

Pro LED Video Light
(Rounded color manual 3200K-
color temperature and
5500K color temperature)

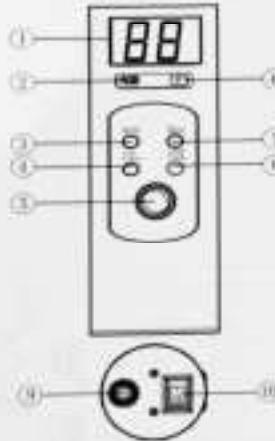

Before using this product, please read this user manual carefully and keep it properly for reference.

Characteristics

Thank you for using the YN360 II LED video light, which is a brand new video light design for photography. Equipped with built-in high capacity battery, it is not hard to connect the external battery which will increase the service time and more convenient and efficient. It adopts transparent cylinder design, which makes the lighting range wider and comfortable hand holding. Adopt full color RGB SMD lamps and LED lamp heads, making each full color LED light effect. The RGB SMD lamps color can be controlled by the mobile phone APP color mode, which makes the color types more rich. With the advantages of simple operation, practical use and color diversity.

I. Product Structure

1. LED digital display screen
2. RGB color light
3. RGB color switch button
4. Fine/Creative button
5. Brightness adjustment encoder
6. Charging indicator light (light on: charging; light off: full charged)
7. Battery capacity testing button (Batt) button
8. 3200K/5500K color temperature button
9. Power switch
10. power switch

II. Function Introduction

1. The video light with LED lamp heads and full color RGB SMD lamps perfectly integrated, which offers better creation colored.
2. Equipped with body is 3200mAh battery, combined with the quick charged duration, charge time and long use time. It is no need to install the external battery, which convenient for outdoor use.
3. The main light adopts 320 pieces of extra-large luminous chips, the high display index LED lamp heads makes the color vibrant truly and naturally.
4. YN360 adopts complex digital dimming system, including coarse tuning mode and fine tuning mode.
5. On the LED digital display screen of YN360, the parameters of the power output is optional.
6. Shooting for long time is possible because YN360 supports external DC power input (power adapter is optional).
7. Supports external DC power input will charge the built-in battery when in use, which will convenient for your long time photographic use.
8. Supports YONGNUO LED wireless control system, the products can mutual communicate and synchronous control.

III. Method of Application

1. External power supply

Use the YONGNUO power adapter to obtain long time use of the video light. When using the external power supply, it will charge the built-in battery until full charged, when not use the power adapter, it will automatically switch to charge the built-in battery. It takes 80 minutes to charge 80% of the battery. It can be continuous used 120 minutes under full electricity. The power supply interface is upside electrode and cathode, the input voltage is 12V and the current is 2A.

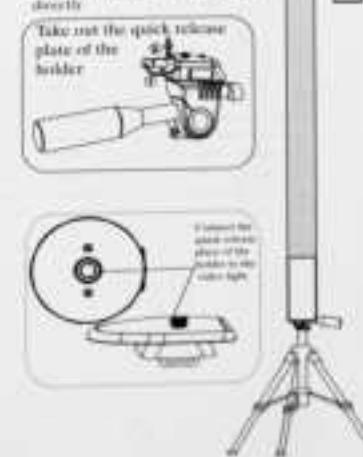

4. Brightening the screen through DC power box.

2. Fasten Video Light As Follows As Needed:

- a. Fasten the video light to the tripod directly
- b. Take out the quick release plate of the holder
- c. Connect the quick release plate of the video light

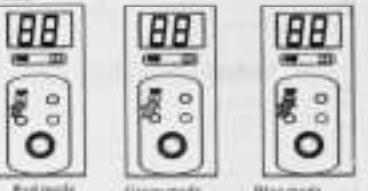

5. Start up & Shut down and Brightness adjustment:
a. Press the power switch, the LED camera light emitted, right-left rotate to increase the brightness, or left-right rotate to reduce the brightness.

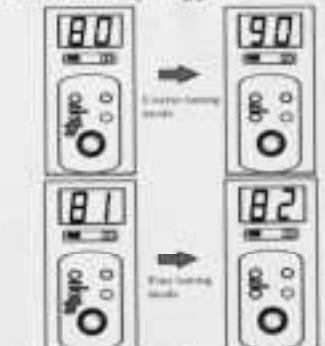

6. RGB color switch button

Press the button when the RGB light on, the luminance of red light can be adjusted when the green light on, the luminance of green light can be adjusted, and when the blue light on the luminance of blue light can be adjusted. It can acquire different color by changing the luminance ratio of the three colors. Note, the RGB color mode and the 3200K, 5500K color temperature mode can not be used at the same time.

7. Fine/Course button

Equipped with coarse and fine adjusting mode, which will be more convenient for use. Press the Coarse/Fine button to conduct to Fine/Course adjustment, when the indication light of Coarse bright, it will enter into coarse adjusting mode, the luminance will be adjusted with 10% as an adjusting grade. Then press the button to switch to fine adjusting, the luminance will be adjusted with 1% as an adjusting grade.

8. Battery capacity testing button (Batt) button

Press the electric quantity testing button for electric test, the LED display shows is the battery capacity. The readings can be divided into P1-P9 which indicates 0%-90% of the electric quantity. The reading in the picture shown indicates the electric quantity is 80%. (Note: the rest electric quantity of test when the brightness is low is different from that of the test when the brightness is high, the service life is tested under the current brightness).

9. 3200K, 5500K color temperature switch function:
It can get the color temperature between 3200K to 5500K by changing the luminance ratio of the two colors. Temperature. Note the RGB color mode and the 3200K, 5500K color temperature mode can not be used at the same time, the 3200K, 5500K color temperature model does not need to switch the color temperature.

Press the button to decrease the temperature of the 3200K color temperature.

Press the button to adjust the temperature of the 3200K color temperature.

Press the button to adjust the temperature of the 3200K color temperature.

The button respects adjustment the bright of the one color, especially the red color.

Higher temperature requires more power and the length of time available for use will be shortened, so the battery capacity should be limited.

Lower temperature requires less power and the length of time available for use will be extended, so the battery capacity should be limited.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.

Press the button to switch the 3200K color temperature.

Press the button to switch the 5500K color temperature.
