several. We don't just welcome comparison. We encourage it.

An Intelligent Alternative

TYPRINTER 221

In the research you are doing before purchasing your computer printer, you are probably confused by the various claims, speeds, choices, shapes and prices. Well, we'd like to clear the air a bit and tell you about the most unusual computer-printer around — the TYPRINTER 221.

You see, it's unusual because it is **totally compatible** with every computer and word processing program . . . from the largest to the smallest. It's versatile to the point of incredibility . . . We'll discuss the broad advantages and explain the details.

THE DAISY WHEEL

The special daisy wheel supplied is of a unique design consisting of a 100 character curving radii. Each radii is formed of two distinct types of plastic — an "elastic plastic" for the stalk of the radii, and a comparatively "hard plastic" used to form the character area. This, combined with a very narrow character profile and a special position on each of the 100 radii, guarantees a uniform character density. There is near perfect geometric positioning of the character with no character higher or lower than the others. And because of its unique dual material design, microvibrations have virtually been eliminated, leaving your final copy clean, clear and smudge free. The copy produced is comparable to that produced by metal daisy wheels and at a fraction of the cost.

THE KEYBOARD

The keyboard has been referred to as a triumph of human engineering - from the way the keys seem to have been custom designed to fit your fingers, to the way the special feature switches have been grouped. A flip of a switch (or under computer control of course) and the printer becomes a foreign language machine. Push a button, and like magic the printer automatically locates and lines up columns of figures, perfectly balanced between the margins. This incredibly fast, extraordinarily quiet electronic keyboard puts more programming power at your fingertips than printers costing five to ten times as much.

THE DISPLAY

The TYPRINTER 221 presents a new dimension in operator/machine communications. In the manual (typewriter) mode, the printer controls and verifies all entries before printing. The display exhibits the last 15 characters of the text, word-by-word, until the end of the line. The operator may control what will be printed before the actual printing takes place. This new found flexibility enables you to make modifications along the entire line and in both directions. This 20 character plasma display has the ability to scroll backwards as well as forwards; will give the operator a visual indication as to which print mode is currently being selected as well as the number of characters remaining before the right margin is reached. The display will also indicate to the operator:

The number of characters available in the memory
When the printer is in an error condition
When a pre programmed form lay out has been selected
When the printer is operating from the internal memory.

What characters will be inserted into an existing text.
When the memory for the previous line has been selected.
A warning message that the end of the page is being approached.
That a hyphenation decision must be made.

PRINT MODE

The TYPRINTER 221 will allow you to automatically highlight individual characters, words or complete sentences. Whatever is entered from the keyboard or from the computer, even an existing text file, can be printed in one or more of the five different modes:

- traditional printing;
- underlined characters;
- true bold characters where the horizontal component of the character is increased without disturbing the vertical component;
- characters which are both bold and underlined, and;
- a feature unique among computer printers - printing in reverse — white on black, sort of reverse video on paper.

MULTILINGUAL CAPABILITY

A unique and useful feature of the TYPRINTER 221 is its capability of being able to print in several languages without changing the daisy wheel. In addition to English, every standard daisy wheel has the ability and the necessary characters to print in French, Spanish, Italian and German.

THE FEATURES

Automatic justification of the right margin

The electronics of the TYPRINTER 221 have made right hand justification a simple, automatic operation.

Phrase and format storage

Phrases, dates, addresses, data, etc. that may be stored in your computer's memory may be sent over to the printer and stored in one of the "memory bins" of the printer. This information may then be used by the operator in the manual mode. This can save you hours when trying to get a form "just right."

Automatic centering

The TYPRINTER 221 will not only center any title between the pre-set margins, but will also center over one or more columns, or over any specific point and will even align copy with the right margin independent of the left margin.

Automatic vertical lines

A command from the computer enables an automatic feature which prints vertical lines at any point on the paper.

Automatic tab sequence recall

With the TYPRINTER 221 you may store and recall the most frequently needed margin and tab sequences for applications such as daily correspondence, statistical reports, etc. This guarantees consistent high quality appearance of each document.

Paragraph indent

A computer command instantly sets a temporary margin in order to print one or more indented paragraphs with respect to the right margin.

Automatic decimal point location

No matter how many figures to the left or right of the decimal point, the TYPRINTER 221 will automatically line up the figures with the decimal point in any position you choose. Statistical printing has never been easier.

Column layout

This feature allows you to obtain automatic and perfect distribution of spaces between columns in respect to the margins. A perfect page balance is assured without the need to carry out calculations or additional operations.

There is a wide variety of options that you can add to TYPRINTER 221.

By now you are probably convinced that we are sold on our machine, and we hope you can understand why. In fact, why don't you use these facts to measure against any and/or all the other computer printers on the market.

When you do, you will realize the TYPRINTER 221 is an intelligent electronic typewriter, a text formatter — and a brilliant computer printer — available at a suggested list price of only \$2850.

TYPRINTER 221 is available at your local computer shop — or we'll tell you where you can see and try one if you call us at
