General remark: when there is a stroke in column 3 (reference of the superseded standard), it means that the referenced standard may not be used without amendment or particular part for EMC purpose.

Note 1: Generally the date of cessation of presumption of conformity will be the date of withdrawal ('dow'), set by the European Standardisation Organisation, but attention of users of these standards is drawn to the fact that in certain exceptional cases this can be otherwise.

Note 2.1: The new (or amended) standard has the same scope as the superseded standard. On the date stated, the superseded standard ceases to give presumption of conformity with the essential requirements of the Directive.

Note 2.2: The new standard has a broader scope than the superseded standard. On the date stated the superseded standard ceases to give presumption of conformity with the essential requirements of the Directive.

Note 2.3: The new standard has a narrower scope than the superseded standard. On the date stated the (partially) superseded standard ceases to give presumption of conformity with the essential requirements of the Directive for those products that fall within the scope of the new standard. Presumption of conformity with the essential requirements of the Directive for products that still fall within the scope of the (partially) superseded standard, but that do not fall within the scope of the new standard, is unaffected.

Note 3: In case of amendments, the referenced standard is EN CCCC:YYYY, its previous amendments, if any, and the new, quoted amendment. The superseded standard (column 3) therefore consists of EN CCCC:YYYY and its previous amendments, if any, but without the new quoted amendment. On the date stated, the superseded standard ceases to give presumption of conformity with the essential requirements of the Directive.

Example: For EN 55011:2007, the following applies:

Cenelec	EN 55011:2007 Industrial, scientific and medical (ISM) radio-frequency equipment — Electromagnetic disturbance characteristics — Limits and methods of measurement (CISPR 11:2003 (modified) + A1:2004 (modified)) [The referenced standard is EN 55011:2007]	EN 55011:1998 and its amendments [The superseded standard is EN 55011:1998 + A1:1999 + A2: 2002 to EN 55011:1998]	1.11.2009
	Amendment A2:2007 to EN 55011:2007 (CISPR 11:2003/A2:2006) [The referenced standard is EN 55011:2007 + A2:2007 to EN 55011:2007]	Note 3 [The superseded standard is EN 55011:2007]	1.11.2009

Note 6: EN 60947-1:1999 does not give presumption of conformity without another part of the standard. EN 60947-1:2004 does not give presumption of conformity without another part of the standard.

Note 8: EN 55012 is applicable for giving presumption of conformity under Directive 2004/108/EC for those vehicles, boats and internal combustion engine-driven devices that are not within the scope of Directives 95/54/EC, 97/24/EC, 2000/2/EC or 2004/104/EC.

Note 9: EN 62052-11:2003 does not give presumption of conformity without a part of the EN 62053 series.

Note 11: EN 62052-21:2004 does not give presumption of conformity without a part of the EN 62054 series.

Note 13: EN 62026-1:2007 does not give presumption of conformity without another part of the standard.
