

It's now easier for patients to get started on the FreeStyle Libre 2 system if they have Medicare*^{1,2}

CMS has provided greater flexibility during the COVID-19 Public Health Emergency (PHE) to allow more diabetic patients to monitor their glucose and adjust insulin doses from home by using a therapeutic CGM*^{1,2}.

BELOW IS A LIST OF PARTICIPATING SUPPLIERS TO HELP GET YOUR PATIENTS STARTED ON THE FREESTYLE LIBRE 2 SYSTEM

Advanced Diabetes Supply	866-976-9110	J&B Medical Supply	800-737-0045
Better Living Now	800-854-7515	Mini Pharmacy	888-545-6464 Option 2
Bridgewater Health Supplies	800-974-2055	Quest Health Solutions	877-888-7050
Byram Healthcare	800-775-4372 Ext. 39027	Solara Medical Supplies/ AdaptHealth	844-381-8032
CCS Medical	800-599-7521	Total Medical Supply	877-670-1120
Diabetes Management & Supplies/AdaptHealth	888-738-7929	United States Medical Supply	877-270-6508
Edgepark Medical Supplies	844-619-4650	US HealthLink	855-421-2732
Edwards Health Care Services	800-951-1725		

Last Updated 03/2021.

Providers listed above include all DME suppliers who have contracted with ADC to acquire FreeStyle Libre family of products directly as of the "Last Updated" date who have represented to ADC they intend to recognize the flexibility provided by CMS.

For a complete listing of DME suppliers contracted directly with ADC go to <https://www.freestylelibre.us/dme-suppliers.pdf>.

FreeStyle Libre family of products may be available through other suppliers not listed who acquire these products indirectly.

This listing of participating suppliers are in alphabetical order and ADC has no preference on the supplier selected from the list. All DME suppliers who have contracted with ADC to acquire FreeStyle Libre family of products directly were eligible to be listed if they indicated they will supply CGM according to the CMS PHE guidelines*^{1,2}.

FLASH GLUCOSE MONITORING SYSTEM

life. to the fullest.®
Abbott

[†]Fingersticks are required if your glucose alarms and readings do not match symptoms or when you see Check Blood Glucose symbol during the first 12 hours.

Indications and Important Safety Information

The FreeStyle Libre 2 Flash Glucose Monitoring System is a continuous glucose monitoring (CGM) device with real time alarms capability indicated for the management of diabetes in persons age 4 and older.**

WARNINGS/LIMITATIONS:** The System must not be used with automated insulin dosing (AID) systems, including closed loop and insulin suspend systems. Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment. Do not take high doses of vitamin C (more than 500 mg per day), as this may falsely raise your Sensor readings. Failure to use the System according to the instructions for use may result in missing a severe low blood glucose or high blood glucose event and/or making a treatment decision that may result in injury. If glucose alarms and readings from the System do not match symptoms or expectations, use a fingerstick blood glucose value to make diabetes treatment decisions. Seek medical attention when appropriate and contact Abbott toll-free 855-632-8658 or visit ** www.FreeStyleLibre.us for detailed indications for use and safety information.

**Please refer to www.FreeStyleLibre.us for the indications and important safety information.
