VP Rogue

The VP Rogue Trac and Rogue Sheet: Best of the Best for Tactile Graphics

- Backward compatible with the VP Max print files, including Smarter Balanced
- The ViewPlus Rogue utilizes 12 impact devices to emboss Braille and High-Resolution Tactile Graphics with **variable** dot heights
- Produces fast single sided Tactile Graphics with **hand-catching** Tiger dots for improved readability of complex images – ideal for STEM
- Provides input for endless tractor (Rogue Trac) or cut stack (Rogue Sheet) fed paper of up to 12-inch width
- Provides easy connectivity and setup

The **ViewPlus Rogue** features the new **TigerPlus** technology combined with the original Tiger dot, which allows users to reuse existing content created for Tiger embossers or create new content with 100 DPI resolution along with 20 DPI dot spacing for the best of the best in tactile graphics quality. The **wider paper format** will help to adjust detailed tactile graphics to a low sensory resolution, helping the visually impaired to get a better grasp on the information.

The **Braille dot** produced by ViewPlus embossers can be **adjusted in height**, allowing users to adjust to the individual sensitivity of the reader's fingertip. This makes **extended Braille reading** more enjoyable, while maintaining **unsurpassed detail** in producing **tactile graphics**.

The unique feature to tactile graphics produced with **ViewPlus embossers** is the touchable **representation** of **colors** through **variable dot heights** or **tactile (texture) fill patterns** designed to match the embosser print resolution. What you see on the screen is what embossers will print, producing lower tactile dots for lighter colors and higher tactile dots for darker colors.

ViewPlus solutions include **Windows printer drivers** that will allow embossing directly from Windows programs, utilizing the **same process as printing to mainstream color printers**. Additionally, direct printing from Braille note takers is also supported.

Though VP embossers are compatible with other Braille translation software, like Duxbury, and RTFC, ViewPlus also offers the **VP Tiger Software Suite (VP TSS)** for Braille translation, tactile graphics design and more. TSS allows the user to create Braille documents in standard Windows programs such as MS Word and Excel without needing to know Braille.

The tactile graphics editor, **Tiger Designer**, which is part of the TSS package, allows editing of the print data visualized on screen in 1-to-1 correlation as it would appear on the embossed output.

Specifications:

Print Speed: Up to 120 CPS

Document Speed: Up to 400 Pages/Hour (A4)

Printing Mode: Single sided

Tactile Resolution: 100 DPI

Minimum Dot Spacing: 1/20 in

Tactile Graphic Dot Heights: Variable for color representation

Braille Dot Heights: Adjustable in 3 heights

Braille Dot Spacing: Adjustable to 5 international standards

Paper Width: 7 – 12 in (176 - 305 mm)

Paper: (Trac) Continuous (Sheet) Cut Sheet (50+ sheets)

Paper Weight: 33 - 120 lb (90 - 200 gsm)

Connection: USB (1.1, 2.0), Ethernet

Compatibility: Windows 7, 8, 8.1 and 10

Height: 6.2 in (158 mm)
Width: 21.9 in (557 mm)
Depth: 10.8 in (275 mm)
Weight: 19.8 lbs (9 kg)

Recommended Temperature: 59 - 95 °F (15 - 35 °C)

Storage Temperature: -4 - 158 °F (-20 - 70 °C)

Humidity: 20 - 80% RH (non-condensing)

Energy Supply: 85- 264 VAC 50/60 Hz (+/- 3%)

Standby: 20 W
Heavy Embossing: 200 W
